Volume 28, Issue 35

Conference Announcement

General equilibrium in Rio

Location : EPGE, Praia de Botafogo 190 , Rio de Janeiro, RJ, Brazil

Organizers : Paulo Klinger Monteiro

Major Topics : general equilibrium, auction theory, game theory, mechanism design

Conference Dates : 2/8/2006 to 2/8/2006

Submission Deadline : 11/30/2005

Send Submissions To : http://epge.fgv.br/geinrio

From February 8-10, 2006, the 1st General Equilibrium Workshop in Rio will be held at EPGE in Rio de Janeiro. Contributed papers in general equilibrium, auction theory, game theory and mechanism design are invited. We anticipate approximately 20 presentations by researchers from Latin America, the U.S.A, Europe and the rest of the world. Besides inviting presentations by leading researchers in the areas of the workshop, the workshop aims to give a number of young researchers the opportunity to present their work. Papers should be submitted for review by 30 November 2005, to http://epge.fgv.br/geinrio. Authors will be informed whether their paper is accepted for presentation by 24 December. Professor C.D. (Roko) Aliprantis will present a keynote lecture. This workshop is similar in spirit to the European workshops in general equilibrium which started in Geneva in 1991. The Workshop will cover accommodation at the designated conference hotel (Ouro Verde, http://www.dayrell.com.br) for those presenting papers. The Journal of Mathematical Economics, which actively promotes equilibrium theory, will launch a special issue based on the selected papers presented at the Rio, Europe and Asia workshops. GEinRio is organized by Paulo Klinger Monteiro, Luis Braido and Carlos Eugenio (co-organizers).
