Editorial

2011 International Conference on Advanced in Control Engineering and Information Science (CEIS 2011) was held in Dali, Yunnan, China during August 18-19, 2011. The aim is to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in control engineering and information science. This proceedings communicates the latest progress and research results of new theory, new method, technology and so on in control engineering and information science, and to grasp the updated research trends in international, which will drive international communication and cooperation of production, education and research in this field.

We received more than 2000 submissions from email and electronic submission system, which were reviewed by international experts, and about 1000 papers have been selected for presentation. We believe the proceedings will provide the readers a broad overview of the latest advances in the field of control engineering and information science.

On behalf of the guest editors for this special issue, I would like to thank the National 863 Program of China and National Science Fund of China. I also thank the conference organization staff, and the members of International Technological Committees for their hard work.

We look forward to seeing all of you next year at the CEIS 2012.

July, 2011
