Equation 4 should read as follows:

\[ K_a = \frac{a_{\text{SOD-site}}}{a_{\text{site} \cdot a_{\text{SOD}}}} = \frac{K_a}{\gamma_{\text{site}} \gamma_{\text{SOD}}} . \]  

\[ (4) \]

The last sentence of the Abstract should read:

Despite the smaller number of required SNAREs, the SNARE activation and fusion rates are almost as fast as previously reported in reconstituted PC/cholesterol bilayers, i.e., ~10 and ~20 ms, respectively.

The sentence carrying over from the bottom left column to the top right column of page 2936 should read:

For example, Lang et al. (10) and Sieber et al. (11) showed that Syx1a forms cholesterol-dependent clusters of ~75 molecules in plasma membranes of neuroendocrine pheochromocytoma 12 (PC12) cells.

Two errors were introduced in these sentences during production of the article.
