SECTION I
ENTERPRISE DATA BANK
SAS DATA FILE

INTRODUCTION

Section I outlines in depth the enterprise analysis variables stored on the Enterprise Data Bank, SAS file. The file contains 238 variables per enterprise for the years 1982-1994. The number of different enterprises, as well as number of farms for each enterprise, will vary from year to year. Subsequent years' data will be added to the overall file when made available. Other SAS data files can be developed from this comprehensive enterprise data bank, such as a file that contains only a specific enterprise for a given period.

The enterprise data sources are farms enrolled in the Kansas Farm Management Association program. For each enterprise, the variable values are on a per operator basis. Except where indicated by decimal format, the values are whole numbers.

The SAS Enterprise Data Bank provides a means whereby extension, instruction, and research personnel can easily access the data bank to obtain information for numerous projects. Every user, through the Department of Agricultural Economics Systems Analyst, has access to the enterprise data bank information using a simple, but standardized, procedure.

VARIABLE #	ITEM - EXPLANATION	DECIMAL FORMAT
------------	--------------------	----------------

SPECIAL DATA ITEMS:

Farm No.	Farm No., Enterprise No., Year of Data
	1 -- Association Number
	2-3 -- County Number
	4-8 -- Farm Number
Enterprise No.	9-12 -- Enterprise No.**
Year	13-15 -- Year of Data

SPECIAL ENTERPRISE/TOTAL FARM DATA:

001	Farm Type Code***	9 (2)
-----	-------------------	-------

Farm typing is done by labor utilization. For farms to be classified as a single enterprise farm, 70 percent to the total labor must be utilized with that enterprise; whereas in a dual enterprise farm, 35 percent of the total labor must be utilized with each enterprise.

002	Enterprise Size	9(5)
-----	-----------------	------

Enterprise size varies by the type of enterprise.

- Type 1 = No. Beef Cows (Beef Cow Herd)
- Type 2 = No. Head (Livestock Feeding)
- Type 3 = No. Dairy Cows (Dairy Cow Herd)
- Type 4 = No. Ewes (Ewe and Lamb)
- Type 5 = No. Litters (Swine Farrowing)
- Type 6 = No. Head (Poultry)
- Type 7 = No. Acres (Crops)

003	Units of Enterprise Production	9(5)
-----	--------------------------------	------

Units of production varies by the type of enterprise.

*The decimal format is indicated for those variables that carry a decimal. For example, the variable "Crop Acres" has a decimal format of 9(6).9, which means that there are 6 digits before the decimal and one digit after the decimal.

**See Appendix Table A for list of enterprise numbers by type of enterprise.

***See Appendix Table B for a definition of the various farm types.

VARIABLE #	ITEM - EXPLANATION	DECIMAL FORMAT
	Type 1 = No. Weanings (Beef Cow Herd)	
	Type 2 = Cwt. Produced (Livestock Feeding)	
	Type 3 = No. Weanings (Dairy Cow Herd)	
	Type 4 = No. Weanings (Ewe and Lamb)	
	Type 5 = No. Weanings (Swine Farrowing)	
	Type 6 = No. Births (Poultry)	
	Type 7 = Gross Sale Units (Crops)	
004	Enterprise Storage Code	9(1)
	0 -- Enterprise was used in Enterprise Analysis Report	
	1 -- Enterprise was not used in Enterprise Analysis Report	
	If an enterprise is code "1", then this enterprise's data were not complete or typical. Thus, the enterprise was removed from that year's Enterprise Analysis Report.	
005	Enterprise Type	9(1)
	The per unit analysis, and report format, varies by the type of enterprise.	
	Type 1 -- Beef Cow Herd	
	Type 2 -- Livestock Feeding	
	Type 3 -- Dairy Cow Herd	
	Type 4 -- Ewe and Lamb	
	Type 5 -- Swine Farrowing	
	Type 6 -- Poultry	
	Type 7 -- Crop	
006	Crop Acres	9(6).9
	Total (owned and rented) crop acres.	
007	Production Man Work Units	9(7).99
	Each acre of each different crop and each livestock unit is assigned a "labor factor" as a fraction of a 10-hour day or productive man work units.	
008	Capital Managed	9(9).99
	Total farm assets plus value of rented land.	

VARIABLE #	ITEM - EXPLANATION	DECIMAL FORMAT
009	Gross Farm Income	9(9).99
	Total farm income computed on accrual basis.	
010	Net Farm Income	9(9).99
	Equals Gross Farm Income minus cash operating expense minus depreciation. Represents a return to operator's unpaid labor, management, and net worth.	

LIVESTOCK AND GRAIN SALES, INVENTORY, OTHER:

These variables represent livestock and grain sales, ending inventory, and other values that comprise Gross Sales. For each specific type of livestock, grain-hay, inventory, or other, three values are provided: units, pounds, and dollars. For example, raised livestock sales will have the following variables:

011 -- Raised Lvst. Sales, Units	9(7).99
012 -- Raised Lvst. Sales, Pounds	9(8).9
013 -- Raised Lvst. Sales, Dollars	9(9).99

The specific value in each variable will depend on the Enterprise Number. For example, "Raised Livestock Sales" can contain raised beef, dairy, sheep, swine, poultry, and other livestock sales. For example, the raised livestock sales will include only raised market hog sales for the Swine Farrow-Finish enterprise.

011	Raised Livestock Sales, Units
012	Raised Livestock Sales, Pounds
013	Raised Livestock Sales, Dollars
014	Raised Grain-Hay-Cash Crop Sales, Units

LIVESTOCK AND GRAIN PURCHASES, INVENTORY, OTHER:

These variables represent livestock and grain purchases, beginning inventory, and other values that comprise Gross Purchases. For each specific type of livestock, grain-hay, inventory, or other, three values are provided: units, pounds, and dollars. For example, livestock purchased for resale will have the following variables:

041 -- Lvst. Purch.-Resale, Units	9(7).99
042 -- Lvst. Purch.-Resale, Pounds	9(8).9
043 -- Lvst. Purch.-Resale, Dollars	9(9).99

The specific value in each variable will depend on the Enterprise Number. For example, "Livestock Purchased for Resale" can contain beef, dairy, sheep, swine, poultry, and other livestock purchases. For example, the livestock purchased for resale variable will include only feeder pigs for the Swine Finish Feeder Pig enterprise.

061	Net Sale Gain, Dollars	9(9).99
OTHER INCOME:		
	For each specific other income variable, three values are provided: units, pounds, and dollars. For example, dairy products-milk will have the following variables:	
	065 -- Dairy Products-Milk, Units	9(7).99
	066 -- Dairy Products-Milk, Pounds	9(8).9
	067 -- Dairy Products-Milk, Dollars	9(9).99

TOTAL VARIABLE EXPENSES, NET RETURNS:

Total variable expenses are equal to the sum of variable 122-205. Net return above variable expenses is equal to "Gross Income" minus "Total Variable Expenses". Decimal format is equal to:

Units	9(7).99
Pounds	9(8).9
Dollars	9(9).99

206	Total Variable Expenses, Units
207	Total Variable Expenses, Pounds
208	Total Variable Expenses, Dollars
209	Net Return above Variable Expenses, Units
210	Net Return above Variable Expenses, Pounds
211	Net Return above Variable Expenses, Dollars

FIXED EXPENSES:

The unpaid operator labor and interest charge variables represent opportunity cost charges on labor and investment minus interest paid, respectively. The opportunity cost labor rates and interest were:

Labor Rates/Operator:

1982-90 -- \$15,000
1991-93 -- \$22,500

Interest Rates:

1982-90 -- 10.0%
1991-93 -- 8.0%

212	Depreciation	9(9).99
213	Unpaid Operator Labor	9(9).99
214	Interest Charge	9(9).99
215	Real Estate Taxes	9(9).99

TOTAL EXPENSES AND RETURNS:

Total fixed expenses are equal to sum of variables 212-215. Total expenses is the sum of "Total Variable Expenses" and "Total Fixed Expenses". Net return to mgt.-land is equal to "Gross Income" minus "Total Expenses". Net return to labor-mgt.-land is equal "Net Return to Mgt.-Land" plus "Unpaid Operator Labor" plus "Hired Labor". Decimal format is equal to:

14	Capital Managed	9(9).99
15	Gross Farm Income	9(9).99
16	Net Farm Income	9(9).99

*The decimal format is indicated for those variables that carry a decimal. For example, the variable "Crop Acres" has a decimal format of 9(6).9, which means that there are 6 digits before the decimal and one digit after the decimal.

**See Appendix Table A for a list of enterprise types by type of enterprise.

**See Appendix Table B for a definition of the various farm types.

SECTION II
ENTERPRISE DATA BANK SYSTEM
K-MAR-105 RAW DATA FILE AND RETRIEVAL SYSTEM

INTRODUCTION

Section II outlines in depth the enterprise analysis variables stored on the enterprise data bank for use with the K-MAR-105 Retrieval System. The file contains 238 variables per enterprise for the years 1982-1994. The number of different enterprises, as well as the number of farms for each enterprise, will vary from year to year. Subsequent years' data will be added to the overall file when made available.

The enterprise data sources are farms enrolled in the Kansas Farm Management Association program. For each enterprise, the variable values are on a per operator basis. Except where indicated by decimal format, the values are whole numbers.

Section II must be used when utilizing the K-MAR-105 Retrieval System to access enterprise data from the raw data file. The Retrieval System includes numerous programs, such as the "Enterprise Analysis Summary" and "Enterprise Factor Retrieval". For example, the Enterprise Analysis Summary can be used to provide an aggregate analysis of farms for a given enterprise or an aggregate analysis for a given enterprise by county, farm type, or gross farm income.

The variables are accessed through the use of the "Table" and "Item" numbers listed under the "Retrieval File". Each variable has a four-digit number. For example, if an analysis on "Farm Type" is desired, then the variable number would be "0007" as obtained from Table 00. For tables that have numerous values, the formula listed with the table is used to obtain the desired variable number. For example, if "Livestock Raised Sales" dollars from Table 01 are desired, the formula listed with Table 01 is used to obtain the variable number of "0103".

The K-MAR-105 Retrieval System provides a means whereby extension, instruction, and research personnel can easily access the raw enterprise data bank to obtain aggregate analysis of specific enterprises for numerous projects. Thus, every user has access to the raw enterprise data bank information through a simple, but standardized, procedure.
