

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Econometric Models of Cyclical Behavior, Vols. 1 and 2

Volume Author/Editor: Bert G. Hickman, ed.

Volume Publisher: UMI

Volume ISBN: 0-870-14232-1

Volume URL: <http://www.nber.org/books/hick72-1>

Publication Date: 1972

Chapter Title: Index to "Econometric Models of Cyclical Behavior, Vols. 1 and 2"

Chapter Author: Bert G. Hickman

Chapter URL: <http://www.nber.org/chapters/c2794>

Chapter pages in book: (p. 1219 - 1225)

AUTHOR INDEX

- Aaron, Henry J., 239, 239*n*
Adams, F. Gerard, 816
Adelman, Frank L., 1, 2, 69, 78, 84, 87, 153, 153*n*, 185*n*, 311-312, 421*n*, 422*n*, 430, 433*n*, 534*n*, 663
Adelman, Irma, 1, 2, 69, 78, 84, 87, 153, 153*n*, 185*n*, 311-312, 313, 421*n*, 422*n*, 430, 433*n*, 534-536, 534*n*, 624, 663
Agarwala, R., 1209-1210
Alexander, Charles, Jr., 25*n*
Alexander, Sydney S., 1182*n*, 1188
Almon, Shirley, 27, 70, 195, 301-302
Almond, 1198
Amemiya, Takeshi, 818-819, 821
Anderson, 816
Ando, Albert, 543-598

Ball, R. J., 171*n*
Baruch, Bernard, 1189-1190
Bassie, V Lewis, 1211-1218
Baumol, William J., 705
Becker, Gary, 739*n*
Beckett, W. A., 1161, 1162*n*, 1176*n*
Boot, J. C. G., 703-704
Boschan, Charlotte, 2, 4, 6, 18, 311-541, 739*n*
Bratt, E. C., 1185*n*
Bristol, Ralph B., Jr., 293-297
Broida, Arthur L., 1164, 1164*n*
Bronfenbrenner, Martin, 1179*n*, 1181*n*
Brown, T. M., 1183*n*
Brundy, James M., 813*n*
Burns, Arthur F., 19-20, 429*n*, 739, 739*n*, 782-784, 791, 1159, 1159*n*, 1160*n*, 1166, 1182*n*, 1184, 1192-1193, 1193*n*, 1198
Burns, Malcolm, 949*n*
Bush, M. G., 1177*n*
Butler, W. F., 1188*n*

Cagan, P., 475*n*, 737, 739*n*
Cheng, Pao Lun, 1175*n*
Childs, Gerald, 205
Chow, Gregory, 2, 19, 20, 312, 627, 627*n*, 739-809
Christ, Carl F., 535, 535*n*, 815, 920
Cochrane, 207
Cohen, A. M., 1177*n*
Cooper, Ronald L., 12-15, 126, 127-128, 813-947, 1129, 1129*n*, 1209, 1213, 1215
Cunningham, Jon, 813, 816, 816*n*

Daly, D. J., 19, 128, 1159-1207
de Leeuw, Frank, 10, 191-196, 211, 211*n*
Denison, Edward F., 1181*n*
Dhrymes, Phoebus J., 729-733, 824*n*, 931*n*
Duesenberry, James S., 209*n*, 312, 995, 995*n*
Dupriez, L. H., 1192

Eckstein, Otto, 208, 208*n*, 312
Edward, John, 126
Eisner, Mark, 739*n*, 816
Eisner, Robert, 1214
Engle, Robert F., 20, 673-737
Evans, Michael K., 5, 6, 11, 14, 15-17, 139-199, 200, 312, 314*n*, 816, 928*n*, 931*n*, 933*n*, 949-1158

Feldstein, Martin S., 791-800, 807-808
Fels, Rendigs, 1173*n*
Ferber, 1173*n*
Finger, J. M., 131
Firestone, O.J., 1181*n*, 1184-1194, 1204-1206

SUBJECT INDEX

- Absolute errors, in real GNP, 941
Adelman's procedure, 78
Aggregate demand, in business cycle models, 740, 790-791
Almon lag structure, 958-959
Almon technique, 283, 301-302
Amplitudes:
 of cyclical and trend movements, 367, 392-397, 409, 412-414
 of declines in GNP, 439, 448-450
 of fluctuation in ex ante simulation results, 390-392, 460-462, 493, 526
 of rises in GNP, 448-459
A priori information, 1140
AR adjustments, in evaluation of econometric forecasts, 990-992, 1034ff
 in OBE Model forecasts, 995ff
 in Wharton-EFU Model forecasts, 990-992
Australia, use of statistical-indicators forecasts in, 1177, 1192
Autocorrelated shocks, in GNP simulations, 433ff
 in OBE ex ante simulations, 479ff
Autocorrelation, 200
 of annual and monthly models compared, 21
 correction for, 18
Automobile expenditures equation, 846
 in OBE econometric model, 26
Autonomous shocks, 421-422
Auto-regressive equations, compared with ex post forecasts, 13
Auto-regressive model, 680-681, 829-831
 simple analysis of, 685-687
Auto-regressive transformations, 236-237
 in Brookings Model, 210
Average lag, in aggregated and disaggregated models, 693-694
 in U.S. economy model, 699-701
Average weekly hours, in Brookings Model, 207
 in OBE ex ante simulations, 519
Biases, extent and direction of, 48-50
 from time aggregation of distributed-lag models, 684-695, 712-714
 See also Errors
Block-recursive structure, breakdown of, 837-843
BLS method, 1206
Bond yield, *see* Corporate bond yield
Brookings Model:
 consumer-demand equations, 254-255
 cyclical turning points forecasts, 214-230
 definitions for, 282-292
 evaluation of, 253-254
 evaluation of turning point forecasts, 295-297, 304-309
 final demand equations, 270-271
 final expenditure equations, 299-302
 financial sector equations, 275-277
 fixed proportions for, 279-282
 forecast errors, 215-230
 foreign-trade equations, 261-262
 GNP errors in, 306-309
 government-taxes equations, 262-263
 gross-product originating equations, 270-271
 hours equations, 303
 identities for, 279-282
 investment equations, 258-261, 301-302
 labor-force equations, 278
 nonwage income equations, 277-278
 orders equations, 259
 output conversion equations, 272
 price conversion equations, 272-275
 prices equations, 266-270
 production functions for, 263-266

- Brookings Model (cont.)**
 residential construction equations, 255–257, 301
 sample period and data for, 201–202, 294–295, 302
 shrinkage in, 293
 simulations for 1957–65, 230–237
 specification changes in, 298–299
 and stochastic-disturbance theory, 12
 structure of, 202–214
 suggested improvements for, 309
 transfer payments equations for, 262–263
 twenty-five-year simulations, *see* Long-run Brookings Model simulations
 variables for, 282–292
 wage-rates equations, 266–270
See also Long-run Brookings Model simulations
- Busem, *see* Brookings Model**
- Business construction equations, of distributed-lag models, 718**
- Business cycles:**
 causes, 7–8, 320
 classification of theories, 191–196
 impulse-response theory, 627–628
 NBER approach to, 781*ff*
 and random shocks, 626–627
 and reduced-form GNP equations, 195–196
 and statistical-indicator forecasts, 1161*ff*
 structural components of, 739–742
 theory of, 601
See also Business cycles forecast study; Business cycle models; Cyclical turning points
- Business cycle forecast study:**
 FMP Model simulations, *see* FMP Model business cycle simulations
 interpretations and comparative results of, 420–429
 and KG Model, 311–312, 313
 measurement and interpretation problems, 319–321
 OBE Model simulations, *see* OBE business cycle simulations
 prior research, 311–312
- Business cycle forecast study (cont.)**
 purposes of, 312–313
 six-quarter simulations around reference turns, *see* Six-quarter simulations
 variables and data used for, 314–319
 Wharton Model simulations, *see* Wharton Model business cycle forecast simulations
- Business cycle models, 19–20**
 business investment equations, 787–788
 capital consumption allowances, 769–771
 compared with other models, 782, 800–801
 compensation per man-hour, 765
 consumer expenditure on durables, 750, 786–787
 consumer expenditures on nondurables, 748, 751
 consumer expenditures on services, 749, 787
 corporate bond yield, 760
 corporate dividends, 767
 corporate profits, 761, 788–789
 and disaggregation of variables, 782–783, 783*n*, 801–802
 distributed-lags in, 803
 dynamic properties of, 797–799
 employment, 763
 endogenous variables in, 797–799
 equations for, 796–797, 804–807, 808
 errors in, 771–778
 for estimation, 747
 estimation problems with, 799–800
 and fluctuations among different economic series, 802–803
 and forecasting, *see* Statistical indicator forecasts
 four-quarter differences in, 807–808
 four-quarter structure of, 792–796
 historical fit of, 797–799
 implicit price deflator in, 766
 imports, 768
 interest rates, 757
 inventory change, 757
 inventory investment, 756, 788
 labor demand, 762

- Business cycle models (cont.)**
 labor supply, 764
 lack of dummy variables in, 785
 linearity in, 807
 manufacturers' new orders, 758
 mathematical formulation of, 742-746
 methods of evaluating, 808-809
 orders for goods for sale, 757
 plant and equipment orders and contracts, 755
 price-adjustment equation, 790-791
 producers' durable equipment and non-residential structures, 753
 residential construction, 787
 residential investment, 752, 754
 time trend in, 793-794
 treasury bill rates, 759
 use of four-quarter differences in, 746-747, 795-796
 use of lagged dependent variables in, 784-785
 variables and data sources for, 778-781
 variables missing from, 783-784, 802
 wages and prices, 789
- Business equipment equations, in distributed-lag models, 719**
- Business inventories changes, actual and fixed values around turning points, 55**
 in nonstochastic six-quarter simulations, 327
 in OBE econometric model, 27
- Business investment:**
 average spectra for, 250
 in Brookings Model, 205, 233, 246
 in business cycle models, 783, 787-788, 796, 805
 comparison study of, 847-849, 876, 877
 test for structural changes in, 903
- Business profits, in business cycle models, 740-741**
- Business transfer payments, in business cycle models, 746**
- Canada, economic-policy formulation in, 1194**
 use of statistical-indicators forecasts in, 1192
- Canadian economy, and devaluation, 1178-1179**
 forecasts for, 1161-1162
 Canadian statistical indicators, 1176
- Capacity hours, for long-term OBE Model simulations, 71**
- Capacity output, in OBE Model, 28**
- Capacity utilization equations:**
 in business cycle model, 788
 in Evans Model forecasts, 960
 in OBE Model, 28, 111-112
 in Wharton Model simulations, 157
- Capital consumption allowances:**
 in Brookings Model, 213
 in business cycle models, 746, 769, 770-771
 in comparisons of models, 857, 858
 in evaluation of models, 884, 886
 in OBE Model, 29, 70
 test for structural change in, 907
- Capital goods price, in business cycle model, 784**
- Capital goods stock, in business cycle model, 740**
- Capital-output ratios, for OBE Model simulations, 70**
- Car inventories, in Brookings Model, 204**
- Characteristic roots, of Wharton Model, 637, 645, 654-658**
- Civilian employment, in Brookings Model simulations, 224**
 in nonstochastic six-quarter simulations, 328
- Civilian expenditures, in Wharton Model simulations, 149**
- Cobb-Douglas production function, 28, 206**
- Cochrane-Orcutt corrections, 207**
- Commercial loan market, in FMP Model, 584**
- Compensation per man-hour, in business cycle model, 765.**
 in ex ante Wharton Model simulation, 478
See also Wage rate equations
- Condensed Wharton Model:**
 characteristic roots of, 654-658
