asked to choose between hypothetical treatment pairs in a series of choice questions.
Each choice alternative was defined by lesion severity (redness, thickness, and texture),
percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
depression, risk of memory loss, risk of weight gain, risk of anxiety, risk of
abdominal discomfort, cost of treatment, out-of-pocket cost, treatment duration,
percentage of body surface area covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.

Percentage of body surface area (BSA) covered by the lesions, type of treatment (oral
agent, subcutaneous injection, or phototherapy), injection discomfort or pain (if type of
administration included injections), risk of side effects, risk of serious side effects, risk of
serious infection, risk of serious cancer, risk of infection, risk of joint pain, risk of
memory loss, risk of weight gain, risk of anxiety, risk of abdominal discomfort, cost of
treatment, out-of-pocket cost, treatment duration.
