Subject Index: Abstracts

Ablation procedures
See also Lasers: Rotation; Surgery, ablation
Ablation of canine ventricular myocardium with a cryogenic catheter: a new closed-chest ablative technique, 166A
Attempted ablation of left sided accessory pathways by radiofrequency current, 168A
Autonomic influence on ventricular subsidiary pacemakers: a study of patients post AV nodal ablation, 232A
Catheter ablation of a posteroseptal accessory atrioventricular connection in forty-two patients, 169A
Catheter ablation of the atrioventricular junction using radiofrequency energy, 169A
Catheter modification of AV nodal conduction in drug resistant AV nodal reentrant tachycardia (AVNRKF), 176A
Catheter modification of the atrioventricular node: a potential cure for atrioventricular nodal reentrant tachycardia, 168A
Comparative effects of radiofrequency and laser ablation in normal and diseased ventricular myocardium, 173A
Direct endocardium guided ablation of the slow conduction zone (SCZ) in human type I atrial flutter (AF), 168A
Effect of epicardial accessory pathway ablation or endocardial dissection for AV nodal reentrant tachycardia on vagal innervation of the AV node, 232A
Effects of low energy direct current countershock on atrioventricular nodal junction in dog using suction-ablation catheter, 178A
Electrophysiologic effects of argon laser irradiation during intrasoperative atrioventricular node or accessory pathway ablation in man, 169A
Phase image triangulation of accessory pathways in patients undergoing catheter ablation of posteroseptal pathways, 168A
Radiofrequency or direct current for ablation of ventricular tachycardia?, 176A
Successful radiofrequency catheter ablation of right anteroventricular accessory atrioventricular connections, 176A
Temperature-guided radiofrequency coagulation of myocardial tissue, 169A

Acceleration
Low maximum acceleration measured using aortic Doppler identifies patients at risk of cardiac death following acute myocardial infarction, 157A
Accessory pathways
See also Ablation procedures; Surgery, ablation; Wolff-Parkinson-White syndrome
Antegrade and retrograde conduction occurring over separate, adjacent accessory AV pathways, 173A

Effects of upright posture on atrioventricular accessory pathway conduction, 205A
Noninvasive localization of accessory pathways, 8A
Retrograde pathway in atrioventricular nodal tachycardia: nodal tissue or extranodal accessory pathway?, 175A

Acetycholine
Acetycholine causes vasocostriction in pre-contracted human coronary arteries in vivo, 85A
Acetycholine is a potent vasocostructor in human coronary arteries early after cardiac transplantation, 85A
Comparison of acetycholine and ergonovine in the provocation of coronary vasospasm, 132A
Contrasting effects of acetycholine on coronary conductance and resistance vessels in patients with coronary artery disease, 133A
Coronary occlusion-reperfusion attenuates endothelium-mediated vascular response to leukotriene D4 and acetycholine, 143A
Effect of oral administration of antihypertensive agents on endothelium dependent and endothelium independent vascular relaxation, 83A
Endothelial function influences the coronary vasomotor response to sympathetic stimulation in man, 202A
Genetically induced atherosclerosis attenuates endotheliually mediated relaxation, 32A
Preserved flow-mediated vasodilation despite acetycholine-induced vasoconstriction in atherosclerotic coronary arteries in man, 132A

Adenyl cyclase
Ischemic ventricular fibrillation is distinguished by preserved histamine-stimulated adenyl cyclase activity, 90A

Adenylate cyclase
Alterations in the catalysis of adenyl cyclase and the inhibitory guanine nucleotide regulatory protein in experimental heart failure, 179A

Adrenaline
Cardiovascular hormones in relation to mortality in severe heart failure, 246A
Adrenergic response
Decreased adrenergic response in hypertensive patients without left ventricular hypertrophy, 82A
Enhanced cardiac adrenergic response in cardiomyopathic hamster at a pre-congestive failure stage, 87A
Hemodynamic correlates of increased cardiac adrenergic drive in the intact failing human heart, 245A

Adriamycin
Use of enoxime in cardiac transplant candidates: effect on β adrenergic receptors, 248A

Afterdepolarizations
Simultaneous demonstration of early- and delayed afterdepolarizations in Ca2+ loaded cardiac cells, 185A

Afterreperalpolarizations
Amiodarone on suppression of barium-induced triggered automaticity and early afterdepolarizations in Purkinje fibers relative to effects of verapamil and class I agents, 249A

Age factors
See also Elderly
Age-related changes in left ventricular performance during isometric exercise, 56A
Aging-related decrease in vasodilatory capacity in coronary microcirculation estimated by Doppler catheter, 57A

Termination of epinephrine-induced ventricular tachycardia by adenosine in halothane-anesthetized dogs, 249A

Adenosine diphasate
Estimation of the concentration and function of the ADP/ATP carrier in the myocardium of patients with dilated cardiomyopathy (DCM), 251A

Adenosine receptors
Blockade of adenosine receptors with aminophylline: effects on exercise capacity in stable angina, 41A

Adenosine triphosphate
Does acute pharmacologic stimulation of stunned myocardium have chronic deleterious effects?, 219A
Estimation of the concentration and function of the ADP/ATP carrier in the myocardium of patients with dilated cardiomyopathy (DCM), 251A

Adenylyl cyclase

Age related risk factors and mechanisms of death following myocardial infarction. Experience from the Multicenter Diltiazem Postinfarction Trial, 27A

Does age modify the hemodynamic and clinical response to converting-enzyme inhibitors in patients with chronic heart failure?, 57A

Effect of age on pulmonary venous flow in normal subjects, 50A

Exercise cardiac output declines with advancing age in normal subjects, 241A

Improvement of relaxation velocity by calcium blocker in aging rabbit myocardium, 57A

Site of age-related PR interval prolongation in normal subjects, 57A

Air transport

Is delivery of r-PA by helicopter transport teams safe and time-effective?, 192A

Albumin

Oxidation of sulfhydryl groups of serum albumin in coronary artery diseases, 44A

Alcohol

Myocardial IgA deposition: a possible marker for alcohol related myocardial disease, 254A

Aldosterone

Direct suppression of aldosterone secretion by endogenous atrial natriuretic peptide in hemodynamically normal man: evidence for physiologic role of ANP, 172A

Alpha-adrenergic blocking agents

See also specific agent

Majority of physicians use drug therapy for isolated systolic hypertension, 13A

Alpha adrenergic receptors

Hypoxia and glucose deprivation independently induce uncoupling of α,-adrenergic signal transduction in cultured myocardial cells, 252A

Role of α-adrenergic receptors in syndrome X, 150A

Alpha adrenergic tone

Reduced myocardial blood flow with persistent vasodilator reserve: role of adrenergic activation, 187A

Alpha tocopherol

See also Vitamin E

Effect of α-tocopherol (vitamin E) on regional function in stunned mycardium, 144A

Aminophylline

Blockade of adenosine receptors with aminophylline: effects on exercise capacity in stable angina, 41A

Exercise capacity after acute aminophylline administration in patients with syndrome X, 202A

Amiodarone

Amiodarone on suppression of barium-induced triggered automaticity and early afterdepolarizations in Purkinje fibers relative to effects of verapamil and class I agents, 249A

Automaticity and cardioverter-defibrillator in patients with chronic amiodarone: effects on the defibrillation threshold and the rate of shocks, 177A

Chronic amiodarone administration protects against global myocardial ischemia in the cat, 250A

Differential effects of amiodarone on Vmax and conduction velocity in anisotropic myocardium, 139A

Disparate effects of acute and chronic amiodarone on ventricular fibrillation threshold in dogs, 249A

Etiology of polymorphic ventricular tachycardia in the absence of prolonged QT, 21A

Fecal elimination of amiodarone and desethyl amiodarone, 186A

Long-term followup of amiodarone in the young: continued efficacy, unimpaired growth, moderate side effects, 171A

Anaerobic threshold

Alterations in the ventilatory anaerobic threshold after a chronic intervention reflect changes in lactate production during exercise in heart failure, 39A

Temporal dissociation between invasive and non-invasive determination of anaerobic threshold in chronic heart failure, 39A

Anastomosis

Bidirectional cavo-pulmonary anastomosis, 74A

Aneurysm

Effect of reperfusion on post-myocardial infarction aneurysm formation at one week, 110A

Endocrine conversion of ventricular cardiocytes in ventricular aneurysm, 171A

Functional left ventricular aneurysm after anterior Q-wave myocardial infarction: incidence, contributing factors and natural history, 45A

Surgically resectable left ventricular aneurysm: specific characteristics by ultrafast computed tomography, 47A

Angina pectoris

See also Syndrome X

Antecedent angina: a clinical marker for patients at high risk following thrombolytic therapy, 28A

Blockade of adenosine receptors with aminophylline: effects on exercise capacity in stable angina, 41A

Epidural spinal stimulation in patients suffering from intractable angina, 46A

In-hospital angina with transient ECG changes predicts poor one-year survival only in patients with ST depression, 93A

Inability of thrombosis related markers to denote a favorableresponse to myocardial reperfusion, 95A

Non Q wave myocardial infarction: a randomized trial of urokinase versus aspirin, 75A

Tissue plasminogen activator for unstable angina pectoris: a multicenter, randomized, double-blind, placebo-controlled trial, 191A

Angiography

See also Arteriography

Angiographic appearances following percutaneous coronary atherectomy, 223A

Angioscopy—more sensitive for identifying thrombus, distal emboli, and subintimal dissection, 146A

Colour flow imaging as intra-operative angiography in ventricular septal defects—advantages and pitfalls, 75A

Digital flashing tomosynthesis (DFTS)—an alternative to cine technique in coronary angiography, 5A

Does balloon inflation duration influence the angiographic results of coronary angioplasty?, 58A

Effect of x-ray dose on accuracy and precision of quantitative digital coronary angiography, 7A

Impact of compensatory enlargement of atherosclerotic coronary arteries on the angiographic assessment of coronary artery disease, 196A

New approach to in vivo measurement of coronary blood flow utilizing high-speed coronary angiography, 7A

Physiologic significance of coronary lesions assessed by exercise echocardiography and quantitative coronary angiography, 158A

Randomized trial of ionic versus non-ionic contrast for cardiac angiography: effect on complications and costs, 46A

rTPA versus rTPA plus PTCA in acute myocardial infarction: quantitative results of early and late coronary arteriography, 54A

Single versus multiple balloon inflations in coronary angioplasty: late angiographic results and recurrence, 58A

Impact of abnormal myocardial perfusion on ventricular function in patients with unstable angina, 239A

Importance of assessing ST elevation by Holter monitoring in unstable angina, 203A

Nifedipine in unstable angina: beneficial effects in the elderly and in patients with reduced left ventricular function, 239A

Patients with ST segment deviation and unstable angina have consistent increases in thrombin activity, 15A

Predicting longterm outcome in medically stabilized unstable angina: early Holter ST segment monitoring, predischarge exercise thallium scintigraphy and coronary angiography, 228A

Prediction and prevention of myocardial infarction during the acute phase of unstable angina, 192A

S.T.A.I. (Study of Ticlopidine in Unstable Angina), 238A

Thrombolytic therapy in unstable angina and non Q wave myocardial infarction: a randomized trial of urokinase versus aspirin, 15A

Tissue plasminogen activator for unstable angina pectoris: a multicenter, randomized, double-blind, placebo-controlled trial, 191A

SUBJECT INDEX 271A
Angiography, radionuclide
Exercise radionuclide angiography yields prognostic information equivalent to cardiac catheterization, 126A
Role of radionuclide angiography in selecting patients for coronary bypass surgery, 213A

Angioplasty
See also Lasers; Restenosis
Coronary angioplasty dissection: in-hospital outcome, 221A
Coronary angioplasty in patients with severe depression of left ventricular function, 222A
Impedance measurement of absolute blood flow using angioplasty guidewire, 194A
Patterns of dilation during coronary angioplasty, 58A
Persistent endothelial dysfunction following experimental angioplasty, 195A
Prolonged autoperfusion angioplasty: immediate clinical outcome and angiographic follow-up, 155A
Radiofrequency thermal angioplasty for the treatment of peripheral vascular occlusive disease: preliminary results of a clinical trial, 14A
Restenosis within coronary stents: possible effect of previous angioplasty, 107A
Time course of improved function following post-infarction angioplasty: evidence for “hibernation” even in “infarcted” myocardium, 25A
Ultrasonic angioplasty using a new flexible wire system, 4A

Angioplasty, coronary
Acute outcome and long term follow-up of patients with acute myocardial infarction and single vessel disease treated with angioplasty without thrombolytic therapy, 94A
Acute thrombotic reocclusion after percutaneous transluminal coronary angioplasty—should thrombolyis be attempted? 58A
Cardiopulmonary bypass supported coronary angioplasty in inoperable patients, 53B
Clinical safety and early course following prolonged inflations in elective transluminal coronary angioplasty, 43A
Comparison of socio-economics and outcome after multivessel coronary angioplasty or bypass surgery, 230A
Consequences of occlusion during PTCA: the 1985-86 NHLBI PTCA Registry, 230A
Coronary arterectomy for the treatment of unfavorable PTCA lesions, 109A
Determinants of arterial dissection during PTCA: lesion type versus infarction rate, 229A
Determinants of improved global left ventricular function after IRA and deferred PTCA for acute MI, 92A
Does balloon inflation duration influence the angiographic results of coronary angioplasty?, 58A
Does the disadvantage of incomplete revascularization by coronary angioplasty increase with time?, 229A
Early and late clinical outcome following successful coronary angioplasty of total coronary occlusions, 220A
Effect of larger balloon size on recurrence after repeat coronary angioplasty due to restenosis, 208A
Histopathologic phenomena at the site of percutaneous transluminal coronary angioplasty, 220A
Internal mammary artery graft angioplasty: clinical and angiographic follow-up, 221A
Intravenous nitroglycerin prevents coronary artery vasodilatation after PTCA, 59A
Late follow-up of 781 patients undergoing percutaneous transluminal coronary angioplasty (PTCA) or open heart surgery (OHS) for an isolated obstruction in the left anterior descending (LAD) coronary artery, 166A
Long-term (4 year) follow-up after percutaneous transluminal coronary angioplasty following acute myocardial infarction, 94A
Long-term improvement of left ventricular function after myocardial infarction with and without thrombolytic therapy by late PTCA of the infarct-related artery, 26A
Percutaneous coronary dilatation bypass to support high risk elective coronary angioplasty, 160A
Percutaneous institution of cardiopulmonary bypass (bypass): support: technique and complications, 159A
Percutaneous transluminal angioplasty of internal mammary artery bypass grafts, 221A
Percutaneous transluminal angioplasty of left internal mammary artery grafts using a femoral approach, 221A
Recovery of regional myocardial function after successful coronary angioplasty early after non-Q-wave myocardial infarction, 7A
“Rescue” percutaneous transluminal coronary angioplasty after failed thrombolytic therapy, 193A
rTPA versus rTPA plus PTCA in acute myocardial infarction: Quantitative results of early and late coronary arteriography, 54A
Single versus multiple balloon inflations in coronary angioplasty: late angiographic results and recurrence, 58A
Supported angioplasty: initial experience with high risk patients, 159A
TIMI II: a study of PTCA timing after rt-PA thrombolyis for acute myocardial infarction, 194A
Transesophageal 2D color-coded Doppler echocardiography during percutaneous transluminal coronary angioplasty, 68A
Two-year post-discharge survival after emergency coronary angioplasty for myocardial infarction: importance of the timing and success of angioplasty, 193A
Vascular repair and remodeling using radiofrequency balloon angioplasty, 228A
Verapamil as a potent cardioprotective agent for coronary angioplasty: first clinical experience, 154A

Angioplasty—more sensitive for identifying thrombus, distal emboli and subintimal dissection, 146A
Detection of intravascular thrombus by high frequency intraluminal ultrasound angioplasty: in vitro and in vivo studies, 5A
Intraluminal two-dimensional ultrasound angiographic quantitation of arterial stenosis: comparison with external high-frequency ultrasound imaging and anatomy, 3A

Antibodies
See Autoantibodies; specific antibody

Anticoagulants
See also specific agent
Patients with ST segment deviation and unstable angina have consistent increases in thrombin activity, 15A

Antigen
See Autoantigens; specific antigen

Oxid-l-Antiplasmin
Selective inhibition of ox-l-antiplasmin augments the potency and specificity of plasminogen activators, 2A

Antiplatelet antibody
Antiplatelet antibody [TE3 Fab (1/2)] prevents rethrombosis after tissue-type plasminogen activator induced coronary artery thrombolysis in a canine model, 32A
Antithymocyte globulin
Propylthiouracil anti-rejection therapy early after cardiac transplantation: rate versus OKT3, 62A

Antitumor agents
Low dose of antitumor agents prevents smooth muscle cell proliferation after endothelial injury, 252A

Aortic arch obstruction
Surgical management of aortic arch obstruction and transposition of the great arteries, 120A

Aortic valve area
Gordin formula for aortic valve orifice area validated in vitro, 73A

Aortic valve disease
See also Stenosis; Surgery, valve; Valve disease
Attenuation of early mitral flow velocity by acute aortic insufficiency, 210A
Catheter balloon valvuloplasty of necropsy stenotic aortic valves: etiology of aortic stenosis is a major factor in early "restenosis", 16A
Evaluation of aortic regurgitation by cine magnetic resonance imaging comparing cineangiography, 201A
Follow-up balloon aortic valvuloplasty: results in 192 cases, 16A

Hyperlipidemic valvulopathy; aortic regurgitation in familial hypercholesterolemia studies by color Doppler echocardiography, 73A
Importance of contractility in determining left ventricular size and performance in patients, 71A
Isolated quadriceps aortic valves; incidence, description, and functional assessment, 60A
One-two year follow-up after primarily successful valvuloplasty for calcified aortic stenosis, 16A
Quantification of acute aortic insufficiency with color Doppler flow mapping: in vitro studies in a flexible model of the left ventricle, 49A
Suppression of cardiac protein degradation contributes to progressive hypertrophy due to aortic regurgitation, 71A
Transesophageal echo, an improved diagnostic technique for sub-aortic membranes, 209A
Ventricular septal defect with aortic regurgitation: a 35 year experience, 121A

APSAC
Improvement of global and regional left ventricular function with intravenous APSAC in acute myocardial infarction. Results of a multicenter double blind trial, 154A
Reduction of infarct size by intravenous APSAC in myocardial infarction (multicenter randomized trial vs. heparin), 95A

Arachidonic acid
Sarcocellular phospholipid turnover: a critical mediator of myocardial injury, 252A

Arginine vasopressin
Effect of inhibition of arginine vasopressin on systemic and coronary hemodynamics, 172A
Vasopressin (AVP) is elevated to pressor levels and unopposed by atrial natriuretic factor (ANF) following repair of coarctation of the aorta (CoA), 136A

Arrhythmias
Determinants and outcome of early and late arrhythmia after Fontan operation, 170A
Nonhomogeneous redistribution of regional myocardial blood flow and potassium during reperefusion of ischemic myocardium, 127A
Arrhythmias, atrial
Atrial natriuretic factor in atrial flutter and fibrillation: Role of atrial rate and cardioversion, 76A
Plecainide acetate for the treatment of postoperative atrial arrhythmias, 164A
Plecainide for prevention of paroxysmal atrial fibrillation and flutter. A multicenter, double-blind, placebo-controlled crossover study, 164A

Arrhythmias, ventricular
Comparison of antiarrhythmic efficacy and safety of class 1A, 1B, and IC agents in symptomatic and potentially malignant ventricular arrhythmia, 163A
Delayed ventricular arrhythmias (phase 1B) resulting from midmyocardial reentry, 128A
Effect of beta-blockade on the circadian variation of ventricular arrhythmias, 34A
Effect of myocardial revascularization on inducible ventricular arrhythmias, 174A
Effects of combined low doses of quinidine and metoprolol on inducible ventricular arrhythmias in a chronic canine infarct model, 248A
Incidence of serious ventricular arrhythmias during surgery in hypertensives with left ventricular hypertrophy, 105A
Risk of ventricular arrhythmias according to anatomical categories of left ventricular hypertrophy, 105A
Short term variability of ventricular arrhythmia and rapid assessment of drug efficacy, 140A
Spontaneous variability in ventricular arrhythmias during chronic "effective" antiarrhythmic therapy, 31A
Ventricular arrhythmias following orthotopic cardiac transplantation: relationship to acute rejection and sudden death, 211A
Ventricular arrhythmias in patients with essential hypertension, 105A

Arterial wall stiffness
In vivo measurement of segmental arterial wall stiffness in pigs using a real-time ultrasonic sector imaging catheter, 218A

Arteriography
Dipyridamole-Doppler echocardiography: comparison to thallium-201 imaging and quantitative coronary arteriography, 159A
Is yearly coronary arteriography sufficient for detection of coronary artery disease in heart transplant recipients?, 242A

Arvin
Dellbrinogenation reduced infarct size in a canine model of acute myocardial infarction, 125A

Aspirin
Antithrombotic therapy: is the combination of aspirin and nitroglycerin beneficial?, 145A
Aspirin but not standard heparin prevents thrombus fibrin deposition in rabbits treated with tissue plasminogen activator, 77A
Early intervention with low dose aspirin in first acute transmural anterior myocardial infarction: infarct size, clinical outcome and follow-up, 27A
Effect of low dose aspirin on the incidence and hematoactivity of left ventricular thrombosis in patients with anterior myocardial infarction, 199A
Effects of aspirin on in vitro lysis with urokinase of combined platelet and fibrin thrombi, 91A

Myocardial infarction with minimal atherosclerosis: a syndrome of young women with guarded long term prognosis, 198A
Overview of bleeding risk from the TAMI trials: two agents are better than one, 198A
Prediction and prevention of myocardial infarction during the acute phase of unstable angina, 192A
Preoperative aspirin is not necessary to achieve improved vein graft patency after coronary artery bypass surgery, 165A
rTPA versus rTPA plus PTCA in acute myocardial infarction: quantitative results of early and late coronary arteriography, 54A

S.T.A.I. (Study of Ticlopidine in Unstable Angina), 238A
Thrombolytic therapy in unstable angina and non-Q wave myocardial infarction: a randomized trial of urokinase versus aspirin, 15A
Tissue plasminogen activator for unstable angina pectoris: a multicenter, randomized, double-blind, placebo-controlled trial, 191A

Atenolol
Antihypertensive therapy is improved by central effects of arterial dilation and reduced wave reflection, 244A
Differences in distribution of beta-blockers in infarcted porcine hearts. A study with positron emission tomography, 64A

Atherectomy
Acute outcome of atherectomy in peripheral arterial obstructive disease, 108A
Angiographic appearance following percutaneous coronary atherectomy, 223A
Bard rotary atherectomy system (BRAS) in normal canine coronary arteries, 223A
Clinical follow-up in 40 patients treated with peripheral percutaneous atherectomy, 107A
Comparison of early and recent experience in percutaneous coronary atherectomy, 108A
Complications: early experiences of percutaneous coronary atherectomy, 108A
Factors associated with restenosis following successful peripheral atherectomy, 13A
Greater improvement in coronary flow velocity
with atherectomy compared to angioplasty, 108A
Histological evaluation of "vessel biopsies" obtained with the Simpson atherectomy catheter, 149A
Human percutaneous coronary rotational atherectomy: results and short follow up, 228A
Initial experience with a flexible rotational atherectomy system designed for removal of coronary and small peripheral artery atheromas, 223A
Intravascular ultrasound visualization of atheroma plaque removal by atherectomy, 222A
Percutaneous coronary atherectomy: early experiences of multicenter trial, 108A
Percutaneous transluminal coronary rotation during heart catheterization, 228A
Utility of an intravascular ultrasound imaging device for arterial wall definition and atherectomy guidance, 222A
Atheroma
Media thinning of severely diseased coronary arteries: guidelines for new interventional procedures, 194A
Atherosclerosis
See also Atherectomy; Coronary artery disease
Compensatory coronary dilatation and media thinning: adaptive responses to progressive atherosclerosis, 196A
Contrasting effects of acetylcholine on coronary conductance and resistance vessels in patients with coronary artery disease, 133A
Contrasting effects of continuous wave and pulsed laser irradiation on vasoreactivity of atherosclerotic vessels in vitro, 144A
Coronary artery disease is associated with inadequate left ventricular hypertrophy in aortic stenosis, 81A
Coronary atherosclerosis impairs control of shear stress, 42A
Correlation of coronary artery with systemic atherosclerosis, 42A
Dietary intake of saturated fat and cholesterol in early childhood: implications for prevention of atherosclerosis, 12A
Endothelial function influences the coronary vasomotor response to sympathetic stimulation in man, 202A
Evaluation of mixed atherosclerotic plaques by quantitative ultrasonic methods, 5A
Histological evidence of coronary atherosclerosis as a cause of myocardial ischemia in patients with normal coronary arteriograms, 150A
Impact of compensatory enlargement of atherosclerotic coronary arteries on the angiographic assessment of coronary artery disease, 196A
In vivo photosensitizer enhanced laser angioplasty in atherosclerotic Yucatan miniswine, 43A
In vivo recanalization of total atherosclerotic arterial occlusions: combined use of an ultrasonic probe and balloon angioplasty system, 195A
Intravascular ultrasound imaging of atherosclerotic coronary arteries: an in vivo validation study, 4A
Percutaneous laser angioplasty of peripheral atherosclerotic obstructions by the Unicorn-Cap (TM) probe system: a multicenter study, 14A
Preserved flow-mediated vasodilation despite acetylcholine-induced vasoconstriction in atherosclerotic coronary arteries in man, 132A
Progression of coronary atherosclerosis and enhanced thrombin-induced platelet aggregability, 42A
Atresia
Right ventricular growth and function following Fontan procedure for tricuspid atresia, 239A
Right ventricular size and pulmonary flow in patients after first stage surgery for pulmonary atresia: combined assessment by cine magnetic resonance imaging and color Doppler flow mapping, 240A
Atrial defects
Transcatheter umbrella closure of atrial defects, 120A
Atrial fibrillation
Amplification of diiltiazem's effects on the AV node by rapid atrial input leads to selective actions during atrial fibrillation, 164A
Changes in left atrial size due to chronic atrial fibrillation, 206A
Effect of cardiac pacing mode on the long-term development of atrial fibrillation, 217A
Flecainide for heart rate control in atrial fibrillation, 164A
Intralesional femicainide versus intravenous disopyramide in the reversion of atrial fibrillation, 165A
Left atrial enlargement as a consequence of atrial fibrillation: a prospective echocardiographic study, 206A
Left ventricular function in atrial fibrillation: a comparison before and after cardioversion, 207A
Mechanism of compensatory pause in atrial fibrillation, 208A
Mechanism of the onset of atrial fibrillation in the Wolff-Parkinson-White syndrome: how important is the accessory pathway?, 203A
Oral propafenone for prevention of recurrent primary atrial fibrillation: predictive value of the response to transesophageal atrial stimulation, 233A
Reliability of procainamide in predicting the shortest preexcited R-R interval during atrial fibrillation is dose dependent, 204A
Atrial flutter
Direct entrainment guided ablation of the slow conduction zone (SCZ) in human type I atrial flutter (AF), 168A
Atrial natriuretic factor
Acute and chronic antihypertensive efficacy of atriopeptidase inhibition in rats, 76A
Acute effects of atriopeptidase inhibition on plasma atrial natriuretic factor in chronic heart failure, 76A
ANF blunts forearm vasoconstriction to lower body negative pressure in essential hypertension, 81A
Atrial natriuretic factor in atrial flutter and fibrillation: role of atrial rate and orthodromic reentry in atrial fibrillation, 76A
Atrial natriuretic factor in patients with right ventricular infarction, 93A
Atrial natriuretic factor inhibition of renin during renal hypoperfusion: role for the macula densa, 8A
Atrial natriuretic peptide and elevated right heart pressures in essential hypertension, 81A
Atrial natriuretic peptide from the coronary sinus is acutely increased following induction of paroxysmal atrial flutter, 172A
Atriopeptidase inhibitors, a novel class of drugs that raises levels of endogenous atrial natriuretic factor—the preclinical pharmacology of UK-69,578, 75A
Cardiovascular hormones in relation to mortality in severe heart failure, 246A
Clinical value of measuring atrionatriuretic factor after balloon aortic valvuloplasty, 56A
Coronary hemodynamic effects of atrial natriuretic peptide, 132A
Direct suppression of aldosterone secretion by endogenous atrial natriuretic peptide in hemodynamically normal man: evidence for physiologic role of ANP, 172A
Does ANF influence venous return?, 171A
Does tolerance to atrial natriuretic factor (ANF) develop during 24-hour infusion in patients with congestive heart failure?, 9A
Effect of atrial natriuretic factor on left ventricular diastolic function in humans with heart failure, 172A
Effect of combined dynamic exercise and head-out water immersion on atrial natriuretic peptide, 41A
Effects of different pacing modes on right atrial pressure and atrial natriuretic peptide in patients with atrioventricular block, 217A
In the human, expression of ventricular ANF is independent of ventricular dilatation, 10A
Is atrial natriuretic factor involved in the modulation of coronary tone in man?, 186A
Lack of inotropic effect of atrial natriuretic factor in humans with heart failure: demonstration by left ventricular end-systolic pressure-volume analysis, 9A
N-terminal (1-25) atrial natriuretic factor in humans with congestive heart failure: a marker for endogenous secretion, 9A
Pacemaker syndrome is associated with very high plasma concentrations of atrial natriuretic peptide (ANP), 111A
Pharmacological elevation of endogenous atrial natriuretic factor in man using the atriopeptidase inhibitor (UK 69,578), 76A
Preserved atrial natriuretic peptide secretory function in desensitized cardiac transplant recipients, 243A
Prohormone atrial natriuretic peptides 1-30, 31-67, and 99-126 increase in proportion to right ventricular pacing rate, 217A
Rapid reduction of plasma atrial natriuretic peptide after balloon mitral valvuloplasty in patients with mitral stenosis, 69A
Relationship of left and right atrial pressures to
atrial natriuretic factor elaboration during exercise in normal man, 40A
Response of atrial natriuretic factor to percutaneous mitral valvuloplasty, 56A
Vasopressin (AVP) is elevated to pressor levels and unopposed by atrial natriuretic factor (ANF) following repair of coarctation of the aorta (CoA), 136A
Ventricular levels of the atrial natriuretic factor and of its messenger ribonucleic acid at the time of heart transplantation, 9A

Atrial pressure
Mitral opening pressure strongly influences left ventricular peak rapid filling rate, 130A
Relationship of left and right atrial pressures to atrial natriuretic factor elaboration during exercise in normal man, 40A

Atrial septal defect
Hemodynamic results and follow-up of patients with iatrogenic atrial septal defect following balloon mitral valvuloplasty, 70A

Atrial size
Changes in left atrial size due to chronic atrial fibrillation, 206A
Left atrial enlargement as a consequence of atrial fibrillation: a prospective echocardiographic study, 206A

Atrial stimulation
Oral propafenone for prevention of recurrent primary atrial fibrillation: predictive value of the response to transeosophageal atrial fibrillation, 233A

Atrioventricular junction
Catheter ablation of the atrioventricular junction using radiofrequency energy, 169A

Atrioventricular node
Effect of epicardial accessory pathway ablation or endocardial dissection for AV nodal reentrant tachycardia on vagal innervation to the AV node, 232A

Atropine
Abnormal QT/QS2 ratio at rest and exercise in Romano-Ward long QT patients, normalized by beta-blocker therapy, 11A
Autonomic influence on ventricular subsidiary pacemakers: a study of patients post AV nodal ablation, 232A

Are Doppler indices of diastolic filling affected by left ventricular hypertrophy, 209A

Are Doppler indices more load sensitive than other measures of diastolic function?, 197A

Diastolic abnormalities in hypertension are not explained by LVH alone, 59A

Diltiazem improves diastolic function during phase II of diastolic dysfunction in the intact conscious dog, 131A

Effect of atrial natriuretic factor on left ventricular diastolic function in humans with heart failure, 172A

Effect of early diastolic loading on myocardial relaxation in the intact canine left ventricle, 130A

Effects of exercise-induced ischemia in pressure-volume relations and filling dynamics in the conscious dog, 181A

Enhanced recovery of diastolic function after global myocardial ischemia in the intact rabbit, 130A

Evidence for an early increase in cardiac sympathetic stimulation in patients with hyperthyroidism, 131A

Improved diastolic function after aortic valve replacement assessed by ultrafast computed tomography, 47A

Improvement of relaxation velocity by calcium blocker in aging rabbit myocardium, 57A

Left ventricular diastolic function—Doppler changes in early post cardiac transplant recipients, 99A

Left ventricular diastolic function in pheochromocytoma: relation to plasma catecholamines, 122A

Load dependence of reduced early diastolic filling in left ventricular hypertrophy, 210A

Persistence of increased diastolic stiffness late following aortic valve replacement, 148A

Regional diastolic mechanics of ischemic and nonischemic areas in the pig heart, 131A

Relationship between the extent of muscular hypertrophy and diastolic function in patients with hypertrophic cardiomyopathy without left ventricular outflow gradient or mitral regurgitation, 89A

Respiratory influence on RV and LV diastolic filling in normal children, 205A

Shift of the left ventricular diastolic pressure-volume curve with ischemia: importance of volume and the pericardium, 207A

Stunned myocardium: evidence that diastolic ventricular dysfunction persists even after resolution of diastolic dysfunction—experimental Doppler echocardiographic studies, 197A

Systolic shortening determines diastolic distensibility of ischemic myocardium during pacing induced angina and transmural coronary occlusion, 80A

Ventricular diastolic interaction in intact dogs assessed by conductance catheters, 131A

Diazoxide

Randomized trial of iodic versus non-iodic contrast for cardiac angiography: effect on complications and costs, 46A

Dibenephrine

Electrophysiologic effects of a chemical defibrillatory agent: dibenephrine, 250A

Diet

Telephone-mail mediated dietary intervention for hypercholesterolemia, 134A

Digitals

Lack of correlation of ouabain binding sites and inotropic response to digitalis in experimental heart failure, 248A

Dilzem

Flecainide for the treatment of postoperative atrial arrhythmias, 164A

Flecainide for heart rate control in atrial fibrillation, 164A

Increased exercise capacity in heart failure patients following digoxin administration, 183A

Dilevalol

Antihypertensive therapy is improved by central effects of arterial dilation and reduced wave reflection, 244A

Diltiazem

Age-related risk factors and mechanism of death following myocardial infarction. Experience from the multicenter diltiazem postinfarction trial, 27A

Amplification of diltiazem's effects on the AV node by rapid atrial input leads to selective actions during atrial fibrillation, 164A

Cocaine-induced contraction of vascular smooth muscle is inhibited by channel blocker, 78A

Coronary spasm induced by stent implantation, 194A

Diltiazem improves diastolic function during hypoxia in hypertrophy rat hearts, 131A

Effect of diltiazem on coronary flow reserve in man, 154A

Exercise training versus exercise training with diltiazem or propranolol: effects on lipids in men with mild hypertension, 241A

Exercise training versus exercise training with diltiazem or propranolol: effects on maximal oxygen uptake and exercise duration in men with mild hypertension, 241A

Exercise training versus exercise training with diltiazem or propranolol: effects on resting blood pressure in men with mild hypertension, 106A

Favorable effect of diltiazem on late mortality and reinfarction after non-Q wave myocardial infarction: Multicenter Diltiazem Post-Infarction Trial (MDPIT), 6A

Intracoronary diltiazem limits infarct size during prolonged angioplasty balloon inflation, 195A

Retrograde conduction properties determine rate-dependent efficacy of diltiazem for AV reentrant tachycardia, 251A

Role of electrocardiographic location of diltiazem treatment effect in non-Q wave myocardial infarction: Multicenter Diltiazem Post-Infarction Trial (MDPIT), 6A

Diprydramole

Detection of coronary stenoses by high speed NMR imaging: the utility of dysprosium-DTPA, 48A

Diprydramole-Doppler echocardiography: comparison to thallium-201 imaging and quantitative coronary arteriography, 159A

Diprydramole-induced malperfusion may not indicate ischemic ventricular dysfunction, 126A

Electrocardiographic changes during diprydramole stress as potential markers of acute cardiac rejection, 88A

Experience with the intracoronary Doppler catheter in patients with clinical ischemic heart disease but normal or trivially diseased coronaries, 161A

High dose diprydramole-echocardiography test in hypertensives: correlation with exercise-electrocardiography test in coronary arteriography, 103A

High dose diprydramole-echocardiography test: large scale clinical trial, 158A

Innervation of thallium 201 imaging after oral diprydramole for detection of reversible myocardial ischemia, 182A

Iodine-123, phenylpentadecanoic acid tomography following diprydramole infusion for the detection of coronary artery disease, 99A

Is there an improvement in coronary vasodilator capacity after aortic valve replacement?, 147A

Normalization of coronary flow reserve after successful angioplasty assessed with positron emission tomography and H15O, 218A

Prognostic value of intravenous diprydramole thallium imaging in asymptomatic patients with coronary disease and no previous myocardial infarction, 126A

SUBJECT INDEX 281A
Role of intravenous diprydamide thallium imaging in preoperative cardiac risk assessment before renal transplantation, 161A

Dopamine
Combination of class IA and IB antiarrhythmic drugs markedly depresses Vmax with little change in the action potential duration in canine Purkinje fibers, 248A
Disopyramide induces uterine contractions in pregnancy, 141A
Intravenous flecainide versus intravenous disopyramide in the reversion of atrial fibrillation, 165A
Safety, efficacy and predictive value of drug termination of ventricular tachycardia, 162A
Short term variability of ventricular arrhythmia and rapid assessment of drug efficacy, 140A
Synergistic actions of disopyramide and lidocaine on Vmax of action potentials in guinea pig papillary muscles, 139A

Dissection
Coronary angioplasty dissection: in-hospital outcome, 221A
Determinants of arterial dissection during PTCA: lesion type versus inflation rate, 229A
Effect of epicardial accessory pathway ablation or endocardial dissection for AV nodal reentrant tachycardia on vagal intervention in the AV node, 232A

Diuretics
See also Specific agent
Majority of physicians use drug therapy for isolated systolic hypertension, 13A

Dobutamine
Accelerated arterial wave reflection with dopamine not dobutamine in congestive heart failure, 247A
Demonstration of viable myocardium after acute infarction submitted to thrombolysis: comparison between positron emission tomography and dobutamine echocardiography, 192A

Dopamine
Accelerated arterial wave reflection with dopamine but not dobutamine in congestive heart failure, 247A
β-adrenergic agonists in nonfailing, failing, and transplanted human hearts, 143A

Dopamine-1 receptor agonist
Neurohormonal activation limits the long-term response to the dopamine-1 receptor agonist, fenoldopam, in chronic heart failure, 246A

Dopexamine
β-adrenergic agonists in nonfailing, failing, and transplanted hearts, 143A
Tachyphylaxis associated with dopexamine administration in severe heart failure, 247A

Doppler color flow imaging
Can color Doppler/two dimensional echocardiography identify the need for tricuspid valve repair?, 24A
Consistency of color flow Doppler estimation of regurgitant flow rate across varying size orifices and multiple orifice communications using flow convergence concepts, 22A
Demonstration of jet entrainment—an interaction which causes parallel jets to merge and cross: in vitro experiments using color Doppler flow mapping and optical visualization, 25A
Diagnosis of left ventricular pseudoaneurysm by color Doppler flow mapping, 24A
Do Doppler flow algorithms for mapping disturbed flow make sense?, 226A
Does color Doppler echocardiography detect additional small muscular defects in infants with a large ventricular septal defect?, 206A
Doppler color flow mapping of the "proximal isovelocity surface area": a new method for measuring volume blood flow across an orifice, 225A
Evaluation of ventricular septal defect complexity, acute myocardial infarction: identification, localization and differentiation from mitral regurgitation by Doppler color flow imaging, 209A
Limitations of color Doppler in analysis of valvular regurgitation, 22A
Quantification of acute aortic insufficiency with color Doppler flow mapping; in vitro studies in a flexible model of the left ventricle in vitro, 232A
Quantitative evaluation of ventricular septal defect by color Doppler flow imaging, 24A
Transthoracic 2D color-coded echocardiography during percutaneous transluminal coronary angioplasty, 68A
Two dimensional/color Doppler assessment of ventricular septal defect, 24A
Validation of a method to estimate regurgitant fractions using the power mode in a dog model, 23A
Value and limitations of transthoracic color Doppler echocardiography for the recognition of transvalvular regurgitation in the normally functioning St. Jude valve, 210A
Doppler ultrasound
Are Doppler indices more load sensitive than other measures of left ventricular function?, 197A
Are Doppler indices of diasstolic filling affected by left ventricular hypertrophy?, 209A
Differential effects of right ventricular pressure and volume loading on left ventricular filling assessed by Doppler echocardiography, 196A
Dipyridamole-Doppler echocardiography: comparison to thallium-201 imaging and quantitative coronary arteriography, 159A
Doppler harmonic spectral signals ("STRIPES"): in vivo and in vitro evidence of an artifact due to leaflet reverberations, 49A
Evaluation of prosthetic valve performance by assessing the response to exercise using Doppler echocardiography, 232A
Experience with the intraaortic Doppler catheter in patients with clinical ischemic heart disease but normal or trivially diseased coronaries, 161A
Profile of a regurgitant color jet is independent of orifice shape, 23A
Progression of aortic stenosis as assessed by echocardiography, 233A
Pulsed Doppler echocardiographic mitral valve flow patterns and left ventricular chamber properties in patients with previous myocardial infarction, 209A
Reduction of left ventricular preload produced by lower body negative pressures alters Doppler transmitral filling patterns, 197A
Use of Doppler echocardiography in determination of left ventricular DP/Dt MAX, 90A

Droperidol
Randomized controlled trial of neuroleptanalgesia infusion in the early treatment of acute myocardial infarction, 91A

Dysprosium-DTPA
Detection of coronary stenosis by high-speed NMR imaging: the utility of dysprosium-DTPA, 48A

Echocardiography
See also Doppler color flow imaging; Doppler ultrasound; Ultrasound
Assessing infarct expansion by an echocardiographic wall motion index improved prediction of outcome after myocardial infarction, 27A
Echocardiographic computed tomography of the heart: preliminary results, 224A
Echocardiographic features of the transplanted heart in well patients one year post transplantation, 243A
High dose diprydramole-echocardiography test: large scale clinical trial, 158A
Impact of intraoperative echocardiography: the first 1,000 patients, 23A
Two to five year echocardiographic follow-up of patients with mitral valve prolapse: is apical four-chamber view displacement a precursor of abnormality, 226A

Echocardiography, contrast
Myocardial contrast echo washout curves: the influence of ischemia and hyperemia, 115A
Myocardial contrast echocardiography can not be used to assess endocardial/epicardial blood flow ratio, 155A
Reproducibility of washout curves derived from myocardial contrast echo, 115A

Echocardiography, exercise
Echocardiographic assessment of mental stress induced wall motion abnormalities: comparison with exercise, 158A
Exercise echocardiographic detection of coronary artery disease in women, 158A
Physiologic significance of coronary lesions assessed by exercise echocardiography and quantitative coronary angiography, 158A
Echocardiography, three dimensional
New three-dimensional echocardiographic
method for quantitating mitral valve prolapse, 227A

Three-dimensional echocardiography: a feasible, non-invasive method to measure cardiac volume, 50A

Transesophageal echo computer tomography: a new method for dynamic 3-D imaging of the heart, 68A

Echocardiography, transesophageal

Contribution of transesophageal echocardiography to the ultrasound assessment of percutaneous mitral valvuloplasty, 51A

Detection of pulmonary artery thrombi by transesophageal echocardiography in patients with suspected pulmonary embolism, 224A

Impact of transesophageal echocardiographic examinations: comparison between transthoracic and transesophageal approaches, 51A

Mitril prosthes malfunction: utility of transesophageal echocardiography, 69A

Safety of transesophageal echocardiography in awake patients: experience with 400 procedures, 225A

Transesophageal echo, an improved diagnostic technique for sub-aortic membranes, 209A

Transesophageal echo computer tomography: a new method for dynamic 3-D imaging of the heart, 68A

Transesophageal echo in mitral prosthetic dysfunction: echo-surgical correlation, 69A

Transthoracic versus transesophageal two-dimensional echo/Doppler flow imaging in surgical patients with mitral regurgitation, 68A

Utility of transesophageal echocardiography in patients undergoing cardiac valve surgery, 123A

Echocardiography, two-dimensional

Can color Doppler/two dimensional echocardiography identify the need for tricuspid valve repair, 24A

Can hemodynamically significant RV infarction be identified by two-dimensional echocardiography?, 157A

Intravascular real-time, high resolution two-dimensional echocardiography, 4A

Progression of aortic stenosis as assessed by echocardiography, 233A

Transthoracic two-dimensional ultrasonic high frequency (7.5 MHz) visualization of the distal left anterior coronary artery, 116A

Transthoracic versus transesophageal two-dimensional echo/Doppler flow imaging in surgical patients with mitral regurgitation, 68A

Two-dimensional echocardiography can reduce hospital admissions for acute myocardial infarction by more than one-third: results of a prospective study performed in the emergency room, 159A

Echocardiography

Current myocardial perfusion echo methodology precludes an accurate assessment of coronary vascular reserve, 116A

Ectopic activity

Increased ventricular ectopic activity during ischemic episodes in ambulatory patients, 33A

Microprocessor based ECG analyzer and tone generator which permits immediate recognition and categorization of ectopic rhythms by sound, 188A

Edema

Rapid-onset pulmonary edema in patients with left ventricular systolic dysfunction: a syndrome related to ventricular function, 179A

Survival among patients with flash pulmonary edema: a retrospective review of surgical and medical management, 46A

Ejection fraction

Ambulatory left ventricular function monitoring: are the ejection fraction measurements reproducible?, 96A

Augmentation of ejection fraction during ambulatory monitoring in thrombolysis patients with isolated silent ventricular dysfunction: mechanistic implications, 96A

Evidence against a “myocardial factor” in rheumatic mitral stenosis, 147A

Improvement in left ventricular ejection fraction during the first post-infarction year in patients with inferior and non-Q wave infarcts, 81A

Natural history of left ventricular function changes after myocardial infarction, 25A

Right and left ventricular response early and late after surgical relief of mitral regurgitation, 71A

Elderly

See also Age factors

Aortic stenosis in the elderly: aortic balloon valvuloplasty vs. aortic valve replacement, 38A

Cardiovascular risk of hypertension in the old: the Bronx Longitudinal Aging Study, 37A

Decreased rejection in older cardiac transplant patients, 38A

Exercise training alters catecholamine metabolism in healthy older men, 41A

Risk factors for coronary mortality in elderly survivors of myocardial infarction: the Framingham Study, 37A

Silent coronary artery disease in elderly men: low exercise tolerance is strongly associated with multivessel disease, 37A

Electrocardiography

See also specific wave; specific interval

Absence of late potentials in patients with repetitive monomorphic and exercise-facilitated ventricular tachycardia and no apparent heart disease, 177A

Complementarity of signal-averaged ECG and exercise testing in predicting cardiac events after myocardial infarction, 190A

Effect of antiarrhythmic drugs on frequency-domain parameters of signal-averaged ECG, 191A

Effect of exercise-induced ischemia on signal averaged electrocardiogram, 191A

Effect of thrombolysis on late potentials incidence after acute myocardial infarction, 178A

Enhancing prediction of induced ventricular tachycardia in patients with non-sustained runs by the signal averaged electrocardiogram, 34A

Late potential and noise level variability caused by bandpass versus high-pass filtering, and type of signal-averaging equipment, 188A

Microprocessor based ECG analyzer and tone generator which permits immediate recognition and categorization of ectopic rhythms by sound, 188A

One heart, two bodies: insights, from the transplanted heart's new electrocardiogram, 243A

Reproducibility of the signal-averaged ECG in the acute phase of myocardial infarction and at long term follow-up, 190A

Right ventricular electrocardiographic abnormality in orthotopic heart transplant patients, 11A

Role of electrocardiographic location on dilatation treatment and myocardial infarction: multicenter dilatation post-infarction trial (MDPIT), 6A

Signal-averaged electrocardiogram predicts arrhythmic events in patients with left bundle branch block, 190A

Signal-averaged electrocardiographic abnormalities in non-aftected first degree relatives of patients with hypertrophic cardiomyopathy, 190A

Signal-averaged electrocardiographic differences between patients with non-myoplastic left ventricular hypertrophy and patients with hypertrophic cardiomyopathy, 189A

Time-dependent electrophysologic changes after experimental myocardial infarction: parallel changes in inducibility of ventricular arrhythmias and the signal-averaged electrocardiogram, 22A

Electrocardiography, ambulatory

Does three channel ambulatory electrocardiographic monitoring increase detection of ischemia?, 189A

Holter monitoring in the diagnosis of sleep apnea syndrome, 189A

Silent ischemia on ambulatory ECG monitoring provides additional prognostic information in patients with stable angina and a positive exercise treadmill test, 202A

ST analysis: intragroup versus intrapatient variability of Holter results, 189A

Electromechanical dissociation

Stunned myocardium: a form fruste of electromechanical dissociation, 90A

Electrophysiologic studies

Accelerated arterial wave reflection with left bundle branch block: a new model of congestive heart failure, 247A

AV nodal reentry incorporating His bundle: verapamil sensitivity in retrograde fast pathway conduction, 173A

Comparison of electrophysiologic responses to losartan in the failing and nonfailing heart, 180A

Delayed ventricular arrhythmias (phase 1B) resulting from midmyocardial reentry, 128A

Electrophysiologic testing in patients with asymptomatic nonsustained ventricular
Endarterectomy: initial clinical experience with the Auth mechanical rotary catheter, 227A

Endocarditis
Prediction of risk for complications in patients with left sided infectious endocarditis, 72A

Endothelin
Effects of endothelin, a novel vasoconstrictor peptide, on the isolated human mesenteric arteries, 85A
Endothelin constricts the systemic and coronary circulations and depresses ventricular function in vivo, 179A
Endothelin is a potent constrictor of forearm resistance vessels and veins in man, 84A
Endothelin is a potent constrictor of human coronary arteries in vitro, 85A
Intracoronary endothelin infusion induces transmural myocardial ischemia in the dog, 84A
Potentialpressor effects of endothelin in spontaneously hypertensive rats and Wistar Kyoto rats, 83A

Endothelium
Endothelial function influences the coronary vasomotor response to sympathetic stimulation in man, 202A
Endothelium-dependent inhibition or ergonovine-induced contraction is impaired in porcine coronary arteries with regenerated endothelium, 31A
Endothelium protects against contractions induced by histamine and serotonin in arterial, but not in venous coronary bypass grafts, 166A
Persistent endothelial dysfunction following experimental angioplasty, 195A

Enoximone
Acute and chronic response to oral enoximone in severe congestive heart failure: sustained hemodynamic improvement and preferential effect on right ventricular systolic performance, 101A
Enoximone improves maximal and submaximal exertion in patients with chronic heart failure: a double-blind, placebo controlled trial, 247A
Use of enoximone in cardiac transplant candidates: effect on β adrenergic receptors, 248A

Extracellular
Surface ECG and intracardiac findings with the onset of entrainment in a pacing model of pseudonyctyous ventricular tachycardia, 185A

Extrusion
Exercise training alters catecholamine metabolism in healthy older men, 41A
Prevention of halothane-epinephrine-induced cardiac arrhythmias with fructose 1-6 diphosphate, 139A
Termination of epinephrine-induced ventricular tachycardia by adenosine in halothane-anesthetized dogs, 249A

Ergonovine
Comparison of acetylcholine and ergonovine in acute pulmonary emboli, 86A
Prevention of halothane-epinephrine-induced cardiac arrhythmias and depression of coronary function in vivo, 79A
Potential role of transesophageal echo in the diagnosis of intracardiac sources of arrhythmia, 185A

Esmolol
Prevention of halothane-epinephrine-induced cardiac arrhythmias with fructose 1-6 diphosphate, 139A

Exercise testing

Insensitivity of right ventricular endomyocardial biopsy in the diagnosis of myocarditis: whither the gold standard?, 253A
Porcine model of myocarditis leading to dilated cardiomyopathy, 253A
Sharing of antigenic determinants between coxsackie B3 virus and autoantigens in viral myocarditis and dilative cardiomyopathy, 253A
Myocardium, immature
Electrophysiologic and histopathologic comparison between apical and transmural septal ventricular pacing in the immature canine myocardium: evaluation of a new method, 110A
Myocardium, stiff
Myocardial stiffness and reparative fibrosis following coronary embolization, 1A
Myocardium, stunned
Demonstration of viable myocardium after an acute infarction submitted to thrombolysis: comparison between positron emission tomography and dobutamine echocardiography, 192A
Does acute pharmacologic stimulation of stunned myocardium have chronic deleterious effects?, 219A
Effect of a-tocopherol (vitamin E) on regional function in stunned myocardium, 144A
Glucose metabolism in stunned reperfused myocardium, 102A
Stunned myocardium: a form fruste of electromechanical dissociation, 90A
Stunned myocardium: evidence that diastolic ventricular dysfunction persists after resolution of systolic dysfunction—experimental Doppler echocardiographic studies, 197A
Myocytes
 Morphometric mapping of regional differences in myocyte diameters after healing of myocardial infarction, 125A
Relationship between stimulation threshold variability of isolated cardiomyocytes and separated defibrillation shocks delivered in orthogonal directions, 177A
Myosin
Myosin heavy chain gene expression in the right ventricle after experimental infarction in the rat, 125A
Myosin light chains
Delayed expression of myosin heavy chain gene expression in the right ventricle after experimental infarction in the rat, 125A
Myosin light chains
Biphasic release of myosin light chains in patients with successful thrombolysis in acute myocardial infarction, 95A
Myotonic dystrophy
Prevalence of cardiac abnormalities in a large kindred with myotonic dystrophy, 89A
N-acyetylcyesteine
N-acyetylcyesteine potentiates IV nitroglycerin in inhibiting periodic platelet thrombus formation in stenosed dog coronary arteries, 145A
Necrosis
Cystic medial necrosis of the aorta: natural history and long-term follow-up, 122A
Neural crest
Noncardiac defects associated with conotruncal abnormalities—further implications of neural crest influence, 118A
Neurohumoral activation
Selective neurohumoral activation in the recovery phase of anterior myocardial infarction in man, 92A
Neuroprotection
Randomized controlled trial of neuroprotection in the early treatment of acute myocardial infarction, 91A
Neuronal function
F-18 metanephrine uptake as marker for neuronal function in post-ischemic canine myocardium, 64A
Neutrophil function
Neutrophil function in ischemic heart disease, 44A
Nicardipine
Negative inotropic effect of nicardipine in patients with heart failure: denotification by left ventricular end-systolic pressure-volume analysis, 178A
Nifedipine
Cocaine-induced contraction of vascular smooth muscle is inhibited by calcium channel blockade, 78A
Coronary spasm induced by stent implantation, 194A
Effects of low dose nifedipine administrated through the coronary sinuses in ischemic heart disease, 153A
Improvement of relaxation velocity by calcium blocker in aging rabbit myocardium, 57A
Modification of myocardial ischemia and dysfunction by nifedipine and nitroglycerin during coronary occlusion, 154A
Nifedipine does not alter the venodilatory response to nitroglycerine, 154A
Nifedipine in unstable angina: beneficial effects in the elderly and in patients with reduced left ventricular function, 239A
Therapy of painful and painless myocardial ischemia in 348 patients: results of the nifedipine total ischemia awareness program, 3A
Treatment of hypertension alters the relationship between platelet calcium and sensitivity to aggregatory agents, 104A
Nisoldipine
Improvement of relaxation velocity by calcium blocker in aging rabbit myocardium, 57A
Preservation of ventricular performance with reduced ischemic dysfunction by ventricular nisoldipine during rapid atrial pacing, 46A
Nitrates
Evidence for antithrombotic properties of nitrate-vasodilators in vivo but not in vitro, 231A
Myocardial infarction with minimal coronary atherosclerosis: a syndrome of young
women with guarded long term prognosis, 27A
Nifedipine in unstable angina: beneficial effects in the elderly and in patients with reduced left ventricular function, 239A

Nitric oxide
Evidence for antithrombotic properties of nitrate-vasodilators in vivo but not in vitro, 231A
Preserved flow-mediated vasodilation despite acetylcholine-induced vasoconstriction in atherosclerotic coronary arteries in man, 132A

Nitrogen-13 ammonia
Nitrogen-13 ammonia myocardial uptake at rest with exercise in normal volunteers: quantification of coronary flow with dynamic positron emission tomography, 97A
Significance of exercise-induced ST-segment elevation in patients with Q wave anterior myocardial infarction: evaluation by positron emission tomography, 203A

Nitroglycerin
Antithrombotic action of nitroglycerin: cyclic GMP as a potential mediator, 231A
Antithrombotic therapy: is the combination of aspirin and nitroglycerin beneficial?, 145A
Biphasic response of coronary blood flow to intracoronary nitroglycerin in normal subjects, 230A
Brachial artery pressure measurements underestimate beneficial effects of nitroglycerin on left ventricular overload, 231A
Chronic reduction of left ventricular volumes at rest and exercise in patients treated with nitroglycerin following anterior MI, 25A
Coronary spasm induced by stent implantation, 194A
Intravenous nitroglycerin prevents coronary artery vasocnstriction after PICA, 59A
Methionine reversed tolerance to transdermal nitroglycerin, 230A
Modification of myocardial ischemia and dysfunction by nifedipine and nitroglycerin curing coronary occlusion, 154A
N-acetylcysteine potentiates IV nitroglycerin in inhibiting periodic platelet thrombus formation in stenosed dog coronary arteries, 145A
Newly developed nitroglycerin patch with "phased release," 231A
Nifedipine does not alter the venodilatory response to nitroglycerin, 154A

Nitroprusside
Effect of oral administration of antihypertensive agents on endothelium dependent and endothelium independent vascular relaxation, 83A
Evidence for antithrombotic properties of nitrate-vasodilators in vivo but not in vitro, 231A
Persistent endothelial dysfunction following experimental angioplasty, 195A
Response to nitroprusside—predictor of early post transplant mortality, 62A

Noradrenaline
Cardiovascular hormones in relation to mortality in severe heart failure, 246A
Genetically-induced atherosclerosis attenuates endothelially mediated relaxation, 32A

Norepinephrine
Differences in neurohumoral activation in patients with left ventricular dysfunction with and without heart failure, 246A
Exercise training alters catecholamine metabolism in healthy older men, 41A
F-18 metaraminol uptake as marker for neuronal function in post-ischemic canine myocardium, 64A
Independent effects of hyoxia and glucose deprivation on the β-adrenoreceptor-adenylate cyclase system in cultured neonatal rat ventricular myocytes, 142A
Persistent endothelial dysfunction following experimental angioplasty, 195A

Nuclear magnetic resonance imaging
See also Spectroscopy
Detection of myocardial hemorrhage using 1 H NMR imaging at 1.5 T, 48A
Evaluation of aortic regurgitation by cine magnetic resonance imaging comparing cineangiography, 201A
Improved assessment of acute myocardial infarction by magnetic resonance imaging and gadolinium DTPA, 49A
Magnetic resonance imaging in ischemic injury following cardiac transplantation, 200A
Magnetic resonance imaging with gadolinium-DTPA in man for detection of acute myocardial infarction with occluded and reperfused vessels, 201A
NMR lipid imaging: a new strategy for quantification of coronary flow with dynamic positron emission tomography, 49A

O-demethylencainide
Prodrhythmia of O-demethyl encainide: suppression by combination with mexiletine, 140A

Obesity
Prognosis of obesity-related hypertenstion: Framingham Study, 104A

OCT3
Prophylactic anti-rejection therapy early after cardiac transplantation, 62A

Oxalain
Lack of correlation of oxalain binding sites and inotropic response to digitals in experimental heart failure, 248A

Oxidase
Glucose metabolism in stunned reperfused myocardium, 102A

Oxygen consumption
Importance of analyzing inspiratory gases when calculating oxygen consumption and carbon dioxide production during exercise, 119A
In vivo assessment of the independent effects of heart rate, contractility and systolic loading condition on myocardial oxygen consumption, 101A
Left ventricular systolic pressure-volume area
and oxygen consumption of hyper-and hypothyroid rabbits, 87A
Oxygen consumption during exercise in the pressure-overloaded hypertrophied heart, 187A

Oxygen radical
Detection of hydroxyl radicals in the reperfused isolated monkey heart, 110A
Post-ischemic oxygen radical production detected by chemiluminescence varies with duration of ischemia, 109A

Oxygen saturation
Acute clinical testing and follow-up of a rate-variable pacemaker controlled by central venous oxygen saturation, 112A

Oxygen uptake
Comparison of exercise protocols: evaluation of oxygen uptake kinetics in heart failure, 242A
Oscillatory shifts in oxygen uptake diminish the functional relevance of gas exchange measurements during exercise in chronic heart failure, 241A

Oxygenation
In vivo near infrared monitoring of myocardial oxygenation during ischemia and reperfusion, 215A

Oxigenators
Cardiac resuscitation by extracorporeal pump oxygenator (ECPO) after failure of precordial compression, 220A

Pacemaker
Acute clinical testing and follow-up of a rate-variable pacemaker controlled by central venous oxygen saturation, 112A
Autonomic influence on ventricular subsidiary pacemakers: a study of patients post AV nodal ablation, 232A
Double blind cross-over study on the symptomatology and quality of life in patients with rate responsive pacemakers, 113A
Impaired activity rate responsiveness of atrial Atrivitax II pacemakers, 215A
Initial clinical experience with a dual chamber rate modulation pacemaker, 112A
Initial experience with automatic slope settings for Meta MV and Rhythmyx rate responsive pacemakers, 113A
Investigation of a new activity sensing rate responsive dual chamber pacemaker, 112A
Pacemaker/implantable defibrillator interactions: are they of clinical importance?, 66A
Response of rate-adaptive pacemakers to physiological stimuli other than isotonic exercise: comparison of six different sensors, 215A
Unique upper rate behaviors in dual chamber, rate modulated pacemakers, 113A

Pacemaker syndrome
Pacemaker syndrome is associated with very high plasma concentrations of atrial natriuretic peptide (ANP), 111A

Pacing
Effect of atrial contraction and synchrony of cardiac contraction on ventriculo-arterial coupling, 206A
Effect of cardiac pacing mode on the long-term development of atrial fibrillation, 217A
Effects of different pacing modes on right atrial pressure and atrial natriuretic peptide in patients with atrioventricular block, 217A
Electrophysiologic and histopathologic comparison between apical and transseptal tip atrial pacing in the immature canine myocardium: evaluation of a new method, 110A
Is atrial activation beneficial in heart transplant recipients?, 111A
Prohormone atrial natriuretic peptides 1-30, 31-67, and 99-126 increase in proportion to right ventricular pacing rate, 217A
Spontaneous changes in ventricular tachycardia cycle length: relevance to antiarrhythmic device development, 111A

Palmitate oxidation
Mechanical function and palmitate oxidation in the neonatal piglet heart during normothermic ischemia and reperfusion, 119A
Papaverin
Preserved flow-mediated vasodilation despite acetylcholine-induced vasoconstriction in atherosclerotic coronary arteries in man, 132A

Papillary muscle
Direct tracing of the papillary muscle during ischemia: implications for ischemic mitral regurgitation, 156A

Parasympathetic denervation
‘Up-regulation’ of GTP binding proteins following cardiac parasympathectomy—quantitation by immunoblot method, 143A

Parasympathetic cardiac control
Chronic impairment of parasympathetic cardiac control in heavy smokers, 36A

Pediatric cardiology

See also Congenital heart defects: specific disease; Surgery, pediatric
Cardiopulmonary exercise response in adolescents following cardiac transplantation, 135A
Characterization of the phasic responses of the neonatal sinus and atrioventricular node to brief vagal stimulation, 138A
Does myocardial involvement in children with severe mitral regurgitation (MR) due to active rheumatic carditis (ARC) influence the outcome of mitral valve replacement (MVR)?, 146A
Early experience with pulmonary autograft use for aortic valve replacement in pediatric patients, 120A
Effects of position and exercise on the QT interval in children, 171A
Evidence of enhanced contractility in normal infants compared to older children and adults, 132A
Experimental animal investigations of the potential for new approaches to diagnostic cardiac imaging in infants and small premature infants from intracardiac and transesophageal approaches using a 20MHz real time ultrasound imaging catheter, 137A
Family history predictors of high blood cholesterol levels in 4th grade school children, 36A
Fate of the neoaortic valve after arterial repair of transposition of the great arteries, 240A

Ischemic time and graft function in human infant cardiac transplantation, 120A
Linear growth in pediatric cardiac transplant patients, 134A
Long-term follow-up of amiodarone in the young: continued efficacy, unimpaired growth, moderate side effects, 171A
Mechanical function and palmitate oxidation in the neonatal piglet heart during normothermic ischemia and reperfusion, 119A
Modulation of the fetal left ventricular function curve by thoracic tissue, 136A
Noncoronary defects associated with conotruncal abnormalities—further implications of neural crest influence, 119A
Noninvasive discrimination of right atrial ectopic from sinus tachycardia in dilated ‘cardiomyopathic’ hearts, 137A
Poor prognostic features for fetuses with prenatally diagnosed tricuspid valve abnormalities, 205A
Postnatal development changes in myocardial mitochondrial calcium transport, 137A
Remodeling of the aorta following successful balloon coarctation angioplasty, 240A
Respiratory influence on RV and LV diastolic filling in normal children, 205A
Time course of pulmonary arterial pressure change in the early postnatal period—noninvasive color Doppler and continuous wave Doppler echocardiographic study, 225A
Transcatheter umbrella closure of atrial defects, 120A
Use of balloon-expandable stents to treat experimental peripheral pulmonary artery and superior vena cava stenosis: preliminary experience, 119A
Validation of Doppler echocardiographic calculation of descending aortic umbilical flow in fetal lambs, 137A
Ventricular septal defect with aortic regurgitation: a 35 year experience, 121A
Ventricular volume and function in infant orthotopic heart transplantation, 239A

Pericarditis
Hibernation induction trigger extended effective organ preservation time in a new autoperfusion multiorgan preparation, 63A
Diagnosis of pericardial abnormalities by two-dimensional echo: a pathology-echo correlation in 85 patients, 235A
Paracardial effusion
Effect of pericardial effusion on energy requirements for defibrillation using extracorporeal defibrillation energy, 112A
Effectiveness of pericardioscopy for etiological diagnosis in 18 patients with suspected malignant pericardial effusion, 235A
Left ventricular pseudo hypertrophy in pericardial effusion: a sign of cardiac tamponade, 235A

Pericardial disease
Treatment of pericardial effusion: results of a multicenter study, 227A

Phenylephrine
Enhanced cardiac adrenergic response in cardiomyopathic hamster at a pre-congestive failure stage, 87A
Increased contractility induced by alpha adrenergic stimulation in septic rat hearts, 144A
Role of α-adrenergic receptors in syndrome X, 150A

Phenoxymyamine
Cocaine-induced contraction of vascular smooth muscle in inhibited by calcium channel blockade, 78A

thrombus deposition in rabbits treated with tissue plasminogen activator, 77A
Bleeding complications after double-chain tPA: influence of dose and duration of infusion, 77A
Comparison of the effect of upright posture and exercise on platelet aggregability and fibrinolytic activity, 93A
Determinants of improved global left ventricular function after tPA and deferred PTCA for acute MI, 92A
Dose response relationship of rt-PA infusion to induction of systemic fibrin (ogen) olysis in the NHLBI thrombolysis in myocardial infarction (TIMI-II) trial, 196A
Echocardiographic evaluation of segmental wall motion early and late after thrombolytic therapy in acute myocardial infarction, 156A
Economic advantage of a conservative strategy for AMI management: rt-PA without obligatory PTCA, 152A
Effect of the length of tissue plasminogen activator administration on lysis of fresh and old thrombi, 78A
Effect of TPA on myocardial cells, the no-reflow phenomenon and intramyocardial hemorrhage, 124A
Is delivery of rt-PA by helicopter transport teams safe and time-effective?, 192A
Lack of association between early administration of thrombolytic therapy and the development of non-Q wave myocardial infarction, 6A
Myocardial infarction with minimal coronary atherosclerosis: a syndrome of young women with guarded long term prognosis, 27A
Myocardial rupture complicating tissue plasminogen activator therapy of acute myocardial infarction, 94A
No difference in long term ventricular function after streptokinase and tissue plasminogen activator therapy in acute myocardial infarction, 96A
Pericarditis in the face of thrombolytic intervention denotes severe myocardial damage, 236A
Prehospital thrombolytic therapy—mini project report on Phase I: feasibility, characteristics of patients, 152A
Risk factors for hemorrhagic and ischemic stroke in myocardial infarct patients treated with tissue plasminogen activator, 153A
rtPA versus rtPA plus PTCA in acute myocardial infarction: quantitative results of early and late coronary arteriography, 54A
Selective inhibition of α2-antiplasmin augments the potency and specificity of plasminogen activators, 2A
TIMI II a new study of PTCA timing after rt-PA thrombolysis for acute myocardial infarction (AMI), 194A
Tissue plasminogen activator for unstable angina pectoris: a multicenter, randomized, double-blind, placebo-controlled trial, 191A
Western Washington tissue plasminogen activator emergency room study, 94A
Plasminogen activator inhibitor
Platelet plasminogen activator inhibitor: purification and characterization of interaction with plasminogen activators and activated Protein C, 1A
Platelet(s)
Angiographic demonstration of hyperextension induced by serotonin and aggregating platelets in porcine coronary arteries with regenerated endothelium, 31A
Platelet-activating factor
Cardiovascular effects of platelet-activating factor in conscious dogs, 144A
Platelet aggregation
Comparison of the effect of upright posture and exercise on platelet aggregability and fibrinolytic activity, 93A
Progression of coronary atherosclerosis and enhanced thrombin-induced platelet aggregability, 42A, 78A
Treatment of hypertension alters the relationship between platelet calcium and sensitivity to aggregatory agents, 104A
Platelet deposition
Platelet deposition in areas of stenosis is stimulated by high plasma cholesterol levels, 145A
Platelet function
Absorption and effect on platelet function from single dose concentrated fish oil compared with tuna fish, 12A
Pleural effusion
Pleural effusion as a cause of right ventricular diastolic collapse and cardiac tamponade, 236A
Posture
Effects of upright posture on atrioventricular accessory pathway conduction, 205A
Potassium
Effects of glyburide on ischemia-induced changes in extracellular potassium and local myocardial activation: a novel antiarrhythmic mechanism, 142A
Nonhomogenous redistribution of regional myocardial blood flow and potassium during reperfusion of ischemic myocardium, 127A
Hibernation induction trigger extended effective organ preservation time in a new autoperfusion multiorgan preparation, 63A
PR interval
Site of age-related PR interval prolongation in normal subjects, 57A
Prazosin
Cocaine-induced contraction of vascular smooth muscle is inhibited by calcium channel blockade, 78A
Increased contractility induced by alpha adrenergic stimulation in septic rat hearts, 144A
Role of α-adrenergic receptors in syndrome X, 150A
Prednisolone, Prednisone
Hibernation induction trigger extended effective organ preservation time in a new autoperfusion multiorgan preparation, 63A
Prednisone withdrawal in "high risk cardiac transplant recipients," 212A
Prophylactic anti-rejection therapy early after cardiac transplantation: RATG versus OPK3, 62A
Treatment of cardiac allograft rejection with pulsed steroids: a three year experience, 210A
Preexcitation
100% specificity in localizing ventricular preexcitation site in WPW syndrome with ECG, 10A
Pregnancy
Disopyramide induces uterine contractions in pregnancy, 141A
Preload

Pressure gradients
Can the modified Bernoulli equation accurately estimate instantaneous transmural pressure gradients in patients with cardiac pathology?, 234A
Pressure half-time
Systemic errors in the Doppler pressure half-time formula for mitral orifice area, 234A
Ventricular and atrial compliance changes affect pressure half-time: experimental evidence, 234A
Preventive cardiology
Housestaff practice of preventive cardiology: who’s not doing what?, 37A
Procarbazine
Comparison of antiarrhythmic efficacy and safety of class 1A, 1B, and IC agents in symptomatic and potentially malignant ventricular arrhythmia, 163A
Comparison of flecainide vs procarbazine in depressing retrograde conduction in atioventricular nodal reentry tachycardia, 165A
Effect of antiarrhythmic drugs on frequency-domain parameters of signal-averaged ECG, 191A
Epicardial mapping of rate-dependent ventricular conduction slowing by procarbazine, 251A
Rate-dependent slowing of intraventricular conduction by procarbazine: direct measurement in the human heart, 250A
Reliability of procarbazine in predicting the shortest preexcited R-R interval during atrial fibrillation is dose dependent, 204A
Use-dependent prolongation of ventricular tachycardia cycle length by type 1A and IC drugs, 21A
Propafenone
Combined therapy with type 1C and 1B agents: is it effective for ventricular tachycardia?, 141A
Effect of antiarrhythmic drugs on frequency-domain parameters of signal-averaged ECG, 191A
Intravenous propafenone for conversion of atrial flutter or fibrillation of recent onset, 140A
Oral propafenone for prevention of recurrent atrial fibrillation: predictive value of the response to transesophageal atrial stimulation, 233A
Short term variability of ventricular arrhythmia and rapid assessment of drug efficacy, 140A
Propranolol
Beta-blockers in syndrome X, 150A
Comparison of pharmacological and nonpharmacological treatment of hypertension. A randomized placebo controlled study, 104A
Electrophysiologic effects of a chemical defibrillatory agent: dibenozepin, 250A
Enhanced cardiac adrenergic response in cardiomyopathic hamster at a pre-congestive failure stage, 87A
Exercise training versus exercise training with diltiazem or propranolol: effects on lipids in men with mild hypertension, 241A
Exercise training versus exercise training with diltiazem or propranolol: effects on maximal oxygen uptake and exercise duration in men with mild hypertension, 241A
Exercise training versus exercise training with diltiazem or propranolol: effects on resting blood pressure in men with mild hypertension, 106A
Increased contractility induced by alpha adrenergic stimulation in septic rat hearts, 144A
Modulation of the fetal left ventricular function curve by the chronic tissue, 136A
'Torsade de pointes' with quinidine and propranolol in conscious dogs with A-V block, 249A
Protein
Suppression of cardiac protein degradation contributes to progressive hypertrophy due to aortic regurgitation, 71A
"Up regulation" of GTP binding proteins following cardiac parasympathetic tone quantitation by immunoblot method, 143A
Protein C
Platelet plasminogen activator inhibitor: purification and characterization of interaction with plasminogen activators and activated protein C, 1A
Pro-urokinase
Acute thrombotic recirculation after percutaneous transluminal coronary angioplasty—should thrombolysis be attempted?, 58A
Coronary thrombolysis with urokinase preactivated intravenous pro-urokinase, 193A
Early reperfusion after treatment with intravenous pro-urokinase when compared to intravenous streptokinase, 152A
Heparin potentiates the thrombolytic efficacy of natural pro-urokinase, 198A
Pseudoaoeuremy
Diagnosis of left ventricular pseudoauremy by colour Doppler flow mapping, 24A
Pulmonary artery pressure
Estimation of pulmonary pressure in ventricular septal defect: Doppler and color flow application, 52A
Non-invasive computer reconstruction of the pulmonary artery pressure waveform using Doppler echocardiography, 225A
Time course of pulmonary arterial pressure change in the early postnatal period—noninvasive color Doppler and continuous wave Doppler echocardiographic study, 225A
Pulmonary capillary wedge pressure
Use of pulmonary capillary wedge pressure to assess the severity of mitral stenosis: is a true left atrial pressure needed in these patients?, 146A
Pulmonary disease
Reduced exercise capacity of chronic obstructive pulmonary disease patients exercising with noseclip/mouthpiece: decreased right heart preload?, 183A
Pulmonary venous flow velocities
Effect of age on pulmonary venous flow velocities in normal subjects, 50A
Pulsation
Improved hemodynamic and left ventricular unloading during acute ischemia using the hemopump left ventricular assist device compared to intra aortic balloon counter pulsation, 160A
Q waves
Q waves in hypertrophic cardiomyopathy: presence and localization according to the site and extent of right and left ventricular hypertrophy, 10A
QRS interval
His-Purkinje activation during ventricular tachycardia: a determinant of QRS duration, 21A
QT interval
Abnormal QT/QS, ratio at rest and exercise in Romano-Ward long QT patients, normalized by beta-blocker therapy, 11C
Effects of position and exercise on the QT interval in children, 171A
Etiology of polymorphic ventricular tachycardia in the absence of prolonged QT, 21A
Improved electrocardiographic identification of patients with the long QT syndrome (LQTS), 11A
Long QT syndrome international prospective registry, 20A
Quantitative regional curvature analysis
Quantitative regional curvature analysis: determination of abnormal systolic and diastolic function by assessing shape throughout the cardiac cycle, 100A
Quinidine
Amodarone on suppression of barium-induced triggered automaticity and early afterdepolarizations in Purkinje fibers relative to effects of verapamil and class 1 agents, 249A
Dynamic response of conduction velocity to quinidine during pulse train stimulation in canine Purkinje fibers, 163A
Effect of antiarrhythmic drugs on frequency-domain parameters of signal-averaged ECG, 191A
Effects of combined low doses of quinidine and metoprolol on inducible ventricular arrhythmias in a chronic canine infarct model, 248A
Is the proarrhythmic effect of quinidine a chaotic phenomenon?, 186A
Quinidine myocardial pharmacokinetics and pharmacodynamics: influence on hypoxia, 138A
'Torsade de pointes' with quinidine and propranolol in conscious dogs with A-V block, 249A
Radionuclide studies

Emergency percutaneous cardiopulmonary (bypass) support in cardiogenic shock, 160A
Sick sinus syndrome
New quantitative method of sinoatrial nodal cells in sick sinus syndrome, 184A
Silent defects
Augmentation of ejection fraction during ambulatory monitoring in thrombolysis patients with concomitant silent ventricular dysfunction: mechanistic implications, 96A
Exercise-induced silent ischemia: effect of type A behavior on frequency and prognosis, 237A
Exercise test results predict silent ischemia on ambulatory monitoring, 3A
Incidence and prognostic significance of early postoperative silent ischemia in peripheral vascular surgery patients, 149A
Left ventricular function at rest and the prevalence of ambulatory silent ischemia in coronary artery disease, 203A
Silent coronary artery disease in elderly men: low exercise tolerance is strongly associated with multivessel disease, 37A
Silent ischemia on ambulatory ECG monitoring provides additional prognostic information in patients with stable angina and a positive exercise treadmill test, 202A
Silent ischemia during daily life is an independent predictor of survival in stable angina, 3A
Sinus node
Duration of sinus node depolarization can indicate the degree of sinus node dysfunction, 232A
Skeletal muscle
Capillary density, fiber type and enzyme composition of skeletal muscle in congestive heart failure, 38D
Decreased aerobic oxidative capacity in skeletal muscle in chronic heart failure, 39A
Skeletal muscle metabolic abnormalities in heart failure are in part due to intrinsic skeletal muscle changes, 39A
Sleep apnea syndrome
Holter monitoring in the diagnosis of sleep apnea syndrome, 189A
Smoking
Chronic impairment of parasympathetic cardiac control in heavy smokers, 36A
Recent exposure to cigarette smoke increases myocardial size ineffect, 124A
Smoking cessation post myocardial infarction: effects of a nurse-directed intervention, 134A
Survival and quality of life in cigarette smokers versus quitters randomized to medicine or CABG in the coronary artery surgery study (CASS): 10 year follow-up, 30A
Smooth muscle
Cocaine-induced contraction of vascular smooth muscle is inhibited by calcium channel blockade, 78A
Eximer laser irradiation induces endothelium-independent relaxation of vascular smooth muscle, 141A
Mechanism responsible for laser-induced photorelaxation of vascular smooth muscle is limited to ultraviolet and visible wavelengths, 142A
Sodium channel
Preliminary biochemical characterization of the canine cardiac sodium channel, 20A
Sodium currents
Evidence for two types of sodium currents isolated neonatal AV nodal heart cells, 128D
Sodium nitroprusside
See Nitroprusside
Sotalol
Effect of antiarrhythmic drugs on frequency-domain parameters of signal-averaged ECG, 191A
Safety, efficacy and predictive value of drug termination of ventricular tachycardia, 162A
Soyacal
Hibernation induction trigger extended effective organ preservation time in a new autoperfusion multiorgan preparation, 63A
Spasm
Coronary spasm induced by stent implantation, 194A
Human percutaneous laser-assisted coronary angioplasty: efforts to reduce spasm and thrombosis, 61A
Spectroscopy
In vivo near infrared monitoring of myocardial oxygenation during ischemia and reperfusion, 251A
In vivo 31P spectroscopy from turtle heart during anoxia and recovery, 199A
Myocardial protection with verapamil during ischemia and reperfusion: assessment by magnetic resonance spectroscopy, 200A
Time-averaged phosphorus-31 NMR spectroscopy of the metabolic response to hemodynamically equivariant pacing-induced and flow-limited ischemia in the conscious dog, 219A
1H magnetic resonance spectroscopy and cine H magnetic resonance imaging in dilated cardiomyopathy in humans, 199A
Stenosis

Spinal stimulation

Epidurospinal stimulation in patients suffering from intractable angina, 46A

SQ 30217

Kinetics of the new Tc-99m labeled blood flow marker (SQ30217) in canine myocardium, 98A

Planar and tomographic myocardial imaging with SQ 30217, a new technetium labeled agent, 98A

ST segment

Enhanced β-adrenergic activity in non-infarcted myocardium may cause exercise-induced ST-segment elevation in old myocardial infarction, 124A

Importance of assessing ST elevation by Holter monitoring in unstable angina, 131A

In-hospital angina with transient ECG changes predicts poor one-year survival only in patients with ST depression, 93A

Initial validation of a new patient-borne miniature device for continuous monitoring of left ventricular function and ST-segment, 96A

Post-exercise ST segment depression in relation to heart rate: improved identification of coronary artery disease by the rate-recovery loop, 236A

Significance of exercise-induced ST segment elevation in patients with Q wave anterior myocardial infarction: evaluation by positron emission tomography, 203A

ST analysis: intragroup versus intrapatient variability of Holter results, 189A

Stenosis

Antithrombotic effect of aspirin is independent of stenosis severity, 77A

Aortic stenosis in the elderly: aortic balloon valvuloplasty vs. aortic valve replacement, 38A

Balloon mitral valvuloplasty: a multicentre study, 70A

Comparison of the Gorlin, Cannon, Angel and Balloon mitral valvuloplasty: a multicentre study, 70A

Regression of infundibular pulmonarystenosis after successful balloon pulmonary valvuloplasty in adults, 56A

Relative coronary flow reserve reflects severity more accurately than absolute flow reserve during changing aortic pressure and cardiac workload, 162A

Reverse redistribution following myocardial infarction is related to severity of coronary stenosis, 99A

Superiority of Tc-99m methoxyisobutyl isonitrile compared to thallium-201 for the tomographic assessment of coronary artery stenosis, 98A

Surgical fate of mitral regurgitation associated with severe aortic stenosis: an interpropective echo study, 72A

Use of balloon-expandable stents to treat experimental peripheral pulmonary artery and superior vena caval stenosis: preliminary experience, 119A

Use of pulmonary capillary wedge pressure to assess the severity of mitral stenosis: is a true left atrial pressure needed in these patients?, 146A

Valve resistance in aortic stenosis: an alternative method for assessing the hemodynamic significance of flow obstruction, 234A

Stents

Additional improvement in vessel lumen in the first 24 hours after stent implantation due to radial dilating force, 224A

Balloon expandable intravascular stents (BEIS) in human coronary arteries: a follow-up report, 106A

Chronic endovascular responses after stent implantation in vein grafts, 106A

Coronary spasm induced by stent implantation, 194A

Evaluation of aortic implantation and redilation of balloon expandable intravascular stents in juvenile minipigs, 223A

Implantation of 100 coronary artery stents: learning curve incidence for the acute early complications, 107A

Pathologic findings after in vivo placement of percutaneous balloon expandable tantalum stents, 224A

Restenosis within coronary stents: possible effect of previous angioplasty, 107A

Self-expanding parallel wire metallic stent, 106A

Stent implantation for the treatment of coronary artery bypass graft stenosis, 107A

Use of balloon-expandable stents to treat experimental peripheral pulmonary artery and superior vena caval stenosis: preliminary experience, 119A

Stenosis

Cytomegalovirus infection in cardiac transplant recipients predicts the incidence of allograft atherosclerosis, 213A

Influence of antihypertensive therapy on plasma hormones in cardiac transplant recipients: measurements at rest and during exercise, 81A

Linear growth in pediatric cardiac transplant recipients, 134A

Streptokinase

Defibrinogenation reduces infarct size in a canine model of acute myocardial infarction, 125A

Demonstration of viable myocardium after an acute infarction submitted to thrombolysis: comparison between positron emission tomography and dobutamine echocardiography, 192A

Early reperfusion after treatment with intravenous pro-urokinase when compared to intravenous streptokinase, 152A

Effect of thrombolysis on late potentials incidence after acute myocardial infarction, 178A

No difference in long term left ventricular function after streptokinase and tissue plasminogen activator therapy in acute myocardial infarction, 96A
Surgery, ablation

Superoxide dismutase

Sufentanil

Sulfhydryl groups

Sudden death

Stress, mental

Stress, shear

Coronary atherosclerosis impairs control of shear stress, 42A

Stroke

Risk factors for hemorrhagic and ischemic stroke in myocardial infarction patients treated with tissue plasminogen activator, 153A

Catheter modification of AV nodal conduction in drug-resistant AV nodal reentrant tachycardia (AVNRT), 176A

Catheter modification of the atrioventricular node: a potential cure for atrioventricular nodal reentrant tachycardia, 168A

Comparison of flecainide vs. procainamide in depressing retrograde conduction in atrioventricular nodal reentry tachycardia, 165A

Effect of epicardial accessory pathway ablation or endocardial dissection for AV nodal reentrant tachycardia, 232A

 Junctional tachycardia—anatomic substrate and its significance in ablative procedures, 175A

New criterion for diagnosis of sustained bundle branch reentry tachycardia, 21A

Retrograde conduction properties determine rate-dependent efficacy of diltiazem for AV reentrant tachycardia, 251A

Retrograde pathway in atrioventricular nodal tachycardia: nodal tissue or extranodal accessory pathway?, 175A

Sustained preexcited tachycardia: AV nodal rather than true antidromic reentry as the main mechanism, 204A

Tachyphylaxis

Absence of tachyphylaxis following chronic therapy with tamoxetol in heart failure, 247A

Tachyphylaxis associated with doxepamine administration in severe heart failure, 247A

Tamponade

See Cardiac tamponade

Technetium

Assessment of myocardial viability with technetium-99m methoxy isobutyl isonitrile (MIBI) and gated tomography in patients with coronary artery disease, 31A

Assessment of "no reflow" phenomenon during reperfusion with 99mTc-MIBI and 14C-deoxyglucose, 30A

Clinical comparison between thallium-201 and Tc-99m methoxy isobutyl isonitrile (MIBI) myocardial perfusion imaging for detection of coronary artery disease, 30A

Quantitative analysis of stress Tc-99m methoxy isobutyl isonitrile (MIBI) SPECT: preliminary development and validation of an optimized computerized method, 98A

Serial changes in myocardial perfusion using tomographic technetium-99m methoxy isobutyl isonitrile (Tc-MIBI) following reperfusion therapy of myocardial infarction, 30A

Superiority of Tc-99m methoxyisobutyl isonitrile compared to thallium-201 for the tomographic assessment of coronary artery stenosis, 98A

Tomographic assessment of myocardial reperfusion during acute myocardial infarction using Tc-99m methoxy isobutyl isonitrile (MIBI), 153A

Tomographic myocardial perfusion imaging with technetium-99m 2-methoxy isobutyl isonitrile (MIBI) and thallium-201: the sensitivity and reproducibility of semi-quantitative assessments of myocardial perfusion and regional systolic function, 30A

Tetrodotoxin

Preliminary biochemical characterization of the canine cardiac sodium channel, 208A

Thallium-201

See also Dipryidamole

Adenosine thallium-201 scintigraphy: feasibility, safety, and initial results in man, 161A

Characterization of patients with abnormal stress redistribution TL-201 SPECT and normal coronary arteries, 99A

Clinical comparison between thallium-201 and Tc-99m methoxy isobutyl isonitrile (MIBI) myocardial perfusion for detection of coronary artery disease, 30A

Cost-benefit advantage of primary scintigraphic evaluation after uncomplicated acute inferior wall myocardial infarction, 162A

Dipyridamole-Doppler echocardiography: comparison to thallium-201 imaging and quantitative coronary arteriography, 159A

Early post-thrombolysis assessment of necrosis and viability with rest-redistribution thallium scintigraphy: correlation with positron emission tomography (PET), 28A

Frequency of late defect reversibility in SPECT TL-201 stress redistribution studies, 28A

Insensitivity of thallium-201 imaging after oral dipyridamole for detection of reversible myocardial ischaemia, 182A

Limitations of exercise thallium single photon tomography early after myocardial infarction, 125A

Reverse redistribution following myocardial infarction is related to severity of coronary stenosis, 99A

Ribose infusion post-ischemia alters thallium-201 myocardial clearance in patients with coronary disease, 29A

Superiority of Tc-99m methoxyisobutyl isonitrile compared to thallium-201 for the tomographic assessment of coronary artery stenosis, 98A

Superiority of tomographic thallium imaging for the detection of restenosis after percutaneous transluminal coronary angioplasty, 161A

Tomographic myocardial perfusion imaging with technetium-99m 2-methoxy isobutyl isonitrile (MIBI) and thallium-201: the sensitivity and reproducibility of semi-quantitative assessments of myocardial perfusion and regional systolic function, 30A

Thrombin

Detection of intravascular thrombus by high frequency intraluminal ultrasound angiography: in vitro and in vivo studies, 5A

Detection of pulmonary artery thrombi by transesophageal echocardiography in patients with suspected pulmonary embolism, 224A

Effects of aspirin on in vitro lysis with urokinase of combined platelet and fibrin thrombi, 91A

Identification of acute experimental left ventricular thrombi using a real-time backscatter imaging system, 59A

N-acetylcysteine potentiates IV nitroglycerin in inhibiting periodic platelet thrombus formation in stenosed dog coronary arteries, 145A

Streptokinase inhibits platelet thrombus formation in stenosed dog coronary arteries: possible mechanisms, 78A

Thrombolytic therapy

women with guarded long term prognosis, 27A

Overview of bleeding risk from the TAMI trials: two agents are better than one, 198A

Percarditis in the face of thrombotic intervention denotes severe myocardial damage, 236A

Plaque: Plasminogen activator inhibitor: purification and characterization of interaction with plasminogen activators and protein C, 1A

Thrombolytic therapy in unstable angina and non-Q-wave myocardial infarction: a randomized trial of urokinase versus aspirin, 15A

Vagal stimulation

Characterization of the phasic responses to the neonatal sinus and atrioventricular node to brief vagal stimulation, 138A

Vagal tone

Effect of cholinergic agonist carbachol and cyclic guanosine monophosphate on sudden cardiac death: protection from ventricular fibrillation, 91A

Valve disease

Consistency of color flow Doppler estimation of regurgitant flow rate across varying size orifice and multiple orifice communications using flow convergence concepts: studies in an "in-vitro" model, 22A

How turbulent is a turbulent jet? An in vitro color flow Doppler study, 22A

Limitations of color Doppler in analysis of valvular regurgitation, 22A

Overestimation of regurgitant jet area by transthoracic as compared to transesophageal color Doppler, 68A

Poor prognosis for fetuses with prenatally diagnosed tricuspid valve abnormalities, 205A

Validation in physiologic pulsatile flow of a new method for noninvasive quantification of valvar regurgitation based on conservation of momentum, 73A

Valve prosthesis

Comparison of long-term hemodynamic evaluation between percutaneous mitral valvuloplasty and mitral valvular replacement for severe mitral stenosis, 19A

Does myocardial involvement in children with severe mitral regurgitation (MR) due to active rheumatic carditis (ARC) influence the outcome of mitral valve replacement (MVR), 146A

Early experience with pulmonary autograft use for aortic valve replacement in pediatric patients, 120A

Early and long-term results after mitral valvuloplasty as compared with valve replacement, 18A

Echocardiographic immediate and late failed mitral valve repair, 114A

Estimation of effective mitral tissue prosthetic area using the continuity equation, 227A

Evaluation of prosthetic valve performance by assessing the response to exercise using Doppler echocardiography, 231A

Improved Doppler assessment of normal St. Jude’s prosthetic aortic valves using the continuity equation, 51A

Is there an improvement in coronary vasodilator capacity after aortic valve replacement?, 147A

Is ultrasonic debridement of aortic stenosis a reliable alternative to valve replacement?, 123A

Long term prevention of bioprosthetic heart valve calcification: A1***'' pretreatment, 136A

Mitr al prosthetic malfunction: utility of transthoracic echocardiography, 69A

Persistence of increased diastolic stiffness late following aortic valve replacement, 148A

Pulmonic valve autograft: echocardiographic factors predicting postoperative valve prosthesis, 122A

Transthoracic echocardiographic recognition of transvalvular regurgitation in the normally functioning St. Jude valve, 210A

What is happening inside implanted homograft valve and conduit?, 124A

Valvotom y, percutaneous mitral

Percutaneous mitral valvotomy increases left atrial compliance without affecting its pressure-volume curve, 70A

Percutaneous mitral valvotomy using the double balloon technique: determinant factors of mitral regurgitation, 69A

Valvular vegetation

Prediction of risk for complications in patients with left sided infectious endocarditis, 72A

Valvuloplasty

Early and long term results after mitral valvuloplasty as compared with open commissurotomy, 55A

Early and long-term results after mitral valvuloplasty compared with valve replacement, 70A

Valvuloplasty, balloon

Advantages of Inoue-balloon (self-positioning balloon) in percutaneous transvenous mitral commissurotomy (PTMC) and aortic valve disease, 18A

Balloon aortic valvuloplasty: acute and chronic assessment of left ventricular hemodynamics and pressure-volume relationships, 54A

Balloon mitral valvuloplasty: a multicentre study, 70A

Catheter balloon valvuloplasty of necropsy stenotic valve: etiology of aortic stenosis is a major factor in early "restenosis," 16A

Clinical value of measuring atrionatriuretic factor after balloon aortic valvuloplasty, 56A

Different immediate and long term outcome after percutaneous balloon valvuloplasty for severe aortic stenosis, contingent upon the type of valve, 54A

Do hemodynamics overestimate the results of balloon mitral valvuloplasty?, 114A

Doppler-echo evaluation of aortic stenosis severity pre- and post-balloon aortic valvuloplasty, 114A

Dual balloon aortic valvuloplasty, despite augmenting acute hemodynamic improvement, fails to prevent post-valvuloplasty restenosis, 148A

Failure of balloon aortic valvuloplasty to result in sustained clinical improvement in patients with depressed left ventricular function, 17A

Follow-up balloon aortic valvuloplasty: results in 192 cases, 16A

Gradual increase in left ventricular dimension with decrease in pressure half-time of transmural flow following balloon mitral valvuloplasty, 59A

Hemodynamic results and clinical follow-up in patients undergoing repeat balloon aortic valvuloplasty, 148A

Hemodynamic results and follow-up of patients with isthmogenic aneurysm septal defect following balloon mitral valvuloplasty, 70A

Is balloon valvuloplasty beneficial in patients with calculated critical aortic stenosis but low ejection fraction and pressure gradient?, 156A

Long-term follow-up in 105 patients undergoing percutaneous balloon mitral valvuloplasty, 18A

Long-term follow-up of patients undergoing closed transvenricular mitral valve commissurotomy, 18A

Mechanical resistance in aortic stenosis: an index of functional change after valvuloplasty, 147A

New developments in aortic balloon valvuloplasty, 17A

One-two year follow-up after primarily successful valvuloplasty for calcified aortic stenosis, 16A

One-year clinical and Doppler echocardiographic follow-up of patients having double-balloon catheter balloon aortic valvuloplasty for mitral stenosis, 115A

Regression of infundibular pulmonary stenosis after successful balloon pulmonary valvuloplasty in adults, 56A

Results and follow-up of a multicenter registry for balloon mitral valvuloplasty, 70A

Second dilatation for restenosis following successful balloon aortic valvuloplasty: results, pathology and mechanism, 17A

Improved hemodynamic and left ventricular unloading during acute ischemia using the hemopump left ventricular assist device compared to intra aortic balloon counter pulsation, 160A
Venous dilatation
In the human, expression of venous ANF is independent of venous dilatation, 10A
Venous fibration
Differences in surgical outcome for ventricular tachycardia and fibrillation, 214A
Disparate effects of acute and chronic amiodarone on ventricular fibrillation threshold in dogs, 249A
Effect of cholinergic agonist carbachol and cyclic guanosine monophosphate on sudden cardiac death, 91A
Favorable outcome of patients with ventricular tachycardia or fibrillation and a normal electrophysiologic study, 20A
Optimal catheter electrode dimensions for non-thoracotomy cardioversion/defibrillation, 216A
Reperfusion associated venricular fibrillation: potentiation by left ventricular hypertrophy despite lidocaine pretreatment, 127A
Venous fibrillation waveform characteristics associated with successful defibrillation using fixed low energy DC shock, 216A
Venous filling
Abnormal Doppler left ventricular filling following acute myocardial infarction and changes during early recovery, 157A
Differential effects of right ventricular pressure and volume loading on left ventricular filling assessed by Doppler echocardiography, 196A
Doppler left ventricular filling pattern is closely related to venricular relaxation abnormalities, 197A
Effect of decreased afterload on Doppler indices of left ventricular filling in pressure overload hypertrophy, 51A
Influence of the pericardium on dynamic right and left ventricular filling, 207A
Insignificance of "load dependence" on left ventricular relaxation and filling, 220A
Mitrall opening pressure strongly influences left ventricular peak rapid filling rate, 130A
Pulsed Doppler echocardiographic mitral valve flow patterns and left ventricular chamber properties in patients with previous myocardial infarction, 209A
Venous function
Age-related changes in left ventricular performance during ischemic and normoxic exercise, 56A
Ambulatory left ventricular function monitoring: are the ejection fraction measurements reproducible?, 96A
Augmentation of myocardial function with dynamic cardiomyoplasty in a chronic canine model, 213A
Balloon aortic valvuloplasty: acute and chronic assessment of left ventricular hemodynamics and pressure-volume relationships, 54A
Comparison of effects of prolonged exercise on the right and left ventricle, 182A
Comparison of three indices of left ventricular performance derived from pressure-volume loops in conscious dogs, 86A
Coronary angioplasty in patients with severe depression of left ventricular function, 222A
Determants of improved global left ventricular function after IMA and deferred PTCA for acute MI, 92A
Determants of left ventricular size and function following mitral valve replacement, 148A
Differences in neurohumoral activation in patients with left ventricular dysfunction with and without heart failure, 246A
Does poor cardiac function preclude benefit from an automatic implantable cardioverter defibrillator, 65A
Evaluation of left ventricular function immediately after successful balloon recanalization of chronic total coronary occlusions, 229A
Failure of balloon aortic valvuloplasty to result in sustained clinical improvement in patients with depressed left ventricular function, 17A
Impact of abnormal myocardial perfusion on ventricular function in patients with unstable angina, 239A
Importance of contractility in determining left ventricular size and performance in patients with aortic regurgitation, 71A
Improvement of global and regional left ventricular function with intravenous APSAC in acute myocardial infarction. Results of a multicenter double blind trial, 26A
Initial validation of a new patient-borne miniature device for continuous monitoring of left ventricular function and ST-segment, 96A
Left ventricular function at rest and the prevalence of ambulatory silent ischemia in coronary artery disease, 203A
Left ventricular function in atrial fibrillation: a comparison before and after cardioversion, 207A
Long-term improvement of left ventricular function after myocardial infarction with and without thrombolytic therapy by late PTCA of infarct-related artery, 26A
Modulation of the fetal left ventricular function curve by the thoracic tissue, 136A
No difference in long term left ventricular function after streptokinase and tissue plasminogen activator therapy in acute myocardial infarction, 96A
Post-hyperperfusion reperfusion: orchestrated recovery from myocardial supply/demand imbalance maximizes heart function, 90A
Postoperative monitoring of regional left ventricular function in man, 80A
Preservation of ventricular performance with reduced ischemic dysfunction by intravenous nisoldipine during rapid atrial pacing, 46A

Quantitative regional curvature analysis: determination of abnormal systolic and diastolic function by assessing shape throughout the cardiac cycle, 100A

Rapid-onset pulmonary edema in patients with left ventricular systolic dysfunction: a syndrome related to right ventricular function, 179A

Right ventricular infarction decreases left ventricular compliance and performance by a pericardial mechanism, 235A

Right ventricular restrictive/constrictive physiology accompanies heart transplant rejection, 100A

Serial changes in left ventricular systolic and diastolic function following successful thrombolytic therapy of myocardial infarction: assessment by Doppler echocardiography, 157A

Sustained left ventricular function benefit one year after thrombolytic therapy, 26A

Use of Doppler echocardiography in determination of left ventricular Dp/Dt max, 60A

Ventricular infarction

Can hemodynamically significant RV infarction be identified by two-dimensional echocardiography?, 157A

Right ventricular infarction decreases left ventricular compliance and performance by a pericardial mechanism, 235A

Ventricular mass

Determinants of left ventricular size and function following mitral valve replacement, 148A

Gradual increase in left ventricular dimension with decrease in pressure half-time of transmitral flow following balloon mitral valvuloplasty, 59A

Pathological involvements of left ventricle in chronic cor pulmonale, 151A

Relationship between left ventricular mass regression and improved left ventricular filling in severe hypertension, 244A

Right ventricular mass can be accurately assessed by ultrafast computed tomography, 8A

Ventricular obstruction

Reducing left ventricular outflow tract obstruction in patients with hypertrophic cardiomyopathy by pacing-induced interventricular septal pre-excitation, 117A

Ventricular relaxation

Doppler ventricular filling pattern is closely related to ventricular relaxation abnormalities, 197A

Insignificance of "load dependence" on left ventricular relaxation and filling, 220A

Left ventricular relaxation in mitral stenosis before and after valvuloplasty, 55A

Ventricular remodeling

Concentric remodeling of the left ventricle in hypertensive patients with normal ventricular mass, 245A

Ventricular septal defect

Colour flow imaging as intra-operative angiography in ventricular septal defects—advantages and pitfalls?, 25A

Does color Doppler echocardiography detect additional small muscular defects in infants with a large ventricular septal defect, 206A

Doubly-committed subarterial ventricular septal defect: an eleven-year experience, 74A

Estimation of pulmonary pressure invetricular septal defect; Doppler and color flow application, 52A

Evaluation of ventricular septal defect complicating acute myocardial infarction: identification, localization and differentiation from mitral regurgitation by color Doppler flow imaging, 209A

New method for noninvasive estimation of ventricular septal defect (VSD) shunt flow by color Doppler: imaging of the laminar flow convergence region on the left septal surface, 205A

Quantitative evaluation of ventricular septal defects by color Doppler flow imaging, 24A

Two dimensional/color Doppler assessment of ventricular septal defects, 24A

Ventricular septal defect with aortic regurgitation: a 35 year experience, 121A

Ventricular tachyarrhythmias

Clinical evaluation of an implantable cardioverter/defibrillator with nonepicardial leads in patients with refractory ventricular tachyarrhythmias, 215A

Holter-monitoring and programmed ventricular stimulation to predict clinical outcome in patients with malignant ventricular tachyarrhythmias, 34A

Ventricular tachycardia

Absence of late potentials in patients with repetitive monomorphic and exercise-facilitated ventricular tachycardia and no apparent heart disease, 177A

Activation pattern during induction and maintenance of ventricular tachycardia in patients with coronary artery disease, 167A

Characteristics of patients requiring epicardial vs endocardial Nd:YAG laser photoablation for ventricular tachycardia, 121A

Clinical algorithm for diagnosis of sustained ventricular tachycardia, 21A

Optimal catheter electrode dimensions for non-thoracotomy cardioversion/defibrillation lead systems, 216A

Periodicity of transmural and epicardial electrograms during sinus rhythm in patients with ventricular tachycardia, 191A

Radiofrequency or direct current for ablation of ventricular tachycardia?, 176A

Relation of inducibility of ventricular arrhythmias to symptoms in patients with hypertrophic cardiomyopathy—relevance to induced polymorphic ventricular tachycardia, 19A

Role of electrophysiologic testing in patients with asymptomatic nonsustained ventricular tachycardia: relationship to ventricular function and the presence or absence of coronary artery disease, 19A

Safety, efficacy and predictive value of drug termination of ventricular tachycardia, 162A

Should the induction of nonsustained ventricular tachycardia during baseline electrophysiologic testing constitute a positive study?, 20A

Spontaneous changes in ventricular tachycardia cycle length: relevance to antitachycardia device development, 111A

Surface ECG and intracardiac findings with the onset of entrainment in a pacing model of pseudoreentry ventricular tachycardia, 185A

Sustained reentrant activation orientations around arcs of abrupt functional conduction block in the canine post-infarction heart, 128A
Termination of epinephrine-induced ventricular tachycardia by adenosine in halothane-anesthetized dogs, 249A
Time-dependent electrophysiologic changes after experimental myocardial infarction: parallel changes in inducibility of ventricular arrhythmias and the signal-averaged electrocardiogram, 22A
Transmural ventricular activation during consecutive cycles of sustained ventricular tachycardia, 167A
Use-dependent prolongation of ventricular tachycardia cycle length by type 1A and 1C drugs, 21A
Ventricular tachycardia is not the predominant cause of monitored sudden death in heart failure, 179A

Ventricular volume
Chronic reduction of left ventricular volumes at rest and exercise in patients treated with nitroglycerin following anterior MI, 25A
On important volumes in the left ventricle, 86A
Three-dimensional echocardiography: a feasible non-invasive method to measure cardiac volume, 50A

Ventricular wall motion
Echocardiographic assessment of mental stress induced wall motion abnormalities: comparison with exercise, 158A
Echocardiographic evaluation of segmental wall motion early and late after thrombolytic therapy in acute myocardial infarction, 156A
Effects of coronary revascularization on regional wall motion: an intraoperative echo study, 211A
Heterogeneity of regional motion and shape in response to altered load, 101A
Predictive value of In-111 antimyosin uptake for improvement of left ventricular wall motion after thrombolysis in acute myocardial infarction, 97A
Recovery of myocardial metabolism by PET precedes improvement of ischemic wall motion after PTCA, 28A

Ventriculography, radionuclide
Initial validation of a new patient-borne miniature device for continuous monitoring of left ventricular function and ST-segment, 96A

Ventriculotomy
Elevated right ventricular pressure increases collagen in ventriculotomy scars in canines, 118A
Late electrophysiologic sequelae of experimental right ventriculotomy with right ventricular hypertension, 170A

Verapamil
Amiodarone on suppression of barium-induced triggered automaticity and early afterrepolarizations in Purkinje fibers relative to effects of verapamil and class I agents, 249A
AV nodal reentry incorporating His bundle: verapamil sensitivity in retrograde fast pathway conduction, 173A
Beta-blockers in syndrome X, 150A
Cocaine-induced contraction of vascular smooth muscle is inhibited by calcium channel blockade, 78A
Influence of antihypertensive therapy on plasma hormones in cardiac transplantation recipients: measurements at rest and during exercise, 81A
Myocardial protection with verapamil during ischemia and reperfusion: assessment by magnetic resonance spectroscopy, 200A
Rate-dependent cellular uncoupling contributes to the conduction changes in acute ischemia and is prevented by verapamil, 127A
Regression of atherosclerosis in cholesterol fed rabbits: effects of fish oil and verapamil, 196A
Sequential pulse defibrillation in man: effects of lidocaine and verapamil, 216A
Verapamil as a potent cardioprotective agent for coronary angioplasty: first clinical experience, 154A

Vitamin E
See also Alpha tocopherol
Model for congestive heart failure: selenium and vitamin E deficient mini pigs, 208A

Warming up phenomenon
Warming up phenomenon cannot be explained by the increase in coronary flow reserve, 237A

Wolff-Parkinson-White syndrome
Age-related differences in the electrophysiologic properties of accessory pathways in patients with the Wolff-Parkinson-White syndrome, 204A
Impact of coexisting heart disease on outcome of surgery for the Wolff-Parkinson-White syndrome, 138A
Long-term followup of 109 pediatric patients treated for the Wolff-Parkinson-White syndrome, 170A
Mechanism of the onset of atrial fibrillation in the Wolff-Parkinson-White syndrome, 203A
100% specificity in localizing ventricular preexcitation in WPW syndrome with the ECG, 10A
Safety and efficacy of oral flecainide therapy in patients with the Wolff-Parkinson-White syndrome, 204A
Sustained preexcited tachycardia: AV nodal rather than true antidromic reentry as the main mechanism, 204A

Women
Cardiac transplantation for peripartum cardiomyopathy, 213A
Exercise echocardiographic detection of coronary artery disease in women, 138A

Worksite health promotion
Cardiovascular risk reduction through worksite health promotion, 134A

Xamoterol
Absence of tachyphylaxis following chronic therapy with xamoterol, 247A

Zinterol
β-adrenergic agonists in nonfailing, failing, and transplanted human hearts, 143A
