(Cell 161, 1215–1228; May 21, 2015)

Our paper presented an integrated sequencing analysis of clinical samples from advanced prostate cancer patients. Parts of the findings were listed in Table S3, Mutations Identified in the 150 Cases. During the preparation of our table, we inadvertently mislabeled three gene names. In row 14118, 11-Sep should be SEPT11. In row 22306, 12-Sep should be SEPT12. In row 22927, 1-Mar should be MARCH1. These errors do not affect any conclusions of the paper, and the corrected version of Table S3 has been updated online. We apologize for any inconvenience this may have caused.
