

News from Chemistry & Biology

As you browse through this issue of *Chemistry & Biology*, or if you visit our website at <http://www.chembiol.com> in search of contact information, you might notice some changes to the lists of our Editors and Editorial Board members. We are delighted to announce that Dr. Craig M. Crews has joined our team of Editors. Dr. Crews is a Professor of Molecular, Cellular, and Developmental Biology, Professor of Chemistry and Professor of Pharmacology at Yale University, New Haven, Connecticut, USA, and his research interests include natural product synthesis, mechanism of action studies, and the use of small molecules to control cellular functions, such as protein degradation and proliferation. On the other hand, we are sorry to lose the services of Dr. Ronald R. Breaker, who started his tenure as the Editor of *Chemistry & Biology* in 2002. We would like to express our gratitude to Dr. Breaker, who has made significant contributions to *Chemistry & Biology* and the research community we serve, in his role as an Editor. Finally, it gives us great pleasure to welcome Dr. Breaker to the journal's Editorial Board, thus continuing his involvement with the journal and communicating exciting scientific reports from research done at the chemistry/biology interface.

Michael Famulok, Editor

Kevan Shokat, Editor

Wolfgang Wohlleben, Editor
