Title Index

A
A lack of ongoing diabetes is an important factor in preserving eyes from late or suboptimally treated endogenous endophthalmitis secondary to Klebsiella pneumoniae liver abscess 5:23
Autologous serum therapy in recalcitrant laser-assisted in situ keratomileusis-Induced neurotrophic epitheliopathy 5:109
Axial length and subfoveal choroidal thickness in individuals with age-related macular degeneration 5:169

B
Bilateral inferior oblique muscle paresis after posterior subtenon injection of triamcinolone acetonide 5:94
Bilateral optic neuritis related to chronic inflammatory demyelinating polyneuropathy 5:40
Bilateral uveitis associated with concurrent administration of rifabutin and nelfinavir 5:187

C
Changes of intraocular pressure and refractive status in children following cycloplegic refraction with 1% cyclopentolate and 1% tropicamide 5:124
Choose the right treatment for the right patients 5:147
Clinical characteristics and antivascular endothelial growth factor effect of choroidal neovascularization in younger patients in Taiwan 5:76
Comparison of surgical outcomes after phacotrabeculectomy in primary angle-closure glaucoma versus primary open-angle glaucoma 5:28
Comparison of trabeculectomy with Ex-PRESS shunt implantation in primary-open-angle-glaucoma patients: A retrospective study 5:120
Complex genetics of familial exudative vitreoretinopathy and related pediatric retinal detachments 5:56

D
Detecting optic nerve head deformation and retinal nerve fiber layer thinning in glaucoma progression 5:50
Detection of the progression of retinal nerve fiber layer loss by optical coherence tomography in a patient with glaucomatocyclitic crisis 5:90
Development of macular holes in diabetic retinopathy with fibrovascular proliferation: Report of four cases 5:85
Distribution of corneal and ocular spherical aberrations in eyes with cataract in the Taiwanese population 5:72

E
Easy-to-prepare autologous platelet-rich plasma in the treatment of refractory corneal ulcers 5:132
Experience of scleritis and episcleritis at a tertiary center in Southern Taiwan 5:19

G
Glaucomatocyclitic crisis and glaucomatous optic neuropathy 5:49

H
How to manage traumatic optic neuropathy? 5:1
IV

I
Immunosuppressive therapy for eye diseases: Effectiveness, safety, side effects and their prevention 5:156

L
Latest advances in the treatment of corneal diseases 5:103
Low vision aid—A ray of hope for irreversible visual loss in the pediatric age group 5:63

M
Major challenges in vitreoretinal surgery 5:9
Management of hypotony after glaucoma filtering surgery 5:44

N
Negative Mantoux test in a patient with definite pulmonary and ocular tuberculosis 5:182
Neuroimaging and clinical features of patients with optic nerve hypoplasia in Taiwan 5:15

O
Occult Descemet’s membrane detachment after phacoemulsification surgery mimicking pseudophakic bullous keratopathy 5:136
Ocular adnexal lymphoma: Five case reports and a literature review 5:99
Ocular decompression retinopathy after laser iridotomy in a patient with acute angle closure 5:195
Ocular post-transplant lymphoproliferative disorder 5:140

P
Prevalence of general binocular dysfunctions among rural schoolchildren in South Korea 5:177

R
Rapid anterior capsular phimosis after cataract surgery in a patient with chronic angle closure glaucoma 5:192
Refractive error, visual acuity, and corneal-curvature changes in high and low myopes with orthokeratology treatment: A Malaysian study 5:164
Rescue effects of intravitreal aflibercept in the treatment of neovascular age-related macular degeneration 5:128
Retinal detachment with a break at pars plicata associated with congenital malformation of the lens–zonule–ciliary body complex 5:143
Rod metabolic demand drives progression in retinopathies 5:105

S
Severe ocular complications following facial calcium hydroxylapatite injections: Two case reports 5:36
Short break-up time type dry eye has potential ocular surface abnormalities 5:68
Spectral-domain optical coherence tomography findings of subinternal limiting membrane hemorrhage in the macula before and after Nd:YAG laser treatment 5:33
Stevens–Johnson syndrome following cataract surgery 5:96
Sub-internal limiting membrane hemorrhage treated with intravitreal tissue plasminogen activator followed by octafluoropropane gas injection 5:198
Suture pull-through insertion of graft donor in Descemet stripping automated endothelial keratoplasty: Results of 4-year follow-up 5:114

T
Traumatic optic neuropathy—Clinical features and management issues 5:3

V
Varicella zoster virus-associated neuroretinitis 5:189

W
When is macular edema not macular edema? An update on macular telangiectasia type 2 5:149
