Acknowledgement

In the name of Allah S.W.T the Most Gracious and the Most Merciful

Alhamdulillah, all praise to Allah S.W.T with the blessing of His good pleasure, I have successfully completed the dissertation as best as possible. May the blessing and peace of Allah be upon Prophet Muhammad (s.a.w.) and upon his family.

Secondly, I am grateful and would like to express a sincere gratitude to my respective and supportive lecturer Pn. Lilis Shereena Safiee who has inspired and encouraged me with her germinal ideas, invaluable guidance, continuous encouragement and constant support in making the dissertation. Furthermore, my lecturer is also has generously shared her knowledge. She also has given with most valuable support by improving my writings, encouraging the starting and ending of the project studies, and also being a tireless motivator. I also feel a truly grateful for her progressive vision about the dissertation, her tolerance of my naive mistakes, and her commitment to my future career. I also sincerely thanks for the time spent proofreading and correcting many mistakes.

Last but not least, my deepest gratitude goes to my beloved parents and also to my entire team group under the same supervisor for their commitment to finish this task and shared the ideas together.
Abstract

The purpose of this dissertation is to study the maintenance management of stadiums in Klang Valey. This dissertation are meant to identify the type of maintenance management used in stadiums, to identify the issues on maintenance managements and to suggest recommendation for improvement on the quality of maintenance program. Observation on the case study condition and semi-structured interview are conducted to the three involved case study to make data collection and analysis as the primary data resources. The secondary data are collected from journals, articles, documents or handout and internet sources. Based on the result, the types of maintenance management system had been identified which are breakdown and preventive maintenance. The issues that occurs among these case studies are deficiency on maintenance budget, lack of expertise and internal technical staff and quality of work from outsource contractor. Based also on the results, complete planned maintenance programs are recommended to be utilized to the stadiums involved in the case study to ensure the building are in a good condition, have a greater lifespan and safe to be used for athletes and public.
