The recent resurgence of experimental music has given rise to a more divergent range of practices than has previously been the case. The Ashgate Research Companion to Experimental Music reflects these recent developments by providing examples of current thinking and presenting detailed case studies that document the work of contemporary figures. The book examines fourteen current practitioners by interrogating their artistic practices through annotated interviews, contextualized by nine authored chapters which explore central issues that emerge from and inform these discussions. Whilst focusing on composition, the book also encompasses related aspects of performance, improvisation and sonic art. The interviews all explore how the selected artists work, focusing on the processes involved in developing their recent projects, set against more general aesthetic concerns. They aim to shed light on the disparate nature of current work whilst seeking to find possible points of contact.
