## New Parking Plan: It Sells

by Bob C. Hall

Brushing aside a flurry of petitions and boycott posters, BSU students, faculty and administrators snapped up a major share of the controversial \$30 reserved parking places that assure close-in parking for one year.

Sale started August 1 with the announcement that 590 designated slots, close to key campus academic buildings would be sold for single "ownership" for the school year on a first-come, first-served basis.

Big bonus from it all goes to BSU's lagging student scholarship fund. With all slots sold, as present trends indicate they will be, some \$17,700 will go to support "outstanding academic students".

Though publicity and news stories on the program stressed that all remaining campus parking areas would be made available under the usual \$2 decal plan, a pattern of protest popped up.

Though rumors persisted of a coming student protest, nothing substantial showed up in meetings, posters or public statements.

To the charge that the program was not giving a fair chance at the slots to students and faculty not in this area during August, News Bureau officers Kim Hale and Larry Burke said wide news coverage was given the plan as early as July.

Visibly irritated by the "unfair" charges, President John Barnes kept insisting his was "the only fair way" to solve a parking tangle that has plagued this urban university during recent years.

To soften the sting for those too late to buy, or too broke, Barnes had the university parking committee set aside what he called "reasonable" alternative parking.

All slots in the 600-plus stadium lot remain free, with no decal required, to first arrivals.

Several other areas closer to key buildings, notably the campus street edges and Towers parking lot, will remain restricted to decal holders, with that price held at last year's \$2 level.

Handicapped faculty, administrators and students get the only parking "break". They can tie down premium parking in the \$30 zones for a \$2 annual fee, if they show a doctors' statement of their condition when they buy.

**SWARMING TO SIGN UP** for fall classes, BSU students jammed the registration center at the university gymnasium just before Labor Day weekend. Official registration figures will be added up, released to state board meeting at an early October meeting. Until then, only the jammed classrooms and housing tell the story.

### Dayan Coming September 24

General Moshe Dayan, Israel's legendary man of action and one of the most drama-tinged major world figures in world affairs will appear at BSU for a lecture September 24.

General Dayan will deliver his lecture, then field questions from the audience, beginning at 8 p.m. in the student union ballroom

BSU students will be admitted free. The lecture charge to the public will be \$2 on general admission basis.

'Thanks to Deans' Work'

### BSU 4 Degrees Better

by Bob C. Hall

President John Barnes credited strong documentation by his faculty for action by the State Board this summer that opens four major new study programs at the school, if legislative funding follows State Board recommendations.

After a special session to examine faculty requests for new and expanded programs, the Board gave its OK for BSU to request funds for a baccalaureate degree program in Construction Management.

The new baccalaureate degree program "Construction Management" would operate in the School of Arts and Sciences to broaden opportunities for students in the physical sciences area.

BSU also got approval for a new master's degree program, joining those recently installed in the Schools of Education and Business. This one, under the School of Arts and Sciences, will bring BSU into a consortium with U. Idaho and ISU to offer a Master's Degree in Public Administration.

Arts and Sciences Dean Joe Spulnik could now point to these programs, plus an already-approved bachelor of science program in physics, as major hikes in school quality he has long sought if legislative funding is achieved.

The new degrees, plus outlook for all-new classroom and lab facilities with completion of the \$4.5 million science building next year, was seen as a vital "shot in the arm" for one of the University's key accreditation soft spots.

Spulnik made a well-documented case

that his sciences area had been too long operating in outmoded rooms with inadequate equipment. The Board authorized a \$541-thousand special sum to purchase science equipment for those departments.

**Other Get A Boost**

Other University schools had their special needs met by the Board at the same July session. Approval was given the School of Health Sciences to begin a program of Radiologic Technology studies that will allow students either a three-year Associate of Arts or four-year Bachelor of Science degree with a Rad-Tech emphasis.

BSU's new Masters of Public Administration degree program joins three other graduate fields here, this fall.

The new "MPA" is a combination of resources at all three state universities, who will all cross-credit students in it.

Three other masters degrees offered to BSU graduate students are:

Master of Business Administration  
Master of Arts in Elementary Education  
Master of Arts or Sciences in Secondary Education.

The Masters in Elementary Education offers three curricula: (1) Education; (2) Reading Education; (3) Education-Core Enriched.

Eight broad areas are offered under the Master in Secondary Education. They include: Art, Business Education, Chemistry, Earth Science, English, Mathematics, Music and Theatre Arts.

### Barnes Visits Faculty

Dr. John Barnes has told "Focus" that, during the fall semester, he will host seven faculty "opportunities for small group dialogue" in order to "encourage the free exchange of ideas in a face-to-face discussion with the President."

Several years ago Dr. Barnes held such meetings with student leaders.

Barnes says: "I recognize the fact that the chief dialogues between faculty members and administrators is at the level of department heads and deans. I am grateful for the excellent relationship which our Executive Vice-President has with individual faculty members and leaders of the faculty. Occasionally individual faculty members contact me to discuss items of interest. I am looking forward to the

group opportunity to share ideas."

Dates for the dialogues are:

Wednesday, September 24

Thursday, October 9

Wednesday, October 22

Thursday, November 6

Wednesday, November 19

Thursday, December 4

Wednesday, December 17

The sessions will be scheduled 2:30 to 4:30 p.m. in the conference room adjoining the office of the President. The room seats about 15-20 people and, Barnes feels, will insure that a face-to-face relationship can exist within the dialogue group.

Faculty members who want to discuss specific items are invited to drop a note to the Office of the President.

# BSU Blueprint-1980

by Bob C. Hall

In 98 data-crammed pages, a Boise State University blueprint for the next five years of development amid Idaho's surging population center lists new buildings, and new baccalaureate and master's degree programs as top priorities for that period.

Handed to the State Board of Education at its mid-summer session by President John Barnes, the document was a comprehensive publication on future objectives of the University.

Under the title "The Way We Were; The Way We Are; Future Objectives", President Barnes divided his document into 16 sections, each with a challenging, slangy sub-title.

(Examples: "Facilities: Where The Action Is"; Land Needs: Go South, Young Institution"; "Financial Affairs: Pass The Bread".)

The report keys to a cautious population prediction that predicts virtual doubling of the Treasure Valley census count within five years. Dr. Barnes then builds his main theme on critical need for land and buildings at an already-crowded campus.

Boise State University must acquire and develop almost half again as much land as the school now operates on, the report predicts. On what should be a 150 acre campus by 1980, the school will need \$16.2 million worth of buildings not now in existence, Barnes says.

## The Building Blocks

New structures to meet the University's mission include the new science-education center; a new liberal arts building; a major addition to the present business building; a new health sciences building and a women's physical education building.

Total cost, guesses Barnes, will be \$16.2 million, with another half-million needed for equipment and fixtures.

To acquire the new acreage, most of it south of the present campus, the school must expect to pay about \$4-million at present market costs, the report says. Properties are valued by state appointed appraisers.

Those physical needs, believes Barnes, will be vital to cope with a campus population of almost twelve thousand students by 1980—a thirteen percent increase over 1974-75 enrollment.

## Faculty—More—And Less

To keep education in this plant

FIRST SHOVEL broke ground for BSU Science Building this summer.

effective, he argues that eighteen new faculty members must be added each year of the five-year span, to hold classroom ratios to an average of nineteen students per instructor.

One of the sharpest direction changes Barnes wants, according to his report, is to cut drastically into the school's heavy reliance on part-time faculty. There were 157 such faculty members on campus the past spring.

Barnes says the school's history has proved that part-time faculty offer vital chances to spice instruction with unusual specialty knowledge and skills; but that continuity in faculty and a sense of organizational membership suffers with too many part-timers on the staff.

As an added quality-of-faculty improvement, the report says the school wants to increase the percentage of faculty with earned doctorates from a present "healthy"

53 percent to an "excellent" 60 percent.

## An Academic Outline Class-By-Class

One of the report's most notable sections is a surprisingly detailed listing, by President Barnes, of the new academic and vocational programs he wants developed by 1980. Each university school and division has projected new programs listed, with the degree or achievement level attached, and a specific "year of implementation" noted alongside.

Equally bold is a section justifying a BSU project to "work with the University of Idaho . . . in a consortium approach plan to offer a graduate engineering program in electrical engineering in Boise."

That ambition is justified, writes Barnes, by recent pressures on BSU from the management of the new Hewlett-Packard engineering complex in Boise. They have repeatedly stated in public their need for BSU to operate a masters program in electrical engineering as research and employment source for their ambitious growth plans. Partnership with the University of Idaho is desired, says Barnes.

## Masters & FM Voices

With such demands from several fields of interest, Barnes makes his case for a new generation of masters' level programs in BSU schools. Enrollment will develop the graduates who want masters' study in Boise, the report documents.

## 'Substantial Increase'

# Research? Need More

Against the background of a major thrust by the University of Idaho's five-year plan for research concentration in the future, Barnes writes cautiously, but firmly, of his own school's needs for research opportunity.

"The research function (at BSU) should be significantly enhanced and brought into sharp focus," he generalizes. Then Barnes promptly puts that focus into his report.

BSU's Center for Business and Economic Research should be the nucleus of a university-wide research center by 1980, he argues. He would pull the present Office of Special Projects, under Dr. Jerry Reed, into a merger with the CBER's present staff to combine grant acquisition, special project proposals and business-economic research into a "multi-functional unit".

That unit would do applied research for public agencies, on request from private industry, within Boise State University on critical state problems, using university expertise and facilities.

In addition, the "multi-functional unit" would be able to furnish faculty and program designs for special seminars, workshops, research under grant proposals and special education service projects, according to Barnes' vision.

It would be the state's central specialist in computer-based research and data gathering, as well

In his section on new program additions, one new facility would attract dramatic public attention to BSU. Barnes notes that BSU student government has already appropriated \$10,000 towards startup cost for an FM broadcast station that would operate as a laboratory for the Department of Communications.

Once installed (the license application has been filed) the station would be a central feature of a new degree program in Radio & Television Journalism that Barnes sees as a high priority in the Communications Department by 1980.

## A Continuing Tool

One other major cost item is the library's five year needs, says the report. It notes that the BSU library building should house 291 thousand volumes and microfilm equivalents by 1980 to keep its standards up to major university demands.

Cost to make the acquisition (he details them in a separate library holdings shopping list) comes to about 2-million. That, he says, is "bare bones minimum" expenditure.

About the weight and detail of his major document, President Barnes is carefully reasonable:

"This report is not a concrete box; it is a flexible guide for the years ahead," he writes. Beyond that, he sees it as a major effort to meld a population-forced bushel of needs into a university mission set by the 1974 Idaho legislature, in clear, measured words.

While the Barnes report clearly supports the idea that BSU work only within those guidelines, it is bold and definite about the cost and organization effort required to meet the mission's challenges into 1980.

as key file and application center for all state and federal grant programs.

Still pressing to make BSU's own research role understood, Barnes calls for a "substantial increase" to back applied research work by individual faculty throughout the university's schools and divisions.

Quality of research is at least half of teaching ability, he argues, and cannot be made a separate function from the regular teaching role.

To meet the cost of the research support he seeks, Barnes suggests:

a special research equipment fund be started with \$10-thousand and \$5-thousand additions for the next five years;

five new graduate assistants added to the total staff each year until 1980;

a jump in sabbatical funds of \$20-thousand;

an increase in funds to relieve teachers from duties when research opportunities arise;

special help from the alumni fund's mini-grant program;

a \$5-thousand starter fund for research publication support, with \$1500 added to that fund for five years.

## Geology Team In Hot Water

Boise State University geologists are key figures in a growing chain of studies aimed at geothermal potentials for Idaho. Already department chairman Ken Hollenbaugh and his staff have investigated resources in several Gem State locations.

The main project for BSU's geologists is on the Boise front, where they have conducted exploration work for the past six months.

Dr. James Applegate and Paul Donaldson have led the geophysics studies of the area. Exploration drilling is scheduled to begin by fall on the project that may lead to geothermal heat for some of Idaho's state buildings.

Over the past year Dr. Clayton Nichols has done x-ray analysis of core samples on the Raft River project. He has also served as consultant for the project.

In the Cascade area, a team led by Dr. Monte Wilson is probing for geothermal sources. Applegate and Donaldson are doing seismic tests of the region while Wilson is mapping and conducting fault studies.

ON THE ROCKS, BSU geology team inspects work site.

# Faculty Takes Stand; Board Gives BSU Boost

by Bob C. Hall

Two BSU faculty members took strong stands on a pair of long-simmering faculty irritants before the State Board of Education at their mid-summer session. Both won board recognition of the problems—and some hope that financial relief action may not be far off.

Geology professor Monte Wilson, speaking as new BSU Faculty Senate President, told the board he was "appalled" at the research funds inequity between BSU and sister universities in the state.

Wilson challenged the board on the inequity of subsidizing Idaho State University non-academic student services "to the amount of a half-million dollars" while BSU's academic research activities operate on what he called "a pittance".

BSU was allowed \$50,000 in first budget considerations by the board this year, while ISU was ticketed for \$354,000 and the University of Idaho increased its research funding to \$2.93 million.

As a token of their agreement with Wilson's appeal, the board voted an extra \$100,000 for research at BSU and promised a three-year program of "equity phase-in" to cure the discrepancy between the state schools.

Communications Department Chairman Bob Boren told the board about another BSU faculty complaint that has been gathering heat as summer school crowding grows here. Boren reminded the board that BSU summer school teachers cus-

tomarily receive ten to twelve percent of their regular salary for the six-week summer school chore. But, he noted, those at other state schools receive slightly over twenty percent of base salary for the same effort.

As BSU summer enrollment continues to increase sharply, classroom loads for teachers receiving inequitable compensation have made the salary difference a major complaint, warned Boren.

Board members revealed sharp interest in the problem, promptly voted to seek a \$100,000 "equalization sum" from the coming legislative session to equalize state summer school pay policies by the 1976-77 school year.

As a by-product of Wilson's criticism of

state subsidies for student services, while academic activities like research needed special help, the board opened a surprising discussion of the entire student services cost question.

While BSU was again the one school with low state support for student services, the board agreed all state universities should work towards a self-supporting student service operation.

This year, they agreed to request \$127,500 of state funds to help ease the student service cost crisis at BSU.

But in the long run, the board ordered student housing, food service and student union operations at all universities and colleges must become more self-supporting. They voted to put a five-year limit, from the current fiscal year, on state subsidy for those operations.

## Building BSU

by C. Jan Baxter

Boise State University has joined the spirit of the nation's Bicentennial celebration by conducting a spirited scholarship drive. *It is no secret that BSU has more students needing financial aid than we have dollars.*

*Office of Gifts and Endowments has begun coordinating a campaign centered around the Bicentennial theme. As Director, I think a reasonable and appropriate goal is \$76,000 by 1976 for the campaign. So far, nearly \$10,000 has come in.*

The campaign is a many-pronged happening, with the intent of involving as many facets of the campus as possible.

Most scholarship drives generally concentrate on a direct mailing to alumni and friends. Well, BSU will certainly send mail solicitations to a great many people seeking their support of the Scholarship Drive.

But, we are also adding a new ingredient—campus activities. In this way, the campus community as well as the outside community can interact with BSU with some entertaining and interesting enjoyment as well as participating in building the Scholarship Fund.

For example, the first activity was the *New and Unique, Old and Antique show at the Student Union Building in May. The Programs Board of the Associated Student Body rolled up their collective sleeves, and produced a truly outstanding event.*

*The antique dealers of the area, as well as merchants displaying new and unique merchandise, set up shop in the SUB Building and over 4,000 people visited our campus to see the show.*

One of the highlights was the rare and tropical plant sale in the Ballroom. The weekend produced nearly \$2,000 for the Bicentennial Scholarship Fund.

In September, the campus "moves" to Westgate Mall in Boise for a repeat of last year's joint promotion of BSU and Westgate.

*The Scholarship Fund should grow again in November, when the Great Potato Sale becomes a reality. Hot potatoes will be sold at the November 1 and November 15 home BSU football games, and the proceeds will go to the Bicentennial Fund.*

Probably the premier event of the year will be the gala opening of the Special Events Center early in 1976. BSU's own Fred Norman, renowned for his spectacular productions in Boise of *Man of LaMancha*, *Fiddler on the Roof*, *Jacques Brel*, and the forthcoming *Oklahoma*, will direct two shows with a Bicentennial flavor for the opening of our new Theatre.

Proceeds from the shows will be designated for the Bicentennial Scholarship Fund. More details regarding these productions will be mentioned in future issues of the FOCUS.

It's easy to see why the people involved with the Bicentennial Scholarship Campaign are excited. We believe the events and activities surrounding the scholarship fund raising activities this year will bring a resounding success to the intent of the program—boosting the scholarship fund by \$76,000.

We hope everyone reading the FOCUS will get involved in one way or another with the Bicentennial Scholarship Campaign.

## Administrators Help United Way

A team of top BSU administrators will help coordinate BSU's share of the 1975 United Way drive.

Gene Blackwelder, Director of Auxiliary Services, was appointed by President Barnes to oversee the BSU subdivision of the Public Affairs division of the drive in Ada County.

Working with Blackwelder to help solicit employee contributions will be Rosalie Nadeau, Director of Affirmative Action; Dr. William Shankweiler, Associ-

ate Dean of Arts & Sciences; Dr. Clyde Martin, Associate Dean of Education; Darrell VanKleek, Chief Accountant; Dr. David Taylor, Vice-President for Student Affairs; and Athletic Director Lyle Smith.

Also assisting will be Doris Kelly, secretary for Accounting & Data Processing; Director of Vo-Tech Don Miller; assistant librarian Carol Bettis; and Office Administration professor Dorothy Albertson.

ANTIQUÉ SHOPPERS swarmed through student union display rooms to look at area merchants' wares and donate to Bi-Centennial Scholarship fund during the successful Antique and Plant Sale event supervised by student programs board in cooperation with Gifts & Endowments office. Three day sale was held in June.

## Driscoll Leads Donors

Several major donors lead the list of private gifts and scholarships received by BSU this summer. BSU Director of Gifts and Endowments, C. Jan Baxter, said that \$51,743 in private funds were accepted by the University during May, June, and July.

An eye catching donation is the \$10,000 check that is the final installment on the \$50,000 John Lynn Driscoll, Jr. Scholarship Trust. The account, contributed by Mr. and Mrs. J. Lynn Driscoll, is held in trust at the First Security Bank for the benefit of BSU.

Named the John Lynn Driscoll, Jr. Scholarship Trust in honor of their son who died during pilot training shortly before WW II, it will generate enough money to pay the fees for about ten students each semester.

Driscoll has been involved with Boise State since the days when it was a junior college run by the Episcopal Diocese of Idaho housed in St. Margaret's Hall. He chaired the board of the school until 1939.

In those early days Driscoll says "we had to pass the hat up and down the street to keep it going."

Boise State also has a dormitory, Driscoll Hall, named after his deceased son.

Driscoll says the scholarships will go to Idaho residents on the basis of need and will not be connected to grade averages.

Another large gift is the \$5,580 from the Joint School District #2 of Ada and Canyon County for summer school scholarships for the district teachers.

BSU also received \$4,341 from Tau Alpha Pi for Vocational-Technical scholarships.

\$3,600 was received from the C.C. and Henrietta W. Anderson Foundation in their annual distribution of BSU scholarships.

Some of the other sizeable contributions received are listed as follows:

\$1,500 from Gem State Properties for School of Business scholarships.

\$800 from the Idaho Federation of Music Clubs and the Commission for the

Arts for music scholarships.

\$700 from the National Secretaries Association, International for scholarships for two students in the Secretarial Science program.

\$550 from Boise Cascade Corrugated Container Division in Nampa to establish a scholarship in the Bilingual-Bicultural Field.

\$525 from friends and family of the late Henry M. Bray for a student loan fund in his memory.

\$300 from the American Watercolor Society to fund an Art Department scholarship.

\$201 from the friends and associates of the late Margaret Scott Ball to establish a scholarship in Art.

\$200 from Dr. and Mrs. Robert DeNeufville to fund a Foreign Language scholarship.

\$200 from the Boise Business and Professional Women's Group for a scholarship.

\$150 from Mr. and Mrs. C. M. Newhouse to fund the Helen Moore English Scholarship.

\$150 from the Boise Home Economists for a Home Economics scholarship.

\$1,000 from KTVB Channel 7, Boise, for School of Business and Department of Communication scholarships.

\$1,000 from Laurence Bettis to assist a student in the Baccalaureate Degree Nursing Program.

### ALL IN ONE

The Arbiter, Les Bois, and the Photo Bureau have been incorporated into a Student Publications Office.

Dean Charles Lein

## Lein's 'Luckiest Guy in Town'

Ten "top rate" students make up the BSU business school's first group of graduate assistants, notes Dean Charles Lein.

"I feel like the luckiest guy in town . . . we really got some good people," says Lein, of the students who will do research and work on the MBA degrees.

Assistants assigned to the Center for Business and Economic Research include Warren Robinson, Brigham Young University; Paul Werner, Shimer College; and Sonny Perry, BSU.

With the department of management and finance are Mark Thoreson, Augustana College; Michael Bunch, Eastern Oregon State; and Maureen Daly, BSU.

Other graduate assistants include Paula Boyll, accounting, BSU; Martha Lilly, marketing, University of Oklahoma; Richard Wallace, economics, BSU; and Madonna Faunce, accounting and data processing, BSU.

Dr. Charles D. Lein, Dean School of Business at Boise State University, has been named President of the Idaho Research Foundation. The group held its annual meeting in Boise.

The Idaho Research Foundation involves all of the public colleges and universities in the State of Idaho. It promotes research activities; functions as an agent for patents, copyrights, inventions, publications, etc.

Other officers elected include Dr. Robert W. Steele, from the University of Idaho, Secretary-Treasurer, and Dr. Ron Stark, Graduate Dean from the University of Idaho, Executive Vice President.

### LIBRARY SKILLS PROGRAM SET

Basic Library Skills, independent study program designed to introduce new students to the resources of the BSU Library, is now listed as LS 102 on page 99 of the catalog. The course is offered on a credit/no credit basis. The new edition of "Library Skills" will be available soon at the BSU Campus Store. For more information about the library skills program, students and faculty can contact Beverly Miller at 3302.

## Faculty Profile

# Less Discrimination As Prof

by Larry Burke

When newly graduated Norm Gardner went job hunting in 1968 the future looked bright. A fresh Master of Business Administration degree in hand, his chances for a good job seemed assured. He finished second in his class and all his fellow graduates had at least five job offers.

But he got none. The reason . . . Norm Gardner is blind.

"Several large companies were interested in my record, but when they found out I was blind they backed away," he notes. "They put me into the typical blind stereotype . . . if you can't see you can't think."

It was after this that he decided to earn a Ph.D. degree so he could teach at a university. So he graduated from the University of Utah and came to Boise State in 1974 as an assistant professor of management and finance. His BSU assignment is his first full-time teaching job.

"I decided to go into education because there is a lot less discrimination against the blind in the academic world. Here they judge me on what I can do, not on what I can't do."

Business school Dean Charles Lein seconds Gardner's opinion. "We hired Norm because he had three things we wanted . . . teaching ability, the right degree, and practical experience."

### A Nuisance, But That's All

Gardner came to Boise State with an impressive list of credentials. Valedictorian of his high school class in Duncan, Arizona, he graduated from Brigham Young University cum laude in 1966. In the meantime, he taught Spanish at BYU's Language Training Center.

He graduated with a 3.8 grade average in his masters program and earned two fellowships while working on his doctorate. He also worked as a vice-president for a small Utah securities firm and was an account executive for Schwabacher and Company.

While students, administrators and teachers marvel at his accomplishments, Gardner remains modest. "What's so unusual about getting a Ph.D. degree and becoming a teacher . . . people do it all the time," he says.

"Sure it's a nuisance to be blind, but I've adopted alternative techniques to do things. I decided I wanted to be a college teacher so I found ways to do it."

He is critical of the stigma that is attached to blindness. "The true tragedy of blindness is the handicap that society gives it. We aren't that different than anybody else."

He stresses that the "average blind person can do the average job just as well

NORM GARDNER

as the average worker if properly trained and exposed to the correct philosophy."

### Forcing Himself

But there was a time when even the ambitious Gardner didn't have that optimistic outlook. He was one of those blind persons who force themselves into the stereotypes of society.

"I used to be very introverted and tried to hide my blindness because I was ashamed. I excelled in academics because that was one place where I could compensate. I associated blind with inferior . . . I was playing 'blind man's bluff' with myself," he now says of his earlier life.

But all that changed last year when he discovered the Idaho Commission for the Blind, a state agency that he now serves as one of three commissioners. He says people there "really turned my head around and totally changed my life."

Now he looks at life with a fresh confidence in himself. "I realize I have limitations and I accept these. But blindness is a characteristic just like baldness . . . I'm no longer ashamed."

## Real Estate Major Off the Ground

Boise State will break ground in a new field this fall when the school offers a major in real estate. Approval for the program came at the summer meeting of the State Board of Education.

Roger Allen, associate professor at BSU and architect of the program, says it has already been "extremely popular" with students. He expects between 50-100 students to enroll in the new major.

"We have always had a demand for real estate at BSU," noted Allen. He said 450 students were enrolled in real estate

Gardner is doing things he thought he could never do, like carpentry. He is putting on the final touches on a cedar chest that he began last year. "It doesn't take a superhuman to do these things, and if I fail, I fail. So do other people."

He is currently hard at work on a computer program for a local bank that will predict the credit worthiness of people who apply for charge cards. Earlier in the year he and BSU accounting professor Dr. Bob Koester conducted executive development seminars for two Idaho companies.

In the classroom Gardner says many of his students feel uneasy at first. But they soon get over it. Now he says some feel at ease enough to joke about his blindness, a sign of acceptance that pleases Gardner.

He wants to be considered "just another member of the faculty," and asks no special considerations.

"My goal at BSU is to become the very best teacher possible . . . I just happen to be blind, that's all."

classes last year.

Allen stressed that the program is not designed only to train real estate salesmen. He said students can go into appraisal, loans, construction or private enterprise after completion of the program. All courses will be accredited for certification from the Idaho State Real Estate Education Council.

Allen called the new program an "exciting and challenging step forward for real estate education in Idaho."

## FOCUS People on the Move

### In Business

Several faculty members in the School instructed a four-week live-in management development program for the Department of Employment.

Dr. Pat Shannon served as a summer intern/consultant for the Idaho Department of Highways.

Dr. Robert Cornwell served as an intern/consultant in the communications area for the Boise Cascade Corporation.

Dr. Dennis Fitzpatrick, Assistant Professor of Finance in the School of Business, was recently named to the Financial Management Association program committee for that organization's annual meeting in Kansas City in October, 1975.

In addition, Dr. Fitzpatrick will be presenting a paper at that conference. The paper is entitled, "Public Utility Holding Companies Adjusted Cost of

Capital Approach."

Chuck Lein, Dean of the School of Business, was recently named to the 1975 edition of *Outstanding Young Men of America*. Lein was recently a keynote speaker at the West Central Wardens and Superintendents Association annual meeting in Boise and was the commencement speaker at the National College of Business in Rapid City, South Dakota. In addition, he was commencement speaker for Links School of Business graduation exercises in late June, and will be addressing the International Conference of the American Collectors Association at Sun Valley.

Dr. Larry Waldorf recently completed his study, *Current and Projected Recreational Demand on the Lower Boise River*, which was funded by the U. S. Army Corps of Engineers.

Dr. Michael Merz, Associate Professor of Accounting, passed the Idaho Certified

Public Accountant examination during the past summer.

Dr. Harold Nix, Chairman of the Department of Accounting and Data Processing, was recently recognized by the National Association of Accountants as author of the outstanding article submitted for publication in the journal *Management Accounting* in 1974-75. Dr. Nix's article was selected from an initial field of over 1,000.

Dr. Tom Stitzel has been a summer intern at the Idaho Power Company and is involved in a variety of research projects with that organization.

Dr. Harold Nix was a faculty intern with the Arthur Anderson CPA firm and has been extensively involved in corporate audits throughout the United States.

Dr. Dennis Fitzpatrick has been an intern at Morrison-Knudsen during the past two summers.

Other related summer activities of the School of Business faculty include a cooperative real estate adventure by Roger Allen and Gail Heist in developing property at McCall, Idaho.

Dr. David Groebner helped the Veteran's Hospital implement a Management by Objectives program.

Dr. Barry Asmus is involved in a \$10,000 research project funded by the Idaho Research Foundation, which is aimed at defining the desirable location for a coal-fired generating plant, based on economic impact criteria.

Dr. Donald Holley and Drs. Ghazanfar and Reading from the U of I and ISU are refining an econometric model for the Idaho State Legislature. The model is aimed at forecasting state revenue and follows up the initial project which was funded in 1974 by the Idaho Research Foundation.

## Angela New Math Assistant

Angela Rudd

Angela Rudd will become BSU's first graduate assistant to teach math, beginning fall semester.

A BSU summer student, Angela has taught prison inmates math courses at the prison site three hours daily. Though she will graduate (BA) next week, she'll finish the summer teaching at the prison school.

Angela will graduate with a Bachelor of Arts in Math - Secondary Education with a minor in Literature, English. She will instruct Algebra Review this fall.

At the prison, Angela works on a one-to-one basis with the inmates. She teaches nearly thirty students everything from 6th grade math to college courses.

The prison courses have now received BSU accreditation. Several of the inmates take correspondence courses from BSU.

An open classroom at the prison, with no guards, provides an easy learning atmosphere for the inmates.

"They are very cooperative . . . and don't question me very often," explains Angela. "I do have one guy who says he doesn't like women in power," she says with a smile.

"Math was my worst subject in high school," commented Angela, "so I figured that if I kept taking courses sooner or later something would click."

"I owe all my inspiration to Dr. Yozo Takeda, Dr. Giles Maloof and Dr. William Mech. Dr. Takeda taught me that math was a beautiful art and science . . . I have learned so much from him . . . he is really a beautiful person."

"And if it hadn't been for Dr. Mech, Math Chairman, I would have never gained the experience I did this summer; he helped me get the teaching assignment this summer and my graduate assistantship," added Angela.

## Ed Consultant

This week saw installation of a new BSU service to Idaho's special education needs. Education School Dean Gerald Wallace says BSU has successfully negotiated with the Idaho Department of Education to install a regional special ed consultant within his department, starting September 1.

That expert, who is funded to have a full-time secretary, will provide special counsel to school districts on problems with exceptional children. The Title Four federal-aided program provides the \$32-thousand office costs until August 31, 1976.

# Ed Master's Off, Running

by Larry Burke

With little advance publicity and funded only two months before it began, Boise State University's new master's degree program for secondary school teachers got off to a "solid start" this summer notes BSU education dean, Dr. Gerald Wallace.

"We were very gratified with the first year results . . . usually the first year of a program has the lowest enrollment. When the word gets around we hope for even more students next year."

Fifty-nine enrolled in the classes this summer.

The program, funded by the State Board of Education in its April meeting, grants master's degrees in post-secondary education to teachers in art, chemistry, business education, English, math and earth science.

### FIRST, THE 'CORE'

But before the students take courses in those areas they first go through the education "core", explained Wallace. Offered each summer, these classes feature lectures, discussions and independent study on current education topics. Each student writes a documented position paper about one of the core topics, a process that Wallace says is designed to screen out unqualified applicants.

Once past the first year core classes, the students can specialize in their teaching field.

"We don't know of another school that has designed a master's degree in this way, but we do know it will make a teacher stronger in his subject area."

As Wallace explains, the program is designed to avoid the traditional isolation of teachers in education courses.

"We're real believers in melding the skills of teaching methods with solid knowledge in subject areas. This program will make people who already know their teaching methods more knowledgeable about the content of the courses they are already teaching."

The 1975 summer sessions were just the first phase of the fuller program that Wallace hopes will eventually include more than the eight content areas. This fall, night courses will be offered in some subjects.

But he says it will continue to be a summer oriented program that is set up so working teachers can get a master's with-out a leave of absence.

Next summer, master's degree level courses in the eight subject areas will be fully developed to accommodate the over 50 students who will move out of the core education courses.

Ms. Sandy Wood [r] shares her ideas on business and education with Mrs. Renda Sullivan [l], Intermountain Gas employee. As a cooperative program with Boise State, Intermountain Gas placed Ms. Wood in their general office for four weeks to improve occupational competency and promote school-business-industry cooperation in the education of vocational and technical teachers.

Ms. Wood is an Office Occupations Instructor at Prairie High School in Cottonwood during the school year.

## Top Brains Attracted To BSU-Hosted Meet

Boise State's education department will be in the international spotlight next month when it hosts the regional annual meeting of the prestigious Comparative and International Education Society Oct. 8-11.

Dr. John Dahlberg, BSU's ambitious conference organizer, says he expects over 100 society members to be at the Sun Valley site to hear a long list of scholars present papers and discuss topics centered around the conference theme of "resource priorities in education and the impact on ethnic minorities."

Among the seventeen speakers at the conference will be what Dahlberg terms some "real heavyweights." Keynoter will be Cole S. Brembeck of Michigan State, who will talk on equal education opportunity.

Also singled out by Dahlberg is William Brickman, University of Pennsylvania. He will speak on Jewish education in the Soviet Union.

BSU's own James Sims and Rolando Bonachea will also present papers during the four day conference.

BSU landed the conference last year after Dahlberg submitted his proposal to the selection committee, complete with personal invitations from Governor Andrus and Dr. John Barnes.

"I think the excellent facilities at Sun Valley and the total support of the state

and BSU brought the conference to Idaho," explained Dahlberg.

He added that BSU edged out larger schools such as Arizona, California, and UCLA.

We are a young institution that doesn't yet have the international reputation of the other schools, so it is a very exciting opportunity to host a meeting of such caliber," he said.

Dahlberg has sent invitations to education scholars throughout the United States as well as foreign countries in Asia, Europe and Latin America. He added that all Idaho educators are welcome to attend the event.

## Gets Easter Seal \$

Mrs. Jeri M. Moody, 1919 Nez Perce, was recently selected by the National Easter Seal Society to receive a \$250.00 scholarship for summer training in learning disabilities, according to BSU Associate Professor of Education Dr. John L. Beitia.

Mrs. Moody, a senior at Boise State majoring in Special Education, was a finalist for the national competitive scholarship.

This is a third year a BSU student has received one of the Easter Seal scholarships.

## People on the Move

### In Biology

BSU's biology "busy bees" kept popping up in news stories and program notes across the land this summer.

Dr. Marcia Wicklow will present a paper at the coming meeting of the American Institute of Biological Sciences summer meeting at Corvallis, Oregon on the campus of Oregon State University. Also representing the Department at the A.I.B.S. sessions will be Drs. James Long and Herbert Papenfuss.

"Fundamentals of Immunology", a special topics course taught last semester by Dr. Russell Centanni was featured in the July issue of the *Idaho Medical Technologist*. This class included 42 medical technologists from the community and was very well received. Also included in the same issue was an "Immunological" crossword puzzle submitted by Dr. Centanni.

Dr. Donald Obee, department chairman, represented BSU on a recent U. S. Forest Service sponsored Educator's

Tour. The tour was through the Caribou and Targee National Forests and included 32 administrators and faculty members from the major universities of Idaho, Wyoming, Montana, Utah and Washington.

### Workshop At Donnelly

The 8th annual Workshop on Conservation and Environmental Education was conducted at the Donnelly 4-H Camp during the last week of July. The workshop, directed by Dr. Obee, had a full complement of 48 participants again this summer due in part to cooperation received from the Boise Rotary Club, Boise Cascade Corporation, the Golden Eagle Chapter of the Audubon Society, Soil Conservation Districts and interested individuals in providing funds for partial scholarships for some of the participants.

A BSU inspection team composed of H. William Belknap and Drs Baker and Obee reviewed property located near Island Park, which has been willed to the State of Idaho by the Harriman family.

Representatives from the state institutions of higher learning perused the land considering the feasibility of utilizing some of the facilities as a biological station site. A portion of the ranch will become a State Park.

Several members have been engaged in consulting projects this summer:

Drs. Wyllie, Fritchman, Papenfuss and Kelley have a contract for conducting water quality studies along the Snake River near Strike Reservoir for Stearns-Roger Corporation of Denver.

Dr. Fenton Kelley is also involved with fish studies in Lucky Peak Reservoir for the Army Corps of Engineers.

Dr. Obee has been working for the Energy Research and Development Administration of Idaho Falls in supplying biological environmental data in conjunction with the Boise Space Heating Demonstration Project being carried out jointly by the Idaho National Engineering Laboratory, BSU Department of Geology and the Idaho Bureau of Mines and Geology.

### In Math

Charles Kerr, Daniel Lamet, and William Mech attended the joint meeting of the American Mathematical Society, the Mathematical Association of America, and the Society for Industrial and Applied Mathematics, June 20 and 21 at Washington State University in Pullman, Washington. Dr. Lamet chaired the session on topology and geometry.

Robert Williams, a BSU student majoring in mathematics, will co-moderate the workshop entitled, "Why Honors?". The other member of his panel will be Dr. Walter Weir, Director of Honors at the University of Colorado, former executive secretary treasurer for NCHC.

Dr. William Mech, Director of Honors, BSU will co-moderate two workshops, the first entitled, "Starting New Honors Programs at Large Institutions". The second is entitled, "Science Courses for the Non-Science Student."

# \$ Found; Events Center 'Go' Again

A last-minute discovery of a surplus chunk in BSU's building bond revenue fund was made in time to avoid a major construction-installation problem at the new campus Special Events Center.

Almost ready to start laying on the massive, slanted roof of the 425-capacity building, architects and contractors checked plans and agreed the key "patch panel" that controls all sound and lighting systems for the building could only be lifted inside through that roof opening.

But funding for the patch panel had been delayed as a later addition in the original construction program. Notified that the patch panel would have to go in "immediately" to avoid costly delay of the roofing schedule caused a flurry of "where do we get the money?" scrambling in the University financial offices.

To the rescue, just days before President John Barnes was set to plead with the state board for special help on the problem, came Financial Vice-President Roger Green. He had re-analyzed the building bond revenue budget and found a surplus sufficient to buy and install the panel.

The surplus amounted to \$38-thousand. That, added to \$12-thousand that had been accrued as interest income from the BSU Plant Fund made up the necessary \$50,000 to get the panel in and the roof project kept on schedule.

Equipment installed includes the main patch panel, dimmer modules for stage and auditorium lights, a "stage manager" control system and the console unit that runs the entire system. "This equipment makes the Center one of the most outstanding theatre facilities in the Northwest," claimed President Barnes.

**SPECCENTER ALMOST READY**— Built with student fee-backed bonds, the new BSU Special Events Center presents interesting architecture to new arrivals on campus this week. Plans are for special drama, music and film productions to open the facility that will relieve the student union ballroom schedule.

## Ball Boosts BSU Music Department

The Music Department at Boise State University will get a real financial boost when the Musicians Local No. 537 of Boise holds its Third Great Musicians Union Ball Sept. 19. Proceeds of the event will benefit BSU's music program.

The Ball will be held from 9 p.m. to 1 a.m. at the Rodeway Inn. The Musicians Union has announced that Gib Hochstrasser's Kings of Swing will be featured among several bands contributing their talents to the ball. Other groups will play all kinds of music from rock to big band.

"This is the first time the Musicians Union has named Boise State as the recipient of the proceeds of one of their events," said Will Elliott, chairman of the BSU music department. He explained that funds would be used for scholarships in the music department.

Tickets for the event will cost \$5 per person and are available at the BSU music department as well as music stores in the Boise area.

Ahsahta Press Prints Macleod Book

## Poet First for BSU Publishers

### Honors Adds More Toughies

For the students who prove by superior grades and testing scores that they can qualify, Boise State University's unusual Honors Study Program will have more brain-busting courses added to the rich fare of last year, this fall.

Honors Program Director Dr. Bill Mech says the Honors students can study a novel "Culture in Context" series that takes an unusual view of six key cultural eras of modern history.

That one will be joined by "Honors English Composition" a souped-up version of standard English Comp. for the premium students who could otherwise bypass the generally-required course.

With such already-proven Honors courses as Radical Economics and Honors History sequences back again this year, Mech believes BSU's program is unique among Idaho higher education institutions.

So far as he knows, it is the only one at a state university in which super-talented students get such radical departure opportunities from the regular schedules and prerequisite constraints imposed on most students.

Honors students are urged into a richer diet of seminars, evening sessions, and self-guided research under Mech's program design. Instruction is more tailored to small, informal settings.

In the "Culture in Context" series, for example, the weekly class sessions will actually proceed around an evening meal, with food and some other trappings setting the "mood" for the historical period under inspection.

Guided by instructors Jim Hadden and Stu Evett, the students will eat, ponder, argue and trade "perceptions" more easily than they would in a classroom, 1975-style.

Norman Wicklund Macleod, a former Idaho poet who went on to gain international notoriety in the 1940's, reached another notch on the literary prestige ladder as the first author published by the new Boise State University-based Ahsahta Press:

The publishing company was formed this year by BSU English professors Tom Trusky, Orvis Burmaster and James Maguire to recognize contemporary or older poets such as Macleod who have "suffered from relative obscurity."

Macleod, who lived in Weiser and Cambridge in the 1920's, wrote five volumes of poetry and had verse published in foreign journals ranging from Japan to France.

But after 1952, despite publication in scattered periodicals, Macleod is little known. Now nearing 70, he lives in Pembroke, N.C. where he teaches and edits a magazine a Pembroke State University.

Until recently, Western poets like Macleod had troubles getting published by large Eastern companies, Trusky explained. "This means a number of good authors have been shamefully neglected. The Ahsahta Press hopes to bring their forgotten poems back to life."

The influence of Macleod's early life in Idaho was important. "It is the crucial period of boyhood and formal education in the West which provides Macleod with the themes and sense of place that mark his most successful poems," said Trusky.

The Ahsahta Press volume of "The Selected Works of Norman Wicklund Macleod" is a collection of 33 poems from published books, periodicals and anthologies as well as previously unpublished manuscripts.

The new paperback book is now on sale in the Boise State University Bookstore for \$2.

## Smith 'Business Heavyweight'

Boise State University has hired the manager of a national educational association to head the business school's department of management and finance, announced Dean Chuck Lein.

Jesse Smith, currently director of the American Assembly of Collegiate Schools of Business in Denver, became chairman of the department in August.

A veteran of ten years in private industry, he has been an instructor of management at the University of Denver. He is now completing work on his doctorate degree from that school.

In Smith Boise State has "picked up a real heavyweight" says Dean Lein. "He

Jesse Smith

has provided considerable leadership for schools of business throughout the United States . . . BSU is fortunate in having him become a part of this institution."

As director of the AACSB, Smith was responsible for accreditation of college business programs throughout the nation. He also supervised business research activities and organized workshops and seminars.

### New Finance Prof Counts \$

Thomas Stitzel, a new professor of finance at the BSU School of Business, was named Secretary-Treasurer to the

Western Finance Association this summer.

WFA is a prestigious coordinating organization for leading business and finance studies institutions of the region.

Stitzel thus becomes a major official on a board which includes top faculty and deans of such schools as the University of Oregon, University of Southern California, University of Washington, University of Colorado, University of Utah, Arizona State University, and Simon Fraser University of Canada.

# New BSU Rad-Tech Program

Already Idaho's central factory for the manufacture of people to help doctors and nurses do their delicate skills more effectively, Dr. Victor Duke's Health Sciences school at BSU puts another vital health care skill into its product line this year.

With State Board of Education approval finally cleared, Duke has spent the summer corresponding with prospective students and clearing classrooms to take in the first of those who may seek an Associate of Science degree in Radiologic Technology.

One more hurdle remains, though Duke seems hopeful the State Board's authorization will make the final technicality routine. Idaho's '76 legislature must approve funding, and the BSU administration must then place the program on a high enough institutional priority for funding.

The soft-spoken, energetic Dr. Duke expects full funds will flow. So, with State Board approval, he's starting the required "pre-professional studies year" of the courses this fall.

Any student who takes that sequence will then have the requirements to apply for the full radiologic technology course. That program will run for two and three year sequences. Twenty such students will be admitted to the program if it is funded by next July.

Biggest question Dr. Duke still gets about the program is, "What's a radiologic technologist?"

"Well, he or she is qualified to take all x-rays used for diagnosis in any hospital, clinic, or special medical facility," Duke explains.

He says the radiologic technologist holds a higher skill than pressing a camera button. The "rad-tech" who goes on into a specialty and a bachelor's degree, in addition to working with a more sophisticated assortment of x-ray gear, may be qualified to handle other radiology systems in applications such as x-ray therapy, nuclear medicine, and even newer ultra-sound and other image-making methods.

Why is the medical specialty being installed at Boise State?

A good share of the answer is Dr. Duke himself. He buzzes about the unimpressive huddle of converted houses, doctors' offices and the abandoned public health laboratory building that is the BSU Health Sciences facility in steady motion. His round, spectacled features poke happy glances through doorways and the lab mazes that are his growing health care training world.

"Vic" Duke really likes doctors and other health professionals, and when they grumble about health care academics, Vic Duke reacts—fast.

In brief years he's soft-talked donations, rounded up support for public and private funds, and convinced capable instructors that BSU is a place where Idaho's medical specialties are in exciting education ferment.

That's how Boise State became first in the field in Idaho as supplier of graduates with competence and degrees as skilled Medical Records Technicians and capable Respiratory Therapists. In addition, that wheelhorse of hospital and clinical offices, the registered nurse, is being trained at the baccalaureate level in several specialty areas since Dr. Duke arrived at BSU in July of 1972.

Under Director of Nursing Joanne Vahey, the high-quality R.N. program and baccalaureate specialties have been developed in a short time.

The RN program accommodates 160 students; the baccalaureate program takes 80 students. Entry to the school is offered after a highly selective process of screening.

All the allied health skill fields, believes

**FINE TUNER**, Professor James Applegate sets up seismograph designed to pinpoint geothermal activity in Boise area. New machines are going onto sensitive sites as part of Boise Front Geothermal project of university geology teams under federal research grant program. [See story, page 2].

# Buildings Go Up All Over

by Bob C. Hall

New capacity to teach students, view the arts in action and whoop the Broncos to football fame are in various stages of construction on the University campus as the first swell of new faculty and early enrollment students arrive here this month.

Final touches are all but completed on the Ray Mittleider Memorial deck that brings Bronco Stadium to a 20,000 seating capacity football-track facility under night lighting.

BSU faculty people in Theatre Arts and Music are already prepping productions to mark opening of the 500-capacity Special Events Center, now getting a key installation of its awesome sound-electronics panels just before final roof work.

Once capped, the Speccenter's interior seating and stage design will go on during fall months, with opening date set for late January or early April. Student fee bonds are the support base for this building.

A special BiCentennial Scholarship Opening Night performance of "John Brown's Body" and "Spoon River Anthology." will be produced by Fred Norman with players drawn from BSU alumni and supporters in the state drama fraternity.

But the most impressive of all current building projects, and one that will affect the University's academic pace most vividly, is now just beginning to find its massive foundations in the broad lawn between the Business Building and the Towers Dormitory, on River Drive.

It's the long-awaited new School of

Duke, are the newest employment phenomenon for the school that built its early reputation as a training ground for nurses.

Radiologic Technology is a classic example, he says, of a program that fits BSU's policy of practical education as a base for broader knowledge development.

It works this way: A BSU student can pick up requirements for entry into the full Rad-Tech curriculum in a pre-professional year that is simply a basic collegiate curriculum salted a bit towards medical care areas.

Courses are the standard English Comp, Speech Communication, Psychology, Math, and Humanities electives, but are interspersed with Anatomy and Physiology, Health Delivery Systems, and Medical Terminology.

With that year done, the student is qualified to apply to several health science

**TWO YEARS** away from completion, this is what new BSU Science building will look like when it opens to house major new classroom, lab facilities on west side of campus.

Sciences Building that will offer students and researchers in biology, chemistry, and physics five-million bucks worth of lab-classroom-office efficiency.

"It is the first building constructed with state tax funds since the University became a part of the Idaho higher education system," noted President John Barnes pointedly, during groundbreaking ceremonies last July.

The science building is the first phase of a science-education complex at BSU. The second phase education building will be built in the future.

Laboratory space for biology, chemistry and physics will be in the building along with classrooms and 50 faculty offices. The Department of Registered Nursing will also be housed there.

Plans call for an astrological observatory to be built on the roof and a greenhouse at the ground level.

An adjacent parking lot that will accommodate 350 vehicles is also a part of the project.

Contractor for the science building is Tekton Incorporated of Salt Lake City, Utah. Architects are Dropping, Kelley, Hosford and Lamarche, Boise.

programs or can leave for another direction at the University, a little wiser in health care understanding, but equally sound in basic university requirements.

Or the student can become one of the twenty premium people who qualify to go full-bore on Rad-Tech studies.

After two years of heavy concentration and practical intern work, the student can take a three-year "associate" degree and get right to work, with full competence in that field. But for the student with broader knowledge desires still unfulfilled, the course offers a final year of senior-level study which will yield a graduate packing a full four-year baccalaureate degree as a Radiologic Technology major.

"Any student still has to pass the AMA's certification test to practice,"

cautions Duke. "But they'll have the academic grounding and clinical experience to be fully qualified for that test by the time they earn their associate degree," he claims.

Then, back in his spartan, book-strewn office, Dr. Duke pops into his swivel chair, starts to slump back, then lets a final thought bring him forward toward a visitor, an elbow propped on his desk.

"You see, it used to be the hospitals who trained all these specialty people for health care . . . and the cost was being added onto the bills of the patients. Now, health care training is becoming the uniform responsibility of all citizens through higher education institutions like this one."

For Dr. Victor Duke, the trick is to press those old, remodeled buildings and limited personnel to their limit, to meet that goal for Idaho.

## Kubitschek's Corner

by Don Kubitschek

Who are athletic boosters? Potentially everyone who believes in the soundness of a sports program within their geographical horizons. Having heard again and read how reliant universities are and will become on your contributions, the word "BOOSTER" will become synonymous with success.

Fortunately here at Boise State University this expression has already gained this connotation. But the pressure of economics is now making its impact felt. As the weight grows heavier from increased scholarship and scheduling, the stronger and more numerous the Bronco Boosters need to become.

This is not a one-way street as can easily be seen on Bronco game days. There is a tremendous movement of people and money from throughout Southwestern Idaho and Eastern Oregon. So while the communities are supporting the Broncos, the valley is also benefiting economically in some manner.

At this time Bronco contributions are being received from throughout the West. If you have not renewed your membership with the Bronco Boosters, do it now. If you already have, surely you have a friend who attends the football games but is not yet a booster. Lend your support to the coaches and the University by signing up a new member.

We may be large and growing by Big Sky standards, but that's not enough. The ambition for our athletic teams is always, "let's go bigger", so let's do the same with our booster club and help the program "grow bigger".

### These Guys Really Worked!

Congratulations are in line for Bob Hobart and Don Johnson as they picked up some \$3,000 in membership monies this past May. The most new members recruited was through the efforts of Ed Knecht, Al Henderson, Jim Swan, Don Troyer and Dick Miller.

Here's a thought: that there are eager members throughout the valley if you would just ask them to support the Broncos. If I can help, feel free to call me at 385-3556. By the time our next column appears, the Broncos will be well along their way with your support and God's blessings to another great year.

The following individuals are members of the Board of Directors of the Bronco Athletic Association. If you have any questions concerning the organization, you are invited to contact them.

Monte Brooks, M. M. Brooks Insurance, is the president of the Bronco Boosters, and S. Hatch Barrett, Boise Kenworth Sales, is the vice-president. Treasurer of the BAA is Chuck Forrestal, Idaho First National Bank, Broadway Office. Mrs. Ernie Roberson is the secretary. Mrs. Roberson and executive director Don Kubitschek are located in the BSU Varsity Center. Their phone number is 375-3556.

Bronco Athletic Association Directors: E. Don Copple, Attorney at Law; Frank Galey, Jr., Galey Construction Co., Inc.; Gil Gilbertson, Administrator, St. Luke's Hospital; Larry Jackson, Capital Planning Services, Inc.; Rich Jordan, Jordan-Wilcomb Co.; Jim Laughrin, Amtrol, Inc.; Rich LeDuc, Idaho First National Bank, Nampa; Lou Pejovich, Southern Idaho Enterprises; Gerald Rudd, Senior Vice-President, Albertson's, Inc.; Lee Scott, General Distributing Co.; Wanek Stein, Stein-McMurray Insurance, Inc.; J. Kirk Sullivan, Associate Director Gov. Affairs, Boise Cascade Corp.; Jim Walp, North's Chuckwagon; R. K. Woodhead, Senior Corporate Vice-President, Morrison-Knudson Co., Inc.; Dwane R. Kern, BAA past president, Cline, Smull, Hammill, Architects.

## BSU Women's Sports Get More \$\$ Boost

Women's athletics will have a boost in budget and programs under Director Connie Thorngren, this year. After a solid year of achievement by women's sports teams in tough competition, a reward came from the State Board.

Awarded is \$50,000 budget approval that will "substantially upgrade" opportunities for the program, as one BSU administrator put it.

In another women's sports "step forward", Jim Faucher, Sports Information Director, will help. He's named an assistant who will specialize in reporting on weekly gals sports events.

### Tonya Takes Third

BSU goat-tying champ Tonya Halbert brought home \$418 and a Bailey hat for her third place finish in the women's division of the Intercollegiate Rodeo National Finals held last week in Bozeman, Montana. She's the daughter of Mr. and Mrs. Amos Halbert, Eagle.

Miss Halbert qualified for the national finals by winning the regional goat-tying championship in June. Points of regional winners were carried over into the national competition, where Tonya had the third highest point total in the nation going into the contest.

### Humanities Grant Sought

Humanities students at Boise State University will benefit if the school's application for a major federal grant to that program is successful.

At stake is a three-year grant totalling \$199,514 to be spread throughout key programs beginning June 1, 1976.

GAINING MOMENTUM as they head to tape, BSU women tracksters symbolize drive of women's sports toward better schedules and programs here.

## Smallest Bronco May Be Biggest Help

An Israeli soccer whiz now "into football" may be a game-saving addition to the BSU Bronco football roster this year.

About the time Coach Tony Knap was wondering if he'd get last year's extra point and field goal woes cured, Avi Rofe [Roe-fay] marched into his office, all 5'4" of him, and volunteered to be the team's new place kicker.

As Coach Knap shortly discovered, Rofe was no novice "walkon". He was an

## P.J. Back To Broadcast Bronco Season

Paul J. Schneider will begin his third year as the "Voice of the Broncos" on Sept. 13 when the Broncos host Cal State Hayward in the 1975 opener in Bronco Stadium.

Schneider, sports writer for KBCI-TV and KBOI-Radio in Boise, is a 1966 graduate of the University of Idaho and joined KBOI Radio and TV in 1967 and became sports director in 1970.

He has announced nearly all sports including horse racing, auto racing, and the major team sports. He has won eight Idaho Press Club awards in the past six years in television, radio and newspaper categories. For the past three years, Paul has been a finalist for Idaho Broadcaster of the Year.

For the 1975 football season, he will be working with Larry Chase as a color commentator for Bronco broadcasts and with Jim Faucher for Bronco road games.

## Boosters Gather

The first Bronco Booster luncheon of the football season will be held Monday, Sept. 8, in the Student Union building on the BSU campus. This "preview" luncheon will feature comments from Bronco head coach and staff and the Bronco highlight film "The Bronco Legacy" will be shown.

The no-host luncheon will begin at 12 noon and is open to all Bronco Boosters and friends.

Those wishing to attend the luncheon and those to follow throughout the season are reminded that there is a new parking program on the BSU campus. To avoid a \$10 fine they are asked to park in the Bronco Stadium parking lot. The Bronco Stadium parking is open for those visiting the campus. It is just a short walk from the stadium to the Student Union Building.

NEW MONUMENT looming a football season against Hayward.

First Game Sept. 13

# Bigger,

by Jim Faucher

Boise State University head football coach Tony Knap is hoping that his fellow Big Sky coaches continue just one winning streak—that streak is picking the Broncos for the second straight year to win the league title.

It is the annual tradition of the league coaches to make their predictions at their August meeting. In 1974 they were seven for seven in predicting the final league standings.

Knap has his Broncos working out in Bronco Stadium in preparation for their season opener on Sept. 13 in Boise against Cal State Hayward. That game will be the first of seven at home, a schedule that should give the Broncos an edge for the 1975 season.

"I really like the condition the players came back in this fall," smiles coach Knap. "They are in fine shape and appear ready for the big challenge. I am looking forward to a very exciting year."

The road to their quest for a third consecutive Big Sky title won't be an easy one for the Broncos. Three of their four road games are league clashes with Weber State (Sept. 27), the University of Idaho (Oct. 11), and the season finale with Idaho State (Nov. 22).

### 35 Vets Return

The Broncos have 35 varsity lettermen back this year. A total of 19 seniors, 31 juniors, 18 sophomores and 11 freshmen are on the team.

Of the 18 sophomores on the squad in 1975, six of them earned varsity letters last year as freshmen. They are John Boben, Bob Cleveland, Alva Liles, Layne Osborne, Mike Roman and Ken West. The freshmen total does not count walkons this fall.

Replacement search for departed All-American Jim McMillan will be one of coach Knap's biggest chores. He has four candidates for the job, including two who played behind McMillan last year.

They are senior Lee Huey (6-1, 211), who completed 49 of 90 passes for 617 yards and six scores, and junior Greg Stern (6-4, 205) who completed seven of 21 passes for 122 yards and three scores.

Others include Boise junior Rik Lewis and freshman Hoskin Hogan from Compton, California. Knap feels that the quarterback situation will be thin in numbers, but most promising in talent. "Injuries to Lee or Greg or both could be a disaster. Rik Lewis represents the only backup and he is coming off a knee operation," Knap said.

The long starter returning to the back-

# OCUS ON SPORTS

Most campus skyline is the Mittleider Memorial deck [left] that brings Bronco stadium to 20,000 capacity. First public use will be when Broncos open home game against Hayward State here September 13, 7:30 p.m.

## Deeper and Ready

field is senior halfback John Smith (6-0, 188). Smith led the Big Sky Conference in scoring last year with 102 points (17 TD's) and was sixth in the national Division II in that category.

Ron Emry (5-11, 195), who played behind Smith last year at right halfback, has been moved to the left side. The two top candidates for fullback at the present time are Bob Cleveland (5-9, 187) and Tom Sims (6-1, 205).

### Encore For Mini-Receiver

Coach Adam Rita, who will be handling the offensive backs this fall, says "We have a good front line in Emry, Cleveland and Smith. The backup people and freshmen will play an important part as to the success of the team."

All of the Bronco "mini-receivers" are back. The top one is 5-8 junior Mike Holton who was second in the nation last year in 5.8 receptions per game. He was an honorable mention All American.

John Crabtree, a 5-7 senior, had 40 catches and six scores. Holton will be backed by 5-8 Bruce Pooley while Crabtree will have Clarence Smith and Ray Hooft behind him on the right side. Terry Hutt, who was injured in the fourth BSU game last year, will be redshirted for the 1975 season.

Prior to the start of the 1974 season, coach Knap was worried about his offensive line where he had just one starter back.

During the 1974 campaign that offensive line helped the Broncos to a total offense game average of 516.9 yards per outing, 334.5 yards passing, and 44.6

points per game—all three marks were tops in the nation in Division II.

This year Knap has three of five starters returning. Those three are senior guards Glenn Sparks (6-2, 232) and Jim Ryan (6-1, 240) plus senior center Todd Whitman (6-2, 218) who started a number of games. Behind Sparks and Ryan are Toots Kaahanui (6-0, 221) and Sal Failla (5-11, 230).

Those players vying for the starting tackle spots on the offensive line are senior Mike Reynolds (6-2, 240), junior Everett Carr (6-1, 225), sophomore Charley Keck (6-2, 224) and junior Mike Gasseling (6-2, 240). Backing up Whitman at center will be Steve Koski (6-0, 230) and possibly freshman Mark Villano (6-2, 215). Coach Dave Nickel says "with four seniors starting it will give us good experience, balance and leadership."

### Defense Seeks Replacements

With six starters gone, the battle is on for those positions. Top returnees on the front defensive line are Saia Misa, Jr. (6-0, 235) at right tackle and Pete Poumele (5-11, 230) at left tackle.

Misa was an all-league pick while Poumele made second team. Candidates for the left end spot are Mark Humphries (6-2, 225) and Kevan O'Hara (6-4, 220).

Challenging for the right end will be Alva Liles (6-3, 230), a sophomore; Chris Isom (6-3, 235), a junior; and sophomore Vince Mendiola (6-2, 225).

With the graduation of all-league middle linebacker Ron Davis and his backup Rocky Patchin, defensive coach Steve Buratto has three top players fighting for

that position. They are junior Kirk Strawser (5-11, 219), a redshirt from last year; Kauhi Hookano (6-1, 210), a junior; and freshman Norm Cochrane (6-2, 220).

Coach Buratto says that the defensive line and middle linebacker corps showed, through their efforts in the spring, that they will be very strong this fall.

### Two-Way Gorrell Returns

The lone linebacker starter back is senior Gary Gorrell (6-3, 215) who also led the Big Sky Conference with his left-footed punting, with a 41.5 average. Other outside linebacker candidates are Barry Munson (6-2, 205), Dave Williams (6-3, 200), Dave Fox (6-3, 206), Mike Roman (5-11, 210), and John Boben (6-2, 200).

Junior Gary Rosolowich (5-9, 180) at left corner and senior strong safety Clint Sigman (6-1, 200) are the veterans back in the secondary. John Inferrera (5-8, 160) and Todd Morgan (5-9, 184) will be pushing Rosolowich for his starting spot.

The two players striving for the open right corner position are Lester McNealy (5-9, 170) and sophomore Ken West (6-1, 180).

Pushing Sigman for the strong safety spot will be Jeff Tryon (6-1, 190) and freshman Sam Miller (6-0, 195).

A welcome addition to the Bronco secondary in 1975 will be senior Jim Meeks (6-4, 195). Meeks did not play in 1974 but came back to have a sparkling spring session in 197. Tom Deuel (5-10, 185) and Layne Osborne (6-0, 175) will be behind Meeks at weak safety.

Coach Tom Cruickshank has just one returning starter back in the secondary, but he feels that the determination shown in the spring will carry over into the fall drills for his charges.

## Harriers Face Race

For the 1975 cross country season BSU will present an almost new group of distance runners. Coach Ed Jacoby predicts that the group will be led by a youngster, who is a veteran to our program. Steve Collier, a sophomore from Ontario, Oregon "may be one of the best young distance men in the country" thinks Jacoby. Collier is current BSU record-holder in the mile and third place finisher in the 1974 Big Sky cross country championships.

He fell victim to a near disaster this past summer when a loaded hay slip fell on him, breaking several ribs. That has slowed his training for this fall's season.

Also returning to the cross-country squad from last year is Dave Frickle, a senior from El Monte, Ca. "He is running extremely well," says his coach.

Glenn Lorensen, the 16th finisher last year in the Big Sky championships, returns as a junior. He missed last

### 1975 Cross Country Schedule

Sept. 20	Alumni-Varsity	at Boise
Oct. 4	UI Invitational	at Moscow
Oct. 11	Oregon State	at Boise
Oct. 25	Northern Arizona	at Boise
Nov. 1	Utah State Invitational	at Logan
Nov. 8	Big Sky Championships	at Moscow
Nov. 18	NCAA Championships	

spring's competition after a bout with mononucleosis. Frank Willy, a sophomore from Boise, rounds out the returnees. Frank is basically a half-miler, now out to make the big transition from middle-distance running to cross-country.

New to the Bronco running scene are junior college transfers: Gil Esparza of Moorpark College, billed as one of the nation's outstanding JC runners in 1974; Jim Van from San Mateo College, "one of the top-ranked three milers in the JC ranks"; and Emil Magallenes, who as a freshman in 1973 at Monterey Peninsula College ran California's best JC steeplechase. "He is also a proven cross country runner," says Jacoby.

A freshman from Cheyenne, Wyoming is Bob Arias, from an outstanding team at Cheyenne Central. Arias ran a 9:30 two-mile at high altitude and a 4:28 mile.

"Defending champion Montana returns their entire top seven individuals and are led by one of the nation's premier runners in Doug Darko. Northern Arizona also returns all of their 1974 athletes with excellent new recruits. The Idaho Vandals, who are sound from last year, boast the most quality athletes of any in the conference, recruited for the upcoming cross country and track seasons."

BEFORE THE BATTLE—Bronco football lettermen relax before they get serious about September 13th opening game against Hayward State of California. l to r Mike Holton, Lee Huey, Gary Rosolowich, Mark Humphries, Glenn Sparks, and Gary Gorrell.

# BSU-Hewlett Co-operate

**MILLARD AT WORK**—BSU electronics instructor Dean Millard found out how new Hewlett Packard Electronics operation in Boise functioned as he worked with systems there this summer. He'll bring that knowledge back to classroom work.

by Kim Hale

As if in answer to the challenge issued by a Hewlett-Packard Engineering Inc. executive at ceremonies announcing the firm's new plant in Boise, BSU has already played a key start-up role for the firm this summer, with education benefits for the school's own electronics programs.

The challenge: Hewlett-Packard executives wondered if BSU could be an adequate training ground for the cooperative research-assembly personnel they would prefer to hire from this local area.

The answer: Dean Millard, BSU Electronics Instructor at the Vocational-Technical division promptly hustled to work at the H-P plant this summer, gained inside knowledge of the company systems and personnel needs while he enriched his own electronics skills that will be passed on to BSU students this year.

Cooperation between Hewlett-Packard and Boise State goes beyond Dean Millard's work experience this summer.

Hewlett-Packard has agreed to hand over obsolete component systems that can be recycled and used as teaching aids in BSU electronics courses. Already, BSU has received two large boxes full of component boards that can be heated up on a "shake-out table" so that the components drop out and can be reused.

Without this donation, students would have to purchase many of the components themselves, some of which can cost twenty dollars or more. "I don't know how many hundreds of dollars this will be saving us," stressed Dean Millard.

Hewlett-Packard plans to continue the cooperative program with Boise State, donating electrical systems and benefiting from the comprehensive training new electricians in the Treasure Valley will get from Boise State University.

## Hey Bronco Fans- It's Chow Time!

By Chef Lavar Hoff

With another Bronco victory behind, there's a great temptation to glow:

"All—right! Hey, Awright! Now let's go to the house and grab a bite . . . it's chow time.

But chow time can also be spendthrift times. In economy days like these, you may want to revive some great Old Idaho country party favorites that go great with drinks, make you look like a sharp host, and stretch party funds a longer way.

This week, we suggest to you a great economy recipe for Barbecued Beef Bronco-style that fills 25 buns amply.

And here's the menu to keep Bronco fans happy while you ladle out the barbecue meat:

- Celery Sticks filled with Peanut Butter and Chili Sauce
- Ritz Crackers filled with Cheese Spread
- Pickles - Dill and Sweet
- Olives - Black
- Barbecued Beef on a Toasted Bun
- Chocolate Cake
- Hot Apple Cider or Hot Coffee

This is a very easy, tasty, Bill of Fare for a group after a ball game or school function. Here is the formula for Barbecued Beef for 25 buns.

This is the first in a regular series of social-brightener recipes and food tips from Chef Hoff, of BSU Food Technology program.

### Barbecued Beef, Bronco-Style

4# paper thin sliced or chopped roast beef mixed with 1½ pints of your favorite Barbecue Sauce.

Heat until hot, 145 degrees F, and use 2½ oz. on a toasted Hamburger Bun and serve.

If you wish to make your own barbecue sauce, here is my favorite simple recipe for a yield of 2 quarts.

#### Ingredients:

- ½ c shortening or oil
- 1¼ c onions, minced
- ¾ c brown sugar
- 2½ tbsp. mustard, prepared
- 1½ tsp. salt
- 2½ c catsup
- 1¼ c celery, chopped fine
- ¼ c cider vinegar
- 1½ pt. water

#### Preparation:

1. Mince onions and celery using a sharp knife.
2. Place shortening or oil in sauce pan. Add the minced onions and celery and saute without browning.
3. Add all other ingredients and simmer slowly for about 30 minutes, stirring occasionally with a kitchen spoon.
4. Remove from fire and pour into a stainless steel container.

Some variations you might want to try with this recipe is to use olive oil as your shortening or you might want to use ½ tsp. dry mustard, for a little more twang, in place of the prepared mustard.

### GOES TO HARVARD

Roy Williams, son of Mr. Bob Williams, 1426 E. Washington, has been accepted by Harvard University, Cambridge, Mass. to continue his studies in philosophy.

## Printshop Now Cool

BSU's printers, platemakers and graphics technicians will beat the heat that has plagued their comfort and control of production conditions at the print shop when a \$5,500 air conditioning system is installed there this budget year.

The installation will be the second of two major equipment improvements for the key campus printing operation that produces 90 percent of the printing requirements for BSU classroom and administrative use.

Now on order and due for installation on arrival is a new computerized process camera. It is the key element in making photographic materials for offset plate procedures. The camera is twice as large, in negative capacity, as the compact, vertical camera that had been an over-worked mainstay of the operation until this year.

That smaller camera will be relocated within the renovated process darkroom to specialize in making photostats and single-copy reproductions for academic and administrative needs.

Print shop equipment generates considerable heat via high intensity arc lamps and other high-wattage lighting equipment. In warm months, interior temperatures in the plant soared to the point where it affected such key production factors as ink consistency on presses and developing chemical activity in the darkroom.

Result was a constant battle to maintain quality control, along with fatiguing discomfort for the printing plant labor force. Many lift, carry and operate heavy weighted equipment and supplies as part of their daily routine.

Plant Manager Steve Jensen says he expects a major improvement in press run control and other savings, as a result of the air conditioning installation.

## Vo-Tech Has 'Soup to Nuts' Classes

In one of Boise State University's most popular vocational-technical programs set this year, working people in the area can learn everything from preventing shop-lifting in their stores to electricity skills for locomotive engineers.

Under program coordinator Wayne Rogers, these "unique educational opportunities" are for working people who want to upgrade their career skills in formal course work.

Rogers says the program was immensely popular last year, with over one thousand students taking one or more courses from a list of 85 career improvement offerings, in 1974-75.

Courses use BSU vo-tech instructors or area business professionals as teachers, to keep course content closely keyed to "real working requirements" of vocational and technical fields.

Courses range from those in nurses' aid training through home beautification techniques to "Electricity for Locomotive Electricians". Course length may vary from three hours long to the 216 total hours in a course "Instruction for the Apprentice Plumber".

"All our teachers are certified by the state of Idaho or hold valid teaching certificates," emphasizes Rogers. He says people who want to get in the program can call him 8-5 daily at 385-1509.

## Apollo Trip 'A Blast'

Boise State University students saw history in the making this summer when they traveled to Cape Canaveral, Florida to eye-witness America's Apollo spacecraft blast-off toward its rendezvous with Russia's Soyuz.

Ninety-six students and area residents made the July 11-16 trip.

The blast-off climaxed four days of educational activities for the people who were in BSU's "classroom in the sky" workshop. The class, worth BSU credit, was especially organized to study the Apollo mission.

While at Cape Canaveral the group heard talks from space experts and toured the Kennedy Space Center. Closer to launch time, they were given detailed information about the mission by scientists who conducted experiments on the flight.

Tour leader Tom Campbell said the group represented a varied cross section of students and teachers from four western states as well as Idaho.

The Apollo trip is the second such venture by BSU. Two years ago another group went to Florida to study the Skylab project.

## Respiratory Students See Kellogg Miners

Seven Boise State University students traveled to Kellogg in August to measure breathing capacity and take blood pressures of area miners.

The students, all sophomores in Boise State's respiratory therapy program, conducted the tests as part of the Idaho Lung Association's statewide health program.

BSU was chosen for the project because its respiratory therapy program is the only one in the state that had enough personnel to test the 350-500 miners in one week. They have conducted similar tests for businesses in the Boise area this year.

Students on the trip include Dale Aspelund, Allen Albright, Beck Wingett, Gary Newhall, Teri Norell, and Leeanne Peppard, all Boise, and Esther Anchutegui, Mtn. Home.

The group left Boise Sunday, August 17 and returned Friday, August 22.

# bsu FOCUS PERSPECTIVE

## What Are We Doing Here?

Well, here we go. Somewhere between coolly objective journalism and fevered flackery will fall "Focus", this monthly tabloid newsmagazine for people who want to read about Boise State University's people. In Volume I, No. 1, we've edited a summer smorgasbord of reading fare into compartments that fit our news flow. If they work—and more issues will tell us that—you can scan "Focus" this way:

Initial pages, generally the first three, will carry news we judge to be of universal interest—"university affairs". They are stories of university politics, finance and major personnel shifts.

Across pages four through the center section, we've loosely organized news about BSU's major schools—business, arts & sciences, education and health sciences. Running as a strand beneath all these sections is the university "who's who" feature we have titled "BSU People On The Move". As submission deadlines permit, the travels, honors and accomplishments of our faculty and staff are reported under departmental headings.

Across the center spread, and for a page or so following, Sports Information Director Jim Faucher and Bronco Athletic Association Director Don Kubitschek combine to bring all BSU alumni, fans and friends a collation of major news about the interscholastic sports efforts by Bronco men and women teams.

Editorials from the "Focus" staff at the information office, together with the opinions of President Barnes and a selected guest columnist are the fodder displayed and clearly labeled as "Focus Perspective", the only personal point of view page for what we hope is a generally objective and balanced newsmagazine.

BSU's "outreach" activities that include extended day and night programs, community education efforts by our staffers and campus use by public agencies for special events and summer sessions are the make-up for page 13. A logical association to these activities, it seems to us, is the community-close array of vocational-technical division news. So they come next.

Finally, in a "last-but-not-least" display, is the news and column comments produced by Dyke Nally and the BSU alumni office. For reader convenience, we have closed the magazine with these alumni announcements, then a last page of official university "bulletin" news.

So much for the paper's physique. Its philosophy is to travel the lengthy route of residences where BSU employees and friends reside, dropping some good and trenchant news along the way. Its aim is to package the university's life, carry it out where it may be seen, pondered and discussed with the citizens who share our piece of Idaho's higher education chore. To the degree that your monthly issue of "Focus" comes welcome, stirs interest and produces reaction to its contents, we'll judge our success.

## They Give, So BSU Gains

May we have leave for some parenthetical encomiums that underline an attitude of which we're very proud, at BSU? If the "Focus" monthly newsmagazine fulfills its goal as a special force for better communications within the university and between it and those beyond the campus, much praise goes to some people who acted in a most un-bureaucratic manner on this one.

For this is not really a "new start" cost item that leaped, like Venus from the waves, from somebody's excess funds embarrassment. Rather, it is a production that melds, in one monthly edition, the costs and efforts that were formerly being scattered to specialty university audiences by several university departments.

As any good government watcher knows, you don't go around making such efficiencies in production with a simple wave of a memo or two. For Focus to have a budget, others had to yield theirs to its uses.

Thus members of the B.A.A. generously let Focus step in where their publication "Impact" used to travel. And Herb Runner, with the blessings of Executive Vice-President Dr. Dick Bullington, transferred funds and news systems of the old BSU Faculty Bulletin into the centralization concept that is "Focus".

Most significantly, Dyke Nally and his BSU alumni association membership offered the major budget and production systems of the alumni magazine, for blending into "Focus" as a total university newsmagazine.

Everyone talks about eliminating duplication and more efficient coordination with, usually, as little sincerity as they do about quitting cigarettes. We're proud of the people who have put budget authority and editing control where others' mouths are. It's evidence there's hope for bureaucracy yet.

### Dear Sir!

(Letters to Focus will be edited, in consultation with their authors, for adherence to good taste, reasonable length and legal implications.)

#### LAMENT OF THE MAILING AGENT

Letters all prepared and sent out  
On [we think] the proper track;  
Have to pay to mail them to you;  
Moved? - We pay to get 'em back!  
Now we are just where we started -  
Correct address, still we lack.

You can help this situation  
If you only keep in mind  
When you move, and we don't know  
it,  
Make us your hand to find  
Just a card, with information,  
Sent to us would be SO kind!

This would save us time and  
headaches  
Also save the extra cost . . .  
Keep the mailing list more useful.

Save the mail from being lost  
Would you, maybe, do that favor  
And not feel you're being  
"bossed"?

Kathy Woods  
BSU Alumni Secretary

### It's Deductible

BSU's Scholarship Parking Plan is tax deductible according to Roger Green, Vice President of Financial Affairs. \$28.00 of the purchase price has been okayed as a tax deductible item.

Confirmation came from Touche-Ross auditors on the matter. A representative from that firm took the issue to IRS officials and was given a nod of approval.

The remaining \$2.00 of the parking price is to be used to defray the cost of decals, managing the parking system, etc.

### As I See It:

by

Dr. H. David Croft

I felt it a great honor and privilege to become President of the Boise State University Alumni Association.

The Alumni Association has a very strong and active role in the development and advancement of the University and to achieve the goals Dr. Barnes has projected for the future.

To enable the Alumni Association to maintain this viable, active role we need HELP. Help in number; and of course, financial help from you, the members and friends of this University.

It may be necessary for every one of you who feels the priorities are great enough to personally contact the state legislators in your district, the State Board of Education members, and possibly the Governor.

We need dormitories, classrooms, research facilities, and library upgrading immediately. No other school, to my knowledge, in the Northwest is utilized to the extent day and night as is Boise State University.

To cite some figures on student enrollment for the fall of 1974, by county; Kootenai-29, Latah-14, Nez Perce-31, Idaho-26, Valley-89, Washington-69, Payette-95, Gem-123, Canyon-1150, Elmore-294, Twin Falls-168, Minidoka-57, Bannock-32, Bingham-46, Bonneville-124.

It is easy to see we are not merely a Boise or Treasure Valley university.

The science building just under construction is the first academic classroom building to be funded by state appropriations. The State Board has now recommended \$3,350,000 for Phase II of the building.

Ask your legislators to appropriate these funds to build the education portion of the science-education building. It is truly needed—today Boise State has fifty-four full-time faculty in older homes off-campus.

## Barnes in Focus

by

Dr. John Barnes

We welcome this opportunity to help portray to the public of the state of Idaho a monthly picture of the activities of Boise State.

For some time the University has been endeavoring to coordinate its on-campus communication with faculty and students, and its off-campus dialogue with leaders of the media and members of the general public.

The state system of higher education provides many services to the people of Idaho.

Boise State, the University of Idaho, Idaho State University, and Lewis Clark State College work together in helping to meet the instructional, research, and service requirements of the state.

We hope that the Boise State University FOCUS, during the year ahead, will help to enlighten not only the activities of Boise State, but the healthy working relationships which exist with other public and private institutions of higher education.

# 18 States Supply New Faculty 'Family'

Sixty-five newcomers to the BSU campus are preparing coursework, organizing offices, meeting department colleagues and deans, and generally settling down for business as the fall semester begins.

Teaching subjects diverse as art and v-tech, the new faculty members come from Idaho and 17 other states to bolster the BSU teacher roster. Biggest faculty gain was in the School of Business, with 12 new members. Education boosted their staff by 10, and the Vo-Tech school added 8 new members to post a close third.

New teachers, and their assignments by department, are:

## ART

Dr. Elmo B. Benson, Boise, assistant professor; Ms. Patricia L. Heddell, Ridgecrest, California, special lecturer; Mr. John A. Taye, Salt Lake City, Utah, instructor; Mr. Ronald S. Taylor, Logan, Utah, instructor.

## BIOLOGY

Dr. Robert C. Rychert, Newburg, Oregon, assistant professor; Dr. Marcia C. Wicklow, San Francisco, California, assistant professor.

## BUSINESS

Dr. Robert T. Adkins, Fayetteville, Arkansas, associate professor of Marketing/Mid-Management; Dr. George R. Kaiser, Bozeman, Montana, assistant professor of Accounting/Data Processing; Dr. Howard J. Kinslinger, Boise, associate professor of Management/Finance; Dr. Peter M. Lichtenstein, Boulder, Colorado, assistant professor of Economics; Mr. Robert D. McWilliam, LaGrande, Oregon, associate professor of Marketing/Mid-Management; Mr. Robert

D. Miller, Boise, assistant professor of Accounting/Data Processing; Dr. Jerold R. Millier, LaGrande, Oregon, assistant professor of Accounting/Data Processing; Dr. Alexander M. Sarko, Boise, assistant professor of Management/Finance; Dr. Vina Y. Sloan, Tempe, Arizona, assistant professor of Accounting/Data Processing; Dr. Jesse M. Smith, Manchester, Missouri, professor and Chairman of Management/Finance; Dr. Thomas E. Stitzel, Corvallis, Oregon, professor of Management/Finance; Mr. Laddie J. Sula, Decatur, Georgia, assistant professor of Economics.

## COMMUNICATION

Ms. Rosalyn O. Barry, Caldwell, assistant professor; Dr. Jerry Burk, Madison Heights, Michigan, associate professor; Mr. James W. Riley, Salt Lake City, Utah, assistant professor.

Mrs. Helen E. Carlson, Mountain Home, adult basic education; Mrs. Willa M. Chaffee, Caldwell, health occupations coordinator; Mr. Samuel D. Houston, Boise, instructor; Mr. Marvin C. Moist, Star, instructor; Mrs. Phyllis Oliver, Boise, instructor; Mr. Thomas Olson, Boise, instructor; Mrs. Marla Petersen, Boise, adult basic education; Mr. Walter Tucker, Caldwell, instructor.

**FIRST BUYER** of Your Campus Store coupon books that went on sale as school opened this month is President Barnes, who shelled out \$6.95 to Campus Store Manager Betty Brock. She says the books contain \$200 in merchandise at substantial discounts, with \$1 from each booklet sale ticketed for Bi-Centennial Scholarship fund.

## Campus Store Warns On Book Refunds

BSU's Campus Store has initiated a new policy that warns students not to buy textbooks until they attend their classes. No refunds will be made on fall textbooks until September 8. Instructors are asked to remind students of the new policy.

According to Betty Brock, Campus Store Manager, "We just don't have the room, we need to use every cash register for 'outgoing' customers and do not have the manpower to handle book returns."

Betty blames increased enrollment but no increase in her floor space for cramped quarters. "We will also have 200 additional charge customers this semester because of increased athletic scholarships."

A coupon book containing over \$200.00

in values will go on sale only at the Campus Store sometime this month for \$6.95. According to Ms. Brock, \$1.00 of every sale will go toward the student scholarship fund.

Radio KBBK is cosponsoring the project and will provide free advertising to promote the Campus Store coupon book.

The Campus Store is sponsoring the "Traveling Book Display", a 44' van, loaded with new books for faculty inspection.

This is the first time the van, a product of "College Marketing", will appear in Idaho. It is scheduled to park in front of the Student Union Building, October 8 and 9.

## Lookout Turns Into Restaurant

Boise State's newest noon eatery will open in mid-September when the SUB Lookout turns into a buffet restaurant.

The restaurant will also have a menu of hot and cold sandwiches and a salad bar, says ARA food services director Gary Ribiero. He added that there will be some waiter service.

Ribiero said the restaurant will keep its old name but take on a new look. Tables will be covered, walls painted and more plants added. Workers are now installing a broiler and grill.

Hours will be 10:30 a.m.-1:30 p.m. and opening is set for about Sept. 16, Ribiero speculated.

Seldom used during the noon hour, the new Lookout should provide a "place for teachers to meet with students beside the more noisy snack bar," Ribiero said.

## Artists Win

Two BSU bookstore employees were prize-winning artists at the Idaho State Fair in August's last week reports Bookstore Manager Betty Brock.

Louie Goitia won the Best of Division, Judges Choice and Second Premium awards with a single work "Bringin' 'Em Home", an acrylic painting. Frank Goitia won a second place ribbon with his watercolor work.

## FOCUS People on the Move

### In Education

David Ferguson and Jerry Young attended a week long institute at the University of Indiana in Bloomington, Indiana during the last week in May.

The institute prepared the university teachers in the use of new materials and approaches in educating teachers for the public schools.

### On Staff

Boise State employees Mary Cozine, Ernie Roberson and Jeri Rose attended the National Association of Educational Secretaries' 41st annual conference and institute held July 16-25 at the University of Arkansas in Fayetteville.

Mary Cozine and Dean Gerald Wallace,

## BSU One of 15

Boise State University's nursing department will play a key role in a nationwide study of the way students are selected for nursing school.

BSU is one of only fifteen universities included in the study conducted by the National League of Nursing.

Dr. Patricia Nash, study director, visited BSU August 18 to interview with administrators and staff members who have a hand in student recruitment and selection. Later she and her staff will contact last fall's applicants to the BSU nursing school.

Major purpose of the study is to determine kinds of student selection methods used by schools of nursing. It will also look at student assistance programs throughout the nation, especially those for minority students.

### RILEY NEW DEBATE COACH

Boise State's successful debate team starts its 1975-76 season under a new coach, James Riley, this fall. Riley's team opened its competition year September 2.

BSU debaters will travel to every far west state as their season runs through April 1976.

School of Education, presented a higher education workshop during the conference. Wallace was named National Educational Administrator of the year at the 1974 meeting of the association.

About 450 educational office personnel from throughout the United States attended the conference.

### In Library

David Andresen, David Crane, Evelyn Everts and Ruth McBirney attended the annual meeting of the American Library Association in San Francisco last July.

Gloria Ostrander attended a seminar on "Revised Anglo-American Cataloguing Rules" last June in Provo, Utah.

Robert McDowell has returned to BSU after a year in Seville, Spain as librarian for Columbia University.

## BSU Students Send for Credit

Correspondence study in Idaho has been in existence since 1928, and yet not many people are aware of the advantages and possibilities offered by this type of schooling.

According to Susan Burcaw, U of I and coordinator of correspondence study in Idaho, the program first began on the University of Idaho campus but the State Board of Education soon found it more feasible to use the faculty of all the universities.

Boise State University, ISU, U of I and Lewis-Clark State College work together to provide a correspondence study program of high caliber where credits are easily transferred between campuses.

Susan Burcaw appears on the BSU campus as much as possible, usually every six weeks to evaluate the program at this end of the state. "The Boise valley has the population and guidance needed to provide a tremendous correspondence program."

"Bill Jensen, Director, Off-Campus Programs, is so dynamic . . . he has really improved the program since he joined BSU," exclaimed Ms. Burcaw, "and Dr. Bullington, Vice President, has been of tremendous help since the program first began."

Correspondence courses offer college credit from the four cooperative schools; high school courses and special non-credit courses. Registration is at any time.

The purpose of correspondence study is to provide an opportunity for students to continue their education, complete degree or certification requirements, to work at their own pace at home, and to receive individual attention on a one-to-one basis.

"In all cases we recommend that if students can take a course in class or a group situation that he take that route," commented Susan Burcaw. "But, in many cases when a student simply cannot travel to a campus the correspondence courses are invaluable."

Continuing education through correspondence is especially helpful for such professionals as nurses and engineers who are unable to take a leave from their jobs and attend class.

In general, up to 32 credits are allowed to fill requirements for a college degree. Each college credit costs \$22.00, the fee strictly going toward offsetting costs.

Currently, the program encompasses 1,000 individuals who are enrolled in over 100 different courses.

Further information may be obtained by writing to: University of Idaho, Correspondence Study Offices, Moscow, Idaho 83843.

### After McCall

## Busy BSU Goes to SW Idaho

by Larry Burke

People who doubt the truth in the old maxim "no rest for the weary" need only to take one look at BSU's continuing education director Bill Jensen and they'd be confirmed believers.

After he successfully choreographed students, teachers and classes to produce BSU's new "mini-summer school" in McCall, Jensen jumped into a busy August in preparation for an expanded off-campus program this fall.

Designed to serve the educational needs of heavy summer population, the McCall school featured seven classes in subjects that ranged from mushrooms to metrics. To teach the BSU Jensen got the services of such BSU experts as Lou Peck, head of the art department, and William Kirtland, director of the school's Reading and Education Center.

"We didn't cut any corners . . . all classes were fully accredited and all had excellent professors," says Jensen.

Jensen said he organized the schedule to appeal to several groups. Some classes were for teachers, others for tourists and others for residents.

The result . . . a highly popular set of July-August classes that attracted over

160 people.

### College Across the Land

Now Jensen is again hard at work to arrange classes and professors to meet the educational demands of southwestern Idaho communities.

This year he estimates the program will be BSU's biggest in history, even larger than last year when the university stretched out to the communities of Caldwell, Nampa, McCall, Mountain Home, Glenns Ferry, Payette, Meridian, Emmett, Ontario and Marsing to offer over 30 classes to nearly 500 people.

At times Jensen pulls a thin line. He is on a self-supporting budget so fees from each class must pay for its own advertising and instructor. That means at least 12 people must enroll before the class can break even.

"We just can't go into a community and offer a course because if only a few people enroll we have to cancel. So we have to find out the needs first and then offer the class."

To help him walk this financial tight-rope, Jensen has asked for \$89,000 from the State Board of Education.

To match community interest and BSU classes, Jensen goes to local Chambers of Commerce and schools to see what people

**BIRDS' BUDDIES**—Youth Conservation Corps, working off of BSU campus this summer lugged materials and labor into Southern Idaho wilds to build new nesting sites for endangered bird species, clean up trails and campgrounds.

## Birds Benefit from YCC Effort

by Kim Hale

For those who care about such things, the geese and hawks of Treasure Valley will rest easier from now on thanks, in some part, to Boise State University's care and feeding of the people who built some better nests for these hassled species.

For their part, Idaho's Youth Conservation Corps workers fanned out all over the key wild geese and predatory bird sanctuary areas this summer to erect safer, built-to-order nesting sites.

But the young conservation crew had good nesting, too, at BSU.

BSU's Housing and Food Service operations, under Director of Housing Jon Vestal and ARA Services Manager Gary Ribiero, kept the young conservationists rested and fueled up for their worthwhile labors in the field.

As host to the YCC program, BSU takes on a complicated responsibility to meet housing and food conditions set down by the federal-state agency group that finances all costs for the program.

Working with help from the U.S. Forest Service, the Bureau of Land Management and the Soil Conservation Service, the youngsters are employed to repair trails, improve wildlife habitat and clean up

recreation facilities in the Southwest Idaho region.

They're kids who cannot find jobs for summer elsewhere and their work would not be done by any other labor group. So BSU, through Special Projects Director Jerry Reed, spotted the opportunity to put some summer money into its Housing and Food Service tills while assisting a worthwhile non-profit environmental improvement project.

This is the third summer for BSU's helpful role as housemother to several dozen trail-weary teenagers, who get lonesome, starving obstreperous, and delightful to be around, in unpredictable turns.

Biggest burden falls on the food service team that must meet the kids' complex travel schedule set down by Ken Runyan, a blonde cub bear of a man who hugs them and drives them with equal parts of crew boss and Godfather.

For that, Runyan gets a lovingly enthusiastic heave into one of the campus irrigation ditches when the ceremony ends in a final picnic and award ceremony each August.

For his work, food service director Riberio gets a couple of weeks to clean up his kitchen, store away the box lunch and sack lunch equipment before the real school year dorm hordes hit his snack bar and upstairs dining rooms.

## Education Evenings This Fall At BSU-Community Helps

by Chris Schultheis

Several Boise-area organizations will bring BSU this fall to present non-credit evening classes in Estate Planning, Retirement Planning, Law For Laypersons, Anxiety and Its Management, and Beginning Flower Arranging.

For example, says program Assistant Director Bob Gibb, the new Law For Laypersons course is cosponsored by the Idaho Law Foundation, education arm of the Idaho State Bar Association.

Ada County Prosecutor David Leroy is scheduled to speak on criminal law, and Rudolph Barchas of the State Attorney General's office will discuss consumer law. The lecture series will also include attorneys from ten Boise law firms. Topics will range from employer-employee relations to family law to community property.

### Estate Planning

Estate Planning is a joint project of BSU and the Boise Estate Planning Council. Trust officers, insurance firms, lawyers, accountants, and judges, Gibb notes, work daily with estate planning and probate administration.

The course is designed to reduce confusion about different types of property, and different methods of preserving and distributing estates. It will include family budgeting, investments, estate taxation, social security, life insurance, guardianships, wills and trusts, and probate procedures.

### Retirement Planning

Gibb claims that Boise State's class in Retirement Planning "is on the cutting edge of new and innovative programs. It's extremely important, I feel, because if we can eliminate retirement shock, we will have made a great contribution."

The course is offered in cooperation with several state agencies, including the Attorney General's office, and will cover areas as diverse as the aging process, estate and financial planning, family relationships, consumerism, volunteer activities, and creative use of leisure time.

Gibb says: "This class will meet a most pressing community need if it can improve the quality of life to an ongoing, joyous experience rather than a damp, dark prison by helping plan adequately for retirement."

Dr. David Torbet

Designed for general appeal is the school's popular "Anxiety and Its Management" class, coordinated by Dr. David Torbet of BSU's Counseling, Guidance and Testing Center. When this course was offered on campus last fall, Gibb recalls, it filled the entire lecture hall of the Liberal Arts Building.

Course content will be similar this fall, he says, but will feature more emphasis on the practical question of what a person can do about anxiety. It will be conducted by a panel of experts which includes local psychiatrists and psychologists, neurologists, clergymen, and BSU instructors in philosophy, psychology, and the social sciences.

A fifth area of community interest will be covered in a new class called "Flower Arranging For Beginners", co-sponsored with the Southwest District Flower Judges of the Idaho State Federation of Garden Clubs.

Students will learn the history of American floral design, and study different principles of design creativity and form. There will be lots of practice doing actual arrangements under expert instruction, too, says Gibb. Enrollment for this class will be held to 30 persons, because of limitations on equipment and supplies.

Gibb stresses that all classes except Flower Arranging will feature special rates for single lecture sessions, plus a special reduced rate for Idaho residents over 60.

# Alum Returns From Zaire Stay

by Larry Burke

For Boise State alumnus Ken Stewart, Boise's July heat wave was a mere cool spell. He was more accustomed to the 120-130 degree temperatures that he left in the African country of Zaire where he spent two years as a Peace Corps volunteer.

Stewart, a 1973 math-education graduate of BSU, returned to Boise this summer after he lived in the inland town of Ipamu, located deep in the African bush nearly nine hundred miles from a large city.

A teacher of math and science at a small Catholic boarding school, he says the experience was a "real eye-opener."

*"They really had little contact with the outside world . . . not much television, radio, newspapers or magazines. The only thing they knew about the modern world is what they learned in school. Since they learned mostly by memorization, they couldn't relate to very much," he explained.*

He said in all cases his students were the first generation to attend secondary school. Most of the students came from farming families who used their profits to send their kids to school.

Zaire, the scene of the Ali-Foreman fight, is now crazy about boxing, said Stewart. And he noted that all the students were keenly interested in the American space program.

Stewart laughs when he says he enjoyed his stay. But at one time he did think of remaining for a second term with the Peace Corps.

"Africa is an exciting place . . . it's a tremendous thing to see a country develop and grow."

*"Here in the U.S. we take so much for granted that we don't appreciate many things—like food and water. But when you have to think about those things every day you appreciate them more."*

Ken Stewart

While in Zaire Stewart stuck to a European style diet, but he did sample some of the country's exotic food, such as monkey meat. He found native foods like dried caterpillars and termites as "not bad" but added with a laugh that he didn't eat them as part of his daily fare.

*"Village life is hard for the people . . . few young want to stay home. All of my students wanted to continue their studies at the university, but most didn't know what they wanted to do after that."*

Despite its recent low-key role, Stewart feels the Peace Corps is still a very valuable service to other countries.

*"It's the best way that America's assistance program can be handled. The contact is people to people rather than through government agencies," said the well tanned Stewart.*

He noted that countries like Zaire have some traits that America could use . . . like the slow pace of life and relaxed atmosphere. "Time and schedules don't rule people's lives there," he reflected.

After his two years in Zaire, Stewart said he has "slowed down quite a bit . . . I don't get worried about things like I used to."

Now he is combing Idaho in search of a teaching job so he can put his African experience to good use for Idaho's youth. And he especially enjoyed his "cool" Idaho summer.

**MOVING IN**—One of the two busiest spots on BSU campus as fall term opens is the Towers dorm, where resident students check in to find room assignments for the year. All housing is full, with private housing the only alternative for late arrivals.

## BSU Foundation Holds Bread & Butter Session

BSU Foundation President James D. McClary moved quickly through a list of what he called "the bread and butter things", then pronounced the major BSU private fund-raising organization "caught up and paid up on an ongoing basis" at the foundation's annual summer business meeting August 18.

McClary noted the foundation was in a low growth phase, as it continues to maintain approximately \$63-thousand in investments, turning revenues over to university development needs.

In brief remarks at his turn before the group, BSU President John Barnes expressed satisfaction at the foundation's work thus far, urged them to work toward more asset acquisitions in the future.

Noting that BSU will have 54 faculty members housed in older homes that have been revived from various stages of disrepair" and that BSU is still two years away from getting classroom relief in its new science building, Barnes called on the foundation trustees to work hard within the organization for private fund increases.

Earl Chandler was elected to a position on the board of trustees of the foundation, as a final action at the meeting.

### Subal Season

The 1975-76 Subal Theatre season has been tentatively set.

At present the season is as follows: "The Country Wife" by William Wycherly; "One Flew Over the Cuckoo's Nest" (stage adaptation of the Ken Kesey novel); "America Laughs" (a bicentennial celebration of American humor); musical comedy in conjunction with the Department of Music (title not yet selected); and "The Madwoman of Chaillot" by Jean Giraudoux.

## FOCUS People on the Move

### In Geology

Dr. Clayton Nichols, associate professor of geology, has taken a position as program manager for resource evaluation in the geothermal division of the U.S. government's energy-research-development administration (ERDA) in Washington, D.C.

Nichols, a BSU prof for five years, will evaluate geothermal sites throughout the U.S. as part of his new job.

Dr. James Applegate was in Alta, Utah Aug. 24-28 for a conference with 40 other geophysicists. Participants in the conference studied methods of detection of geothermal resources.

### In Arts

Dr. Robert Ericson, Department Chairman, attended a June meeting of the Idaho Alliance for Art Education held in

### Big Alumni Dates

- Sept. 13 BSU vs. Cal State, Hayward. Champagne reception, Union Pacific Depot Garden. 5:30 p.m. FREE CHAMPAGNE.
- Oct. 11 BSU vs. University of Idaho. Victory Party. 4 p.m. Elks Lodge, Moscow.
- Oct. 18 BSU vs. Las Vegas. Victory Party. Immediately following game, Rodeway Inn, Boise.
- Nov. 15 Homecoming. Watch for special Homecoming schedule of events in next issue of FOCUS.
- Nov. 22 BSU vs. Idaho State University. Victory Party. Immediately following game, Bannock Hotel, Pocatello.

### Milbrooke Returns

Anne Millbrooke, one of BSU's most sought-after graduate scholars, will visit her native campus here this fall as a pause in a nation-girdling schedule.

A 1973 History graduate "with distinguished honors", Ms. Millbrooke has since whipped through Masters degree work at U. Wisconsin and U. Pennsylvania, now has only some final completion work before she wins a Ph.D. in the History of Sociology of Science.

While back at BSU, Ms Millbrooke will deliver two formal talks, plus share her postgraduate experience and philosophies with students here.

BSU's Honors Program was in its formative years with Ann Millbrooke as one of its brightest "stars", during her BSU years. She has since played key roles in Honors schools at Wisconsin University and at Pennsylvania U.

The talks at BSU will be "Science In Utopia: The Case of New Harmony Indiana 1825-1828"; and "Promoting State Science; The Geological Society of Pennsylvania 1832-1836".

### Geologists Gather

Boise State University's geology department hosted over 700 geologists last spring at the annual regional meeting of the Geological Society of America.

BSU geology head Dr. Kenneth Hollenbaugh, chairman of the May 2-6 meeting, said geoscientists from nearly every state west of the Mississippi and many foreign countries attended. One hundred fifty scientists presented papers, including several BSU faculty and students.

Theme of the conference was "Geologic Structures and Geothermal Research in the Western United States."

### Epilepsy Talks Set

A five-session conference on epilepsies will be held this month on the BSU campus.

According to organizers Howard Welsh and Susan Havlina, it will focus on legal, educational, medical and vocational implications of epilepsy.

Co-sponsored by the BSU health sciences committee and the Idaho Epilepsy League, the conference will open 7 p.m., Sept. 8 in the Student Union Building.

At the next three sessions Sept. 12-13 forty member task forces made up of BSU faculty and students, community members and the Idaho Epilepsy League will draft a legislative "plan of action" for epilepsies.

The plan, which will be presented at a 7 p.m. public meeting Sept. 15, will be given to state agencies who deal with epilepsies.

### Gooding.

Dr. Ericson will coordinate a special dramatics class this fall, in conjunction with KAID, Channel 4.

Del Corbett, associate director of the Subal Theatre, extended his academic leave for one more year to work on a Ph.D. in theatre at the University of Oregon.

Larry West will stay on as guest director and coordinator for the Idaho Invitational Theatre Arts Festival at BSU. This summer, West directed "Butley" for the Intelist Theatre.

Roger Bedard will be on leave during 1975-76 to begin work on his Ph.D. at the University of Kansas.

John Killmaster, Assistant Professor of Art at BSU, used a Western States Arts foundation fellowship this summer to expand his work in porcelain enameling on steel and copper grounds.

One artist in each of the ten WSAP states was named to receive a \$5,000 Fellowship Award.

Delores Ringer leads new faces in the cast as BSU Theatre Arts gets personnel set for a busy production year, according to department chairman Bob Ericson.

Ms. Ringer has been appointed Theatre Arts Guest Designer for the 1975-76 academic year. From Pennsylvania State University, she has served as scenic and costume designer for the Utah Shakespeare Festival at Cedar City for several summer seasons. Ms. Ringer will teach a special topics course in costume construction this fall.

## Dyke On The Line

by Dyke Nally

I meet many people in my work as Alumni Director who are unaware of the fact that they qualify as alumni of Boise State University.

Any person who has attended BJC, Boise College, Boise State College, or Boise State University for two semesters or more is in fact an alumnus and is entitled to all privileges of the Association.

Some of these privileges include life time library use, swimming pool, Student Union and games area, university job placement service, alumni publications and all alumni tours and social functions.

One of the most difficult tasks as Director is keeping in contact with the 10,000+ alumni of BSU.

I need your help. Please let me know if you change addresses, also

### ALUMNI CHAMPAGNE RECEPTION AT DEPOT.

Boise State University alumni and friends are invited to attend a free champagne reception to cheer the Broncos on for the coming football season.

Last year some 400 persons attended.

The corks will start popping at 5:30 on September 13 at the Union Pacific Depot gardens immediately before the BSU/Cal State, Hayward game.

All alumni and friends are urged to attend.

if you get promoted or change jobs. Other members would like to know about your promotions and I would like to use it in keeping your alumni file current.

If you know of other alumni who are not getting alumni mail or who have not received their free lifetime membership card, please let me know and I'll contact them.

Another question I get from alums is "How much does it cost to join the Alumni Association? There is no charge.

The Association gladly accepts donations from its members based on what they can afford and what they wish to contribute, but there is no mandatory fee to belong. We really just want your involvement.

Help Boise State University get adequate funding, discuss the University with your friends, come back and visit, and be proud of the fact that you attended such a great university.

## Wieggers Returns

Karl Wieggers, Boise State Alumni, will be visiting the Boise State campus on October 27, 28 as he returns from the National Honors Council conference.

Karl will discuss his undergraduate education and current graduate work in chemistry with BSU students and faculty.

The National Collegiate Honors Council has drawn Karl for four years. He will appear this year as an official nominee for the executive committee.

Wieggers graduated with a "highest honors" major in chemistry from BSU. He's currently continuing his work toward a Ph.D. in Organic Chemistry at the University of Illinois, as a National Science Foundation Fellow.

FAIR BOOTH SALESMAN for BSU is High School Relations Coordinator Jerry Davis [r] Davis and other BSU development representatives manned the popular university booth during the Idaho State Fair Days.

## Agee Tapped Outstanding Alum

William Agee, Executive Vice-President for the Bendix Corporation at Southfield, Michigan, has been selected Outstanding BSU Alumnus by the BSU alumni board of directors.

Of the 1958 Boise college graduate, alumni board members issued this reference in their citation:

"The award is presented in sincere appreciation and recognition of outstanding cooperation and assistance rendered not only to the alumni association but to the university as a whole."

Born in Boise, William Agee attended Meridian High through 1958, then took an Associate of Arts degree from BJC.

He transferred from Boise to Harvard University, where he took his bachelors and masters degrees, in business administration.

Agee's Harvard Masters degree was awarded "with distinction", in 1963. With Bendix Corporation since 1972, Agee acts as chief financial officer for the company, plus serves on the executive, finance and retirement committees for the firm's administration.

With his wife Diane and three children, they live in Bloomfield, Michigan.

## New Alumni Head

Dr. David Croft will lead the activities of the Boise State University alumni board of Directors as 1975-76 president for the organization. Dr. Croft, a Caldwell physician, will serve with Jim Diekey of Boise as vice-president; Michelle Morrison of Boise as secretary and Jack Adkins of Boise as Treasurer.

Directors for the current year are Boiseans Roger Allen, Russ Biaggne, Ed Hedges (ex-officio), with Pocatello businessman Gary Dance.

Regional coordinators for the alumni activities around the state are Gary and Keerleen Dance for Southeastern Idaho; Gary Likkell of Grangeville for Central Idaho, and Dean E. Tuley of Twin Falls for Southwestern Idaho.

## Alumni Continue Scholarships

Despite hikes in overall office and program operating costs, the BSU Alumni association will maintain its annual donation of ten "full-tuition" scholarships to selected BSU students, during the coming school year.

Alumni Director Dyke Nally said recent analysis by the alumni board of directors makes him anticipate "an increase in scholarship awards" under next academic year's budget (1976-77).

Not yet selected, the ten students who will receive the alumni assistance are now being screened from a full applications list, says Nally.

### Alums

### Where Are You?

Information leading to the whereabouts of the following alumni. If you have any knowledge of these people, or know of someone we should have on our mailing list, please contact the Alumni Office, 1910 College Blvd. (385-1698).

Lee R. Adler, Bobby G. Agee, Ronald C. Agenbroad, Carol Ann Agentia, Barbara Ann (Ambrose) Ahern, Bill Ahfong, Judy Aitken, Sam Allbee, Ruby Alleman.

Albern Eugene Allen, Dennis W. Allen, James T. Allen, Jesse L. Allen, Jr., Lon L. Allen, Phillip L. Allen, Raymond Allen, Robert H. Allen, Jr., Robert L. Allen, Laurie M. Andrews, Tom Kay Blaier.

Stanley G. Bosch, David Brown, D.D.S., Edwin Case, Barbara Hill Cockrell, Daniel J. Colclase, Ralph Collier, Ken Crow, M.D., Mike Daly, D.V.M., Barbara Smith Dawson, Delmar L. Deide.

Julia Dewey, Larry Downer, Joan M. Dudgeon, Julie L. Duncan, Terri Edwards, Lelyn E. Fortier, James M. Fraser, Jana L. Freeman, Ronald Gage, D.D.S., Joann I. Galyan, Glenn Hancock, M.D., Richard D. Heaton.

Dieter Helfen, Gail G. Herr, Sandra M. Nortune Herrick, George Hibbard, D.D.S., Ana Holzmueller, Gerry Hooper, M.D., James M. Hudson, James F. Hunt, William Hussman, D.D.S., Benita Elaine (Ricketts) Jaca, Terry D. Jackson.

Jon Stewart Johnson, Rita Ann Johnson, George Jordan, Manual Karagranes, D.V.M., Dale G. Lama, Clarence M. Lindsay, Paul W. Long, Burrell Mans, D.D.S., Shirli Mix, Floyd Munson, D.D.S., Mike McFadden, M.D.

Gloria McDonald McLachlan, David L. McLean, David A. Norman, Dr. Francis T. O'Brien, Donald Page, D.D.S., Jack Eugene Pedersen, Beth Marie Peer, Irving Marie Peer, Irving Perce, M.D., Janette Perkins, Leslie A. Peterson, William Floyd Post, Janet K. Priddy.

Pamela Suzette Rayburn, James C. Reed, Benjamin M. Rush, Edith Ann Rydalch, John Robert Salskov, Angelo Santoro, Steve Sherrill, Walter K. Sims, Steven J. Snider, M. Spect, D.V.M., Rick O. Stevens.

Thomas L. Stevenson, Kenneth Lamont Stewart, Charles A. Story, Joseph T. Thomas, M.D., Kenneth D. Thomas, Lon White, M.D., Carolyn R. Wilcox, Mike Ziff.

## Alumni In Touch

Rick Stevens has assumed duties as manager of the Boise Cascade Building Service Center in Godding.

Larry D. West is a partner in Appraisal West, a real estate appraisal firm in Boise.

U.S. Air Force Sgt. Wilfred L. Barga, Jr. has graduated with honors from the Tactical Air Command Non-Commissioned Officer Leadership School at Mountain Home Air Force Base.

Navy P.N.S.N. Holly Nissula is now stationed in Nea Makri Greece following training in Meridian, Mississippi. Holly would very much like to hear from area friends at this address: P.N.S.N. Holly C. Nissula, 519-66-4575, U.S.N.R., U.S. Naval Communications Station, F.P.O. New York.

Rod Pridmore was recently promoted to sales coordinator for Guerdon Industries, Inc.

Dr. Clinton Ballou will work at the Basil Immunology Institute in Switzerland. Dr. Ballou was also named to the National Academy of Sciences this year.

Beth Musser (75) has received a graduate teaching assistantship at Oregon State University.

Warren William White (72) has received a promotion from ensign to lieutenant junior grade in the Navy Air Force.

Linda Ann (Wilson) Barry has recently been commissioned in the United States Public Health Service Corps.

Airman William D. Powell has graduated at Keesler AFB, Miss. from the Air Training Command's basic course for electronic specialists.

Dr. James L. Huckabay (BJC-61) has been promoted to assistant professor of geography in the University of Colorado at Denver.

William E. Fitts (75) has been accepted to attend medical school at Washington University in St. Louis, Missouri. While attending Boise State, Bill was selected as a Laura Moore Cunningham scholar.

Ken Stearns has joined the staff of the Twin Falls Bank & Trust Co. as assistant Vice-President of Marketing.

Fernando Bensusaki has been promoted to the position of credit analysis officer in the administrative office of the Idaho First National Bank.

W. C. Glynn has been elected an assistant treasurer of Intermountain Gas Co.

Greg Nutt, Boise, has received a teaching assistant position at Michigan State University.

A 1975 graduate of Boise State University in psychology and math, Nutt will study quantitative psychology and help teach classes at the East Lansing school. He will receive a yearly 3,000 tuition stipend.

Nutt is currently at MSU conducting research.

Robert Burns, a 1975 BSU accounting grad termed a "top student" by business Dean Chuck Lein, has been accepted for the fall semester at the Columbia University law school.

Tami K. Winn, a 1975 graduate of Boise State University, has been accepted as a teaching assistant in mathematics at Purdue University, Lafayette, Indiana.

As a TA, she will teach lower division math courses or tutor students. At the same time, she will be doing graduate work toward her doctorate degree in math.

While at Boise State Winn won the Laura Moore Cunningham scholarship three times and carried a 3.94 grade average. She was also offered assistantships at Washington State, Oregon State, Michigan State as well as Purdue. She was accepted as a graduate student at eight other schools.

# What's Happening- In September

**Friday, September 5**  
Foreign Film "Traffic", Tall. 7:30 p.m., LA 106.

**Wednesday, September 10**  
Coffeehouse at the Lookout, SUB, 9:00 p.m.

**Thursday, September 11**  
Address by Dr. Barnes to faculty and staff, 7:30 p.m., Music Auditorium.

**Friday, September 12**  
Foreign Film "Scenes From A Marriage", Bergman. 7:30 p.m., LA 106.

**Saturday, September 13**  
Football, BSU vs. Cal State-Hayward, 7:30 p.m., Bronco Stadium.

**Sunday, September 14**  
Pop Films, "The Sting" and "Rushing Roulette", 8:00 p.m., SUB Ballroom.

**Monday, September 15**  
Opening, Goudage Art Exhibition. Lasts to October 3. Liberal Arts Bldg. Gallery.

**Wednesday, September 17**  
Pop Concert, "Child", BSU Ballroom, tentatively scheduled for 5-7 p.m.

Foreign Film, "The Blue Angel", Van Sternberg, 7:30 p.m., LA 106.

**Friday, September 19**  
Music Department Faculty Recital, 8:15 p.m., Music Auditorium.

**Saturday, September 20**  
Football, BSU vs. Cal Poly-San Luis Obispo, 7:30 p.m. at Bronco Stadium.

Cross-Country meet, Varsity vs. Alums, no time set.

**Sunday, September 21**  
Pop Films, "Dark Star" and "Dumb Patrol", 8:00 p.m., SUB Ballroom.

**Tuesday, September 23**  
Edgar Winter Concert, 8:00 p.m., BSU Gym.

**Wednesday, September 24**  
Lecture, Gen. Moshe Dayan, 8:00 p.m., BSU Gym.

**Friday, September 26**  
Foreign Film, "King of Hearts", DeBroca, 7:30 p.m., LA 106.

**Saturday, September 27**  
Football, BSU vs. Weber State College, 7:30 p.m. at Ogden.

**Sunday, September 28**  
Pop Films, "Let It Be", "Help", and "Hard Days Night", 8:00 p.m., SUB Ballroom.

**Tuesday, September 30**  
Merle Haggard Concert, 8:00 p.m., BSU Gym.

## BSU Bulletin Board

An addendum to the 1975-76 Boise State University Bulletin, Catalog Issue, has been compiled and is available in the Admissions Office. Please refer to it for new programs and courses added since the catalog was issued.

### Tickets

Individual game tickets for the seven Bronco home football games are now on sale in the Boise State ticket office located east of the BSU Varsity Center.

The reserved seat tickets are \$5 each for five of the seven games with a charge of \$6 for the University of Nevada Las Vegas and Utah State football clashes.

The home opener for the Broncos will be on Sept. 13 when they host Cal State Hayward in the expanded, 20,000-seat, Bronco Stadium. Those wishing further information concerning tickets for the Bronco home games are asked to call 385-1285 in Boise or stop by the BSU ticket office.

The information cards for the 1975-76 Faculty/Staff Directory will be distributed August 25th. These cards are used in compiling the new Directory. The cards should be completed by all employees of Boise State University and returned before September 12, 1975. It is essential that everyone, to be included in the Directory, completes and returns a card. There is a block to check if there is no change from last year's entry.

The reverse side of the Directory card contains an Employees Survey form. The information requested is necessary for Boise State University to comply with Federal Law. Please note that the survey information will not be a part of the Directory and will only be used for statistical and reporting purposes. FTE stands for Full Time Equivalent and should be reported as 100 for full time employees and a lesser number for part time employees (50 for half time, 25 for quarter time, etc.).

Thursday-8-10 a.m., noon-4 p.m. and 6 p.m.-midnight  
Friday-8 a.m.-4 p.m.  
Saturday-10 a.m.-4 p.m.

An objective of two-hour turnaround for all student jobs will be pursued, says systems analyst Harvey Capell. A special "quick turnaround" time for those people working on-site in room B-106 will normally be available from 6-8 p.m. Monday through Thursday and the majority of scheduled hours on Saturday, he says.

Long-running jobs and jobs that require special files or system set up should be submitted through the data control section in room B-116 during the hours of 8 a.m.-noon and 1-5 p.m. These jobs will be scheduled upon submission for running as soon as possible, says Capell.

He added that individuals who submit academic jobs in student room B-106 should precisely follow the specified JOB card format.

He said those who submit jobs should be sure to put the person's last name immediately following the job accounting number.

This can be followed by the first name or initials or other comments. The associated class identification number and the section number should be used as the job name following the // JOB portion of the JOB card.

A correct example would be // JOB DP210-4 3100-01-80 BROWN, DON

## Library Notes

### FOR SHOW OFFS:

People who want to display materials can use library cases on the first and third floors and the large bulletin board on the third floor. Displays on the first floor can be scheduled with Dave Crane, phone 3755, or on the third floor with Don Haacke, phone 3958.

### TWO NEW COLLECTIONS

Over the summer the library has received two large acquisitions. On the shelves are the Loeb Classical Library, a collection of classics in both the original language and English, and a reproduction of the 1884-1902 edition of the Deutsche National Litteratur: Historisch-Kritische Ausgabe, a 222 volume collection of German literature in the original language.

### LIBRARY HOURS

The BSU Library will resume regular library hours in September. The library is open 7:30 a.m.-11 p.m. Monday through Thursday, 7:30 a.m.-5 p.m. Friday, 9 a.m.-5 p.m. Saturday and 2-10 p.m. Sun-

day. Vacation and holiday hours will be posted in advance.

### WHERE DID THEY GO?

Books on the third floor of the BSU Library have been shifted. The numbers are in straight sequence from west to east starting with the A's in the northwest corner near the river-side windows. Signs will be hung and new maps made so books can be more easily found.

### ORIENTATION

The library will continue to offer a program for faculty, staff and students. Persons interested in orientation sessions can call Janet Strong, 1139.

### RESERVATIONS, PLEASE

Faculty members are asked to give reserve materials to library clerks before assignments are made. The library needs at least 24 hours and prefer three days notice to get reserve materials on the shelves. Faculty members can get reserve forms at phone 1204. For assigned magazines instructors can call 1263 in the periodicals department.

## Handbook

The Faculty Handbook has been revised and a completely new edition is available. The new edition should be substituted for the previous edition dated August 15, 1974. Additional covers are not being printed this year. The handbook will continue to be in a loose leaf format to facilitate future revisions.

## Computer Notes

The computer schedule for academic jobs submitted in room B-106 will be as follows for the fall semester:

Monday-Wednesday-8 a.m.-4 p.m. and 6 p.m.-midnight

## Catalog Correction

An error has been found in the BSU Bulletin, Catalog Issue 1975-76, page 18 under Bachelor of Science Degree, paragraph D. Area III requirements—the next line should read Two fields must be represented (rather than three fields).

Boise State University 1910 College Boulevard Boise, Idaho 83725

Non-Profit Organ.  
U.S. POSTAGE  
PAID  
Boise, Idaho  
Permit No. 170

The U.S. Postal Service charges 10 cents for each change of address notice sent back to the University following a mailing of "Focus". Readers can save this expense by notifying the Alumni Office immediately of an address change.
