This conference provides a platform for researchers, professionals and policy makers to present and discuss their latest research, as well as being a forum for the exchange of theories and research findings in three main fields of industrial economics: Topic 1 : Broadband and economic performance in developed countries Topic 2 : Cellular phones and economic performance in developing countries Topic 3 : Telecommunications infrastructure and economic performance – The role of markets and institutions Roundtable on “Market oriented vs intervention policies for broadband deployment” There is no registration fee for the conference. The deadline for registration is the 15th September. Interested audience should register as soon as possible since there is limited capacity. The registration covers access to sessions, lunch on the 17th October, coffee-breaks, and conference documents. For registration email [infrastructure\\_performance@telecom-paristech.fr](mailto:infrastructure_performance@telecom-paristech.fr).
