Papers to appear in forthcoming issues

Narayan Vikas. Computational complexity of compaction to irreflexive cycles

Wojciech Palacz. Algebraic hierarchical graph transformation

P. Kuusela and D. Ocone. Learning with side information: PAC learning bounds

Etienne Grandjean and Frédéric Olive. Graph properties checkable in linear time in the number of vertices

Hung-Min Sun, Bing-Chang Chen and Her-Tyan Yeh. On the design of time-stamped signatures

Frank Drewes and Joost Engelfriet. Branching synchronization grammars with nested tables

Christopher M. Homan. Tight lower bounds on the ambiguity of strong, total, associative, one-way functions
