Foreword

The year 2013 has been exceptional - in two extreme ways.

On one hand, we witnessed important progress in the technological developments for the accelerator and detector components for FAIR, the Facility for Antiproton and Ion Research, the future project of GSI and the international science community in the fields of hadron and nuclear sciences as well as for many applications in atomic and biophysics and material research. Several Technical Design reports have been concluded in 2013 (i.e. CBM Silicon Tracking Stations). From the Manne-Siegbahn-Laboratory in Stockholm the CRYRING storage ring has been delivered to the future FAIR accelerator facility. This storage ring will be assembled first at the existing GSI facility to conduct experiments and machine tests. Elaborate alterations of GSI’s large ring accelerator SIS18 have been concluded end of 2013 after one year of work which included in particular the installation of a new accelerator cavity.

On the other hand, the necessary focussing of GSI on the FAIR project came with a price: no beam time at GSI and financial support in the research department at the bare minimum. Despite these less than optimal conditions, my colleagues in the research department have reached many scientific firsts, based on experiments performed in earlier years or outside of GSI and very often supported by collaborations with the Helmholtz Institutes in Jena and Mainz or within the HIC4FAIR excellence initiative and the Helmholtz Alliance ‘Cosmic Matter in the Laboratory’. This report summarizes the achieved scientific highlights and the path taken by the research department towards FAIR.

I am grateful to my colleagues for not having lost the motivation accepting the severe cuts in the ongoing research activities and maintaining their drive for our joint goal in 2020: to open up an unprecedented science program at the international FAIR facility in Darmstadt.

Karlheinz Langanke

Foreword ........................................ iii
Contents ........................................ v

Division CBM / NQM (Nuclear and Quark Gluon Matter)

Department HADES ................................ 1
NQM-HADES-01 – Investigations on two-particle correlations in \( p + ^{93} N b \) collisions at \( E_{\text{kin}} = 3.5 \) GeV ........................................ 1
NQM-HADES-02 – Kaon in-medium potential probed in proton-nucleus reactions ........................................ 2
NQM-HADES-03 – Search for a “\( ppK^- \)” bound state in \( p+p \) collisions ........................................ 3
NQM-HADES-04 – A new upper limit on the rare decay \( \eta \to e^+e^- \) ........................................ 4
NQM-HADES-05 – Searching a Dark Photon with HADES ........................................ 5
NQM-HADES-06 – Hunting for \( K^+ \) in pp and pNb reactions ........................................ 6
NQM-HADES-07 – Electron identification in Au+Au collisions at 1.23 GeV/u in HADES using multivariate analysis ........................................ 7
NQM-HADES-08 – \( \pi^0 \) reconstruction via conversion method in Au+Au at 1.23AGeV with HADES ........................................ 8
NQM-HADES-09 – The HADES alignment strategy ........................................ 9
NQM-HADES-10 – Integration of the Pion-Beam Tracker into the HADES DAQ ........................................ 10
NQM-HADES-11 – Diamond detector preparation for high intensity beam monitoring and high precision T0 determination ........................................ 11
NQM-HADES-12 – Test of the HADES Electromagnetic Calorimeter modules on photon beam ........................................ 12
NQM-HADES-13 – A Precise Multi-Channel QDC FEE utilizing FPGAs as Discriminators and Delay Elements Based on the TRB3 as TDC and Readout Platform ........................................ 13

Department CBM ........................................ 15
NQM-CBM-01 – Status of the Compressed Baryonic Matter (CBM) experiment at FAIR ........................................ 15
NQM-CBM-02 – Quench calculation for the CBM Dipole magnet ........................................ 17
NQM-CBM-03 – Quench detection and protection system for the CBM dipole magnet ........................................ 18
NQM-CBM-04 – Quality assessment of ultra-thin CMOS sensors for the Micro Vertex Detector of the CBM experiment at FAIR ........................................ 19
NQM-CBM-05 – The next generation of CBM MVD read-out electronics ........................................ 20
NQM-CBM-06 – The layout of the CBM Silicon Tracking System ........................................ 21
NQM-CBM-07 – Silicon strip sensor layout for the CBM Silicon Tracking System ........................................ 22
NQM-CBM-08 – Performance of neutron irradiated prototype sensors for the CBM Silicon Tracking System ........................................ 23
NQM-CBM-09 – Measurement of coupling and interstrip capacitances in silicon microstrip sensors for the CBM experiment at FAIR ........................................ 24
NQM-CBM-10 – In-beam test of prototype modules for the CBM Silicon Tracking System ........................................ 25
NQM-CBM-11 – Full-size prototype microstrip sensors for the CBM Silicon Tracking System ........................................ 26
NQM-CBM-12 – First mock-up of the CBM STS module based on a new assembly concept ........................................ 27
NQM-CBM-13 – Low and high voltage power supply for STS detector electronics ........................................ 28
NQM-CBM-14 – Calibration of a laser scanning system for quality assurance of CBM prototype silicon microstrip sensors ........................................ 29
NQM-CBM-15 – Automated quality assurance of sensors for the CBM Silicon Tracking System ........................................ 30
NQM-CBM-16 – Application of the CBM Silicon Tracking System CAD model for integration studies ........................................ 31
NQM-CBM-17 – An improved detector response simulation for the Silicon Tracking System ........................................ 33
NQM-CBM-18 – A front-end electronics board to test the assembly procedure of modules for the CBM Silicon Tracking System ................................................................. 34
NQM-CBM-19 – A mechanical model of an STS station for the study of cable routing ........ 35
NQM-CBM-20 – A setup for adjustment of process parameters for CBM module production . 36
NQM-CBM-21 – Development of a CO₂ cooling prototype for the CBM Silicon Tracking System 37
NQM-CBM-22 – Cherenkov photon detection with WLS coated MAPMTs .......................... 38
NQM-CBM-23 – Ronchi test for measurements for the mirror surface of the CBM-RICH detector ............................................................. 39
NQM-CBM-24 – Characterization of the GET4 v1.0 TDC ASIC with detector signals .......... 40
NQM-CBM-25 – Event based unpacker and digitizer for the CBM TOF in CBMROOT .......... 41
NQM-CBM-26 – High counting rate test of the basic structure for the inner zone of the CBM RPC-TOF .............................................................................................. 42
NQM-CBM-27 – 100 Ohm transmission line multi-strip multi-gap high counting rate RPC prototype 43
NQM-CBM-28 – RPC prototype test with cosmic irradiation .............................................. 44
NQM-CBM-29 – CBM TRD radiator simulation in CbmRoot .............................................. 45
NQM-CBM-30 – Construction and first performance studies of a CBM TRD prototype with alternating wires developed in Frankfurt ......................................................... 46
NQM-CBM-31 – Development of an online feature extraction pre-processing stage for TRD based on SPADIC 1.0 .................................................................................. 47
NQM-CBM-32 – e/π Discrimination and position resolution of a real size CBM-TRD prototype .......................................................... 48
NQM-CBM-33 – Design of new SPADIC front-end boards for TRD readout .................... 49
NQM-CBM-34 – Commissioning of the SPADIC 1.0 Amplifier / Digitizer Chip ................. 50
NQM-CBM-35 – Testing of 31cm x 31cm GEM Chamber at COSY .................................. 51
NQM-CBM-36 – CBM First-level Event Selector Data Management Developments .......... 52
NQM-CBM-37 – Status of the CBMnet based FEE DAQ readout ................................ 53
NQM-CBM-38 – A Monte Carlo feasibility study of the CBM event reconstruction at high interaction rates based on time information ........................................ 54
NQM-CBM-39 – Employing the CBM Micro Vertex Detector for Background Rejection in Dilepton Analyses ................................................................. 55
NQM-CBM-40 – Production of hyperons at FAIR energies .............................................. 56
NQM-CBM-41 – Reaction plane reconstruction in the CBM experiment ......................... 57
NQM-CBM-42 – The di-muon measurements with CBM at SIS100 .................................. 58

Department FOPI ............................................................................................................. 59
NQM-FOPI-01 – Constraining the nuclear matter equation of state around twice saturation density 59
NQM-FOPI-02 – Differences in population of the phase space for Kᵐ⁻mesons produced in π⁻ induced reactions with heavy and light targets ........................................... 60
NQM-FOPI-03 – Status of the pKΛ Analysis in pp Collisions with the FOPI Spectrometer 61
NQM-FOPI-04 – Cluster Error of the FOPI TPC ......................................................... 62
NQM-FOPI-05 – Discharge probability studies with GEM detectors ............................. 63
NQM-FOPI-06 – Ion backflow studies with a triple GEM detector ................................. 64

Department ALICE ........................................................................................................ 65
NQM-ALICE-01 – Performance of the ALICE Experiment during the LHC Run 1 ........... 65
NQM-ALICE-02 – Multiplicity dependence of the average transverse momentum in pp, p-Pb, and Pb-Pb collisions at the LHC ..................................................... 66
NQM-ALICE-03 – Nuclear Modification Factor and Centrality Determination in p-Pb Collisions at ALICE ................................................................. 67
NQM-ALICE-04 – Measurement of charged jets in p-Pb collisions with ALICE ............... 68
NQM-ALICE-05 – Measurement of electrons from charm and beauty-hadron decays in p-Pb collisions at √s_{NN} = 5.02,TeV with ALICE at the LHC ................................. 69
NQM-ALICE-06 – J/ψ production in p-Pb collisions measured with ALICE at the LHC .... 70
NQM-ALICE-07 – J/ψ production in Pb-Pb collisions measured with ALICE ................. 71
NQM-ALICE-08 – Azimuthal correlation measurements with ALICE at the LHC ............ 72
NQM-ALICE-09 – Deuteron production in Pb-Pb collisions measured with ALICE at the LHC 73
NQM-ALICE-10 – Validation of Bayesian PID in ALICE, for the channel D⁰ → K⁻π⁺ in pp at √s = 7 TeV ...................................................................................... 74
NQM-ALICE-11 – Study of Higher Order Net-Particle Fluctuations at LHC Energies ....... 75
Division PANDA / HSD (Hadron Structure and Dynamics) 77

Departments Hadron Physics I and Hadron Physics II 77

HSD-01 – Collaboration report PANDA progress in 2013 77
HSD-02 – Invariant mass reconstruction of $^{3}_1H$ and $^{4}_1H$ 78
HSD-03 – Breakthrough in the Lifetime of Microchannel Plate PMTs 79
HSD-04 – In-Beam Tests of Double-Sided Silicon Microstrip Sensors Employing Flex-PCB Readout for the PANDA MVD 80
HSD-05 – Quality assurance for large-scale GEM-foils 81
HSD-06 – The PANDA GEM-Tracker Prototype ‘GEM2D’, Simulations and Pad-Plane design 82
HSD-07 – Time-based reconstruction in the GEM Tracker 83
HSD-08 – Comparison of Radiation Damage Effects in PWO Under Proton Irradiation at 150 MeV and 24 GeV Energy 84
HSD-09 – Quality of PbWO$_4$ Crystals Manufactured at SICCAS 86
HSD-10 – Dark count measurements of SiPM detectors 88
HSD-11 – Further Development of Lattice-FPGA based TDC and Its Implementation on different Platforms 89
HSD-12 – Study of PANDA Barrel DIRC design options 90
HSD-13 – Study of a PANDA Barrel DIRC design based on radiator plates 91
HSD-14 – Study of the timing resolution of a PANDA Barrel DIRC prototype 93

Division NuSTAR / ENNA (Nuclear Structure, Astrophysics and Reactions) 95

Department FRS / FRS 95

NUSTAR-FRS-01 – Collaboration report NUSTAR progress in 2013 95
NUSTAR-FRS-02 – Progress on the Super-FRS Experimental Program 98
NUSTAR-FRS-03 – Spectroscopy of $\eta$-mesic nuclei at FRS and Super-FRS 100
NUSTAR-FRS-04 – Experimental Setup for hypernuclear study at the Super-FRS 101
NUSTAR-FRS-05 – Measurement of $\beta$-delayed neutrons around the third $\tau$-process peak 102
NUSTAR-FRS-06 – A Cherenkov detector as a possible TOF detector for the Super-FRS 103
NUSTAR-FRS-07 – Performance of the Prototype Cryogenic Stopping Cell for the Low-Energy Branch of the Super-FRS 104
NUSTAR-FRS-08 – Recent Technical Improvements for the Multiple-Reflection A Laser Ablation Carbon Cluster Ion Source and an RFQ-based Switchyard for the FRS Ion Cather 105
NUSTAR-FRS-09 – Conceptual Design of A Next-Generation Cryogenic Stopping Cell for the Low-Energy Branch of the Super-FRS 106
NUSTAR-FRS-10 – Recent Technical Improvements for the Multiple-Reflection Time-of-Flight Mass Spectrometer at the FRS Ion Catcher 107
NUSTAR-FRS-12 – Efficiency calibration of the neutron detector BELEN-48 with (p,n) and ($\alpha$,n) reactions at the PTB Braunschweig 109
NUSTAR-FRS-13 – Tests of scintillation Fibers for the compact neutron Detector NeuRad 110
NUSTAR-FRS-14 – Atomic Mass compilations 111

Department Gamma Spectroscopy 113

NUSTAR-GS-01 – Status of PreSPEC Commissionning Data Analysis 113
NUSTAR-GS-02 – Automatic Self-consistent Gain-Matching of DSSSD Detector Channels 115
NUSTAR-GS-03 – Development and test of a segmented Time-of-Flight plastic detector 117
NUSTAR-GS-04 – In-beam $\gamma$-ray spectroscopy with AGATA@PreSPEC: Development of new experimental tools for HISPEC@FAIR 119
NUSTAR-GS-05 – Simulations for DEGAS detectors at FAIR 121
NUSTAR-GS-06 – Simulations for position-sensitive tracking of $\gamma$ rays in scintillators Approach for source reconstruction 123

Departements SHE Physics and SHE Chemistry 125

NUSTAR-SHE-01 – Study of the $^{48}$Ca+$^{249}$Bk fusion reaction leading to element $Z = 117$: long-lived $\alpha$-decaying $^{270}$Db and discovery of $^{266}$Lr 125
NUSTAR-SHE-02 – Element 115 studied with TASSiSpec 126
NUSTAR-SHE-03 – Neutron Shell Strengths at $N = 152$ and towards $N = 162$ 127
NUSTAR-SHE-04 – Decay of $^{201-203}$Ra 128
NUSTAR-SHE-05 – Decay of $^{200,201}_{1}Fr$ .................................................. 129
NUSTAR-SHE-06 – Compound nucleus spin distribution for $^{64}_{28}Ni + ^{100}_{48}Mo$ ................................. 130
NUSTAR-SHE-07 – Diamond dE-E-ToF-telescope for heavy ion reactions at the Coulomb barrier 131
NUSTAR-SHE-08 – Electronic Structure, Properties and Volatility of Chlorides and Oxychlorides of Group-4 Elements Zr, Hf, and Element 104, Rf .................................................. 132
NUSTAR-SHE-09 – Relativistic coupled cluster study of the MAu and M$_2$ dimers of Hg, Cn, and Fl 133

Department Nuclear Reaktions .................................................. 135
NUSTAR-KR-01 – Measurement of the Dipole Polarizability of $^{68}_{30}Ni$ .................................................. 135
NUSTAR-KR-02 – Observation of Unbound States in $^{16}_{8}Ne/^{15}_{7}Ne$ via 1n- / 2n-Knockout on $^{17}_{7}Ne$ ... 136
NUSTAR-KR-03 – Study of the $^{14}_{6}Be$ Continuum ................................................................. 137
NUSTAR-KR-04 – Coulomb Dissociation of $^{37}_{17}Ne$ ................................................................. 138
NUSTAR-KR-05 – Coulomb Dissociation of $^{27}_{13}P$ ................................................................. 139
NUSTAR-KR-06 – Fewbody theoretical studies of Quasi Free Scattering reactions 140
NUSTAR-KR-07 – Total Fission Cross Sections for Proton-Induced Fission of $^{208}_{82}Pb$ ........................................... 142
NUSTAR-KR-08 – Identification and Reconstruction of Fission Fragments for Proton-Induced Fission of $^{208}_{82}Pb$ at 500 MeV in Inverse Kinematics .................................................. 143
NUSTAR-KR-09 – Progress report of the CALIFA/R$^{3}B$ calorimeter .................................................. 144
NUSTAR-KR-10 – Heavy-ion tracking detectors for the R$^{3}B$ setup .................................................. 147
NUSTAR-KR-11 – Tests of timing silicon photomultipliers for NeuLAND .................................................. 150
NUSTAR-KR-12 – Application of Calorimetric Low Temperature Detectors (CLTD’s) for Precise Stopping Power Measurements of Heavy Ions in Matter .................................................. 151
NUSTAR-KR-13 – Efficiency calibration of the neutron detector BELEN-48 with (p,n) and (a,n) reactions at the PTB Braunschweig .................................................. 152
NUSTAR-KR-14 – SOFIARoot: Simulation of the SOFIA/ANDES Setup .................................................. 153
NUSTAR-KR-15 – GGLAND - command line simulations .................................................. 154

Division APPA / PNI (Atomic, Plasma Physics and Applications) 155

Department Atomic Physics .................................................. 155
PNI-AP-01 – FOCAL - precision x-ray spectroscopy for extreme fields in high-z ions .................................................. 155
PNI-AP-02 – Forward-angle electron spectroscopy in ion-atom collisions studied at the ESR .................................................. 157
PNI-AP-03 – The Effect of the Breit-Interaction Studied for the Emission Characteristics of $1s^{2}s^{2}p_{1/2}$ Decay in Be-like Uranium .................................................. 158
PNI-AP-04 – Innovative Concepts for Collision Studies at GSI’s and FAIR’s Storage Rings .................................................. 160
PNI-AP-05 – High-resolution measurement of the time-modulated orbital electron-capture and of the $^2\beta^+$ decay of hydrogen-like $^{142}_{56}Pm$ ions .................................................. 161
PNI-AP-06 – Further insight into Bayesian and Akaike information criteria of the EC-decay rate oscillations .................................................. 163
PNI-AP-07 – Increased lifetime of hydrogen-like $^{192}_{76}Os$ observed in the ESR .................................................. 164
PNI-AP-08 – Odd-Even Staggering in Fragment Yields from $^{78}_{36}Kr + Be$ Reactions .................................................. 165

Current Uranium Ion Beams at New GSI Heavy-Ion Linac ........................................... 305
FG-UNILAC-10 – The Status of the High-Energy Linac Project at GSI ............................... 306
FG-UNILAC-12 – REMBRANDT - The REMote Beam instRumentation And Network Diagnosis
Tool .................................................................................................................................. 308
FG-UNILAC-13 – Retrofitting of a non-invasive Bunch Shape Monitor for GSI LINACs .... 309
FG-UNILAC-14 – Direct measurement of mechanical vibrations of the 4-rod RFQ at the HLI 310
FG-UNILAC-15 – Calculation of the quadrupole moment $\alpha^2_z - \alpha^2_y$ for an asymmetrical Pick-up
FG-UNILAC-16 – Progress of the 325 MHz sc CH Cavity

Machine SIS18
FG-SIS18-01 – Controlled beam loss experiment at SIS18
FG-SIS18-02 – Beam Phase Feedback for Dual-Harmonic Operation of RF Cavity Systems
FG-SIS18-03 – Measurement of the magnetic properties of the Ferroxcube 8C12m material
FG-SIS18-04 – Status and Results of the TPS for SIS18/SIS100
FG-SIS18-05 – Observation and simulation of transverse BTFs of high energy bunched beams

Machine P-LINAC
FG-P-LINAC-01 – Ion source and 4-grid analyzer for the proton injector for FAIR
FG-P-LINAC-02 – Mechanical Design for the p-LINAC BPMs Inter-tank Section

Machine HEBT
FG-HEBT-01 – FAIR HEBT System - Status Report
FG-HEBT-02 – Interdisciplinary development of a support structure for components in building
H0705A - A challenge for systematic requirements engineering

Machine SIS100
FG-SIS100-01 – Status of the Superconducting Magnets for FAIR
FG-SIS100-02 – Cryogenics for SIS100 Accelerator
FG-SIS100-03 – Cryogenic Tests of Ceramic Feedthroughs for SIS100 BPM
FG-SIS100-04 – Design of a Mutual Inductance Based Quench Detector for the Corrector Magnets of the SIS100
FG-SIS100-05 – Estimation of beam induced heat load in SIS100 kicker magnets
FG-SIS100-06 – Halo collimation of fully-stripped light and heavy ions in the SIS100
FG-SIS100-07 – Measurement of the behaviour of residual gas particles on cryogenic surfaces to improve the simulation of dynamic vacuum effects
FG-SIS100-08 – FPGA Based Tunable Digital Filtering for Closed Loop RF Control in Synchrotrons

Machine Super-FRS
FG-S-FRS-01 – Development of a tool for CBM STS module assembly
FG-S-FRS-02 – Setup for adjustment of process parameters for CBM module production
FG-S-FRS-03 – Silicon strip sensor layout for CBM STS
FG-S-FRS-04 – A new Time-of-flight wall for $R^3B$
FG-S-FRS-05 – High precision multi-hit time-of-flight measurements at $R^3B$
FG-S-FRS-06 – New time-of-flight system for the $R^3B$ set-up
FG-S-FRS-07 – Development of Heteroepitaxial DoI Plates for Diamond Detectors
FG-S-FRS-08 – Laser Lithography for Production of Diamond Detectors
FG-S-FRS-09 – Optimizing the manufacturing method of detector parts
FG-S-FRS-10 – Characterizing the SOFIA/ANDES TwinMUSIC
FG-S-FRS-11 – NeuLAND - from prototypes to double-planes
FG-S-FRS-12 – Simulations of the GEM-TPC response
FG-S-FRS-13 – Threshold calibration of the n-XYTER readout ASIC
FG-S-FRS-14 – Time and trigger distribution for NUSTAR DAQ systems
FG-S-FRS-15 – TRLO II - friendly FPGA trigger control

Machine P-BAR
FG-P-BAR-01 – A 400 kA Pulsed Power Supply for Magnetic Horn at the pbar Separator

Machine ESR
FG-ESR-01 – Ion Optics of the High Energy Storage Ring for Operation With Heavy Ions

Machine CR
FG-CR-01 – Progress report on the Collector Ring (CR)
FG-CR-02 – Developments for the CR Stochastic Cooling System
FG-CR-03 – Software development for stochastic cooling study in the time domain
FG-CR-04 – Progress in development of resonant Schottky pickups with transverse sensitivity for the CR
FG-CR-05 – The status of the CRYRING@ESR project

Machine CRYRING
FG-CRYRING-01 – Beam Instrumentation for CRYRING@ESR

Machine CW-LINAC

Common Systems CS
FG-CW-LINAC-01 – Status of the sc cw-linac demonstrator installation 369
FG-CS-01 – Accelerator Shutdown Report 371
FG-CS-02 – Development of a FPGA based PCI-express to optical link interface card, KINPEX 372
FG-CS-03 – Features of the new MBS Production Version 6.2 373
FG-CS-04 – FPGA Hit Finder and Energy Filter for the FEBEX Pipelining ADC 374
FG-CS-05 – Status of the software development for the FAIR accelerator control system 375
FG-CS-06 – Project status of the new setting generation system for GSI and FAIR 376
FG-CS-07 – SCU system goes productive 377
FG-CS-08 – Paving the Way for the FAIR General Machine Timing System 378
FG-CS-09 – White Rabbit Applications for FAIR Experiments 380
FG-CS-10 – The credit-card sized, general purpose controls platform: HadCon2 381
FG-CS-11 – The GSI Event Driven TDC ASIC GET4 V1.23 382
FG-CS-12 – Web interface in DABC 383
FG-CS-13 – POLAND - Low Current Profile Measurement Readout System 385
FG-CS-14 – Status of the Coating Activities at the Magnetron Sputtering Facility 386
FG-CS-15 – Status of the SuperFRS Cryogenics 387

Annex

ANNEX-01 – JCR publications to the programme physics of hadrons and nuclei published in 2013 389
ANNEX-02 – Further publications to the programme physics of hadrons and nuclei published in 2013 413
ANNEX-03 – JCR publications to the programme large-scale facilities for research with photons, neutrons and ions published in 2013 415
ANNEX-04 – Further publications to the programme large-scale facilities for research with photons, neutrons and ions published in 2013 427
ANNEX-05 – JCR publications to the programme health published in 2013 431
ANNEX-06 – Further publications to the programme health published in 2013 435
ANNEX-07 – Doctoral theses 2013 supported by GSI 436
ANNEX-08 – Organigram 438
