Title: Appendix to "NBER International Seminar on Macroeconomics 2008"

Author: Stephanie E. Curcuru, Charles P. Thomas, Francis E. Warnock

URL: <http://www.nber.org/chapters/c11106>

This workbook contains appendix tables and the summary Table 3 for the following paper:

Curcuro, Stephanie E., Charles P. Thomas, and Francis E. Warnock, forthcoming,  
"Current Account Sustainability and Relative Reliability," *NBER International Seminar on  
Macroeconomics 2008* .

It contains the following tables:

**Table 3: Consolidated Adjustments** (an annual summary of all adjustments)

**Appendix Table A.1: Estimating "Other Adjustments" by Asset Class** (annual data on other adjustments by asset class)

**Appendix Table B.1: Estimated Derivatives Transactions and Holdings** (underlying data behind our derivatives adjustments)

**Appendix Table B.2: Estimated Real Estate Claims and Liabilities** (underlying data behind our real estate adjustments)

**Appendix Table C.1: Adjustments to U.S. Goods Exports** (underlying data behind our goods exports adjustments)

**Appendix Table D.1: Estimated Equity Claims Short Sales** (underlying data behind our short sales adjustments)

**Appendix Table D.2: Adjustments to U.S. Equity Income Receipts and Payments** (underlying data behind our equity income adjustments)

**Table 3: Consolidated Adjustments**

This tables summarizes adjustments that are detailed in the appendix tables. Full details of the adjustments are in Appendices B, C, and D.  
All data are in billions of dollars.B, C, and D.

## Appendix Table A.1: Estimating “Other Adjustments” by Asset Class

Total revised “other adjustments” is reported by BEA at [www.bea.gov/international/xls/intinv06\\_t3.xls](http://www.bea.gov/international/xls/intinv06_t3.xls).

For equities, bonds, banking and nonbanking, and other assets, estimated “other adjustments” are from equation (4).

Other assets includes U.S. official reserve and other U.S. Government assets, U.S. Government liabilities associated with military sales contracts and other transactions arranged with or through foreign official agencies, and foreign holdings of U.S. currency. DI is measured at current-cost. Throughout financial derivatives are excluded.

## Appendix Table B.1: Estimated Derivatives Transactions and Holdings

This table reports our estimates of cross-border derivatives transactions and holdings.

The IMF data are the sum of derivatives transactions and holdings reported by all countries in International Monetary Fund (2007).

U.K. holdings data start in 1999, and are reported in Office of National Statistics (2007).

The U.S. transaction data for 2007 and holdings for 2005-2007 are from the U.S. Balance of Payments, available at [www.bea.gov](http://www.bea.gov).

Prior to 2000, U.S. transactions and holdings are assumed to increase at a growth rate of 50 percent, and after that 30 percent.

## Appendix Table B.2: Estimated Real Estate Claims and Liabilities

This table reports our estimates of cross-border real estate transactions and holdings.

The mean sales price and total U.S. sales are obtained from the National Association of Realtors.

See Appendix B for details on how these estimates were constructed.

Mean sales prices are in thousands of U.S. dollars; all other values are in billions of U.S. dollars.

## Appendix Table C.1: Adjustments to U.S. Goods Exports

The table shows the balance of U.S. goods exports included in line 3 of Table 1 of the U.S. Balance of Payments reported by BEA for all countries excluding Canada. The total adjustment is the sum of the low-value trade adjustment, an adjustment for Mexico equal to the indicated percentage of exports to Mexico, and an adjustment of the indicated percentage of exports to all countries excluding Canada and Mexico.

All values are in billions of U.S. dollars.

## Appendix Table D.1: Estimated Equity Claims Short Sales

This table shows U.S. equity claims holdings from Table 18 in Dept. of Treasury (2007) in the countries where short-selling is allowed and practiced as listed in Table 7 of Endo and Ree (2006). All holdings are for end of December, except for the 1994 holdings which are as the end of March of that year. Holdings for 2007 are estimated using the growth rate between 2005 and 2006. The final line shows an estimate of short sales in each of the years shown, calculated as the sum of 4% of U.K. holdings and 5% of holdings in the other countries listed.

## Appendix Table D.2: Adjustments to U.S. Equity Income Receipts and Payments

The table shows the adjustments to income arising from the short-sales adjustments to equity claims and liabilities holdings.

The dividend yield is computed using the “original” method discussed in CDW. The interest rate is the 2 year constant maturity treasury rate reported in the Federal Reserve H.15 “Selected Interest Rates” release.

The income adjustments are the products of the dividend or interest yield and the short-sale adjustment reported in Panels B and C of Table 3.
