(Cell Metabolism 9, 499–511; June 3, 2009)

We have recently become aware that northern and western blot band images in Figures 6 and 7 appear more than once in independent and unrelated experiments. Although the reasons for the errors are still under investigation, we believe that the most responsible course of action is to retract the article and to sincerely apologize to the scientific community for not detecting these errors prior to publication. We also apologize for any negative impact this may have caused.
