Revised July, 1986

Enterprise Budgets for Livestock Businesses that Use National Forest Grazing Land by C. Kerry Gee, National Economics Division, Economic Research Service, U.S. Department of Agriculture, stationed at Colorado State University.

ABSTRACT Cow-calf and sheep enterprise inputs, production, costs, and returns are estimated for ranches with Forest Service grazing permits using 1982 as a base year. Budgets represent different cow and sheep herd sizes in National Forests and national Grasslands of United States.

Keywords: Beef cows, sheep costs and returns, Federal rangeland

\*\*\*\*\*  
\*  
\* NOTE: The budgets represented in this report are different in methodology\*  
\* than the official published ERS estimates of livestock cost of \*  
\* production. The treatment of interest expense on fixed assets, \*  
\* costing of fixed assets, and an allocation of returns to economic \*  
\* factors are the main areas of difference. Gross returns and most \*  
\* cash costs are same in both methodologies. These budgets were pre-\*  
\* pared per Forest Service/Bureau of Land Management contract \*  
\* specifications concerning the use of a prior ERS methodology to be \*  
\* consistent with previously submitted contract work to FS/BLM. For \*  
\* discussion of the current ERS methodology, see Economic Indicators \*  
\* of the Farm Sector: Costs of Production, 1982, USDA-ERS, ECLFS 2-3, \*  
\* December, 1983. \*  
\*

## Contents

The enterprise budgets in this report are listed in the following sequence. Table numbers begin with 1 in each of the general categories.

### National Forests:

Beef cow budgets	Region 1 . . . . .	Table 1-	40
Beef cow budgets	Region 2 . . . . .	Table 41-	82
Beef cow budgets	Region 3 . . . . .	Table 83-	115
Beef cow budgets	Region 4 . . . . .	Table 116-	166
Beef cow budgets	Region 5 . . . . .	Table 167-	207
Beef cow budgets	Region 6 . . . . .	Table 208-	241
Beef cow budgets	All other regions . . . . .	Table 242-	253
Yearling budgets	All regions . . . . .	Table 254	

### National Grasslands:

Beef cow and yearling budgets . . . . .	Table 1-	36
---	----------	----

### National Forest and National Grasslands:

Sheep budgets . . . . .	Table 1-	42
-------------------------	----------	----

### Footnotes

## Introduction

The livestock budgets in this report were prepared through a cooperative effort of the Economic Research Service, U.S. Department of Agriculture and the Agricultural and Natural Resources Economics Department, Colorado State University. Data collection and tabulation was financed through contracts with the Forest Service, U.S. Department of Agriculture and Bureau of Land Management, U.S. Department of the Interior. The project began in October 1979 and ended September 1984.

The detailed methodology used for data collection and budget construction is reported in Technical Bulletin 143, Estimating Economic Impacts of Adjustments in Grazing on Federal Lands and Estimating Federal Rangeland Forage Values published by the Colorado State University Experiment Station in 1981.

Data used in constructing the budgets are from sample surveys conducted by the Economic Research Service and from panels of producers with grazing permits in the area represented by the budgets. Information on production such as calving rates, death loss, market weights, numbers of animals sold and selling time was obtained from the producer panels. Physical feed inputs other than public grazing were also from this source. Seasons and quantities of federal land use were provided by the public land agency. All input and market prices were from published USDA sources except state land lease rates which were provided by state agencies. Labor and the cost of all items reported in dollars only are from survey data.

The budget format was designed to present as much detail as possible of the assumptions regarding production, physical inputs, costs and prices. A lack of machinery, equipment and facilities inventories is the major deficiency. Feed sources are listed by month so dependency on federal grazing is easily identified. Footnotes to the budgets appear at the end of the report.
