

**Discrete Applied Mathematics**  
**Volume 158, Issue 10, 28 May 2010**

**Contents**

**Contributions**

- D. Andersson, V. Gurvich and T.D. Hansen*  
On acyclicity of games with cycles 1049
- I.F. Blake and T. Garefalakis*  
A transform property of Kloosterman sums 1064
- B. Horoldagva and S.-G. Lee*  
Comparing Zagreb indices for connected graphs 1073
- K.-J. Pai, J.-M. Chang and Y.-L. Wang*  
Restricted power domination and fault-tolerant power domination on grids 1079
- D. Shabtay, G. Steiner and L. Yedidsion*  
Bicriteria problems to minimize maximum tardiness and due date assignment cost in various scheduling environments 1090

**Notes**

- H. Hocquard, M. Montassier and A. Raspaud*  
A note on the acyclic 3-choosability of some planar graphs 1104
- Q. Meng, L. Chen and F.-W. Fu*  
On homogeneous rotation symmetric bent functions 1111
- D.O. Theis*  
A note on the relationship between the graphical traveling salesman polyhedron, the Symmetric Traveling Salesman Polytope, and the metric cone 1118
- L. Yuan*  
Acute triangulations of trapezoids 1121
