Subject Index: Volume 32

A
Abciximab
Abciximab in primary angioplasty for acute myocardial infarction improves short and medium-term outcomes, 1996
Occurrence and clinical significance of thrombocytopenia in a population undergoing high-risk percutaneous coronary revascularization, 311
Reduction in complications of angioplasty with abciximab occurs largely independently of baseline lesion morphology, 1619
Ablation procedures
Catheter ablation of atrioventricular conduction as a cure for atrial arrhythmia after orthotopic heart transplantation, 1048
Entrainment mapping and radiofrequency catheter ablation of ventricular tachycardia in right ventricular dysplasia, 724
Expanding indications for radiofrequency catheter ablation: ventricular tachycardia in association with right ventricular dysplasia (editorial comment), 729
Left atrial “stunning” following radiofrequency catheter ablation of chronic atrial flutter, 468
ACC
Results from late breaking clinical trials, 1
ACC/AHA Task Force Report
ACC/AHA Guidelines for the Management of Patients with Valvular Heart Disease: A Report of the American College of Cardiology/American Heart Association Task Force on Practice Guidelines (Committee on Management of Patients with Valvular Heart Disease), 1486
ACC Committee Report
ACC Professional Life Survey: career decisions of women and men in cardiology: a report of the Committee on Women in Cardiology, 827
ACC Expert Consensus Document
ACC Expert Consensus Statement on Coronary Artery stents: Statement of the American College of Cardiology, 1471
Present use of bedside right heart catheterization in patients with cardiac disease, 840
ACC news
ACC Committee appointments, 287
Newly elected members of the College, 1799
President’s page: ACC and the cardiovascular specialty societies: working together to promote quality cardiovascular care, 838
President’s page: International leadership in cardiovascular medicine: benefits and responsibilities, 2100
President’s page: Introducing the College’s new executive vice president, 548
President’s page: practice expense: the struggle continues, 1130
President’s page: redefining continuing medical education, 1469
Access to care
Effects of New York’s bypass surgery provider profiling on access to care and patient outcomes in the elderly, 993
Acetylcholine
Therapy with nitroglycerin increases coronary vasoconstriction in response to acetylcholine, 1969
Acute coronary syndromes
Clinical characteristics determining the mode of presentation in patients with acute coronary syndromes, 2018
Mast cell infiltration in acute coronary syndromes: implications for plaque rupture, 606
Peripheral blood levels of matrix metalloproteinases-2 and -9 are elevated in patients with acute coronary syndromes, 368
Potential impact of evidence-based medicine in acute coronary syndromes: insights from GUSTO-IIb, 2023
Role of different determinants of psychological distress in acute coronary syndromes, 613
Smooth muscle cell: sinner or saint in restenosis and the acute coronary syndromes? (editorial), 283
Stenting in acute coronary syndromes: a comparison of radial versus femoral access sites, 572
Utility of the prehospital electrocardiogram in diagnosing acute coronary syndromes: the Myocardial Infarction Triage and Intervention (MITT II) project, 17
Acute myocardial infarction
See Myocardial infarction
Adenosine
Renal circulatory effects of adenosine in patients with chronic heart failure, 211
Adult cardiology
Training programs in adult cardiology, 1137
Adventitia
Adventitial vasa vasorum in balloon injured coronary arteries: visualization and quantitation by a microscopic three-dimensional computed tomography technique, 2072
Role of adventitial vasculature in restenosis: a new view of an old problem (editorial comment), 2080
Afterload
Effects of afterload reduction on vena contracta width in mitral regurgitation, 427
AIP 201
Spontaneous redistribution after reperfusion: a unique property of AIP 201, an ultrasound contrast agent, 1765
Albumin
Microvascular injury in reperfused infarcted myocardium: noninvasive assessment with contrast-enhanced echoplanar magnetic resonance imaging, 787
ALRUNE X
Improved left ventricular endocardial border delineation and opacification with OPTISON (FS069), a new echocardiographic contrast agent: results of a phase III multicenter trial, 746
Alteplase
In vivo effects of contrast media on coronary thrombolysis, 1102
Amiodarone
Amiodarone reduces transmural heterogeneity of repolarization in the human heart, 1063
Anastomosis
Systemic venous collateral development after the bidirectional cavopulmonary anastomosis: prevalence and predictors, 502
Androgens
Vascular reactivity is impaired in genetic females taking high-dose androgens, 1331
Aneurysm
See Pseudoaneurysm
Angina pectoris
See also Acute coronary syndromes
Cardiac troponin I as a predictor of major cardiac events in emergency department patients with acute chest pain, 8
Enhanced activity of sodium-lithium cotransport in patients with cardiac syndrome X: a potential link between cardiac and metabolic syndrome X, 2031
Enhanced secretion of insulin plays a role in the development of atherosclerosis and restenosis of coronary arteries: elective percutaneous transluminal coronary angioplasty in patients with effort angina, 1624
Health outcomes associated with beta-blocker and dihydramine treatment of unstable angina, 1305
Identification of low risk patients with chest pain in the emergency department: another look at cardiac troponins (editorial comment), 15
Immune system activation follows inflammation in unstable angina: pathogenetic implications, 1295
Improvement of exercise capacity by sarpogrelate as a result of augmented collateral circulation in patients with effort angina, 1982
Inappropriate microvascular constriction produced transient ST-segment elevation in patients with syndrome X, 1287
Increased release of nitric oxide in ischemic hearts after exercise in patients with effort angina, 63
Influence of insurance type on the use of procedures, medications, and hospital outcome in patients with unstable angina: results from the GUARANTEE Registry, 387
Long-term (10-year) outcome in patients with unstable angina pectoris treated by coronary balloon angioplasty, 1603
Prognostic value of pharmacologic stress echocardiography in women with chest pain and unknown coronary artery disease, 1975
Vitamin C attenuates abnormal vasomotor reactivity in spasm coronary arteries in patients with coronary spastic angina, 103
Vitamin E administration improves impairment
of endothelium-dependent vasodilation in patients with coronary spastic angina, 1672

Angiography
Comparison of electron beam computed tomography scanning and conventional risk factor assessment for the prediction of angiographic coronary artery disease, 673
Prospective randomized trial of triage angiography in acute coronary syndromes ineligible for thrombolytic therapy; results of the Medicine Versus Angiography in Thrombolytic Exclusion (MATE) trial, 596

Angioplasty
See also Restenosis
Adventitial vasa vasmorum in balloon injured coronary arteries: visualization and quantitation by a microscopic three-dimensional computed tomography technique, 2072
Balloon angioplasty for the treatment of coronary in-stent restenosis: immediate results and 6-month angiographic recurrent restenosis rate, 980
Comparison of thrombolytic therapy and primary coronary angioplasty with liberal stenting for inferior myocardial infarction with precordial ST-segment depression: immediate and long-term results of a randomized study, 1687
Coronary interventions at a crossroads: the bifurcation stenosis, 1853
Importance in time to reperfusion for 30-day and late survival and recovery of left ventricular function after primary angioplasty for acute myocardial infarction, 1312
Influence of treatment delay on infarct size and clinical outcome in patients with acute myocardial infarction treated with primary angioplasty, 629
Long-term analysis of conventional coronary angioplasty and an initial "stent-like" result: the NHLBI PTCA Registry, 590
Long-term endothelial dysfunction is more pronounced after stenting than after balloon angioplasty in porcine coronary arteries, 1109
Long-term follow-up after direct percutaneous transluminal coronary angioplasty for acute myocardial infarction, 1320
Long-term (10-year) outcome in patients with unstable angina pectoris treated by coronary balloon angioplasty, 1603
Mechanical debulking versus balloon angioplasty for the treatment of true bifurcation lesions, 1845
Optimal coronary balloon angioplasty with provisional stenting versus primary stent (OCBAS): immediate and long-term follow-up results, 1351
Pattern of alteration in flow velocity in the recanalized artery is related to left ventricular recovery in patients with acute infarction and successful direct balloon angioplasty, 338
Reduction in complications of angioplasty with abciximab occurs largely independently of baseline lesion morphology, 1619
Remodeling after directional coronary atherectomy (with and without adjunct percutaneous transluminal coronary angioplasty): a serial angiographic and intravascular ultrasound analysis from the optimal Atherectomy Restenosis Study, 32
Rotational atherectomy for in-stent restenosis: acute and long-term results of the first 100 cases, 1358
Six-month and clinical follow-up of patients prospectively randomized to receive either tiopronin or placebo during angioplasty in the RESTORE trial, 28
Stent implantation versus balloon angioplasty in chronic coronary occlusions: results from the GISSOC trial, 90
Treatment of right ventricular infarction: thrombolytic therapy, coronary angioplasty or neither? (editorial comment), 862

Angiotensin-II
Effects of angiotensin II on expression of the gap junction channel protein connexin-43 in neonatal rat ventricular myocytes, 800

Angiotensin-converting enzyme inhibitors
Angiotensin-converting enzyme (ACE) inhibitors revert abnormal right ventricular filling in patients with restrictive left ventricular disease, 1187
Circadian activity of the endogenous fibrinolytic system in stable coronary artery disease: effects of beta-adrenoceptor blockers and angiotensin converting enzyme inhibitors, 1962
Interstitial fibrosis and angiotensin-converting enzyme inhibition in patients with end-stage myocardial infarction (letter), 552
Superiority of "triple" drug therapy in heart failure: insights from the PROVED and RADIANCE trials, 680
Triple drug therapy—what is next? (editorial comment), 693
Use of angiotensin-converting enzyme inhibitors at discharge in patients with acute myocardial infarction in the United States: data from the National Registry of Myocardial Infarction 2, 360

Angiotensin-converting enzyme insertion/deletion genotype
Endothelial cell damage and angiotensin-converting enzyme insertion/deletion genotype in elderly hypertensive patients, 444

Angiotensin receptor blockade
Infarct size reduction by AT1-receptor blockade through a signal cascade of AT1-receptor activation, bradykinin and prostaglandins in pigs, 1787

Ankylosing spondylitis
Preventive effects of carvedilol on nitrate tolerance—a randomized, double-blind, placebo-controlled comparative study between carvedilol and arotinolol, 1201

Aortic arch
Growth characteristics of the aortic arch after the Norwood operation, 1951

Aortic banding
Hypertrophic remodeling: gender differences in the early response to left ventricular pressure overload, 1118

Aortic debris
Scraping of aortic debris by coronary guiding catheters: a prospective evaluation of 1000 cases, 1861

Aortic pressure augmentation
Use of radial artery applanation tonometry and a generalized transfer function to determine aortic pressure augmentation in subjects with treated hypertension, 1214

Aortic valve disease
Aortic root disease and valve disease associated with ankylosing spondylitis, 1397
Application of the proximal flow convergence method to calculate the effective regurgitant orifice area in aortic regurgitation, 1032
Chronic i-arginine treatment increases cardiac cyclic 3'-guanosine monophosphate in rats with aortic stenosis: effects on left ventricular mass and beta-adrenergic contractile reserve, 528
Echoangiographic hemodynamic and morphometric predictors of survival after two-ventricle repair in infants with critical aortic stenosis, 237
Variation of anatomic valve area during ejection in patients with valvular aortic stenosis evaluated by two-dimensional echocardiographic planimetry: comparison with traditional Doppler data, 1931

Arginine
Does acute improvement of endothelial dysfunction in coronary artery disease improve myocardial ischemia: a double-blind comparison of parenteral D- and L-arginine, 904
Early endothelial dysfunction in adults at risk from atherosclerosis: different responses to i-arginine, 110
Restoring vascular nitric oxide formation by i-arginine improves the symptoms of intermittent claudication in patients with peripheral arterial occlusive disease, 1336

Arinolol
Preventive effects of carbidol on nitrate tolerance—a randomized, double-blind, placebo-controlled comparative study between carbidol and arotinolol, 1201

Arrhythmias
Arhythmicogenic effects induced by coronary conversion of pulmonary big endothelin to endothelin: aggravation of this phenomenon in heritable hyperlipidemia, 1773
Significant arrhythmias during pericarditis are due to concomitant heart disease (letter), 551

Arterial wall remodeling
Catheter ablation of atrial tachycardia as a cure for atrial arrhythmia after orthotopic heart transplantation, 1048
Is hospital admission for initiation of antiarrhythmic therapy with sotalol for atrial arrhythmias required? Yield of in-hospital monitoring and prediction of risk for significant arrhythmia complications, 169
Risks of initiating therapy with sotalol for treatment of atrial fibrillation? (editorial comment), 177

Arhythmias, ventricular
Effects of reperfusion on arrhythmias and death after coronary artery occlusion in the rat increased electrical stability independent of myocardial salvage, 261

Aspirin
Aspirin and newer orally active antiplatelet agents in the treatment of the post-myocardial infarction patient (editorial), 1126

Atenolol
Atenolol use and clinical outcomes after thrombolysis for acute myocardial infarction: the GUSTO-I experience, 634
Effects of therapy with nifedipine GITS or atenolol on mental stress-induced ischemic left ventricular dysfunction, 1680

Atherectomy
Adjunctive stent implantation following directional coronary atherecomy in patients with coronary artery disease, 1855
Coronary interventions at a crossroads: the bifurcation stenosis, 1853
Mechanical debulking versus balloon angioplasty for the treatment of true bifurcation lesions, 1845
Remodeling after directional coronary atherecomy (with and without adjunct percutaneous transluminal coronary angioplasty): a serial angiographic and intravascular ultrasound analysis from the optimal Atherectomy Restenosis Study, 32
Rotational atherecomy for in-stent restenosis: acute and long-term results of the first 100 cases, 1358
Serial volumetric (three-dimensional) intravascular ultrasound analysis of restenosis after directional coronary atherecomy, 1874

Atheroma
Lipoprotein(a) and inflammation in human coronary atheroma: association with the severity of clinical presentation, 2035

Atherosclerosis
Adventitial vasa vasorum in balloon injured coronary arteries: visualization and quantitation by a microscopic three-dimensional computed tomography technique, 2072
Early endothelial dysfunction in adults at risk from atherosclerosis: different responses to L-arginine, 110
Enhanced secretion of insulin plays a role in the development of atherosclerosis and restenosis of coronary arteries: elective percutaneous transluminal coronary angioplasty in patients with effort angina, 1624
HMG-CoA reductase inhibition by atorvastatin reduces neointimal inflammation in a rabbit model of atherosclerosis, 2057
Treating patients with documented atherosclerosis to National Cholesterol Education Program-recommended low-density lipoprotein cholesterol goals with atorvastatin, fluvastatin, lovastatin and simvastatin, 665
Treatment effects of serum lipoprotein lipids, apolipoproteins and low density lipoprotein particle size and relationships of lipoprotein variables in progression of coronary artery disease in the Bezafibrate Coronary Atherosclerosis Intervention Trial (BECAIT), 1648

Atria
Prevalence of sudden cardiac death during competitive sports activities in Minnesota High School athletes, 1881

Atrial fibrillation
Atorvastatin
HMG-CoA reductase inhibition by atorvastatin reduces neointimal inflammation in a rabbit model of atherosclerosis, 2057
Treating patients with documented atherosclerosis to National Cholesterol Education Program-recommended low-density lipoprotein cholesterol goals with atorvastatin, fluvastatin, lovastatin and simvastatin, 665

Atrial arrhythmias
Atrial fibrillation/flutter
Atrial fibrillation is associated with an increased risk for mortality and heart failure progression in patients with asymptomatic and symptomatic left ventricular systolic dysfunction: a retrospective analysis of the SOLVD trials, 695
Left atrial “stunning” following radiofrequency catheter ablation of chronic atrial flutter, 468
Long-term outcome with drug-refractory atrial flutter and fibrillation after single and dual site right atrial pacing for arrhythmia prevention, 1900
Predictors of primary atrial fibrillation and concomitant clinical and hemodynamic changes in patients with heart failure: a prospective study in 344 patients with baseline sinus rhythm, 197
Resolution of cardiomyopathy after ablation of atrial flutter, 205
Role of atrial electrophysiology and autonomic nervous system in patients with supraventricular tachycardia and paroxysmal atrial fibrillation, 733

B
Baroreflex function
Baroreflex function
Arterial baroreflex impairment in patients during acute coronary occlusion, 1641

Bedside care
Present use of bedside right heart catheterization in patients with cardiac disease (ACC Expert Consensus Document), 840

Beta-adrenergic blocking agents
Circadian activity of the endogenous fibrolytic system in stable coronary artery disease: effects of beta-adrenoceptor blockers and angiotensin converting enzyme inhibitors, 1962

Health outcomes associated with beta-blocker and diiltiazem treatment of unstable angina, 1305

Beta-adrenergic stimulation
Chroni c L-arginine treatment increases cardiac cyclic guanosine 5-monophosphate in rats with aortic stenosis: effects on left ventricular mass and beta-adrenergic contractile reserve, 528

Beta-receptor antagonism
Augmentation of the cardiac natriuretic peptides by beta-receptor antagonism: evidence from a population-based study, 1839

Bexafibrate
Treatment effects of serum lipoprotein lipids, apolipoproteins and low density lipoprotein particle size and relationships of lipoprotein variables in progression of coronary artery disease in the Bezafibrate Coronary Atherosclerosis Intervention Trial (BECAIT), 1648

Bifurcation
Coronary interventions at a crossroads: the bifurcation stenosis, 1853
Mechanical debulking versus balloon angioplasty
for the treatment of true bifurcation lesions, 1845

Biopsy
Antimyosin scintigraphy and immunohistologic analysis of endomyocardial biopsy in patients with clinically suspected myocarditis—evidence of myocardial cell damage and inflammation in the absence of histologic signs of myocarditis, 1371

Blood flow
See also Coronary flow reserve; Renal blood flow
Accurate noninvasive quantitation of blood flow, cross-sectional lumen vessel area and wall shear stress by three-dimensional paraboloid modeling of magnetic resonance imaging velocity data, 128
Clinical predictors of early infarct-related artery patency following thrombolytic therapy: importance of body weight, smoking history, infarct-related artery and choice of thrombolytic regimen: the GUSTO I experience, 641
Comparison of mitral inflow and superior vena cava Doppler velocities in chronic obstructive pulmonary disease and constrictive pericarditis, 2043
Coronary collateral quantitation in patients with coronary artery disease using intravascular flow velocity or pressure measurements, 1272
Determinants of Doppler Pulmonary flow components (letter), 2103
Evaluation of dynamic changes in microvascular flow during ischemia-reperfusion by myocardial contrast echocardiography, 1096
Myocardial blood flow and coronary flow reserve later after anatomical correction of transposition of the great arteries, 1955
Noninvasive assessment of coronary flow velocity and coronary flow velocity reserve in the left anterior descending coronary artery by Doppler echocardiography; comparison with invasive technique, 1251
Pattern of alteration in flow velocity in the recanalized artery is related to left ventricular recovery in patients with acute infarction and successful direct balloon angioplasty, 38
Peak negative myocardial velocity gradient in early diastole as a noninvasive indicator of left ventricular diastolic function: comparison with transmural flow velocity indices, 1418
Three-dimensional echocardiographic planimetry of maximal regurgitant orifice area in myxomatous mitral regurgitation: intraoperative comparison with proximal flow convergence, 432
Variation of anatomic valve area during ejection in patients with valvular aortic stenosis evaluated by two-dimensional echocardiographic planimetry; comparison with traditional Doppler data, 1931

Blood pressure
See also Hypertension
Coronary collateral quantitation in patients with coronary artery disease using intravascular flow velocity or pressure measurements, 1272
Coupled systolic-ventricular and vascular stiffening with age: implications for pressure regulation and cardiac reserve in the elderly, 1221

Exercise-induced abnormal blood pressure responses are related to subendocardial ischemia in hypertrophic cardiomyopathy, 1938

Body composition
Associations of body size and body composition with left ventricular mass: impacts for indexation in adults, 451

Body weight
Clinical predictors of early infarct-related artery patency following thrombolytic therapy: importance of body weight, smoking history, infarct-related artery and choice of thrombolytic regimen: the GUSTO I experience, 641

Brachial artery
Additional benefit of vitamin E supplementation to simvastatin therapy on vasoactivity of the brachial artery of hypercholesterolemic men, 711

Brdykinin
Infarct size reduction by AT1-receptor blockade through a signal cascade of AT1-receptor activation, bradykinin and prostaglandins in pigs, 1787

Brain natriuretic peptide
Expression and distribution of brain natriuretic peptide in human right atria, 1832

C
C-reactive protein
Evaluation of C-reactive protein, an inflammatory marker, and infectious serology as risk factors for coronary artery disease and myocardial infarction, 35

Calcium, calcifications
Usefulness of electron beam computed tomography scanning for distinguishing ischemic from nonischemic cardiomyopathy, 1173

Calcium channel blocking agents
See specific agent

Candesartan
Infarct size reduction by AT1-receptor blockade through a signal cascade of AT1-receptor activation, bradykinin and prostaglandins in pigs, 1787

Cardiomyopathy
See also Hypertrophy
Cardiac β-myosin heavy chain gene is not the predominant gene for hypertrophic cardiomyopathy in the Finnish population, 1709
Characteristics of wave fronts during ventricular fibrillation in human hearts with dilated cardiomyopathy: role of increased fibrosis in the generation of reentry, 187
Coronary endothelial dysfunction in patients with acute-onset idiopathic dilated cardiomyopathy, 216
Effects of partial left ventriculectomy on left ventricular performance in patients with nonischemic dilated cardiomyopathy, 1801
Exercise-induced abnormal blood pressure responses are related to subendocardial ischemia in hypertrophic cardiomyopathy, 1938
Familial dilated cardiomyopathy, 1135
Programmed ventricular stimulation for arrhythmia risk prediction in patients with idiopathic dilated cardiomyopathy and nonsustained ventricular tachycardia, 739
Resolution of cardiomyopathy after ablation of atrial flutter, 295
Role of myocardial contrast echocardiography during nonsurgical septal reduction therapy for hypertrophic obstructive cardiomyopathy, 225
Therapeutic options in patients with obstructing hypertrophic cardiomyopathy and severe drug-refractory symptoms (letter), 1485
Usefulness of electron beam computed tomography scanning for distinguishing ischemic from nonischemic cardiomyopathy, 1173

Cardiopulmonary bypass
Effect of veno-venous ultrafiltration on myocardial performance immediately after cardiac surgery in children: a prospective randomized trial, 766
Risk factors for clinically important adverse
events after propranolol administration following cardiopulmonary bypass, 1916

Cardiopulmonary resuscitation
Is CPR the Answer? (Editor's page), 546
Therapeutic CPR on consent DNR—a dilemma looking for an answer (editorial), 2095

Cardiothoracic cardiology
Training programs in cardiothoracic cardiology, 1155

Cardiovascular disease
See also Coronary artery disease
Does earthquake-induced cardiovascular disease persist or is it suppressed after the major quake (letter), 553
Specialty differences in cardiovascular prevention practices, 1283

Cardiovascular events
Effect of pravastatin on cardiovascular events in women after myocardial infarction: the Cholesterol and Recurrent Events (CARE) trial, 140

Cardioversion
“Stunning” of left atrium after spontaneous conversion of atrial fibrillation to sinus rhythm: demonstration by transesophageal Doppler techniques in a canine model, 2081

Cardioverter-defibrillator
Cardiac death and stored electrograms in patients with chronic heart failure, 1194

Cardiac sympathetic innervation in patients with idiopathic ventricular outflow tract tachycardia, 181

Cardiac teratogenicity of trichloroethylene and complex problem, 1741

Chorein cuts
Counseling families with chromosome 22q11 deletions: the catch in CATCH-22, 499

Chromosomal translocations
Posttransplant recoarctation of the aorta: a twelve year experience, 509, 509

Collagen
Interstitital fibrosis and angiotensin-converting enzyme inhibition in patients with end-stage myocardial infarction (letter), 552

Collateral vessels
Coronary collateral quantitation in patients with coronary artery disease using intravascular flow velocity or pressure measurements, 1272

Comparison of exercise capacity by sarpogrelate as a result of augmented collateral circulation in patients with effort angina, 1982

Long-term physical exercise and quantitatively assessed human coronary collateral circulation, 49

Systemic venous collateral development after the bidirectional cavopulmonary anastomosis: prevalence and predictors, 502

Computed tomography
See also Technetium-99m
Comparative prognostic value of automatic quantitative analysis versus semiquantitative visual analysis of exercise myocardial perfusion SPECT, 1987

Comparison of electron beam computed tomography scanning and conventional risk factor assessment for the prediction of angioGraphic coronary artery disease, 673

Usefulness of electron beam computed tomography scanning for distinguishing ischemic from nonischemic cardiomyopathy, 1173

Contrast agents
See also specific agent
Administration of an intravenous perfluorocarbon contrast agent improves echocardiographic determination of left ventricular volumes and ejection fraction: comparison with cine magnetic resonance imaging, 1426

Improved left ventricular endocardial border delineation and opacification with OPTISON (FS069), a new echocardiographic contrast agent: results of a phase III multicenter trial, 746

In vivo effects of contrast media on coronary thrombolysis, 1102

Phase III multicenter trial comparing the efficacy of 2% dodecafluoroether pentane emulsion (EchoGen) and sonicated 5% human albumin (Albunex) as ultrasound contrast treatment for acute myocardial infarction, 1020

Chest pain
See Angina pectoris

Cholesterol
See Hypercholesterolemia; Lipids; Lipoproteins

Chromosomes
Counseling families with chromosome 22q11 deletions: the catch in CATCH-22, 499

Frequency of 22q11 deletions in patients with conotruncal defects, 492

Chronic heart failure
Association of chronotropic incompetence with echocardiographic ischemia and prognosis, 1280

Circadian rhythm
Circadian activity of the endogenous fibrinolytic system in stable coronary artery disease: effects of beta-adrenoceptor blockers and angiotensin converting enzyme inhibitors, 1962

Claudication
Restoring vascular nitric oxide formation by l-arginine improves the symptoms of intermittent claudication in patients with peripheral arterial occlusive disease, 1336

Clinical trials
Results from late breaking clinical trials, 1

Clonidine
Hemodynamic changes induced by laparoscopy and their endocrine correlates: effects of clonidine, 1389

Clopidogrel
Aspirin and newer orally active antiplatelet agents in the treatment of the post-myocardial infarction patient (editorial), 1126

Coarctation of the aorta
Posttransplant recoarctation of the aorta: a twelve year experience, 509, 509

Collagen
Interstitial fibrosis and angiotensin-converting enzyme inhibition in patients with end-stage myocardial infarction (letter), 552

Collateral vessels
Coronary collateral quantitation in patients with coronary artery disease using intravascular flow velocity or pressure measurements, 1272

Improvement of exercise capacity by sarpogrelate as a result of augmented collateral circulation in patients with effort angina, 1982

Long-term physical exercise and quantitatively assessed human coronary collateral circulation, 49

Systemic venous collateral development after the bidirectional cavopulmonary anastomosis: prevalence and predictors, 502

Computed tomography
See also Technetium-99m
Comparative prognostic value of automatic quantitative analysis versus semiquantitative visual analysis of exercise myocardial perfusion SPECT, 1987

Comparison of electron beam computed tomography scanning and conventional risk factor assessment for the prediction of angioGraphic coronary artery disease, 673

Usefulness of electron beam computed tomography scanning for distinguishing ischemic from nonischemic cardiomyopathy, 1173

Conduction
See cardiac conduction

Congenital heart defects
See also specific defect; Surgery, pediatric

Accessory and abnormal atrioventricular valvar tissue causing outflow tract obstruction: surgical implications of a heterogenous and complex problem, 1741

Atrioventricular node fistal separation and His bundle fragmentation of the cardiac conduction system in sudden cardiac death, 1885

Cardiac teratogenicity of trichloroethylene metabolites, 540

Counseling families with chromosome 22q11 deletions: the catch in CATCH-22, 499

Determinants of Doppler Pulmonary flow components (letter), 2103

Frequency of 22q11 deletions in patients with conotruncal defects, 492

Predisposing factors of valve regurgitation in complete atrioventricular septal defect, 1449

Prevalence of congenital cardiovascular malformations in children of human immunodeficiency virus-infected women: the Prospective PC-CN HIV Multicenter study, 1749

Supraventricular tachycardia in patients with right atrial isomerism, 773

Connexin-43
Effects of angiotensin II on expression of the gap junction channel protein connexin-43 in neonatal rat ventricular myocytes, 800

Conotruncal defects
Frequency of 22q11 deletions in patients with conotruncal defects, 492

Continuity equation
Use of the continuity equation for transesophageal Doppler assessment of severity of proximal left coronary artery stenosis: a quantitative coronary angiographic validation study, 42

Contractile function
Early changes in myocardial perfusion patterns after myocardial infarction: relation with contractile reserve and functional recovery, 2011

Effect of veno-venous ultrafiltration on myocardial performance immediately after cardiac surgery in children: a prospective randomized trial, 766

Expression, activity and functional significance of inducible nitric oxide synthase in the failing human heart, 955

Inducible nitric oxide synthase in skeletal muscle of patients with chronic heart failure, 964

Contrast agents
See also specific agent

Administration of an intravenous perfluorocarbon contrast agent improves echocardiographic determination of left ventricular volumes and ejection fraction: comparison with cine magnetic resonance imaging, 1426

Improved left ventricular endocardial border delineation and opacification with OPTISON (FS069), a new echocardiographic contrast agent: results of a phase III multicenter trial, 746

In vivo effects of contrast media on coronary thrombolysis, 1102

Phase III multicenter trial comparing the efficacy of 2% dodecafluoroether pentane emulsion (EchoGen) and sonicated 5% human albumin (Albunex) as ultrasound contrast treatment for acute myocardial infarction, 1020
Coronary artery disease

See also Cardiovascular disease: Stenosis

Adjunctive stent implantation following directional coronary athrectomy in patients with coronary artery disease, 1855

Circadian activity of the endogenous fibrinolytic system in stable coronary artery disease: effects of beta-adrenoceptor blockers and angiotensin converting enzyme inhibitors, 1962

Common mutation in the methylenetetrahydrofolate reductase gene and risk of coronary heart disease: results among U.S. men, 353

Comparison of electron beam computed tomography scanning and conventional risk factor assessment for the prediction of angiographic coronary artery disease, 673

Coronary collateral quantitation in patients with coronary artery disease using intravascular flow velocity or pressure measurements, 1272

Dobutamine stress echocardiography for assessing coronary artery disease after transplantation in children, 515

Does acute improvement of endothelial dysfunction in coronary artery disease improve myocardial ischemia: a double-blind comparison of parenteral D- and L-arginine, 904

Effect of hormone replacement therapy alone and in combination with simvastatin on plasma lipids of hypercholesterolemic postmenopausal women with coronary artery disease, 1244

Efficacy of augmented immunosuppressive therapy for early vasculopathy in heart transplantation, 423

Evaluation of C-reactive protein, an inflammatory marker, and infectious serology as risk factors for coronary artery disease and myocardial infarction, 35

Lipoprotein (a): an important risk factor in coronary artery disease (letter), 1132

Myocardial viability during dobutamine stress echocardiography: Clinical predictors of early infarct-related artery patency following thrombolytic therapy: importance of body weight, smoking history, infarct-related artery and choice of thrombolytic regimen: the GUSTO I experience, 641

Coronary artery size

Artery size, neointima, and remodeling: time for some standards (editorial comment), 2087

Coronary flow reserve

Early impairment of coronary flow reserve in young men with borderline hypertension, 147

Myocardial blood flow and coronary flow reserve later after anatomical correction of transposition of the great arteries, 1955

Restricted coronary flow reserve in patients with mitral regurgitation improves after mitral reconstruction surgery, 1923

Coronary occlusion

Arterial baroreflex impairment in patients during acute coronary occlusion, 1641

Stent implantation versus balloon angioplasty in chronic coronary occlusion: results from the GISSOC trial, 90

Sustained benefit of stenting chronic coronary occlusion: long-term clinical follow-up of the Stenting in Chronic Coronary Occlusion (SICCO) study, 305

Coronary perfusion

Accuracy and feasibility of contrast echocardiography for detection of perfusion defects in routine practice: comparison with wall motion and technetium-99m sestamibi single-photon emission computed tomography, 1260

Early changes in myocardial perfusion patterns after myocardial infarction: relation with contractile reserve and functional recovery, 2011

Coronary reperfusion

See also Ischemia-reperfusion

Distinction between coronary and myocardial reperfusion after thrombolytic therapy by clinical markers of reperfusion, 1326

Effects of reperfusion on arrhythmias and death after coronary artery occlusion in the rat increased electrical stability independent of myocardial salvage, 261

Importance in time to reperfusion for 30-day and late survival and recovery of left ventricular function after primary angioplasty for acute myocardial infarction, 1312

Microvascular injury in reperfused infarcted myocardium: noninvasive assessment with contrast-enhanced echoplanar magnetic resonance imaging, 787

Pattern of alteration in flow velocity in the recanalized artery is related to left ventricular recovery in patients with acute infarction and successful direct balloon angioplasty, 338

Prediction of short- and long-term prognosis of patients with acute myocardial infarction using myocardial contrast echocardiography one day after recanalization, 890

Lipoprotein(a) and inflammation in human coronary atheroma: association with the severity of clinical presentation, 2035
Treatment effects of serum lipoprotein lipids, apolipoproteins and low density lipoprotein particle size and relationships of lipoprotein variables in progression of coronary artery disease in the Bezafibrate Coronary Atherosclerosis Intervention Trial (BECAIT), 1648

Lithium
Enhanced activity of sodium-lithium cotransport in patients with cardiac syndrome X: a potential link between cardiac and metabolic syndrome X, 2031

Long QT syndrome
See QT interval

Lovastatin
Treating patients with documented atherosclerosis to National Cholesterol Education Program-recommended low-density lipoprotein cholesterol goals with atorvastatin, fluvastatin, lovastatin and simvastatin, 665

Lumen
Accurate noninvasive quantitation of blood flow, cross-sectional lumen vessel area and wall shear stress by three-dimensional paraboloid modeling of magnetic resonance imaging velocity data, 128
Relation of arterial geometry to luminal narrowing and histologic markers for plaque vulnerability: the remodeling paradox, 655

M
Magnesium
Magnesium reduces free radicals in an in vivo coronary occlusion-reperfusion model, 536

Magnetic resonance imaging
Accurate noninvasive quantitation of blood flow, cross-sectional lumen vessel area and wall shear stress by three-dimensional paraboloid modeling of magnetic resonance imaging velocity data, 128
Administration of an intravenous perfluorocarbon contrast agent improves echocardiographic determination of left ventricular volumes and ejection fraction: comparison with cine magnetic resonance imaging, 1426
New real time interactive cardiac magnetic resonance imaging system complements echocardiography, 2049
Quantitation and time course of microvascular obstruction by contrast-enhanced echocardiography and magnetic resonance imaging following acute myocardial infarction and reperfusion, 1757

Managed care
Influence of insurance type on the use of procedures, medications, and hospital outcome in patients with unstable angina: results from the GUARANTEE Registry, 387

Manuscripts
To publish or not to publish: that is the question (Editor’s page), 1468

Mapping procedures
Entrainment mapping and radiofrequency catheter ablation of ventricular tachycardia in right ventricular dysplasia, 724

Mast cells
Mast cell infiltration in acute coronary syndromes: implications for plaque rupture, 606

Matrix metalloproteases
Peripheral blood levels of matrix metalloproteases-2 and -9 are elevated in syndromes: implications for plaque rupture, 387

Men
See also Gender issues
Early impairment of coronary flow reserve in young men with borderline hypertension, 147

Mental stress
See Stress, mental

Methylenetetrahydrofolate reductase gene
Common mutation in the methylenetetrahydrofolate reductase gene and risk of coronary heart disease: results among U.S. men, 553

Mibebradil
Effects of mibebradil, a novel calcium channel blocking agent with T-type activity, on acute experimental myocardial ischemia; maintenance of ventricular fibrillation threshold without inotropic compromise, 268

Microbubbles
Basis for detection of stenosis using venous administration of microbubbles during myocardial contrast echocardiography: bolus or continuous infusion?, 252

Microvascular injury
Assessment of “microvascular non-reflow phenomenon” using technetium-99m macroaggregated albumin scintigraphy in patients with acute myocardial infarction, 898
Microvascular injury in reperfused infarcted myocardium: noninvasive assessment with contrast-enhanced echocardiographic imaging, 787

Microvascular integrity
Prediction of short- and long-term prognosis of patients with acute myocardial infarction using myocardial contrast echocardiography one day after recanalization, 890

Microvascular obstruction
Quantitation and time course of microvascular obstruction by contrast-enhanced echocardiography and magnetic resonance imaging following acute myocardial infarction and reperfusion, 1757

Mitral valve
Comparison of mitral inflow and superior vena cava Doppler velocities in chronic obstructive pulmonary disease and constrictive pericarditis, 2043

Mitral valve disease
Effects of afterload reduction on vena contracta width in mitral regurgitation, 427
Effects of balloon mitral valvuloplasty on left atrial function in mitral stenosis as assessed by pressure-area relation, 159
Mechanism of decrease in dynamic mitral regurgitation during heart failure treatment: importance of reduction in regurgitant orifice size, 1819
Quantitation of mitral regurgitation by automated cardiac output measurement: experimental and clinical validation, 1074
Restricted coronary flow reserve in patients with mitral regurgitation improves after mitral reconstruction surgery, 1923
Restricted diastolic opening of the mitral leaflet in patients with left ventricular dysfunction: evidence for increased valve tethering, 398
Three-dimensional echocardiographic planimetry of maximal regurgitant orifice area in myxomatous mitral regurgitation: intraoperative comparison with proximal flow convergence, 432
Utility of three-dimensional echocardiography during balloon mitral valvuloplasty, 1405

Mortality rates
See also Survival rates
Atrial fibrillation is associated with an increased risk for mortality and heart failure progression in patients with asymptomatic and symptomatic left ventricular systolic dysfunction: a retrospective analysis of the SOLVD trials, 695
Cardiac death and stored electrolyms in
patients with third-generation implantable cardioverter-defibrillators, 1056

Effects of reperfusion on arrhythmias and death after coronary artery occlusion in the rat increased electrical stability independent of myocardial salvage, 261

Gender differences in use of stress testing and coronary heart disease mortality: a population-based study in Olmstead County, Minnesota, 545

How do we know how well we are doing? (editorial comment) 1000

Patients treated by cardiologists have a lower in-hospital mortality for acute myocardial infarction, 885

Prevalence and significance of nonsustained ventricular tachycardia in patients with premature ventricular contractions and heart failure treated with vasodilator therapy, 942

Prognostic value of congestive heart failure history in patients undergoing percutaneous coronary interventions, 936

Prognostic value of ischemic electrocardiographic findings for cardiovascular mortality in men and women, 680

Murmurs

Increased intraventricular velocities: an unrecognized cause of systolic murmur in adults, 1589

Systolic ejection murmurs in the era of modern cardiology: what do we really know? (editorial review) 1596

Myocardial disease

Clinical characteristics of sudden death victims in heritable (chromosome 1p1-1q1) conduction and myocardial disease, 1717

Myocardial function

Human SERCA2a levels correlate inversely with age in senescent human myocardium, 458

Myocardial infarction

See Infarction

Myocardial infarction

Stress testing
Association of chronotropic incompetence with echocardiographic ischemia and prognosis, 1280
Attenuation of myocardial ischemia with repeated exercise in subjects with chronic stable angina: relation to myocardial contractility, intensity of exercise and the adenosine phosphate-sensitive potassium channel, 1665
Comparative prognostic value of automatic quantitative analysis versus semiquantitative visual analysis of exercise myocardial perfusion SPECT, 1987
Concerning the Fontan patient’s excessive minute ventilation during exercise (letter), 1132
Exercise testing in asymptomatic patients after coronary artery bypass graft surgery (letter), 1483
Exercise-induced abnormal blood pressure responses are related to subendocardial ischemia in hypertrophic cardiomyopathy, 1938
Functional assessment of coronary stenosis (letter), 1134
Gender differences in use of stress testing and coronary heart disease mortality: a population-based study in Olmstead County, Minnesota, 345
Improvement of exercise capacity by sarpogrelate as a result of augmented collateral circulation in patients with effort angina, 1982
Increased release of nitric oxide in ischemic hearts after exercise in patients with effort angina, 63
Prognostic value of pharmacologic stress echocardiography in women with chest pain and unknown coronary artery disease, 1975
T wave normalization in infarct-related electrocardiographic leads during exercise testing for detection of residual viability: comparison with positron emission tomography, 75
Value of cardiopulmonary exercise testing and big endothelin plasma levels to predict short-term prognosis of patients with chronic heart failure, 1065
Value of exercise treadmill testing in women, 1657
Value of pharmacologic stress echocardiography in risk stratification of patients with single-vessel disease: a report from the Echo-Persantine and Echo-Dobutamine International Cooperative studies, 69

Stroke volume
Left ventricular diastolic function in infants, children, and adolescents. Reference values and analysis of morphologic and physiologic determinants of echocardiographic Doppler flow signals during growth and maturation, 1441

Stunning
Left atrial “stunning” following radiofrequency catheter ablation of chronic atrial flutter, 468
“Stunning” of left atrium after spontaneous conversion of atrial fibrillation to sinus rhythm: demonstration by transesophageal Doppler techniques in a canine model, 2081

Sudden death
Atrioventricular node fetal dispersion and His bundle fragmentation of the cardiac conduction system in sudden cardiac death, 1885
Clinical characteristics of sudden death victims in heritable (chromosome 1p1-1q1) conduction and myocardial disease, 1717
Increased left ventricular mass and hypertrophy are associated with increased risk for sudden death, 1454
Left ventricular hypertrophy and sudden death (editorial comment), 1460
Population-based prospective evaluation of risk of sudden death after operation for common congenital heart defects, 245
Predisposing factors of valve regurgitation in complete atrioventricular septal defect, 1449
Systemic venous collateral development after the bidirectional cavo pulmonary anastomosis: prevalence and predictors, 502

Surgery, valve
See also Valvotomy; Valvuloplasty
Mechanisms of hemolysis after mitral valve repair: assessment by serial echocardiography, 717
Tricuspid valve surgery and intraoperative echocardiography: factors meeting survival, clinical outcome, and echocardiographic success, 1023

Survival rates
See also Mortality rates
Myocardial viability during dobutamine echocardiography predicts survival in patients with coronary artery disease and severe left ventricular systolic dysfunction, 921
Right ventricular ejection fraction is an independent predictor of survival in patients with moderate heart failure, 648

Sympathetic nervous system
Comparison of effects of enalapril and nitrendipine on cardiac sympathetic nervous system in essential hypertension, 436

Syndrome X
See Angina pectoris

Systolic function
Atrial fibrillation is associated with an increased risk for mortality and heart failure: progression in patients with asymptomatic and symptomatic left ventricular systolic dysfunction: a retrospective analysis of the SOLVD trials, 695
Coronary endothelial dysfunction in patients with acute-onset idiopathic dilated cardiomyopathy, 216
Coupled systolic-ventricular and vascular stiffening with age: implications for pressure regulation and cardiac reserve in the elderly, 1221
Effect of myocardial hypertrophy on systolic and diastolic function in children: insights from the force-frequency and relaxation-frequency relationship, 1088
Effects of critical coronary stenosis on global systolic left ventricular function quantified
Clinical predictors of early infarct-related artery patency following thrombolytic therapy: importance of body weight, smoking history, infarct-related artery and choice of thrombolytic regimen: the GUSTO I experience, 641

Combining thrombolyis with the plasma glycoprotein IIb/IIIa inhibitor laminitan: results of the Platelet Aggregation Receptor Antagonist Dose Investigation and Repereusion Gain in Myocardial Infarction (PARADIGM) trial: the PARADIGM Investigators, 2003

Distinction between coronary and myocardial reperfusion after thrombolytic therapy by clinical markers of reperfusion, 1326

Effects of thrombolytic therapy in acute inferior myocardial infarction with or without right ventricular involvement, 876

Guidelines for thrombolytic therapy (letter), 550

In vivo effects of contrast media on coronary thrombolysis, 1102

Prognostic value of myocardial viability and ischemia detected by dobutamine stress echocardiography early after acute myocardial infarction treated with thrombolysis, 380

Treatment of right ventricular infarction: thrombolytic therapy, coronary angioplasty or neither? (editorial comment), 862

Tiludipine
Aspirin and newer orally active antiplatelet agents in the treatment of the post-myocardial infarction patient (editorial), 1126

Duration of pretreatment with ticlopidine prior to stenting is associated with the risk of procedure-related non-Q-wave myocardial infarctions, 1366

Time factors
Importance in time to reperfusion for 30-day and late survival and recovery of left ventricular function after primary angioplasty for acute myocardial infarction, 1312

Influence of treatment delay on infarct size and clinical outcome in patients with acute myocardial infarction treated with primary angioplasty, 629

Relevance of delayed hospital admission on development of cardiac rupture during acute myocardial infarction: study in 225 patients with free wall, septal or papillary muscle rupture, 135

Time dependence of left ventricular recovery after delayed recanalization of an occluded infarct-related coronary artery: findings of a pilot study, 97

Tirofiban
Six-month and clinical follow-up of patients prospectively randomized to receive either tirofiban or placebo during angioplasty in the RESTORE trial, 28

Tissue-type plasminogen activator
See Plasminogen activator

Triacylglycerol
Amiodarone reduces transmural heterogeneity of repolarization in the human heart, 1063

Transthoracic echocardiography
Use of radial artery application tonometry and a generalized transfer function to determine aortic pressure augmentation in subjects with treated hypertension, 1214

Torsade de pointes
Amiodarone reduces transmural heterogeneity of repolarization in the human heart, 1063

Transfer function
Use of radial artery application tonometry and a generalized transfer function to determine aortic pressure augmentation in subjects with treated hypertension, 1214

Transplantation
See Heart transplantation

Tomography
See also Computed tomography; Fluorine-18 fluorodeoxyglucose

Assessment of myocardial viability by dobutamine echocardiography, positron emission tomography and thallum-201 SPECT: correlation with histopathology in explanted hearts, 1701

T wave normalization in infarct-related electrocardiographic leads during exercise testing for detection of residual viability: comparison with positron emission tomography, 75

Tonometry
Use of radial artery application tonometry and a generalized transfer function to determine aortic pressure augmentation in subjects with treated hypertension, 1214

Tricuspid valve disease
Tricuspid valve surgery and intraoperative echocardiography: factors meeting survival, clinical outcome, and echocardiographic success, 1023

Tricyclic antidepressants
Cardiac teratogenicity of tricyclic antidepressants, 540

Trichloroethylene metabolites
Cardiac teratogenicity of trichloroethylene metabolites, 540

Troponin I
Cardiac troponin I as a predictor of major cardiac events in emergency department patients with acute chest pain, 8

Troponin T
Elevated serum concentrations of cardiac troponin T in acute allograft rejection after human heart transplantation, 405
Tumor necrosis factor
Denopamine, a β1-adrenergic agonist, prolongs survival in a murine model of congestive heart failure induced by viral myocarditis: suppression of tumor necrosis factor-α production in the heart, 808

Tyrosine kinase inhibitor
Intravenous delivery of a specific tyrosine kinase inhibitor with biodegradable stent suppresses the restenosis changes in the coronary artery in pigs in vivo, 780

V

Valve prosthesis
Differentiating thrombus from pannus formation in obstructed mechanical prosthetic valves: an evaluation of clinical, transthoracic, and transesophageal echocardiographic parameters, 1410
Echocardiographic and biochemical evaluation of the development and progression of carcinoid heart disease, 1017
Predopposing factors of valve regurgitation in complete atrioventricular septal defect, 1449

Valve disease
Differentiating thrombus from pannus formation in obstructed mechanical prosthetic valves: an evaluation of clinical, transthoracic, and transesophageal echocardiographic parameters, 1410
Guidelines for thrombolytic therapy (letter), 550

Ventricular dysplasia
Entrainment mapping and radiofrequency catheter ablation of ventricular tachycardia in right ventricular dysplasia, 724
Expanding indications for radiofrequency catheter ablation: ventricular tachycardia in association with right ventricular dysplasia (editorial comment), 729

Ventricular fibrillation
Characteristics of wave fronts during ventricular fibrillation in human hearts with dilated cardiomyopathy: role of increased fibrosis in the generation of reentry, 187
Effects of mibebradil, a novel calcium channel blocking agent with T-type activity, on acute experimental myocardial ischemia; maintenance of ventricular fibrillation threshold without inotropic compromise, 268
Effects of ventricular fibrillation duration and site of initiation on the defibrillation threshold during early ventricular fibrillation, 521
Ventricular tachycardia during follow-up in patients resuscitated from ventricular fibrillation: experience from stored electrograms of implantable cardioverter-defibrillators, 1724

Ventricular filling
Angiotensin-converting enzyme (ACE) inhibitors revert abnormal right ventricular filling in patients with restrictive left ventricular disease, 1187

Ventricular function
See also systolic function
Effects of partial left ventriculectomy on left ventricular performance in patients with nonischemic dilated cardiomyopathy, 1801
Effects of therapy with nifedipine GITS or atenolol on mental stress-induced ischemic left ventricular dysfunction, 1680
Importance in time to reperfusion for 30-day and late survival and recovery of left ventricular function after primary angioplasty for acute myocardial infarction, 1312
Pattern of alteration in flow velocity in the recanalized artery is related to left ventricular recovery in patients with acute infarction and successful direct balloon angioplasty, 338
Prognostic value of the amount of dysfunctional but viable myocardium in revascularized patients with coronary artery disease and left ventricular dysfunction, 912
Restricted diastolic opening of the mitral leaflet in patients with left ventricular dysfunction: evidence for increased valve tethering, 398
Significance of rest technetium-99m sestamibi imaging for the prediction of improvement of left ventricular dysfunction after Q wave myocardial infarction: importance of infarct location adjusted thresholds, 648
Time dependence of left ventricular recovery after delayed recanalization of an occluded infarct-related coronary artery: findings of a pilot study, 97

Ventricular mass
Associations of body size and body composition with left ventricular mass: impacts for indexation in adults, 451
Increased left ventricular mass and hypertrophy are associated with increased risk for sudden death, 1454

Vasodilation
Therapy with nitroglycerin increases coronary vasodilation in response to acetylcholine, 1969

Vascular stiffening
Impact of intravascular ultrasound guidance in stent deployment on 6-month restenosis rate: a multicenter, randomized study comparing two strategies—with and without intravascular ultrasound guidance, 320
Serial volumetric (three-dimensional) intravascular ultrasound analysis of restenosis after directional atherectomy, 1874
Validation of the in vivo intravascular ultrasound measurement of in-stent neointimal hyperplasia volumes, 794

Ventricular mass
Associations of body size and body composition with left ventricular mass: impacts for indexation in adults, 451
Increased left ventricular mass and hypertrophy are associated with increased risk for sudden death, 1454

Ventricular tachycardia
During follow-up in patients with coronary spastic angina, 1672

Ventricular fibrillation
Characteristics of wave fronts during ventricular fibrillation in human hearts with dilated cardiomyopathy: role of increased fibrosis in the generation of reentry, 187
Effects of mibebradil, a novel calcium channel blocking agent with T-type activity, on acute experimental myocardial ischemia; maintenance of ventricular fibrillation threshold without inotropic compromise, 268
Effects of ventricular fibrillation duration and site of initiation on the defibrillation threshold during early ventricular fibrillation, 521
Ventricular tachycardia during follow-up in patients resuscitated from ventricular fibrillation: experience from stored electrograms of implantable cardioverter-defibrillators, 1724

Ventricular filling
Angiotensin-converting enzyme (ACE) inhibitors revert abnormal right ventricular filling in patients with restrictive left ventricular disease, 1187

Ventricular function
See also systolic function
Effects of partial left ventriculectomy on left ventricular performance in patients with nonischemic dilated cardiomyopathy, 1801
Effects of therapy with nifedipine GITS or atenolol on mental stress-induced ischemic left ventricular dysfunction, 1680
Importance in time to reperfusion for 30-day and late survival and recovery of left ventricular function after primary angioplasty for acute myocardial infarction, 1312
Pattern of alteration in flow velocity in the recanalized artery is related to left ventricular recovery in patients with acute infarction and successful direct balloon angioplasty, 338
Prognostic value of the amount of dysfunctional but viable myocardium in revascularized patients with coronary artery disease and left ventricular dysfunction, 912
Restricted diastolic opening of the mitral leaflet in patients with left ventricular dysfunction: evidence for increased valve tethering, 398
Significance of rest technetium-99m sestamibi imaging for the prediction of improvement of left ventricular dysfunction after Q wave myocardial infarction: importance of infarct location adjusted thresholds, 648
Time dependence of left ventricular recovery after delayed recanalization of an occluded infarct-related coronary artery: findings of a pilot study, 97

Ventricular mass
Associations of body size and body composition with left ventricular mass: impacts for indexation in adults, 451
Increased left ventricular mass and hypertrophy are associated with increased risk for sudden death, 1454
Ventricular pressure
Hypertrophic remodeling: gender differences in the early response to left ventricular pressure overload, 1118

Ventricular tachycardia
Autonomic nervous system activity and the spontaneous initiation of ventricular tachycardia, 1891
Cardiac sympathetic innervation in patients with idiopathic ventricular outflow tract tachycardia, 181
Effects of nicorandil, a potassium channel opener, on idiopathic ventricular tachycardia, 1377
Entrainment mapping and radiofrequency catheter ablation of ventricular tachycardia in right ventricular dysplasia, 724
Expanding indications for radiofrequency catheter ablation: ventricular tachycardia in association with right ventricular dysplasia (editorial comment), 729
Prevalence and significance of nonsustained ventricular tachycardia in patients with premature ventricular contractions and heart failure treated with vasodilator therapy, 942
Programmed ventricular stimulation for arrhythmia risk prediction in patients with idiopathic dilated cardiomyopathy and nonsustained ventricular tachycardia, 739
Role of atrial electrophysiology and autonomic nervous system in patients with supraventricular tachycardia and paroxysmal atrial fibrillation, 733
Supraventricular tachycardia in patients with right atrial isomerism, 773
Ventricular tachycardia during follow-up in patients resuscitated from ventricular fibrillation: experience from stored electrograms of implantable cardioverter-defibrillators, 1724

Ventricular volume
Administration of an intravenous perfluorocarbon contrast agent improves echocardiographic determination of left ventricular volumes and ejection fraction: comparison with cine magnetic resonance imaging, 1426
Current role of less ventricular reduction for treatment of heart failure (editorial comment), 1809

Ventricular wall stress
Accurate noninvasive quantitation of blood flow, cross-sectional lumen vessel area and wall shear stress by three-dimensional paraboloid modeling of magnetic resonance imaging velocity data, 126

Ventriculectomy
Effects of partial left ventriculectomy on left ventricular performance in patients with nonischemic dilated cardiomyopathy, 1801

Verapamil
Effects of mibefradil, a novel calcium channel blocking agent with T-type activity, on acute experimental myocardial ischemia; maintenance of ventricular fibrillation threshold without inotropic compromise, 268
Rationale and design of the International Verapamil SR/Trandolapril Study (INVEST): an Internet-based randomized trial in coronary artery disease patients with hypertension, 1228

Viability
See Myocardial viability

Vitamin C
Vitamin C attenuates abnormal vasomotor reactivity in spasm coronary arteries in patients with coronary spastic angina, 103

Vitamin E
Additional benefit of vitamin E supplementation to simvastatin therapy on vasoreactivity of the brachial artery of hypercholesterolemic men, 711
Vitamin E administration improves impairment of endothelium-dependent vasodilation in patients with coronary spastic angina, 1672

W
Weight
See Body weight

Women
See also Gender issues
ACC Professional Life Survey: career decisions of women and men in cardiology: a report of the Committee on Women in Cardiology, 827
Effect of hormone replacement therapy alone and in combination with simvastatin on plasma lipids of hypercholesterolemic postmenopausal women with coronary artery disease, 1244
Effect of pravastatin on cardiovascular events in women after myocardial infarction: the Cholesterol and Recurrent Events (CARE) trial, 140
Prognostic value of pharmacologic stress echocardiography in women with chest pain and unknown coronary artery disease, 1975
Value of exercise treadmill testing in women, 1657
