Correct version of "Further evidence on the size and power of the Bierens and Johansen cointegration procedures" restored to the EB website

David O. Cushman
University of Saskatchewan

Abstract

The paper "Further evidence on the size and power of the Bierens and Johansen cointegration procedures," by David O. Cushman, was published by the Economics Bulletin on October 8, 2003. Shortly thereafter, while correcting formatting problems on its website, the journal mistakenly replaced the paper's PDF with its earlier unrevised version. The correct PDF version has now been restored.

Accepted on for publication in:
