(E73-11160) SNOW SURVEYING TO ASSESS
RISK OF SPRING FLOOD AND SNOW STORAGE IN
AREAS OF HYDRO-POWER STATIONS (State
Power Board, Oslo (Norway).) 1 p HC

N73-33313

Dear Sir,

\$3.00

CSCL 08H G3/13 Unclass
01160

Reg.: Project Hydrology - No. Fo 418 - ERTS.

We have been delayed in our work with analyzing ERTS-data, but we are now picking up and are doing well.

Our new I²s Addcol Viewer has arrived and is a good help.

But the most important point is that we are very happy about the ERTS-images we have received this summer.

Last spring we thought we had to discontinue our work due to the difficulties experienced with the tape-recorder. This seems to have been overcome and we are very happy to be able to inform you that we have received many images this summer covering the most interesting areas with a high technical quality and which have proved very valuable in our work.

As soon as the material has been further analyzed it will be presented in a new report.

So in short we are very happy about the material received and hope for continued good coverage this fall.

Sincerely yours

H. Odegaard
Helge Odegaard
