2012. Chain length determines the folding rates of RNA. *Biophys. J.* 102:L11–L13.

In the published manuscript, ~1 ms should be corrected to ~1  $\mu$ s in both “... the speed limit of RNA folding is ~1 ms just as ...” in the Abstract and “... the speed limit for protein folding is also ~1 ms ...” on page L12, to read:

In the Abstract,

“... the speed limit of RNA folding is ~1  $\mu$ s just as ...”.

On page L12,

“... the speed limit for protein folding is also ~1  $\mu$ s ...”.

The authors thank Anna Wirth for bringing this error to their attention.
