Subject Index: Volume 8

Ablation procedures
Closed chest catheter ablation of an accessory pathway in a patient with permanent junctional reciprocating tachycardia (letter), 740
Ectopic atrial tachycardia after transvenous catheter ablation of a posteroseptal accessory pathway, 441
Electrical catheter ablation in the left and right ventricular wall in dogs: relation between delivered energy and histopathologic changes, 637
Thermal effects of laser and electrical discharge on cardiovascular tissue: implications for coronary artery recanalization and endocardial ablation, 193
Transcatheter ablative techniques for treatment of the permanent form of junctional reciprocating tachycardia in young patients, 385

Accessory pathways
Closed chest catheter ablation of an accessory pathway in a patient with permanent junctional reciprocating tachycardia (letter), 740
Ectopic atrial tachycardia after transvenous catheter ablation of a posteroseptal accessory pathway, 441

Acetylcholine
Atroventricular junction tachycardia during heart block, 657

Adenosine
Adenosine in atrial arrhythmias (letter), 463
Effects of adenosine and adenine 5'-triphosphate on ventricular escape rhythm in canine heart, 1145
Mechanism of tetrodoxin-resistant atrioventricular block during inferior myocardial infarction: possible role of adenosine, 1232
Adenosine 5'-triphosphate
Effects of adenosine and adenine 5'-triphosphate on ventricular escape rhythm in canine heart, 1145
Stabilization of a derangement in adenosine triphosphate metabolism during sustained, partial ischemia in the dog heart, 894

Adrenergic stimulation
Atroventricular junctional tachycardia during heart block, 657
Functional consequences and intracoronary localization of alpha-adrenergic stimulation of the canine coronary circulation, 885
Plasma catecholamine response to ventricular tachycardia induction and external countershock during electrophysiologic testing, 584

Aging heart
Myocyte cell loss and myocyte hypertrophy in the aging rat heart, 1441

Airline pilots
Should airline pilots be eligible to resume active flight status after coronary bypass surgery? A CASS registry study, 1318

Airway resistance
Mechanisms of pulsus paradoxus during resitive respiratory loading and asthma, 529

Alpha-adrenergic stimulation
See Adrenergic stimulation

American College of Cardiology
Cardiovascular teaching techniques: planning and presenting effective instruction—alternative technologies of teaching in cardiovascular medicine, 465
Guidelines for clinical use of cardiac radionuclide imaging, December 1986: a report of the American College of Cardiology/American Heart Association task force on assessment of cardiovascular procedures (subcommittee on nuclear imaging), 1471
Guidelines for exercises testing: a report of the American College of Cardiology/American Heart Association task force on assessment of cardiovascular procedures (subcommittee on exercise testing), 1471
Newly elected members of the College, 1004

President’s page: on physician payment reform, 257

Angiodyaline
Amiodarone and desethylamiodarone distribution in the atrium and adipose tissue of patients undergoing short- and long-term treatment with amiodarone, 210

Aneurysm
See also Pseudoaneurysm
Determinants of left ventricular aneurysm formation after anterior myocardial infarction: a clinical and angiographic study, 1256

Angina pectoris
Effects of nifedipine on arterial oxygenation at rest and during exercise in patients with stable angina, 1461
Effects of recent and remote infarction on the predictive accuracy of the ST segment/heart rate slope, 267
High dose diprymidol echocardiography test in effort angina pectoris, 848
Nifedipine versus isosorbide dinitrate in patients with exertional angina receiving propranolol (letter), 739
Place of transluminal coronary angioplasty in the management of variant angina: a warning (editorial comment), 509
Platelet prostacyclin binding in coronary artery disease, 259
Role of antimicrobial therapy in unstable angina, myocardial infarction and sudden death, 67B
Site of increased resistance to coronary flow in patients with angina pectoris and normal epicardial coronary arteries (editorial), 459

Angiography
See also Arteriography; Cineangiography
Cine computed tomographic evaluation of aortocoronary bypass graft patency, 693
Coronary artery caliper in normal children and patients with Kawasaki disease but without aneurysms: an echocardiographic and angiographic study, 1119
Diagnosis of pulmonary embolism, 128B
Left ventricular function in tricuspid atresia: a radionuclide study, 916
Promise of digital cardiac angiography (editorial comment), 817
Quantification of aortic regurgitation utilizing continuous wave Doppler ultrasound, 592
Transient right axis deviation during acute anterior wall infarction or ischemia: electrocardiographic and angiographic correlation, 27

Angioplasty
Comparative results of percutaneous transluminal coronary angioplasty in patients with dynamic versus fixed coronary stenosis, 504
Comparison of ejection fraction and pulmonary blood volume ratio as markers of left ventricular function change after coronary angioplasty, 511
Contrast echocardiography for evaluation of myocardial perfusion: effects of coronary angioplasty, 232
Coronary angioplasty and the persistent problem of restenosis (editorial comment), 1277
Coronary angioplasty under the prospective payment system: the need for a severity-adjusted payment scheme, 784
Crossing balloons. A new technique for complex angioplasty, 980

Deep arterial injury during experimental angioplasty: relation to a positive indium-111-labeled platelet scintigram, quantitative platelet deposition and mural thrombosis, 1380
Effect of nifedipine on recurrent stenosis after percutaneous transluminal coronary angioplasty, 1271
Histopathology after Nd-YAG laser percutaneous transluminal angioplasty of peripheral arteries, 1089
Laser angioplasty with angiographic guidance in humans, 184
Long-term outcome after repair of coarctation in infancy: subclavian angioplasty does not reduce the need for reoperation, 1406
Pathogenesis and prevention of aortocoronary vein bypass graft occlusion and restenosis after arterial
angioplasty: role of vascular injury and platelet thrombus deposition, 57B
Percutaneous coronary laser thermal angioplasty, 1437
Percutaneous transluminal coronary angioplasty after thrombolytic therapy: a perspective controlled randomized trial, 485
Place of transluminal coronary angioplasty in the management of variant angina; a warning (editorial comment), 509
Prevention of subsequent exercise-induced perinfarct ischemia by emergency coronary angioplasty in acute myocardial infarction: comparison with intra coronary streptokinase, 496
Spectrum of pathology associated with percutaneous transluminal coronary angioplasty during acute myocardial infarction, 835

Angiography
Laser angioplasty with angiographic guidance in humans, 184

Antiarrhythmic therapy
See also Sotalol; specific agents
Amiodarone and desethylamiodarone distribution in the atrium and adipose tissue of patients undergoing short- and long-term treatment with amiodarone, 210
Classification by type of ventricular arrhythmia predicts frequency of adverse cardiac events from flecainide, 607
Flecainide: steady state electrophysiologic effects in patients with remote myocardial infarction and inducible sustained ventricular arrhythmias, 214
Further observations on junctional rhythm: role of verapamil (letter), 255
Lidocaine causes a reversible, concentration-dependent increase in defibrillation energy requirements, 327
Mechanisms of prevention of sudden death by nadolol: differential actions on arrhythmia triggers and substrate after myocardial infarction in the dog, 1365
Multicenter trial of sotalol for suppression of frequent complex ventricular arrhythmias: a double-blind, randomized, placebo-controlled evaluation of two doses, 752
Programmed electrical stimulation studies for ventricular tachycardia induction in humans. I. Comparison of indwelling electrode catheter and daily catheter replacement, 576
Recainam, a patent new antiarrhythmic agent: effects on complex ventricular arrhythmias, 427
Role of antiarrhythmic drugs in sudden cardiac death, 104A

Anticoagulant therapy
See also Heparin; Warfarin
Thrombosis and embolism from cardiac chambers and infected valves, 76B
Antinuclear antibodies
Antinuclear antibodies in primary hypertension, 1307
Antithrombotic therapy
Antithrombotic therapy in patients with valvular heart disease and prosthetic heart valves, 41B
Pharmacology of heparin and warfarin, 10B
Pharmacology of platelet inhibitors, 21B
Role of antithrombotic therapy in unstable angina, myocardial infarction and sudden death, 67B
Role of platelet activation and fibrin formation in thrombogenesis, 2B
Symposium on thrombosis and antithrombotic therapy, 1B
Thromboembolism and antithrombotic therapy in cerebrovascular disease, 88B
Thromboembolism and antithrombotic therapy in peripheral arterial disease, 98B

Aortic arch
Quantitative morphology of the aortic arch in neonatal coarctation, 616

Aortic insufficiency
See Aortic valve disease

Aortic outflow
Patterns and timing of Doppler-detected intracavitary and aortic flow in hypertrophic cardiomyopathy, 1047

Aortic valve disease
See also Valve disease
Doppler echocardiographic measurement of aortic valve area in aortic stenosis: a noninvasive application of the Gorlin equation, 1059
Quantification of aortic regurgitation utilizing continuous wave Doppler ultrasound, 592
Quantitative evaluation of aortic insufficiency by continuous wave Doppler echocardiography, 1341
Regional blood flow and metabolite levels in the left ventricular free wall and septum during aortic insufficiency: implications for the development of asymmetric septal hypertrophy, 1182

Arginine vasopressin
Hemodynamic effects of infused arginine vasopressin in congestive heart failure, 779

Arrhythmias
See also Antiarrhythmic therapy; specific type
Clinical features and basic mechanisms of quinidine-induced arrhythmias, 73A
Contribution of depolarized foci with variable conduction impairment to arrhythmogenesis in 1 day old infarcted canine cardiac tissue: an in vitro study, 648
Diagnosis of fatal arrhythmias using echocardiographic and Doppler techniques, 1425
Efficacy of dilatazem in two experimental feline models of sudden cardiac death, 661

Arrhythmias, atrial
Adenosine in atrial arrhythmias (letter), 463

Arrhythmias, ventricular
Antiarrhythmic efficacy of propranolol: comparison of low and high serum concentrations, 959
Classification by type of ventricular arrhythmia predicts frequency of adverse cardiac events from flecainide, 607
Long-term reproducibility and significance of provokable ventricular arrhythmias after myocardial infarction, 32
Mechanism of cardiac arrhythmias induced by epinephrine in dogs with hypokalemia, 1373
Relation between ventricular arrhythmia and sudden cardiac death in patients with acute myocardial infarction: the predictors of ventricular fibrillation, 69A
Significance of timing programmed electrical stimulation after acute myocardial infarction, 1279
Ventricular arrhythmias initiated by programmed stimulation in four groups of patients with healed myocardial infarction, 1035

Arterial injury
Deep arterial injury during experimental angioplasty: relation to a positive inium-111--labeled platelet scintigram, quantitative platelet deposition and mural thrombosis, 1380

Arteriography
See also Angiography
Myocardial contrast echocardiography in humans. I. Safety—a comparison with routine coronary arteriography, 1066
Progression of coronary atherosclerotic disease assessed by cinevideodensitometry: relation to clinical risk factors, 1325
Quantitative evaluation of regional myocardial blood flow by videodensitometric analysis of digital subtraction coronary arteriography in humans, 809

Aspirin
Coronary vasodilation by nitrates is not mediated by the prostaglandin system: a quantitative cineangiographic study, 1263
Pathogenesis and prevention of aortocoronary bypass graft occlusion and restenosis after arterial angioplasty: role of vascular injury and platelet thrombus deposition, 57B
Role of antithrombotic therapy in unstable angina, myocardial infarction and sudden death, 67B

Asthma
Mechanism of pulsus paradoxus during resistive respiratory loading and asthma, 529

AT-1b interval
Manipulating the AT-1b (letter), 254

Atherosclerosis
See also Coronary artery disease
Laser angioplasty and atherosclerosis (letter), 254
Mechanisms of coronary spasm of isolated human epicardial coronary segments excised 3 to 5 hours after sudden death, 42A
Progression of coronary atherosclerotic disease assessed by cinevideodensitometry: relation to clinical risk factors, 1325
Thromboembolism and antithrombotic therapy in peripheral arterial disease, 11B

SUBJECT INDEX 1489
Uptake of hematoporphyrin derivative by atheromatous plaques: studies in human in vitro and rabbit in vivo, 1387

Atria
Amiodarone and desethylamiodarone distribution in the atrium and adipose tissue of patients undergoing short- and long-term treatment with amiodarone, 210
Persistent left superior vena cava communicating with the left atrium through a systemic-pulmonary venous malformation, 621
Thrombosis and embolism from cardiac chambers and infected valves, 76B
Ultrasound study of acoustic properties of normal canine heart: comparison of backscatter from all chambers, 880

Atrial fibrillation
Thrombosis and embolism from cardiac chambers and infected valves, 76B

Atrial flutter
A new animal model of atrial flutter, 872

Atrial natriuretic factor
Atrial pressure and secretion of atrial natriuretic factor into the human central circulation, 18

Atrial pressure
Atrial pressure and secretion of atrial natriuretic factor into the human central circulation, 18

Atrial tachycardia
Ectopic atrial tachycardia after transvenous catheter ablation of a posteroesopetal accessory pathway, 441

Atrioventricular canal
Double outlet right ventricle associated with common atrioventricular canal: report of nine anatomic specimens, 396
Cardiac seption in atrioventricular canal defect, 1421

Atrioventricular junctional tachycardia
Atrioventricular junctional tachycardia during heart block, 657

Atropine
Mechanism of atropine-resistant atrioventricular block during inferior myocardial infarction: possible role of adenosine, 1232

Autonomic nervous system
Changes in neural and humoral mechanisms of the heart in sudden death due to myocardial abnormalities, 55A
Degenerative lesions of a coronary chemoreceptor and nearby neural elements in the hearts of victims of sudden death, 12A
Differential modulation of autonomic activity by ethmozin and ethacizin (analog of ethmozin) on the canine sinus node and atrioventricular junction, 56A

Axis deviation
Transient right axis deviation during acute anterior wall infarction or ischemia: electrocardiographic and angiographic correlation, 27

Balloon valvotomy
See Valvotomy

Beta-adrenergic blocking agents
See specific agents

Beta-adrenergic receptors
Beta-adrenergic receptor properties of canine myocardium: effects of myocardial infarction, 349
Mechanisms of coronary spasm of isolated human epicardial coronary segments excised 3 to 5 hours after sudden death, 42A

Bigeminy
Triggered activity as a cause of bigeminy, 644

Biopsy
Predictive value of lung biopsy in ventricular septal defect: long-term follow-up, 1113

Blood flow
See also Myocardial blood flow
Effect of elevations of coronary artery partial pressure of carbon dioxide (Pco2) on coronary blood flow, 1175
Regional blood flow and metabolite levels in the left ventricular free wall and septum during aortic insufficiency: implications for the development of asymmetric septal hypertrophy, 1182
Regional vascular adjustments during recovery from myocardial infarction in rats, 134
Site of increased resistance to coronary flow in patients with angina pectoris and normal epicardial coronary arteries (editorial), 459
Subselective measurement of coronary blood flow velocity using a steerable Doppler catheter, 1332

Blood volume
Comparison of ejection fraction and pulmonary blood volume ratio as markers of left ventricular function change after coronary angioplasty, 511

Books received, 566

8-Bromo-cyclic guanosine monophosphate
Effect of 8-bromo cyclic guanosine monophosphate (cGMP) on coronary artery constriction in isolated rabbit hearts, 342

Calcium
Mechanisms of coronary spasm of isolated human epicardial coronary segments excised 3 to 5 hours after sudden death, 42A
Role of sarcolemmal-bound calcium in regulation of myocardial contractile force, 65A

Cameras
See Gamma camera

Carbon dioxide
Effect of elevations of coronary artery partial pressure of carbon dioxide (Pco2) on coronary blood flow, 1175

Cardiac catheterization
See Angiography

Cardiac conduction
See also Heart block
Atrial dissociation: an electrophysiologic finding in patients with transposition of the great arteries, 236

Contribution of depolarized foci with variable conduction impairment to arrhythmogenesis in 1 day old infarcted canine cardiac tissue: an in vitro study, 648
Congenital abnormalities of the conduction system in sudden death in young adults, 1096

Functional characteristics of human macroreentry: a study of "pre-excited" circuits by extrastimulus method, 1073

Cardiac transplantation
Cardiac transplantation in patients over 50 years of age, 285
Outcome of patients referred for cardiac transplantation, 1312

Cardiac ultrastructure
Alcoholic cardiomyopathy and sudden cardiac death, 3A
Changes in neural and humoral mechanisms of the heart in sudden death due to myocardial abnormalities, 55A
Effect of repetitive brief episodes of ischemia on cell volume, electrolytes and ultrastructure, 33A
Role of sarcolemmal-bound calcium in regulation of myocardial contractile force, 65A
Ultrastructural and histochemical observations in human and experimental alcoholic cardiomyopathy, 22A

Cardiology, training in
Adult and pediatric cardiovascular training programs in the United States, 993

Cardiomegaly
Patent ductus arteriosus in adults—long-term follow-up: nonsurgical versus surgical treatment, 280
Gated blood pool scintigraphic monitoring of doxorubicin cardiomyopathy: comparison of camera and computerized probe results in 101 patients, 1082

Hypertrophic cardiomyopathy with extreme increase in left ventricular wall thickness: functional and morphologic features and clinical significance, 57

Intramural ("small vessel") coronary artery disease in hypertrophic cardiomyopathy, 545

Left ventricular diastolic filling in children with hypertrophic cardiomyopathy: assessment with pulsed Doppler echocardiography, 310

Patterns and timing of Doppler detected intracavitary and aortic flow in hypertrophic cardiomyopathy, 1047

Peripartum cardiomyopathy: clinical, hemodynamic, histologic and prognostic characteristics, 52

Reversal of left ventricular intracavitary diastolic regurgitation in hypertrophic obstructive cardiomyopathy, 703

Severe functional limitation in patients with hypertrophic cardiomyopathy and only mild localized left ventricular hypertrophy, 537
Successful reversal by chelation therapy of congestive cardiomyopathy due to iron overload, 436

Assessment of left ventricular and systolic pressure volume relations with an impedance catheter and transient inferior vena cava occlusion: use of this system in the evaluation of the cardiogenic effects of dobutamine, milrinone, Posicor and epinephrine, 1152
Mechanisms of cardiac arrhythmias induced by epinephrine in dogs with hypokalemia, 1373

Escape rhythm
See Ventricular escape rhythm
Esmolol
Effects of esmolol on patients with left ventricular dysfunction, 225

Ethmozin
Differential modulation of autonomic activity by ethmozin and ethacizin (analogue of ethmozin) on the canine sinus node and atrioventricular junction, 86A

Ethacizin
Differential modulation of autonomic activity by ethmozin and ethacizin (analogue of ethmozin) on the canine sinus node and atrioventricular junction, 86A

Exercise testing
Changing role of the exercise electrocardiogram as a diagnostic and prognostic test for chronic ischemic heart disease, 1195
Comparative study of coronary flow reserve, coronary anatomy and results of radionuclide exercise tests in patients with coronary artery disease, 1022
Comparison of ejection fraction and pulmonary blood volume ratio as markers of left ventricular function change after coronary angioplasty, 511
Effects of nifedipine on arterial oxygenation at rest and during exercise in patients with stable angina, 1461
Effects of recent and remote infarction on the predictive accuracy of the ST segment/heart rate slope, 267
Exercise electrocardiographic variables: a critical appraisal, 836
Exercise-induced hypertension after repair of coarctation of the aorta: arm versus leg exercise, 165
Exercise testing after myocardial infarction: a perspective (editorial comment), 1018
Guidelines for exercise testing, 725
Left ventricular filling in endurance-trained subjects, 289
Plasma norepinephrine in exercise-induced ventricular tachycardia, 11
Prevention of subsequent exercise-induced perinfarct ischemia by emergency coronary angioplasty in acute myocardial infarction: comparison with intracoronary streptokinase, 496
Prognostic significance of the treadmill exercise test performance 6 months after myocardial infarction, 1007
Prognostic value of exercise electrocardiogram in men at high risk of future coronary heart disease: Multiple Risk Factor Intervention Trial experience, 1
Relative value of clinical variables, bicycle ergometry, rest radionuclide ventriculography and 24 hour ambulatory electrocardiographic monitoring at discharge to predict 1 year survival after myocardial infarction, 40
Risk of sudden death with exercise (letter), 991
Role of exercise testing after myocardial infarction (editorial comment), 1020
Role of exercise testing in identifying patient with improved survival after coronary artery bypass surgery, 741

False tendons
See Left ventricular false tendons

Femoral artery recanalization
Histopathology after Nd-YAG laser percutaneous transluminal angioplasty of peripheral arteries, 1089

Fetal heart
Doppler echocardiographic studies of diastolic function in the human fetal heart: changes during gestation, 391
Fetal ventricular pacing for hydrops secondary to complete atrioventricular block, 1434
Pulmonary atresia in prenatal life, 1131
Uses and abuses of fetal echocardiography: a pediatric cardiologist’s view (editorial), 451

Fibrin
Role of platelet activation and fibrin formation in thrombogenesis, 2B

Fibrinolytic therapy
See also Thrombolytic therapy
New mechanisms of action for tissue-type plasminogen activator, 132
Preventive and therapeutic approach to venous thrombolytic disease and pulmonary embolism—can death from pulmonary embolism be prevented, 146B

Flecainide
Classification by type of ventricular arrhythmia predicts frequency of adverse cardiac events from flecainide, 607
Flecainide: steady state electrophysiologic effects in patients with remote myocardial infarction and inducible sustained ventricular arrhythmias, 214

Flow velocity
Doppler-detected paradoxus of mitral and tricuspid valve flows in chronic lung disease, 706

Fontan procedure
Left ventricular function in tricuspid atresia: a radionuclide study, 916

Gamma camera
Gated blood pool scintigraphic monitoring of doxorubicin cardiomyopathy: comparison of camera and computerized probe results in 101 patients, 1082

Gorlin equation
Doppler echocardiographic measurement of aortic valve area in aortic stenosis: a noninvasive application of the Gorlin equation, 1059

Grants
See Surgery, coronary artery bypass

Heart block
Atrial dissociation: an electrophysiologic finding in a patient with transposition of the great arteries, 236
Atrioventricular block in acute inferior wall myocardial infarction: harbinger of associated obstruction of the left anterior descending coronary artery, 777
Atrioventricular junctional tachycardia during heart block, 657
Fetal ventricular pacing for hydrops secondary to complete atrioventricular block, 1434
Mechanism of atropine-resistant atrioventricular block during inferior myocardial infarction: possible role of adenosine, 1232
Serial production of controlled periods of temporary heart block used to unmask and assess latent ventricular automaticity during experimental acute myocardial ischemia, 95A

Heart failure
See Congestive heart failure

Heart valve
See Valve prosthesis; Valve disease

Heath-Edwards classification system
Predictive value of lung biopsy in ventricular septal defect: long-term follow-up, 1113

Hemostasis
Uptake of hematoporphyrin derivative by atheromatous plaques: studies in human in vitro and rabbit in vivo, 1387

Hemodynamics
Hemodynamic effect of infused arginine vasopressin in congestive heart failure, 779
Role of reflex sympathetic withdrawal in the hemodynamic response to an increased inotropic state in patients with severe heart failure, 413
Transient myocardial dysfunction during pharmacologic vasodilatation as an index of reduced coronary reserve: a coronary hemodynamic and echocardiographic study, 84

Hemostasis
Coronary thermolysis by intravenous infusion of recombinant single chain urokinase-type plasminogen activator or recombinant urokinase in baboons: effect on regional blood flow, infarct size and hemostasis, 118

Heparin
Antithrombotic therapy in patients with valvular heart disease and prosthetic heart valves, 41B
Combined use of warfarin and adjusted subcutaneous heparin during pregnancy in patients with an artificial heart valve, 221
Effects of full-dose heparin anticoagulation on the development of left ventricular thrombosis in acute transmural myocardial infarction, 419
Pharmacology of heparin and warfarin, 10B
Preventive and therapeutic approach to venous thromboembolic disease and pulmonary embolism—can death from pulmonary embolism be prevented, 146B

His-Purkinje system
Functional characteristics of human macroreentry; a study of “pre-excited” circuits by extrastimulus method, 1073
Holter monitoring

Sotalol
Electrophysiologic and antiarrhythmic efficacy of oral sotalol for sustained ventricular tachyarrhythmias: evaluation by programmed stimulation and ambulatory electrocardiogram, 949
Multicenter trial of sotalol for suppression of frequent, complex ventricular arrhythmias: a double-blind, randomized, placebo-controlled evaluation of two doses, 752

ST segment
Exercise electrocardiographic variables: a critical appraisal, 836
Role of exercise testing in identifying patients with improved survival after coronary artery bypass surgery, 741

Stenosis
See also Coronary artery disease; Pulmonary stenosis
Coronary angioplasty and the persistent problem of restenosis (editorial comment), 1277
Effect of nifedipine on recurrent stenosis after percutaneous transluminal coronary angioplasty, 1271
Pathogenesis and prevention of aortocoronary vein bypass graft occlusion and restenosis after arterial angioplasty: role of vascular injury and platelet thrombus deposition, 57B

Stimulus
See Electrical stimulation

Streptokinase
Enhancement of salvage of reperfused ischemic myocardium by diltiazem, 861
Percutaneous transluminal coronary angioplasty after thrombolytic therapy: a prospective controlled randomized trial, 485
Pharmacology of thrombolytic drugs, 33B
Prevention of subsequent exercise-induced perinfarct ischemia by emergency coronary angioplasty in acute myocardial infarction: comparison with intracoronary streptokinase, 496

Subclavian flap repair
Case for subclavian flap repair (editorial comment), 1412

Sudden death
Alcoholic cardiomyopathy and sudden cardiac death, 3A
Changes in neural and humoral mechanisms of the heart in sudden death due to myocardial abnormalities, 55A
Congenital abnormalities of the conduction system in sudden death in young adults, 1096
Degenerative lesions of a coronary chemoreceptor and nearby neural elements in the hearts of victims of sudden death, 12A
Effect of repetitive brief episodes of ischemia on cell volume, electrolytes and ultrastructure, 33A
Efficacy of diltiazem in two experimental feline models of sudden cardiac death, 661
Fourth USA/USSR symposium on sudden cardiac death, 1A
Mechanisms of coronary spasm of isolated human epicardial coronary segments excised 3 to 5 hours after sudden death, 42A
Mechanisms of prevention of sudden death by nadolol: differential actions on arrhythmia triggers and substrate after myocardial infarction in the dog, 1365
Relation between ventricular arrhythmia and sudden cardiac death in patients with acute myocardial infarction: the predictors of ventricular fibrillation, 69A
Risk of sudden death with exercise (letter), 991
Role of antiarrhythmic drugs in sudden cardiac death, 69A
Role of antithromboic therapy in unstable angina, myocardial infarction and sudden death, 67B
Role of sarcolemmal-bound calcium in regulation of myocardial contractile force, 65A
Ultrastructural and histochemical observations in human and experimental alcoholic cardiomyopathy, 22A

Superior vena cava
Persistent left superior vena cava communicating with the left atrium through a systemic-pulmonary venous malformation, 621

Surgery
Laser scintigraphy with angiographic guidance in humans, 184
JACC Vol. 8, No. 6
December 1986: 1488–1504

Patent ductus arteriosus in adults—long-term follow-up: nonsurgical versus surgical treatment, 280

Unusual case of postoperative pseudoaneurysm of the left ventricle: Doppler echocardiographic findings, 699

Surgery, coronary artery bypass
Cine computed tomographic evaluation of aortocoronary bypass graft patency, 293
Clinical response to coronary artery reoperation, 274
Coronary artery bypass surgery to prolong life? Less anatomy/more physiology (editorial comment), 749
Pathogenesis and prevention of aortocoronary vein bypass graft occlusion and restenosis after arterial angioplasty: role of vascular injury and platelet thrombus deposition, 57B
Role of exercise testing in identifying patients with improved survival after coronary artery bypass surgery, 741
Should airline pilots be eligible to resume active flight status after coronary bypass surgery?: A CASS registry study, 1318

Surgery, pediatric
Atrial dissociation: an electrophysiologic finding in a patient with transposition of the great arteries, 236
Case of subclavian flap repair (editorial comment), 1412
Effect of pressure loading, volume loading and surgery on left ventricular chamber and myocardial stiffness in congenital heart disease, with a reevaluation of normal pediatric valves, 371
Exercise-induced hypertension after repair of coarctation of the aorta: arm versus leg exercise, 165
Left ventricular function in tricuspid atresia: a radionuclide study, 916
Long-term outcome after repair of coarctation in infancy: subclavian angioplasty does not reduce the need for reoperation, 1406
Percutaneous balloon valvotomy of congenital pulmonary stenosis using oversized balloons, 909
Persistent ventricular adaptations in postoperative coarctation of the aorta, 172
Pulsed Doppler echocardiography in the preoperative evaluation of total anomalous pulmonary venous connection, 1413
Use of a venous assist device after repair of complex lesions of the right heart, 922
Valve replacement in children less than 5 years of age, 901

Thrombolysis therapy
See also Fibrinolytic therapy
Beneficial effects of tissue-type plasminogen activator in acute myocardial ischemia in cats, 125
Coronary thrombolysis by intravenous infusion of recombinant single chain urokinase-type plasminogen activator or recombinant urokinase in baboons: effect on regional blood flow, infarct size and hemostasis, 118
Coronary thrombolysis with recombinant plasminogen activator: patency rate and regional wall motion after 3 months, Dec.
Coronary thrombolysis with tissue-type plasminogen activator (t-PA): emerging strategies, 1220
Enhancement of salvage of refurused ischemic myocardium by diltiazem, 861
Percutaneous transluminal coronary angioplasty after thrombolytic therapy: a prospective controlled randomized trial, 485
Pharmacology of thrombolytic drugs, 33B
Symposium on thrombolysis in myocardial infarction, 1218

Thrombosis
See also Venous thrombosis; Ventricular thrombosis
Deep arterial injury during experimental angioplasty: relation to a positive indium-111-labeled platelet scintigram, quantitative platelet deposition and mural thrombosis, 1380
Symposium on thrombosis and antithrombotic therapy, 1B
Thrombosis and embolism from cardiac chambers and infected valves, 76B

Thrombus
Pathogenesis and prevention of aortocoronary vein bypass graft occlusion and restenosis after arterial angioplasty: role of vascular injury and platelet thrombus deposition, 57B

Tissue-type plasminogen activator
See Plasminogen activator

Tomography
Cine computed tomographic evaluation of aortocoronary bypass graft patency, 693
Quantitation of regional myocardial function by cine computed tomography: pharmacologic changes in wall thickness, 682
Regional myocardial metabolism in patients with acute myocardial infarction assessed by positron emission tomography, 800

Transplantation
See Cardiac transplantation

Transposition of the great arteries
Atrial dissociation: an electrophysiologic finding in a patient with transposition of the great arteries, 236
Obstruction of right ventricular inflow and outflow in corrected transposition of the great arteries (S,L,L): two-dimensional echocardiographic diagnosis, 407

Tricuspid valve
Doppler-detected paradoxus of mitral and tricuspid valve flows in chronic lung disease, 706
Triggered activity

Triggered activity as a cause of bigeminy, 644

Ultrasound

See also Doppler ultrasound; Echocardiography

Ultrasound study of acoustic properties of the normal canine heart: comparison of backscatter from all chambers, 880

Urokinase

Coronary thrombolysis by intravenous infusion of recombinant single chain urokinase-type plasminogen activator or recombinant urokinase in baboons: effect on regional blood flow, infarct size and hemostasis, 118

Pharmacology of thrombolytic drugs, 57B

Valve disease

See also Aortic valve disease

Antithrombotic therapy in patients with valvular heart disease and prosthetic heart valves, 41B

Automatic burst extrastimulus pacemaker to treat recurrent ventricular tachycardia in a patient with mitral valve prolapse: more than 2,000 documented successful tachycardia terminations, 446

Diagnosis of mitral valve perforation by real-time two-dimensional Doppler flow imaging technique, 1235

Doppler-detected paradoxus of mitral and tricuspid valve flows in chronic lung disease, 706

Doppler and two-dimensional echocardiographic diagnosis of Björk-Shiley prosthetic valve malfunction: importance of interventricular septal motion and the timing of onset of valve flow, 971

Left ventricular function in tricuspid atresia: a radionuclide study, 916

Membranous supravalvular mitral stenosis: a treatable form of congenital heart disease, 159

Myocardial ischemia in patients with pulmonary atresia and intact ventricular septum, 402

Pulmonary atresia in prenatall life, 1131

Pulsed Doppler echocardiographic evaluation of valvular regurgitation in patients with mitral valve prolapse: comparison with normal subjects, 1355

Relation between clinical features of the mitral prolapse syndrome and echocardiographically documented mitral valve prolapse, 763

Thrombosis and embolism from cardiac chambers and infected valves, 76B

Valve prostheses

Antithrombotic therapy in patients with valvular heart disease and prosthetic heart valves, 41B

Combined use of warfarin and adjusted subcutaneous heparin during pregnancy in patients with an artificial heart valve, 221

Doppler and two-dimensional echocardiographic diagnosis of Björk-Shiley prosthetic valve malfunction: importance of interventricular septal motion and the timing of onset of valve flow, 971

Normal and abnormal prosthetic valve function as assessed by Doppler echocardiography, 317

Valve replacement in children less than 5 years of age, 901

Vallotomy

Percutaneous balloon valvotomy of congenital pulmonary stenosis using oversized balloons, 909

Vascular injury

Pathogenesis and prevention of aortic coronary vein bypass graft occlusion and retenostosis after arterial angioplasty: role of vascular injury and platelet thrombus deposition, 57B

Vascular reserve

See Coronary vascular reserve

Vascular resistance

Regional vascular adjustments during recovery from myocardial infarction in rats, 134

Vasoconstriction

See Coronary vasoconstriction

Vasodilatation

See Coronary vasodilatation

Vasopressin

See Arginine vasopressin

Vectorcardiogram

When is the vectorcardiogram superior to the scalar electrocardiogram (seminar), 791

Vena cava

See Inferior vena cava; Superior vena cava

Venous assist device

Use of a venous assist device after repair of complex lesions of the right heart, 922

Venous thrombosis

Clinical features and diagnosis of venous thrombosis, 114B

Epidemiology and pathogenesis of venous thrombosis, 104B

Preventive and therapeutic approach to venous thromboembolic disease and pulmonary embolism—can death from pulmonary embolism be prevented, 146B

Venous thrombosis in particular organs, 137B

Ventricular function

Assessment of left ventricular function: Comparison of Doppler echocardiography and gated blood pool scintigraphy, 1348

Effect of pressure loading, volume loading and displaying the extent of regional left ventricular dysynchrony, 830

Effects of esmolol on patients with left ventricular dysfunction, 225

Immediate rebound followed by deterioration of regional left ventricular function with coronary reperfusion, 333

Left ventricular function in tricuspid atresia: a radionuclide study, 916

Peripartum cardiomyopathy: clinical, hemodynamic, histologic and prognostic characteristics, 52

Persistent ventricular adaptations in postoperative coarctation of the aorta, 172

Programmed electrical stimulation studies for ventricular tachycardia induction in humans. 1. The role of ventricular functional refractoriness in tachycardia induction, 567

Regional vascular adjustments during recovery from myocardial infarction in rats, 134

Reversal of left ventricular intracavitary

Ventricular arrhythmias

See Arrhythmias, ventricular

Ventricular dimensions

Electrocardiographic diagnosis of chamber enlargement, 711

Severe functional limitation in patients with hypertrophic cardiomyopathy and only mild localized left ventricular hypertrophy, 537

Ventricular endocardial surface

New echocardiographic model for quantifying three-dimensional endocardial surface area, 819

Ventricular escape rhythm

Effects of adenosine and adenine 5'-triphosphate on ventricular escape rhythm in canine heart, 1145

Ventricular false tendons

Incidence and distribution of left ventricular false tendons: an autopsy study of 483 normal human hearts, 179

Ventricular fibillation

See Ventricular tachyarrhythmias

Ventricular filling

Doppler echocardiographic assessment of impaired left ventricular filling in patients with right ventricular pressure overload due to primary pulmonary hypertension, 1298

Improved left ventricular filling accompanies reduced left ventricular mass during therapy of essential hypertension, 1449

Left ventricular diastolic filling in children with hypertrophic cardiomyopathy: Assessment with pulsed Doppler echocardiography, 301

Left ventricular filling in endurance-trained subjects, 289

Ventricular perfusion scan

Diagnosis of pulmonary embolism, 128B

Ventricles

Double outlet right ventricle associated with common atrioventricular canal: report of nine anatomic specimens, 396

Effect of pressure loading, volume loading and surgery on left ventricular chamber and myocardial stiffness in congenital heart disease, with a reevaluation of normal pediatric valves, 371

Heterogeneous fate of the left ventricle after acute myocardial infarction (editorial review), 986

Thrombosis and embolism from cardiac chambers and infected valves, 76B
