Subject Index

A
Abdominal aortic aneurysm; see Aortic aneurysm, abdominal
Abdominal fat
Intra-abdominal fat and metabolic syndrome are associated with larger infrarenal aortic diameters in patients with clinically evident arterial disease (Gorter et al). 2008;48:114-20
Abdominal injuries
Early Palma procedure after iliac vein injury in abdominal penetrating trauma (Alcocer et al). 2008;48:745-8 (Case rep.)
Ablation techniques
The importance of deep venous reflux velocity as a determinant of outcome in patients with combined superficial and deep venous reflux treated with endovenous saphenous ablation (Marston et al). 2008;48:400-6
Abstracts
Activities of daily living
Corridor-based functional performance measures correlate better with physical activity during daily life than treadmill measures in persons with peripheral arterial disease (McDermott et al). 2008;48:1231-7
Acute disease
Endovascular vs open repair of acute abdominal aortic aneurysms—A systematic review and meta-analysis (Sadat et al). 2008;48:227-36 (Review)
Adenoviridae
Aged
Regarding “Radiocephalic and brachiocephalic arteriovenous fistula outcomes in the elderly” (Lazarides et al) (Letter); (Weale) (Reply). 2008;48:251-2
Airway obstruction
Traumatic dissection and rupture of the abdominal aorta as a complication of the Heimlich maneuver (Desai et al). 2008;48:1325-7 (Case rep.)
Alloys
Amputation
Incidence of ipsilateral postoperative deep venous thrombosis in the amputated lower extremity of patients with peripheral obstructive arterial disease (Matielo et al). 2008;48:1514-9
Risk stratification in critical limb ischemia: derivation and validation of a model to predict amputation-free survival using multicenter surgical outcomes data (Schanzer et al). 2008; 48:1464-71
Substitution of smokeless tobacco for cigarettes in Buerger’s disease does not prevent limb loss (Lawrence et al). 2008; 48:210-12 (Case rep.)
Through-knee amputation in patients with peripheral arterial disease: a review of 50 cases (Morse et al). 2008;48:638-643
Anesthesia, local
Carotid endarterectomy under local anesthesia may be the treatment of choice for symptomatic carotid artery stenosis (Paraskevas) (Letter). 2008;48:256-7
Aneurysm
A hybrid approach using a composite endovascular and open graft procedure for a symptomatic common femoral aneurysm extending well above the inguinal ligament (Bakoyiannis et al). 2008;48:461-4 (Case rep.)
Aneurysmal dilatation of the great saphenous vein stump after endovenous laser ablation (Edison et al). 2008;48:1037-9 (Case rep.)
Endovenous stent-assisted coil embolization for a symptomatic femoral vein aneurysm (Ross et al). 2008;48:1032-6 (Case rep.)
Fatal pulmonary embolus associated with asymptomatic popliteal venous aneurysm (Cox et al). 2008;48:1040
Hypoplasia and fibromuscular dysplasia of infrarenal abdominal aorta with downstream aneurysm: case report and review of the literature (Odero et al). 2008;48:1589-92 (Case rep.)
Metalloproteinase expression in venous aneurysms (Irwin et al). 2008;48:1278-85
Renal artery saccular aneurysm (Park et al). 2008;48:226
Repair of complex renal artery aneurysms by laparoscopic nephrectomy with ex vivo repair and autotransplantation (Gallagher et al). 2008;48:1408-13
Thrombosed iliac venous aneurysm: a rare form of presentation of a congenital anomaly of the inferior vena cava (Ysa et al). 2008;48:218-22 (Case rep.)
Aneurysm, dissecting
A staged replacement of the entire aorta from the ascending arch to the hypogastric arteries using a hybrid approach (Jimenez and Moore). 2008;48:1593-6 (Case rep.)
Chronic type B dissecting aortoiliac aneurysm repair complicated by congenital pelvic kidney (Coney et al). 2008; 48:727-9 (Case rep.)
Coil-assisted false lumen thrombosis in complicated chronic type B dissection (Hager et al). 2008;48:465-8 (Case rep.)
Traumatic dissection and rupture of the abdominal aorta as a complication of the Heimlich maneuver (Desai et al). 2008;48:1325-7 (Case rep.)
Aneurysm, false
Massive upper gastrointestinal bleeding due to a ruptured superior mesenteric artery aneurysm duodenum fistula (Zhao). 2008;48:735-7 (Case rep.)
Angioplasty

Angiography

Angiogenic proteins

Aneurysm, ruptured

Failure properties of intraluminal thrombus in abdominal aortic aneurysms under static and pulsating mechanical loads (Gasser et al). 2008;48:179-88

Increased 18F-fluorodeoxyglucose uptake in abdominal aortic aneurysms in positron emission/computed tomography is associated with inflammation, aortic wall instability, and acute symptoms (Rees et al); (Dardik) (Commentary). 2008;48:417-24

Mortality of ruptured abdominal aortic aneurysm treated with open or endovascular repair (Verhoeven et al). 2008;48:1396-400

Regarding “Endovascular vs open repair of acute abdominal aortic aneurysms—A systematic review and meta-analysis” (Paraskevas) (Letter); (Sadat and Hayes) (Reply). 2008;48:255-6

Successful treatment tailored to each splanchnic arterial lesion due to segmental arterial mediolysis (SAM): report of a case (Hashimoto et al). 2008;48:1338-41 (Case rep.)

Angiogenic proteins

Resveratrol attenuates ischemic brain damage in the delayed phase after stroke and induces messenger RNA and protein expression for angiogenic factors (Dong et al). 2008;48:709-14

Angiography

Indocyanine green angiography: a new method to quantify collateral flow in mice (Wuestenfeld et al). 2008;48:1315-21

Reappraisal of velocity criteria for carotid bulb/internal carotid artery stenosis utilizing high-resolution B-mode ultrasonography validated with computed tomography angiography (Shaalan et al); (Rockman) (Commentary). 2008;48:104-13

Angioplasty

Angioplasty with stent-graft versus bare stent for recurrent cephalic arch stenosis in autogenous arteriovenous access for hemodialysis: a prospective randomized clinical trial (Shemesh et al). 2008;48:1524-31

Endovascular management of atherosclerotic renovascular disease: early results following primary intervention (Corriere et al). 2008;48:580-8

Endovascular repair of stent-graft collapse by stent-protected angioplasty using a femoral-brachial guidewire (Kotefis et al). 2008;48:1609-12 (Case rep.)

Prospective randomized trial of ACUSEAL (Gore-Tex) vs Finesse (Hemashiled) patching during carotid endarterectomy: long-term outcome (AbuRahma et al). 2008;48:99-103

Regarding “Internal endoconduit: an innovative technique to address unfavorable iliac artery anatomy encountered during thoracic endovascular aortic repair” (Ysa et al) (Letter); (Petersen and Matsumura) (Reply). 2008;48:253

Selective stenting in subintimal angioplasty: analysis of primary stent outcomes (Schmieder et al). 2008;48:1175-81

Successful lower extremity angioplasty improves brachial artery flow-mediated dilation in patients with peripheral arterial disease (Husmann et al). 2008;48:1211-6

Angioplasty, balloon

Intrainguinal cutting balloon angioplasty in de novo arterial lesions (Canada et al). 2008;48:1182-8

Infrapopliteal angioplasty for critical limb ischemia: relation of TransAtlantic InterSociety Consensus class to outcome in 176 limbs (Giles et al). 2008;48:128-36

The long-term outcomes of percutaneous therapy for renal artery fibromuscular dysplasia (Davies et al). 2008;48:865-71

Pre-procedural neutrophil count predicts outcome in patients with advanced peripheral vascular disease undergoing percutaneous transluminal angioplasty (Toor et al). 2008;48:1504-8

Subintimal angioplasty: our experience in the treatment of 506 infrapopliteal arterial occlusions (Scott et al). 2008;48:878-84

Ankle

The association between elevated ankle systolic pressures and peripheral occlusive arterial disease in diabetic and nondiabetic subjects (Aboyans et al). 2008;48:1197-203

Validation of a method for determination of the ankle-brachial index in the seated position (Gornik et al). 2008;48:128-36

Anticoagulant agents

Regarding “Growth predictors and prognosis of small abdominal aortic aneurysms” (Takagi et al) (Letter); (Schlösser) (Reply). 2008;48:1637

Antiphospholipid syndrome

Superficial femoral artery thrombosis as a cause for distal embolism in primary antiphospholipid syndrome (Lauvao et al). 2008;48:1361-8

Regarding “Delayed presentation of aortic injury by pedicle screws: report of two cases and review of the literature” (Samdani) (Letter); (Kakkos and Shephard) (Reply). 2008;48:1067-8

A staged replacement of the entire aorta from the ascending
arch to the hypogastric arteries using a hybrid approach (Jimenez and Moore). 2008;48:1593-6 (Case rep.)
Aorta, abdominal
Combined replacement of infrarenal aorta and inferior vena cava after en bloc resection of retroperitoneal extravasous osteosarcoma (Schnieder et al). 2008;48:478-9
The epidemiology of abdominal aortic diameter (Allison et al). 2008;48:121-7
Hypoplasia and fibromuscular dysplasia of infrarenal abdominal aorta with downstream aneurysm: case report and review of the literature (Odero et al). 2008;48:1589-92 (Case rep.)
Measurement and analysis of ultimate mechanical properties, stress-strain curve fit, and elastic modulus formula of human abdominal aortic aneurysm and nonaneurysmal abdominal aorta (Xiong et al). 2008;48:189-95
Severe structural damage of the seemingly non-diseased infrarenal aortic aneurysm neck (Diehm et al). 2008;48:425-34
Tuberculous aneurysms of the abdominal aorta (Canaud et al). 2008;48:1012-6 (Case rep.)
Use of a percutaneous septal occlusion device to exclude a juxta-renal pseudoaneurysm of the abdominal aorta (Hovis et al). 2008;48:1328-31 (Case rep.)
Aorta, thoracic
An unusual presentation of pedunculated thrombus in the distal arch of the aorta after splenectomy for B-cell lymphoma (Rafiq et al). 2008;48:1603-4
Endovascular treatment of arch and proximal thoracic aortic lesions (Wang et al). 2008;48:64-8
Physiologic coarctation of the aorta resulting from proximal protrusion of thoracic aortic stent grafts into the arch (Go et al). 2008;48:1007-11 (Case rep.)
Successful ventricular transapical thoracic endovascular graft deployment in a pig model (Grenon et al). 2008;48:1301-5
Supra-aortic hybrid endovascular procedures for complex thoracic aortic disease: single center early to midterm results (Chan et al). 2008;48:571-9
Thoracic aortic lesions treated with the Zenith TX1 and TX2 thoracic devices: intermediate- and long-term outcomes (Morales et al). 2008;48:54-63
Aortic aneurysm
Aortoiliac aneurysms infected by Campylobacter fetus (Cochenec et al). 2008;48:315-20
Basic fibroblast growth factor slow release stent graft for endovascular aortic aneurysm repair: a canine model experiment (Kajimoto et al). 2008;48:1306-14
Perimalleolar and pedal thromboembolectomy and bypasses to treat distal embolization during aortoiliac aneurysm repairs (Gargiulo et al). 2008;48:43-6
Aortic aneurysm, abdominal
Biomechanical properties of abdominal aortic aneurysms assessed by simultaneously measured pressure and volume changes in humans (van’t Veer et al). 2008;48:1401-7
Bleeding into the intraluminal thrombus in abdominal aortic aneurysms is associated with rupture (Roy et al). 2008;48:1108-13
Cardiovascular risk profile and outcome of patients with abdominal aortic aneurysm in out-patients with atherothrombosis: data from the Reduction of Atherothrombosis for Continued Health (REACH) Registry (Baumgartner et al). 2008;48:808-14
Colonic ischemia complicating open vs endovascular abdominal aortic aneurysm repair (Perry et al). 2008;48:272-7
Do very fit patients with small abdominal aortic aneurysm benefit from early intervention? (Brown et al). 2008;48:1375-81
Endovascular vs open repair of acute abdominal aortic aneurysms—A systematic review and meta-analysis (Sadat et al). 2008;48:227-36 (Review)
Failure properties of intraluminal thrombus in abdominal aortic aneurysm under static and pulsating mechanical loads (Gasser et al). 2008;48:179-88
Incidence and significance of nonaneurysmal-related computed tomography scan findings in patients undergoing endovascular aortic aneurysm repair (Indes et al). 2008;48:286-90
Increased 18F-fluorodeoxyglucose uptake in abdominal aortic aneurysms in positron emission/computed tomography is associated with inflammation, aortic wall instability, and acute symptoms (Reeps et al); (Dardik) (Commentary). 2008;48:417-24
Magnetic resonance angiography of collateral blood supply to spinal cord in thoracic and thoracoabdominal aortic aneurysm patients (Backes et al). 2008;48:261-71
Measurement and analysis of ultimate mechanical properties, stress-strain curve fit, and elastic modulus formula of human abdominal aortic aneurysm and nonaneurysmal abdominal aorta (Xiong et al). 2008;48:189-95
More patients are treated for nonruptured abdominal aortic aneurysms, but the proportion of women remains unchanged (Larsson et al). 2008;48:802-7
Mortality of ruptured abdominal aortic aneurysm treated with open or endovascular repair (Verhoeven et al). 2008;48:1396-400
Open thoracic or thoracoabdominal aortic aneurysm repair after previous abdominal aortic aneurysm surgery (Schlösser et al). 2008;48:761-8 (Review)
A randomized, placebo-controlled trial of doxycycline after endoluminal aneurysm repair (Hackmann et al); (Dalman) (Commentary). 2008;48:519-26
Redefining postoperative surveillance after endovascular aneurysm repair: recommendations based on 5-year follow-up in the US Zenith multicenter trial (Sternbergh III et al); (Rockman) (Commentary). 2008;48:278-85
Regarding “Aortic neck dilatation after endovascular abdominal aortic aneurysm repair: a word of caution” (Dalinas) (Letter); (Diehm et al) (Reply). 2008;48:505-6
Regarding “Endovascular vs open repair of acute abdominal aortic aneurysms–A systematic review and meta-analysis” (Paraskevas) (Letter); (Sadat and Hayes) (Reply). 2008;48:255-6
Regarding “Growth predictors and prognosis of small abdominal aortic aneurysms” (Paraskevas) (Letter); (Schlösser et al) (Reply). 2008;48:1067
Regarding “Growth predictors and prognosis of small abdominal aortic aneurysms” (Takagi et al) (Letter); (Schlösser) (Reply). 2008;48:1636
Regarding “Informed consent for AAA repair: assessing variations in surgeon opinion through a national survey” (Ledderle) (Letter); (Berman et al) (Reply). 2008;48:255
Severe structural damage of the seemingly non-diseased infrarenal aortic aneurysm neck (Diehm et al). 2008;48:425-34
Successful endovascular treatment of aneurysm sac hygroma after open abdominal aortic aneurysm replacement: a report of two cases (Salameh and Hoballah). 2008;48:457-60 (Case rep.)
A technique for increased accuracy in the placement of the “giant” Palmaz stent for treatment of type IA endoleak after endovascular abdominal aneurysm repair (Kim et al). 2008;48:755-7 (Tech. Note)
Total laparoscopic juxtarenal abdominal aortic aneurysm repair (Coggia et al). 2008;48:87-42
Traumatic dissection and rupture of the abdominal aorta as a complication of the Heimlich maneuver (Desai et al). 2008;48:1352-7 (Case rep.)
Vertebral erosion due to chronic contained rupture of an abdominal aortic aneurysm (Caynak et al). 2008;48:1342
Zenith abdominal aortic aneurysm endovascular graft (Greenberg et al). 2008;48:1-9, 1.e1-e11
Aortic aneurysm, thoracic
Magnetic resonance angiography of collateral blood supply to spinal cord in thoracic and thoracoabdominal aortic aneurysm patients (Backes et al). 2008;48:261-71
Open thoracic or thoracoabdominal aortic aneurysm repair after
Aortic diseases

Predictors of morbidity and mortality with endovascular and open thoracic aortic aneurysm repair (Dillavou and Makaroun). 2008;48:1114-20

Simultaneous sizing and preoperative risk stratification for thoracic endovascular aneurysm repair: role of gated computed tomography (Schlösser et al). 2008;48:561-70

A staged replacement of the entire aorta from the ascending arch to the hypogastric arteries using a hybrid approach (Jimenez and Moore). 2008;48:1593-6 (Case rep.)

Aortic coarctation

Physiologic coarctation of the aorta resulting from proximal protrusion of thoracic aortic stent grafts into the arch (Go et al). 2008;48:1007-11 (Case rep.)

Aortic diseases

Endovascular treatment of arch and proximal thoracic aortic lesions (Wang et al). 2008;48:64-8

Late complication from a retrievable inferior vena cava filter with associated caval, aortic, and duodenal perforation: a case report (Veroux et al). 2008;48:223-5 (Case rep.)

The management of severe aorto-iliac occlusive disease: endovascular therapy rivals open reconstruction (Kashyap et al). 2008;48:1451-7

Supra-aortic hybrid endovascular procedures for complex thoracic aortic disease: single center early to midterm results (Chan et al). 2008;48:571-9

Thoracic aortic lesions treated with the Zenith TX1 and TX2 thoracic devices: intermediate- and long-term outcomes (Morales et al). 2008;48:54-63

Aortic rupture

Bleeding into the intraluminal thrombus in abdominal aortic aneurysms is associated with rupture (Roy et al). 2008;48:1108-13

Regarding “Growth predictors and prognosis of small abdominal aortic aneurysms” (Takagi et al) (Letter); (Schlösser) (Reply). 2008;48:1636

Regarding “Internal endoconduit: an innovative technique to address unfavorable iliac artery anatomy encountered during thoracic endovascular aortic repair” (Ysa et al) (Letter); (Peterson and Matsumura) (Reply). 2008;48:253

Traumatic dissection and rupture of the abdominal aorta as a complication of the Heimlich maneuver (Desai et al). 2008;48:1325-7 (Case rep.)

Vertebral erosion due to chronic contained rupture of an abdominal aortic aneurysm (Caynak et al). 2008;48:1342

Apolipoproteins E

Apoprotein E/−/− mice have delayed skeletal muscle healing after hind limb ischemia-reperfusion (Kang et al). 2008;48:701-8

Arginase

Arginase blockade lessens endothelial dysfunction after thrombosis (Lewis et al). 2008;48:441-6

Arterial occlusive diseases

Arginase blockade lessens endothelial dysfunction after thrombosis (Lewis et al). 2008;48:441-6

Assessment of the medial head of the gastrocnemius muscle in functional compression of the popliteal artery (Pillai et al). 2008;48:1189-96

The association between elevated ankle systolic pressures and peripheral occlusive arterial disease in diabetic and nondiabetic subjects (Aboyans et al). 2008;48:1197-203

Celiac artery thrombosis in a young patient with multiple platelet receptor polymorphisms and local compression syndrome (Rudolph et al). 2008;48:1335-7 (Case rep.)

Cellular and molecular mechanism regulating blood flow recovery in acute versus gradual femoral artery occlusion are distinct in the mouse (Yang et al). 2008;48:1546-58

Common femoral artery occlusive disease: contemporary results following surgical endarterectomy (Kang et al). 2008;48:872-7

Heavily calcified chronic total occlusion of common iliac artery successfully treated with Tornus microcatheter and rotational atherectomy (Hara et al). 2008;48:758-60 (Tech. Note)

Infragenual cutting balloon angioplasty in de novo arterial lesions (Canaud et al). 2008;48:1182-8
Intra-abdominal fat and metabolic syndrome are associated with larger infrarenal aortic diameters in patients with clinically evident arterial disease (Gorter et al.). 2008;48:114-20

Long-term results of combined common femoral endarterectomy and iliac stenting/stent grafting for occlusive disease (Chang et al.). 2008;48:362-7

The management of severe aortoiliac occlusive disease: endovascular therapy rivals open reconstruction (Kashyap et al.). 2008;48:1451-7

Outcomes of endovascular interventions for TASC II B and C femoropopliteal lesions (Baril et al.). 2008;48:627-33

Percutaneous intervention for infrapopliteal occlusive disease in women: equivalent outcomes despite increased severity of disease compared with men (DeRubertis et al.). 2008;48:150-8

Polydeoxyribonucleotide (PDRN) restores blood flow in an experimental model of peripheral artery occlusive disease (Bitto et al.). 2008;48:1292-1300

Posterior wall capture and resultant common femoral occlusion complicating StarClose access closure (Stone et al.). 2008;48:469-471 (Case rep.)

Regarding “Stenting for femoropopliteal lesions” (Schillinger and Minar) (Letter); (Mwipatayi) (Reply). 2008;48:252-3

Regarding “Symptomatic acute occlusion of the internal carotid artery: reappraisal of urgent vascular reconstruction based on current stroke imaging” (Lev) (Letter); (Weis-Mueller and Sandmann) (Reply). 2008;48:1068-9

Selective stenting in subintimal angioplasty: analysis of primary stent outcomes (Schmieder et al.). 2008;48:1175-81

Subintimal angioplasty: our experience in the treatment of 506 infrapopliteal arterial occlusions (Scott et al.). 2008;48:878-84

Transluminal hypogastic artery occlusion with an Amplatzer vascular plug during endovascular aortic aneurysm repair (Vandy et al.). 2008;48:1121-4

Treatment for peripheral arterial obstructive disease: an appraisal of the economic outcome of complications (Flu et al.). 2008;48:368-76, 368.e1-e11

Arteries

Arterial trauma during central venous catheter insertion: case series, review and proposed algorithm (Guilbert et al); (Myers) (Commentary). 2008;48:918-25

Paraplegia with lumbar artery compression by the diaphragmatic crus (Batt et al.). 2008;48:1017-21 (Case rep.)

Arterioles

Integrity of veno-arteriolar reflex determines level of microvascular flow enhancement by intermittent pneumatic compression (Husmann et al.). 2008;48:1509-13

Arteriovenous fistula

The brachial artery-brachial vein fistula: expanding the possibilities for autogenous fistulae (Greenberg et al.). 2008;48:1245-50

Correlation of intraoperative blood flow measurement with autogenous arteriovenous fistula outcome (Lin et al.). 2008;48:167-72

Endovascular management of a large post-traumatic iliac arteriovenous fistula: utilization of a septal occlusion device (Anderson et al.). 2008;48:1597-9 (Case rep.)

Percutaneous treatment of a large superior mesenteric artery pseudoaneurysm and arteriovenous fistula: a case report (Yeo et al.). 2008;48:730-4 (Case rep.)

Regarding “Radiocephalic and brachiocephalic arteriovenous fistula outcomes in the elderly” (Lazarides et al) (Letter); (Weale) (Reply). 2008;48:251-2

Arteriovenous malformation

Regarding “Multidisciplinary approach in the management of a giant arteriovenous malformation in the right axillary region” (Lec and Laredo) (Letter); (Mendonça) (Reply). 2008;48:775-6

Arteriovenous shunt, surgical

An endogenously deposited fibrin scaffold determines construct size in the surgically created arteriovenous loop chamber model of tissue engineering (Lokmic et al). 2008;48:974-85

Angioplasty with stent-graft versus bare stent for recurrent cephalic arch stenosis in autogenous arteriovenous access for hemodialysis: a prospective randomized clinical trial (Shemesh et al.). 2008;48:1524-31

Cerebral oximetry does not correlate with electroencephalography and somatosensory evoked potentials in determining the need for shunting during carotid endarterectomy (Friedell et al.). 2008;48:601-6

Prosthetic axillary-axillary arteriovenous straight access (necklace graft) for difficult hemodialysis patients: a prospective single-center experience (Morsy et al). 2008;48:1251-4

Regarding “Side-to-side arteriovenous fistula at the elbow with perforating vein ligation” (Jennings et al) (Letter); (Williams) (Reply). 2008;48:1647

The role of the prosthetic axilloaxillary loop access as a tertiary arteriovenous access procedure (Kendall, Jr et al). 2008;48:389-93

Surveillance of arteriovenous hemodialysis access: a systematic review and meta-analysis (Casey et al.). 2008;48:S48-54

Atherectomy

Heavily calcified chronic total occlusion of common iliac artery successfully treated with Tornus microcatheter and rotational atherectomy (Hara et al.). 2008;48:885-90

Midterm outcome predictors for lower extremity atherectomy procedures (Sarac et al); (Back) (Commentary). 2008;48:885-90

Atherosclerosis

Cardiovascular risk profile and outcome of patients with abdominal aortic aneurysm in out-patients with atherothrombosis: data from the Reduction of Atherothrombosis for Continual Health (REACH) Registry (Baumgartner et al). 2008;48:808-14

Endovascular management of atherosclerotic renovascular disease: early results following primary intervention (Corriere et al). 2008;48:580-8

The epidemiology of abdominal aortic diameter (Allison et al). 2008;48:121-7

Histopathological comparison between endofibrosis of the high-performance cyclist and atherosclerosis in the external iliac artery (Vink et al). 2008;48:1458-63

Regarding “In-stent restenosis after carotid artery stenting is asymptomatic because of low embolic potential” (Gallerini et al.) (Letter); (Lal) (Reply). 2008;48:257-8

Suboptimal use of statin therapy in elderly patients with atherosclerosis: a population-based study (Al-Omran et al.). 2008;48:607-12

Autoregulation: see Homeostasis

Awareness

Increasing awareness about venous disease: the American Venous Forum expands the National Venous Screening Program (McLaugherty et al.). 2008;48:394-9

Axilla

Prosthetic axillary-axillary arteriovenous straight access (necklace graft) for difficult hemodialysis patients: a prospective single-center experience (Morsy et al.) 2008;48:1251-4

Regarding “Multidisciplinary approach in the management of a giant arteriovenous malformation in the right axillary region” (Lee and Laredo) (Letter); (Mendonça) (Reply). 2008;48:775-6

Axillary artery

Subscapular artery Y-shaped flow-through muscle flap: a novel one-stage limb salvage procedure (Malikov et al.). 2008;48:159-66

Axillary vein

The role of the prosthetic axilloaxillary loop access as a tertiary arteriovenous access procedure (Kendall, Jr et al.) 2008;48:389-93

Blood vessel prosthesis

The role of prosthetic axilloaxillary loop access as a tertiary arteriovenous access procedure (Kendall, Jr et al.) 2008;48:389-93

Ballooning angioplasty; see Angioplasty, balloon

Ballooning catheter; see Balloon dilatation

Ballooning dilatation

Regarding “Aortic neck dilatation after endovascular abdominal aortic aneurysm repair: a word of caution” (Dalainas) (Letter); (Diehm et al) (Reply). 2008;48:505-6

Ballooning occlusion

Partial right atrial inflow occlusion for controlled systemic hypotension during thoracic endovascular aortic repair (Lee et al.). 2008;48:494-8 (Tech. Note)

Basilar artery

Transcranial Doppler ultrasonography of the basilar artery in patients with retrograde vertebral artery flow (Harper et al.). 2008;48:859-64

B-cell lymphoma; see Lymphoma, B-cell

Biomechanics

Biomechanical properties of abdominal aortic aneurysms assessed by simultaneously measured pressure and volume changes in humans (van’t Veer et al.). 2008;48:1401-7

Measurement and analysis of ultimate mechanical properties, stress-strain curve fit, and elastic modulus formula of human abdominal aortic aneurysm and nonaneurysmal abdominal aorta (Xiong et al.). 2008;48:189-95

Bleeding; see Hemorrhage

Blood flow velocity

Cellular and molecular mechanism regulating blood flow recovery in acute versus gradual femoral artery occlusion are distinct in the mouse (Yang et al.). 2008;48:1546-58

Blood gas monitoring, transcutaneous

Reference value of transcutaneous oxygen measurement in diabetic patients compared with nondiabetic patients (de Meijer et al.). 2008;48:382-8

Blood pressure

The association between elevated ankle systolic pressures and peripheral occlusive arterial disease in diabetic and nondiabetic subjects (Aboyans et al.). 2008;48:1197-203

Biomechanical properties of abdominal aortic aneurysms assessed by simultaneously measured pressure and volume changes in humans (van’t Veer et al.). 2008;48:1401-7

Dynamic cerebral autoregulation in carotid stenosis before and after carotid stenting (Tang et al.). 2008;48:88-92

Blood pressure determination

Validation of a method for determination of the ankle-brachial index in the seated position (Gornik et al.). 2008;48:1204-10

Blood vessel prosthesis

Autogenous versus prosthetic vascular access for hemodialysis: a systematic review and meta-analysis (Murad et al.). 2008;48:S34-47

Brachial artery ligation with total graft excision is a safe and effective approach to prosthetic arteriovenous graft infections (Schanzer et al.). 2008;48:655-8

A computational fluid dynamic study of stent graft remodeling after endovascular repair of thoracic aortic dissections (Cheng et al.). 2008;48:303-10

Experience with covered stents for the management of hemodialysis polytetrafluoroethylene graft seromas (Gargiulo et al.). 2008;48:216-17 (Case rep.)

Regarding “Endovascular repair of para-anastomotic aortic aneurysms” (Scurr et al) (Letter); (Sachdev and Marin) (Reply). 2008;48:258-9

Thoracic aortic lesions treated with the Zenith TX1 and TX2 thoracic devices: intermediate- and long-term outcomes (Morales et al.). 2008;48:54-63

Zenith abdominal aortic aneurysm endovascular graft (Greenberg et al.). 2008;48:1-9, 1.e1-e11

Blood vessel prosthesis implantation

Abdominal aortic coarctation: surgical treatment of 53 patients with a thoracoabdominal bypass, patch aortoplasty, or interposition aortoaoortic graft (Stanley et al.). 2008;48:1073-82

Early and midterm results after endovascular stent graft repair of penetrating aortic ulcers (Geibusch et al.). 2008;48:1361-8

Endovascular repair of traumatic thoracic aortic disruptions with “stacked” abdominal endograft extension cuffs (Rosenthal et al.). 2008;48:841-4

Endovascular treatment of abdominal aortic aneurysms with the Powerlink endograft system: influence of placement on the bifurcation and use of a proximal extension on early and late outcomes (Coppi et al.). 2008;48:795-801

First report of a late type III endoleak from fabric tears of a Zenith stent graft (Wanhaien et al.). 2008;48:723-6 (Case rep.)

A hybrid approach using a composite endovascular and open graft procedure for a symptomatic common femoral aneu-
rysm extending well above the inguinal ligament (Bakoyiannis et al). 2008;48:461-4 (Case rep.)
Incidence and significance of nonaneurysmal-related computed tomography scan findings in patients undergoing endovascular aortic aneurysm repair (Indes et al). 2008;48:286-90
A modified technique for iliac artery branched endografting using a “tromboned” sheath (Tieliu et al); (Buth) (Commentary). 2008;48:1605-8
Prosthetic axillary-axillary arteriovenous straight access (necklace graft) for difficult hemodialysis patients: a prospective single-center experience (Morsy et al). 2008;48:1251-4
Redefining postoperative surveillance after endovascular aneurysm repair: recommendations based on 5-year follow-up in the US Zenith multicenter trial (Stembergh III et al); (Rockman) (Commentary). 2008;48:278-85
Regarding “Aortic neck dilatation after endovascular abdominal aortic aneurysm repair: a word of caution” (Dalainas) (Letter); (Dickh et al) (Reply). 2008;48:505-6
Regarding “Internal endoconduit: an innovative technique to address unfavorable iliac artery anatomy encountered during thoracic endovascular aortic repair” (Ysa et al) (Letter); (Peterson and Matsumura) (Reply). 2008;48:253
Successful devascularization of carotid body tumors by covered stent placement in the external carotid artery (Scanlon et al). 2008;48:1322-4 (Case rep.)
Successful ventricular transapical thoracic endovascular graft deployment in a pig model (Grenon et al). 2008;48:1301-5
A technique for increased accuracy in the placement of the “giant” Palmaz stent for treatment of type IA endoleak after endovascular abdominal aneurysm repair (Kim et al). 2008;48:755-7 (Tech. Note)
Use of a percutaneous septal occlusion device to exclude a juxta-renal pseudoaneurysm of the abdominal aorta (Hovis et al). 2008;48:1328-31 (Case rep.)
Blue toe syndrome
Superficial femoral artery thrombosis as a cause for distal embolism in primary antiphospholipid syndrome (Lauvao et al). 2008;48:472-7 (Case rep.)
Bone screws
Regarding “Delayed presentation of aortic injury by pedicle screws: report of two cases and review of the literature” (Samdani) (Letter); (Kakkos and Shepard) (Reply). 2008;48:1067-8
Brachial artery
The brachial artery-brachial vein fistula: expanding the possibilities for autogenous fistulae (Greenberg et al). 2008;48:1245-50
Brachial artery ligation with total graft excision is a safe and effective approach to prosthetic arteriovenous graft infections (Schanzer et al). 2008;48:655-8
Endovascular repair of stent-graft collapse by stent-protected angioplasty using a femoral-brachial guidewire (Kotelski et al). 2008;48:1609-12 (Case rep.)
Successful lower extremity angioplasty improves brachial artery flow-mediated dilation in patients with peripheral arterial disease (Husmann et al). 2008;48:1211-6
Validation of a method for determination of the ankle-brachial index in the seated position (Gornik et al). 2008;48:1204-10
Brachiocephalic veins
The brachial artery-brachial vein fistula: expanding the possibilities for autogenous fistulae (Greenberg et al). 2008;48:1245-50
Brain infarction
An experimental model of lacunar infarction: embolization of microthrombi (Rapp et al). 2008;48:196-200
Brain ischemia
Carotid endarterectomy within 2 weeks of minor ischemic stroke: a prospective study (Ballotta et al). 2008;48:595-600
Resveratrol attenuates ischemic brain damage in the delayed phase after stroke and induces messenger RNA and protein expression for angiogenic factors (Dong et al). 2008;48:709-14
B-type natriuretic peptide; see Natriuretic peptide, brain
Buerger’s disease; see Thromboangiitis obliterans
Campylobacter fetus
Aortoiliac aneurysms infected by Campylobacter fetus (Cochenue et al). 2008;48:815-20
Campylobacter infections
Aortoiliac aneurysms infected by Campylobacter fetus (Cochenue et al). 2008;48:815-20
Carbon dioxide
Cardiovascular diseases
The epidemiology of abdominal aortic diameter (Allison et al). 2008;48:121-7
Regarding “Growth predictors and prognosis of small abdominal aortic aneurysms” (Takagi et al) (Letter); (Schlösser) (Reply). 2008;48:1636
Carotid stenosis
Carotid endarterectomy; Carotid body tumor
Carotid artery injuries
Carotid artery, external
Carotid artery diseases
Carotid disease
Carotid artery, common
Carotid artery diseases
Current imaging modalities to visualize vulnerability within the atherosclerotic carotid plaque (Wallis de Vries et al). 2008;48:1620-9
Case reports
Catheter ablation
Catheterization, central venous
Celiac artery
Celiac artery thrombosis in a young patient with multiple platelet receptor polymorphisms and local compression syndrome (Rudolph et al). 2008;48:1335-7 (Case rep.)
Isolated spontaneous dissection of the splanchnic arteries (Shaalan et al). 2008;48:675-9
Reappraisal of velocity criteria for carotid bulb/internal carotid artery stenosis utilizing high-resolution B-mode ultrasound validated with computed tomography angiography (Rockman) (Commentary). 2008;48:104-13
Regarding “In-stent restenosis after carotid artery stenting is asymptomatic because of low embolic potential” (Gallerini et al) (Letter); (Lal) (Reply). 2008;48:257-8
Carotid body tumor
Successful devascularization of carotid body tumors by covered stent placement in the external carotid artery (Scanlon et al). 2008;48:1322-4 (Case rep.)
Carotid endarterectomy; see Endarterectomy, carotid
Carotid stenosis
Alert for increased long-term follow-up after carotid artery stenting: results of a prospective, randomized, single-center trial of carotid artery stenting vs carotid endarterectomy (Steinbauer et al). 2008;48:93-8
Carotid artery stenting: a promising therapeutic option for carotid artery stenosis or a bubble about to burst? (Paraskevas) (Letter); (Steinbauer et al) (Reply). 2008;48:1641
Carotid endarterectomy under local anesthesia may be the treatment of choice for symptomatic carotid artery stenosis (Paraskevas) (Letter). 2008;48:256-7
Carotid endarterectomy with adjunctive cephalad carotid stenting: complementary, not competitive, techniques (Tameo et al). 2008;48:351-4
Current imaging modalities to visualize vulnerability within the atherosclerotic carotid plaque (Wallis de Vries et al). 2008;48:1620-9
Endovascular treatment for carotid artery stenosis after neck irradiation (Favre et al). 2008;48:852-8
Leptin receptor is elevated in carotid plaques from neurologically symptomatic patients and positively correlated with augmented macrophage density (Schneiderman et al). 2008;48:1146-55
Reappraisal of velocity criteria for carotid bulb/internal carotid artery stenosis utilizing high-resolution B-mode ultrasound validated with computed tomography angiography (Shaalan et al); (Rockman) (Commentary). 2008;48:104-13
Regarding “In-stent restenosis after carotid artery stenting is asymptomatic because of low embolic potential” (Gallerini et al) (Letter); (Lal) (Reply). 2008;48:257-8
Case reports
Catheterization, central venous
Arterial trauma during central venous catheter insertion: case series, review and proposed algorithm (Guilbert et al); (Myers) (Commentary). 2008;48:918-25
Celiac artery
Celiac artery thrombosis in a young patient with multiple platelet receptor polymorphisms and local compression syndrome (Rudolph et al). 2008;48:1335-7 (Case rep.)
Endovenous ablation with laser for great saphenous vein insufficiency and tributary varices: a retrospective evaluation (Lu et al). 2008;48:675-9
Endovascular treatment for carotid artery stenosis after neck irradiation (Favre et al). 2008;48:852-8
Leptin receptor is elevated in carotid plaques from neurologically symptomatic patients and positively correlated with augmented macrophage density (Schneiderman et al). 2008;48:1146-55
Reappraisal of velocity criteria for carotid bulb/internal carotid artery stenosis utilizing high-resolution B-mode ultrasound validated with computed tomography angiography (Shaalan et al); (Rockman) (Commentary). 2008;48:104-13
Regarding “In-stent restenosis after carotid artery stenting is asymptomatic because of low embolic potential” (Gallerini et al) (Letter); (Lal) (Reply). 2008;48:257-8
Case reports
Catheterization, central venous
Arterial trauma during central venous catheter insertion: case series, review and proposed algorithm (Guilbert et al); (Myers) (Commentary). 2008;48:918-25
Celiac artery
Celiac artery thrombosis in a young patient with multiple platelet receptor polymorphisms and local compression syndrome (Rudolph et al). 2008;48:1335-7 (Case rep.)
Isolated spontaneous dissection of the splanchnic arteries (Takayama et al). 2008;48:351-4
Reappraisal of velocity criteria for carotid bulb/internal carotid artery stenosis utilizing high-resolution B-mode ultrasound validated with computed tomography angiography (Shaalan et al); (Rockman) (Commentary). 2008;48:104-13
Regarding “In-stent restenosis after carotid artery stenting is asymptomatic because of low embolic potential” (Gallerini et al) (Letter); (Lal) (Reply). 2008;48:257-8
Case reports
Catheterization, central venous
Arterial trauma during central venous catheter insertion: case series, review and proposed algorithm (Guilbert et al); (Myers) (Commentary). 2008;48:918-25
Celiac artery
Celiac artery thrombosis in a young patient with multiple platelet receptor polymorphisms and local compression syndrome (Rudolph et al). 2008;48:1335-7 (Case rep.)
Isolated spontaneous dissection of the splanchnic arteries (Takayama et al). 2008;48:329-33
Cellular repressor of E1A-stimulated genes; see Reppressor proteins
Central venous catheterization; see Catheterization, central venous
Cerebrospinal fluid
Strategies to improve spinal cord ischemia in endovascular thoracic aortic repair: outcomes of a prospective cerebro-
spinal fluid drainage protocol (Hnath et al). 2008;48:836-40

**Cerebrovascular accident**

Alert for increased long-term follow-up after carotid artery stenting: results of a prospective, randomized, single-center trial of carotid artery stenting vs carotid endarterectomy (Steinbauer et al). 2008;48:93-8

Carotid artery stenting: a promising therapeutic option for carotid artery stenosis or a bubble about to burst? (Paraskevas) (Letter); (Steinbauer et al) (Reply). 2008;48:1641

Carotid endarterectomy within 2 weeks of minor ischemic stroke: a prospective study (Ballotta et al). 2008;48:595-600

Factors associated with stroke or death after carotid endarterectomy in Northern New England (Goodney et al). 2008;48:1139-45

Reseveratrol attenuates ischemic brain damage in the delayed phase after stroke and induces messenger RNA and protein expression for angiogenic factors (Dong et al). 2008;48:709-14

**Cerebrovascular circulation**

**Chronic disease**

Chronic type B dissecting aortoiliac aneurysm repair complicated by congenital pelvic kidney (Coney et al). 2008;48:727-9 (Case rep.)

Chronic renal insufficiency; see Renal insufficiency, chronic

Chylopericardium; see Pericardial effusion

Cilostazol; see Tetrazaoles

**Clinical competence**

Cognitive training improves clinically relevant outcomes during simulated endovascular procedures (Van Herzeele et al). 2008;48:1223-30

**Cognition**

Cognitive training improves clinically relevant outcomes during simulated endovascular procedures (Van Herzege et al). 2008;48:1223-30

**Collateral circulation**

Indocyanine green angiography: a new method to quantify collateral flow in mice (Wuestenfeld et al). 2008;48:1315-21

Magnetic resonance angiography of collateral blood supply to spinal cord in thoracic and thoracoabdominal aortic aneurysm patients (Backes et al). 2008;48:261-71

**Colonic diseases**

Colonic ischemia complicating open vs endovascular abdominal aortic aneurysm repair (Perry et al). 2008;48:272-7

**Combined modality therapy**

**Computed tomography; see Tomography, X-ray computed**

**Computer simulation**

Cognitive training improves clinically relevant outcomes during simulated endovascular procedures (Van Herzeele et al). 2008;48:1223-30

**Congenital abnormalities**

Thrombosed iliac venous aneurysm: a rare form of presentation of a congenital anomaly of the inferior vena cava (Ysa et al). 2008;48:218-22 (Case rep.)

**Constriction**

Regarding “Easy alternatives to difficult clamping of distal vessels of the leg” (Spinelli and Stilo) (Letter); (Ysa) (Reply). 2008;48:1642

**Constriction, pathologic**

Angioplasty with stent-graft versus bare stent for recurrent cephalic arch stenosis in autogenous arteriovenous access for hemodialysis: a prospective randomized clinical trial (Shemesh et al). 2008;48:1524-31

**Contrast media**

**Coronary artery bypass**

Trends and outcomes of concurrent carotid revascularization and coronary bypass (Timaran et al). 2008;48:355-61, 555.e1-e8

**Corrections**

**Cost-effectiveness analysis**

**Costs and cost analysis**

**Coumarins**

Cryoplasty therapy; see Cryotherapy

Cryotherapy
Cryoplasty therapy of the superficial femoral and popliteal artery: a reappraisal after 44 months’ experience (Samson et al). 2008;48:634-7

Cytokines
The relationship between cytokine concentrations and wound healing in chronic venous ulceration (Gohel et al). 2008; 48:1272-7

Death
Carotid artery stenting has increased rates of post-procedure stroke, death, and resource utilization than does carotid endarterectomy in the United States, 2005 (McPhee et al). 2008;48:1442-50
Factors associated with stroke or death after carotid endarterectomy in Northern New England (Goodney et al). 2008; 48:1139-45

Decision making

Deep vein thrombosis; see Venous thrombosis

Delivery of health care
Cost per day of patency: understanding the impact of patency and reinervention in a sustainable model of healthcare (Stoner et al) 2008;48:1489-96

Device removal
Brachial artery ligation with total graft excision is a safe and effective approach to prosthetic arteriovenous graft infections (Schanzer et al). 2008;48:655-8

Dextran
The antithrombotic effect of dextran-40 in man is due to enhanced fibrinolysis in vivo (Jones et al). 2008;48:715-22

Diabetes complications
The association between elevated ankle systolic pressures and peripheral occlusive arterial disease in diabetic and nondiabetic subjects (Aboyans et al). 2008;48:1197-203

Diabetes mellitus
Reference value of transcutaneous oxygen measurement in diabetic patients compared with nondiabetic patients (de Meijer et al). 2008;48:382-8
Regarding “Impact of diabetes mellitus on outcomes of superficial femoral artery endoluminal interventions” (Meerwaldt et al) (Letter); (Bakken and Davies) (Reply). 2008; 48:774-5

Diabetes mellitus, type 2
Deep vein thrombosis resolution is impaired in diet-induced type 2 diabetic mice (Bouzeghrane et al). 2008;48:1575-84

Diabetic foot

Diagnostic imaging
Current imaging modalities to visualize vulnerability within the atherosclerotic carotid plaque (Wallis de Vries et al). 2008; 48:1620-9

Regarding “Symptomatic acute occlusion of the internal carotid artery: reappraisal of urgent vascular reconstruction based on current stroke imaging” (Lev) (Letter); (WeissMüller and Sandmann) (Reply). 2008;48:1068-9

Diaphragm
Paraplegia with lumbar artery compression by the diaphragmatic crus (Batt et al). 2008;48:1017-21 (Case rep.)

Dietary supplements
Impaired graft healing due to hypercholesterolemia is prevented by dietary supplementation with α-tocopherol (Miyazaki et al). 2008;48:986-93

Dilatation, pathologic
Aneurysmal dilatation of the great saphenous vein stump after endovenous laser ablation (Eidson et al). 2008;48:1037-9 (Case rep.)

Doxycycline
A randomized, placebo-controlled trial of doxycycline after endoluminal aneurysm repair (Hackmann et al); (Dalman) (Commentary). 2008;48:519-26

Drainage

Duodenal diseases
Massive upper gastrointestinal bleeding due to a ruptured superior mesenteric artery aneurysm duodenum fistula (Zhao). 2008;48:735-7 (Case rep.)

Duplex ultrasound; see Ultrasonography, Doppler, duplex

Education, medical
Surgical education: Eschewing the doing (Jones and McCullough). 2008;48:1060-1

Elasticity
Measurement and analysis of ultimate mechanical properties, stress-strain curve fit, and elastic modulus formula of human abdominal aortic aneurysm and nonaneurysmal abdominal aorta (Xiong et al). 2008;48:189-95

Elastic tissue

Elbow
Regarding “Side-to-side arteriovenous fistula at the elbow with perforating vein ligation” (Jennings et al) (Letter); (Williams) (Reply). 2008;48:1646

Electroencephalography
Cerebral oximetry does not correlate with electroencephalography and somatosensory evoked potentials in determining the need for shunting during carotid endarterectomy (Friedell et al). 2008;48:601-6

Embolectomy
Perimalleolar and pedal thromboembolism and bypasses to treat distal embolization during aortoiliac aneurysm repairs (Gargiulo et al). 2008;48:43-6

Embolism
Perimalleolar and pedal thromboembolism and bypasses to treat distal embolization during aortoiliac aneurysm repairs (Gargiulo et al). 2008;48:43-6

Regarding “In-stent restenosis after carotid artery stenting is
asymptomatic because of low embolic potential” (Gallerini et al) (Letter); (Lal) (Reply). 2008;48:257-8

Embolization, therapeutic
Coil-assisted false lumen thrombosis in complicated chronic type B dissection (Hager et al). 2008;48:465-8 (Case rep.)
Endovenous stent-assisted coil embolization for a symptomatic femoral vein aneurysm (Ross et al). 2008;48:1032-6 (Case rep.)
Incidence of soft tissue injury and neuropathy after embolotherapy for congenital vascular malformation (Lee et al). 2008;48:1286-91
Regarding “Incidence and clinical significance of peripheral embolization during percutaneous interventions involving the superficial femoral artery” (Katsanos) (Letter); (Morrissey) (Reply). 2008;48:506-8

Embolus; see Embolization, therapeutic

Endarterectomy
Circulating endothelial progenitor cells decrease in patients after endarterectomy (Stein et al). 2008;48:1217-22
Common femoral artery occlusive disease: contemporary results following surgical endarterectomy (Kang et al). 2008;48:872-7
Outcomes after endarterectomy for chronic mesenteric ischemia (Mell et al). 2008;48:1132-8

Endarterectomy, carotid
Alert for increased long-term follow-up after carotid artery stenting: results of a prospective, randomized, single-center trial of carotid artery stenting vs carotid endarterectomy (Steinbauer et al). 2008;48:93-8
Carotid artery stenting: a promising therapeutic option for carotid artery stenosis or a bubble about to burst? (Paraskevas) (Letter); (Steinbauer et al) (Reply). 2008;48:1641
Carotid artery stenting has increased rates of post-procedure stroke, death, and resource utilization than does carotid endarterectomy in the United States, 2005 (McPhee et al). 2008;48:1442-50
Carotid endarterectomy under local anesthesia may be the treatment of choice for symptomatic carotid artery stenosis (Paraskevas) (Letter). 2008;48:256-7
Carotid endarterectomy with adjunctive cephalad carotid stenting: complementary, not competitive, techniques (Tameo et al). 2008;48:351-4
Carotid endarterectomy within 2 weeks of minor ischemic stroke: a prospective study (Bailott et al). 2008;48:595-600
Cerebral oximetry does not correlate with electroencephalography and somatosensory evoked potentials in determining the need for shunting during carotid endarterectomy (Friedell et al). 2008;48:601-6
Effect of chronic renal insufficiency on outcomes of carotid endarterectomy (Sidawy et al). 2008;48:1423-30
Endovascular treatment for carotid artery stenosis after neck irradiation (Favre et al). 2008;48:852-8
Factors associated with stroke or death after carotid endarterectomy in Northern New England (Goodney et al). 2008;48:1139-45
Prospective randomized trial of ACUSEAL (Gore-Tex) vs Fi- nesse (Hemashield) patching during carotid endarterectomy: long-term outcome (AbuRahma et al). 2008;48:99-103
Statistical modeling of the volume-outcome effect for carotid endarterectomy for 10 years of a statewide database (Nazarian et al); (Kresowik) (Commentary). 2008;48:343-50

Endothelial cells
Circulating endothelial progenitor cells decrease in patients after endarterectomy (Stein et al). 2008;48:1217-22

Endothelial growth factors

Endothelium, vascular
Arginase blockade lessens endothelial dysfunction after thrombosis (Lewis et al). 2008;48:441-6

Endovascular surgical procedures

Enoxaparin

Equipment failure
Posterior wall capture and resultant common femoral occlusion complicating StarClose access closure (Stone et al). 2008;48:469-471 (Case rep.)

Ergotism
Ergotism (Brancaccio et al). 2008;48:754

Ethics, professional
Resolution of retribution (Jones and McCullough). 2008;48:244-5

Evoked potentials, somatosensory
Cerebral oximetry does not correlate with electroencephalography and somatosensory evoked potentials in determining the need for shunting during carotid endarterectomy (Friedell et al). 2008;48:601-6

Exercise
Association between daily ambulatory activity patterns and exercise performance in patients with intermittent claudication (Gardner et al). 2008;48:1238-44

Exercise therapy
Cost-effectiveness of endovascular revascularization compared to supervised hospital-based exercise training in patients with intermittent claudication: a randomized controlled trial (Spronk et al). 2008;48:1472-80

External carotid artery; see Carotid artery, external

Extracorporeal circulation
Hypertensive extracorporeal limb perfusion (HELP): a new
Femoral artery
Cellular and molecular mechanism regulating blood flow recovery in acute versus gradual femoral artery occlusion are distinct in the mouse (Yang et al). 2008;48:1546-58
Common femoral artery occlusive disease: contemporary results following surgical endarterectomy (Kang et al). 2008;48:872-7
CryoPlasty therapy of the superficial femoral and popliteal arteries: a reappraisal after 44 months’ experience (Samson et al). 2008;48:634-7
Endovascular repair of stent-graft collapse by stent-protected angioplasty using a femor-brachial guidewire (Kotelski et al). 2008;48:1609-12 (Case rep.)
A hybrid approach using a composite endovascular and open graft procedure for a symptomatic common femoral aneurysm extending well above the inguinal ligament (Bakoyiannis et al). 2008;48:461-4 (Case rep.)
Impact of runoff on superficial femoral artery endoluminal interventions for rest pain and tissue loss (Davies et al). 2008;48:619-26
Outcomes of endovascular interventions for TASC II B and C femoropopliteal lesions (Baril et al). 2008;48:627-33
Posterior wall capture and resultant common femoral occlusion complicating StarClose access closure (Stone et al). 2008;48:469-471 (Case rep.)
Regarding “Cilostazol reduces restenosis after endovascular therapy in patients with femoropopliteal lesions” (Dindyal et al) (Letter); (Lida) (Reply). 2008;48:1357
Regarding “Impact of diabetes mellitus on outcomes of superficial femoral artery endoluminal interventions” (Meerwaldt et al) (Letter); (Bakken and Davies) (Reply). 2008;48:774-5
Regarding “Incidence and clinical significance of peripheral embolization during percutaneous interventions involving the superficial femoral artery” (Katsanos) (Letter); (Morrissey) (Reply). 2008;48:506-8
Stenting vs above knee polytetrafluoroethylene bypass for TransAtlantic Inter-Society Consensus-II C and D superficial femoral artery disease (Dosluoglu et al). 2008;48:1166-74
Superficial femoral artery thrombosis as a cause for distal embolism in primary antiphospholipid syndrome (Lauvao et al). 2008;48:472-7 (Case rep.)

Fibromuscular dysplasia
Hypoplasia and fibromuscular dysplasia of infrarenal abdominal aorta with downstream aneurysm: case report and review of the literature (Odero et al). 2008;48:1589-92 (Case rep.)
The long-term outcomes of percutaneous therapy for renal artery fibromuscular dysplasia (Davies et al). 2008;48:865-71

Fibrin
The antithrombotic effect of dextran-40 in man is due to enhanced fibrinolysis in vivo (Jones et al). 2008;48:718-22
Fibroblast growth factors
Basic fibroblast growth factor slow release stent graft for endovascular aortic aneurysm repair: a canine model experiment (Kajimoto et al). 2008;48:1306-14
Fibroinolysis
The quantitative benefit of isolated, segmental, pharmacomechanical thrombolysis for iliofemoral venous thrombosis (Martinez Trabal et al). 2008;48:1532-7
Fibrin
The antithrombotic effect of dextran-40 in man is due to enhanced fibrinolysis in vivo (Jones et al). 2008;48:718-22
Fibroblast growth factors
Basic fibroblast growth factor slow release stent graft for endovascular aortic aneurysm repair: a canine model experiment (Kajimoto et al). 2008;48:1306-14
Fibromuscular dysplasia
Hypoplasia and fibromuscular dysplasia of infrarenal abdominal aorta with downstream aneurysm: case report and review of the literature (Odero et al). 2008;48:1589-92 (Case rep.)
The long-term outcomes of percutaneous therapy for renal artery fibromuscular dysplasia (Davies et al). 2008;48:865-71

Fibrosis
Histopathological comparison between endofibrosis of the high-performance cyclist and atherosclerosis in the external iliac artery (Vink et al). 2008;48:1458-63
Fluorodeoxyglucose F18
Increased 18F-fluorodeoxyglucose uptake in abdominal aortic aneurysms in positron emission/computed tomography is associated with inflammation, aortic wall instability, and acute symptoms (Reeps et al); (Dardik) (Commentary). 2008;48:417-24
Fogarty catheter; see Balloon dilatation
Follow-up studies
Redefining postoperative surveillance after endovascular aneurysm repair: recommendations based on 5-year follow-up in the US Zenith multicenter trial (Sternbergh III et al); (Rockman) (Commentary). 2008;48:278-85
Foot diseases
Perimalleolar and pedal thromboembolectomy and bypasses to treat distal embolization during aortoiliac aneurysm repairs (Gargiulo et al). 2008;48:43-6

Gangrene
Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients with tissue loss (Dosluoglu et al). 2008;48:137-43
Regarding “Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients
Hemoglobins
Gastrocnemius muscle; see Muscle, skeletal
Gastroepiploic artery
Successful treatment tailored to each splanchic arterial lesion due to segmental arterial mediolysis (SAM): report of a case (Hashimoto et al). 2008;48:1338-41 (Case rep.)
Gastrointestinal hemorrhage
Massive upper gastrointestinal bleeding due to a ruptured superior mesenteric artery aneurysm duodenum fistula (Zhao). 2008;48:735-7 (Case rep.)
Giant cell arteritis
Giant cell arteritis: heterogeneity in clinical presentation and imaging results (Janssen et al). 2008;48:1025-31 (Case rep.)
Graft occlusion, vascular
Efficacy of duplex ultrasound surveillance after infrainguinal vein bypass may be enhanced by identification of characteristics predictive of graft stenosis development (Tinder et al). 2008;48:613-18
Hand injuries
Handman index; see Severity of illness index
Heart ventricles
Successful ventricular transapical thoracic endovascular graft deployment in a pig model (Grenon et al). 2008;48:1301-5
Hemodialysis
Angioplasty with stent graft versus bare stent for recurrent cephalic arch stenosis in autogenous arteriovenous access for hemodialysis: a prospective randomized clinical trial (Shemesh et al). 2008;48:1524-31
Autogenous versus prosthetic vascular access for hemodialysis: a systematic review and meta-analysis (Murad et al). 2008;48:534-47
The effect of implementation of an optimized care protocol on the outcome of arteriovenous hemodialysis access surgery (Fiu et al). 2008;48:659-68
Prosthetic axillary-axillary arteriovenous straight access (necklace graft) for difficult hemodialysis patients: a prospective single-center experience (Morsy et al). 2008;48:1251-4
Surveillance of arteriovenous hemodialysis access: a systematic review and meta-analysis (Casey et al). 2008;48:548-54
Hemodynamics
Evaluation of renal artery stenosis with hemodynamic parameters of Doppler sonography (Li et al). 2008;48:323-8
Experimental study of hemodynamics in procedures to treat access-related ischemia (Zanow et al). 2008;48:1559-65
Hemoglobins
Hemorrhage
Bleeding into the intraluminal thrombus in abdominal aortic aneurysms is associated with rupture (Roy et al). 2008;48:1108-13
Heparin
Heparin-platelet factor 4 antibodies are frequent after vascular surgery but are not a frequent cause of graft thrombosis or thrombocytopenia (Alexy et al). 2008;48:377-81
Hindlimb
Apolipoprotein E–/– mice have delayed skeletal muscle healing after hind limb ischemia–reperfusion (Kang et al). 2008;48:701-8
Homeostasis
Hospital costs
Cost per day of patency: understanding the impact of patency and reintervention in a sustainable model of healthcare (Stoner et al). 2008;48:1489-96
Treatment for peripheral arterial obstructive disease: an appraisal of the economic outcome of complications (Flu et al). 2008;48:368-76, 368.e1-e11
Hospitalization
Hospital mortality
Regarding “Endovascular vs open repair of acute abdominal aortic aneurysms–A systematic review and meta-analysis” (Paraskevas) (Letter); (Sadat and Hayes) (Reply). 2008;48:255-6
Hydroxymethylglutaryl-CoA reductase inhibitors
Regarding “Statins are independently associated with reduced mortality in patients undergoing infrainguinal bypass graft surgery for critical limb ischemia” (Mascitelli et al) (Letter); (Schanzer) (Reply). 2008;48:1639
Statin use in the elderly: results from a peripheral vascular survey in the Netherlands (Hocks et al); (Froehlich) (Commentary). 2008;48:891-6
Hygroma; see Lymphangioma, cystic
Hyoid bone
Carotid artery entrapment by the hyoid bone (Kölbel et al). 2008;48:1022-4 (Case rep.)
Hypercholesterolemia
Impaired graft healing due to hypercholesterolemia is prevented by dietary supplementation with α-tocopherol (Miyazaki et al). 2008;48:986-93
Hypereamia
Hyperemic maximal venous outflow unmasks symptomatic lower extremity venous obstruction (Paolini et al). 2008;48:749-53 (Case rep.)
Hyperplasia
Adenovirus-mediated intra-arterial delivery of cellular repres sor of E1A-stimulated genes inhibits neointima formation in rabbits after balloon injury (Han et al). 2008;48:201-9
Regarding “In-stent restenosis after carotid artery stenting is asymptomatic because of low embolic potential” (Gallerini et al) (Letter); (Lal) (Reply). 2008;48:257-8
Hypotension, controlled

Iliac aneurysm
Aortoiliac aneurysms infected by Campylobacter fetus (Cochener et al). 2008;48:815-20
Chronic type B dissecting aortoiliac aneurysm repair complicated by congenital pelvic kidney (Coney et al). 2008;48:727-9 (Case rep.)
Perimalleolar and pedal thromboembolectomy and bypass to treat distal embolization during aortoiliac aneurysm repairs (Gargiulo et al). 2008;48:43-6

Iliac artery
Histopathological comparison between endoliftosis of the high-performance cyclist and atherosclerosis in the external iliac artery (Vink et al). 2008;48:1458-63
A modified technique for iliac artery branch endografting using a “tromboned” sheath (Tielliu et al); (Buth) (Commentary). 2008;48:1605-8
Regarding “Internal endocondit: an innovative technique to address unfavorable iliac artery anatomy encountered during thoracic endovascular aortic repair” (Ysa et al) (Letter); (Peterson and Matsumura) (Reply). 2008;48:253
A staged replacement of the entire aorta from the ascending arch to the hypogastric arteries using a hybrid approach (Jimenez and Moore). 2008;48:1593-6 (Case rep.)

Iliac vein
Early Palma procedure after iliac vein injury in abdominal penetrating trauma (Alcocer et al). 2008;48:745-8 (Case rep.)
The quantitative benefit of isolated, segmental, pharmacomechanical thrombolysis for iliofemoral venous thrombosis (Martinez Trabal et al). 2008;48:1532-7
Thrombosed iliac venous aneurysm: a rare form of presentation of a congenital anomaly of the inferior vena cava (Ysa et al). 2008;48:218-22 (Case rep.)

Incidental findings
Incidence and significance of nonaneurysmal-related computed tomography scan findings in patients undergoing endovascular aortic aneurysm repair (Indes et al). 2008;48:286-90

Indocyanine green
Indocyanine green angiography: a new method to quantify collateral flow in mice (Wuestenfeld et al). 2008;48:1315-21

Informed consent
Regarding “Informed consent for AAA repair: assessing variations in surgeon opinion through a national survey” (Led-erie) (Letter); (Berman et al) (Reply). 2008;48:255

Infrarenal aorta; see Aorta, abdominal

Inguinal canal
A hybrid approach using a composite endovascular and open graft procedure for a symptomatic common femoral aneurysm extending well above the inguinal ligament (Bakoyannis et al). 2008;48:461-4 (Case rep.)

In Memoriam

Insurance coverage
Insurance status predicts access to care and outcomes of vascular disease (Giacovelli et al). 2008;48:905-11

Interleukin 1 receptor antagonist protein
Interleukin-1 receptor antagonist attenuates the severity of spinal cord ischemic injury in rabbits (Akuzawa et al). 2008;48:694-700

Intermittent claudication
Altered fibrin clot structure and function in the healthy first degree relatives of subjects with intermittent claudication (Bhasin et al). 2008;48:1497-503
Association between daily ambulatory activity patterns and exercise performance in patients with intermittent claudication (Gardner et al). 2008;48:1238-44
Cost-effectiveness of endovascular revascularization compared to supervised hospital-based exercise training in patients with intermittent claudication: a randomized controlled trial (Spronk et al). 2008;48:1472-80

Intermittent pneumatic compression devices
Integrity of veno-arteriolar reflex determines level of microvascular flow enhancement by intermittent pneumatic compression (Husmann et al). 2008;48:1509-13
On the mechanism of action of pneumatic compression devices: combined magnetic resonance imaging and duplex ultrasound investigation (Lurie et al). 2008;48:1000-6

Internship and residency
Surgical education: Escewing the doing (Jones and McCul-lough). 2008;48:1060-1

Intestinal fistula
Massive upper gastrointestinal bleeding due to a ruptured superior mesenteric artery aneurysm duodenum fistula (Zhao). 2008;48:735-7 (Case rep.)
Saphenous vein graft aneurysm with graft-enteric fistula after renal artery bypass (Levy et al). 2008;48:738-40 (Case rep.)

Intestinal perforation
Late complication from a retrievable inferior vena cava filter with associated caval, aortic, and duodenal perforation: a case report (Veroux et al). 2008;48:223-5 (Case rep.)

Intracranial thrombosis
An experimental model of lacunar infarction: embolization of microthrombi (Rapp et al). 2008;48:196-200

Intraoperative complications
Arterial trauma during central venous catheter insertion: case
series, review and proposed algorithm (Guilbert et al); (Myers) (Commentary). 2008;48:918-25
Vascular injury during anterior exposure of the spine (Hamdan et al). 2008;48:650-4

Intraoperative period
Correlation of intraoperative blood flow measurement with autogenous arteriovenous fistula outcome (Lin et al). 2008;48:167-72

Ischemia
Colonic ischemia complicating open vs endovascular abdominal aortic aneurysm repair (Perry et al). 2008;48:272-7
Experimental study of hemodynamics in procedures to treat access-related ischemia (Zanow et al). 2008;48:1559-65
Hypertensive extracorporeal limb perfusion (HELP): a new technique for managing critical lower limb ischemia (Lane et al); (Powell) (Commentary). 2008;48:1156-65
Impact of runoff on superficial femoral artery endoluminal interventions for rest pain and tissue loss (Davies et al). 2008;48:619-26
Infrapopliteal angioplasty for critical limb ischemia: relation of TransAtlantic InterSociety Consensus class to outcome in 176 limbs (Giles et al). 2008;48:128-36
Outcomes after endarterectomy for chronic mesenteric ischemia (Mell et al). 2008;48:1132-8
Regarding “Statins are independently associated with reduced mortality in patients undergoing infrainguinal bypass graft surgery for critical limb ischemia” (Mascitelli et al) (Letter); (Schanzer) (Reply). 2008;48:1639
Risk stratification in critical limb ischemia: derivation and validation of a model to predict amputation-free survival using multicenter surgical outcomes data (Schanzer et al). 2008;48:1464-71

Ischemic attack, transient
Carotid artery entrapment by the hyoid bone (Kölbel et al). 2008;48:1022-4 (Case rep.)
Occam’s razor: intervene early to prevent more strokes! (Naylor). 2008;48:1053

Kidney

Kidney diseases
Chronic type B dissection aortoiliac aneurysm repair complicated by congenital pelvic kidney (Coney et al). 2008;48:727-9 (Case rep.)

Kidney transplantation
Repair of complex renal artery aneurysms by laparoscopic nephrectomy with ex vivo repair and autotransplantation (Gallagher et al). 2008;48:1408-13

Knee
Through-knee amputation in patients with peripheral arterial disease: a review of 50 cases (Morse et al). 2008;48:638-643

L

Lacunar infarction; see Brain infarction

Laparoscopy
Repair of complex renal artery aneurysms by laparoscopic nephrectomy with ex vivo repair and autotransplantation (Gallagher et al). 2008;48:1408-13
Total laparoscopic juxtarenal abdominal aortic aneurysm repair (Coggia et al). 2008;48:57-42

Laser ablation; see Laser therapy

Laser surgery
Duplex ultrasound changes in the great saphenous vein after endosaphenous laser occlusion with 808-nm wavelength (Corcos et al). 2008;48:1262-71

Laser therapy
Aneurysmal dilatation of the great saphenous vein stump after endovenous laser ablation (Eidson et al). 2008;48:1037-9 (Case rep.)
Endovenous laser ablation improves venous outcomes irrespective of the presence of deep venous insufficiency (Knipp et al). 2008;48:1538-45
Endovenous laser and echo-guided foam ablation in great saphenous vein reflux: one-year follow-up results (Gonzalez-Zeh et al). 2008;48:940-6

Leg
Duplex scan for deep vein thrombosis—defining who needs an examination of the contralateral asymptomatic leg (Pennell et al). 2008;48:413-6
Infrapopliteal angioplasty for critical limb ischemia: relation of TransAtlantic InterSociety Consensus class to outcome in 176 limbs (Giles et al). 2008;48:128-36
Regarding “Easy alternatives to difficult clamping of distal vessels of the leg” (Spinelli and Stilo) (Letter); (Ysa) (Reply). 2008;48:1642
Substitution of smokeless tobacco for cigarettes in Buerger’s disease does not prevent limb loss (Lawrence et al). 2008;48:210-12 (Case rep.)

Leg ulcer
Impact of protein deficiency on venous ulcer healing (Legendre et al). 2008;48:688-93
Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients with tissue loss (Dosluoglu et al). 2008;48:137-43
Regarding “Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients with tissue loss” (Dardik) (Letter); (Dosluoglu et al) (Reply). 2008;48:1644
The relationship between cytokine concentrations and wound healing in chronic venous ulceration (Gohel et al). 2008;48:1272-7

Length of stay
Regarding “Endovascular vs open repair of acute abdominal aortic aneurysms—A systematic review and meta-analysis”
Leptin receptors; see Receptors, leptin

Letters to the Editor
Carotid artery stenting: a promising therapeutic option for carotid artery stenosis or a bubble about to burst? (Paraskevas) (Letter); (Steinbauer et al) (Reply). 2008;48:1641
Carotid endarterectomy under local anesthesia may be the treatment of choice for symptomatic carotid artery stenosis (Paraskevas) (Letter). 2008;48:256-7
Regarding “Aortic neck dilatation after endovascular abdominal aortic aneurysm repair: a word of caution” (Dalainas) (Letter); (Dichm et al) (Reply). 2008;48:505-6
Regarding “A randomized trial of carotid artery stenting with and without cerebral protection” (Kastrup et al) (Letter); (Makaroun) (Reply). 2008;48:504-5
Regarding “A randomized trial of carotid stenting with and without cerebral protection” (LoGerfo) (Letter). 2008;48:775
Regarding “Roadbed vena cava filter placement with intravascular ultrasound: a simple, accurate, single venous access method” (Passman) (Letter); (Jacobs) (Reply). 2008;48:257
Regarding “Cilostazol reduces restenosis after endovascular therapy in patients with femoropopliteal lesions” (Dindyal et al) (Letter); (Iida) (Reply). 2008;48:1357
Regarding “Easy alternatives to difficult clamping of distal vessels of the leg” (Spinelli and Stillo) (Letter); (Ysa) (Reply). 2008;48:1642
Regarding “Endovascular repair of para-anastomotic aortic aneurysms” (Scurr et al) (Letter); (Sachdev and Marin) (Reply). 2008;48:258-9
Regarding “Endovascular vs open repair of acute abdominal aortic aneurysms—A systematic review and meta-analysis” (Paraskevas) (Letter); (Sadat and Hayes) (Reply). 2008;48:255-6
Regarding “Growth predictors and prognosis of small abdominal aortic aneurysms” (Takagi et al) (Letter); (Schlösser) (Reply). 2008;48:1636
Regarding “Impact of diabetes mellitus on outcomes of superficial femoral artery endoluminal interventions” (Meerwaldt et al) (Letter); (Bakken and Davies) (Reply). 2008;48:774-5
Regarding “Incidence and clinical significance of peripheral embolization during percutaneous interventions involving the superficial femoral artery” (Katsanos) (Letter); (Morrissey) (Reply). 2008;48:506-8
Regarding “Informed consent for AAA repair: assessing variations in surgeon opinion through a national survey” (Lederle) (Letter); (Berman et al) (Reply). 2008;48:255
Regarding “In-stent restenosis after carotid artery stenting is asymptomatic because of low embolic potential” (Gallerini et al) (Letter); (Lal) (Reply). 2008;48:257-8
Regarding “Internal endocoil: an innovative technique to address unfavorable iliac artery anatomy encountered during thoracic endovascular aortic repair” (Ysa et al) (Letter); (Peterson and Matsumura) (Reply). 2008;48:253
Regarding “Multidisciplinary approach in the management of a giant arteriovenous malformation in the right axillary region” (Lee and Laredo) (Letter); (Mendonça) (Reply). 2008;48:775-6
Regarding “Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients with tissue loss” (Dardik) (Letter); (Dosluoglu et al) (Reply). 2008;48:1644
Regarding “Pharmacologic risk factor management in peripheral arterial disease: A vade mecum for vascular surgeons” (Paraskevas) (Letter); (Rehring et al) (Reply). 2008;48:776-7
Regarding “Radiocephalic and brachicephalic arteriovenous fistula outcomes in the elderly” (Lazarides et al) (Letter); (Weale) (Reply). 2008;48:251-2
Regarding “Side-to-side arteriovenous fistula at the elbow with perforating vein ligation” (Jennings et al) (Letter); (Williams) (Reply). 2008;48:1647
Regarding “Statins are independently associated with reduced mortality in patients undergoing infrainguinal bypass graft surgery for critical limb ischemia” (Mascitelli et al) (Letter); (Schanzer) (Reply). 2008;48:1639
Regarding “Stenting for femoropopliteal lesions” (Schillinger and Minar) (Letter); (Mwipatayi) (Reply). 2008;48:252-3

Ligaments
Venous stenting across the inguinal ligament (Neglèn et al). 2008;48:1255-61
Ligation
Brachial artery ligation with total graft excision is a safe and effective approach to prosthetic arteriovenous graft infections (Schanzer et al). 2008;48:655-8
Midterm outcome after the distal revascularization and interval ligation (DRIL) procedure (Huber et al). 2008;48:926-33
Limb salvage
Percutaneous intervention for infrainguinal occlusive disease in women: equivalent outcomes despite increased severity of disease compared with men (DeRubertis et al). 2008;48:150-8
Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients with tissue loss (Dosluoglu et al). 2008;48:137-43
Regarding “Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients with tissue loss” (Dardik) (Letter); (Dosluoglu et al) (Reply). 2008;48:1644
Lower extremity
Hypereemic maximal venous outflow unmasks symptomatic lower extremity venous obstruction (Paolini et al). 2008;48:749-53 (Case rep.)
Hypertensive extracorporeal limb perfusion (HELP): a new technique for managing critical lower limb ischemia (Lane et al); (Powell) (Commentary). 2008;48:1156-65
Incidence of ipsilateral postoperative deep venous thrombosis in the amputated lower extremity of patients with peripheral obstructive arterial disease (Matiolo et al). 2008;48:1514-9
Lower extremity arterial inflow is adversely affected in patients with venous disease (Paolini et al). 2008;48:960-4
Midterm outcome predictors for lower extremity atherectomy procedures (Sarac et al); (Back) (Commentary). 2008;48:885-90
Successful lower extremity angioplasty improves brachial artery
flow-mediated dilation in patients with peripheral arterial disease (Husmann et al). 2008;48:1211-6

Lumbar vertebrae
Paraplegia with lumbar artery compression by the diaphragmatic crus (Batt et al). 2008;48:1017-21 (Case rep.)
Vertebral erosion due to chronic contained rupture of an abdominal aortic aneurysm (Caynak et al). 2008;48:1342

Lymphangioma, cystic
Successful endovascular treatment of aneurysm sac hygroma after open abdominal aortic aneurysm replacement: a report of two cases (Salameh and Hoballah). 2008;48:457-60 (Case rep.)

Lymphocele
Use of vacuum assisted closure (VAC) therapy in treating lymphatic complications after vascular procedures: new approach for lymphoceles (Hamed et al). 2008;48:1520-3

Lymphoma, B-cell
An unusual presentation of pedunculated thrombus in the distal arch of the aorta after splenectomy for B-cell lymphoma (Rafiq et al). 2008;48:1603-4

M

Macrophage
Leptin receptor is elevated in carotid plaques from neurologically symptomatic patients and positively correlated with augmented macrophage density (Schneiderman et al). 2008;48:1146-55

Magnetic resonance angiography
Magnetic resonance angiography of collateral blood supply to spinal cord in thoracic and thoracoabdominal aortic aneurysm patients (Backes et al). 2008;48:261-71

Magnetic resonance imaging (MRI)
On the mechanism of action of pneumatic compression devices: combined magnetic resonance imaging and duplex ultrasound investigation (Lurie et al). 2008;48:1000-6

Mass screening
 Increasing awareness about venous disease: the American Venous Forum expands the National Venous Screening Program (McLafferty et al). 2008;48:394-9

Matrix metalloproteinases
Prolonged increases in vein wall tension increase matrix metalloproteinases and decrease constriction in rat vena cava: potential implications in varicose veins (Raffetto et al). 2008;48:447-56

Mentors
Without prejudice (Calligaro). 2008;48:237-43 (Presidential Address)

Mesenteric arteries
Isolated spontaneous dissection of the splanchnic arteries (Takayama et al). 2008;48:329-33

Mesenteric artery, superior
Massive upper gastrointestinal bleeding due to a ruptured superior mesenteric artery aneurysm duodenum fistula (Zhao). 2008;48:735-7 (Case rep.)

Mesenteric vascular occlusion
Outcomes after endarterectomy for chronic mesenteric ischemia (Mell et al). 2008;48:1132-8

Mesentery
Outcomes after endarterectomy for chronic mesenteric ischemia (Mell et al). 2008;48:1132-8

Metabolic syndrome X
Intra-abdominal fat and metabolic syndrome are associated with larger infrarenal aortic diameters in patients with clinically evident arterial disease (Gorter et al). 2008;48:114-20

Metalloproteinase
Metalloproteinase expression in venous aneurysms (Irwin et al). 2008;48:1278-85

Microcirculation
Integrity of veno-arteriolar reflex determines level of microvascular flow enhancement by intermittent pneumatic compression (Husmann et al). 2008;48:1509-13

Minor ischemic stroke; see Brain ischemia; Cerebrovascular accident

Models, statistical
Statistical modeling of the volume-outcome effect for carotid endarterectomy for 10 years of a statewide database (Nazarian et al); (Kresowik) (Commentary). 2008;48:343-50

Mortality
Mortality of ruptured abdominal aortic aneurysm treated with open or endovascular repair (Verhoeven et al). 2008;48:1396-400

Regarding “Statins are independently associated with reduced mortality in patients undergoing infrainguinal bypass graft surgery for critical limb ischemia” (Mascitelli et al) (Letter); (Schanzer) (Reply). 2008;48:1639

Multiple trauma

Muscle, skeletal
Apolipoprotein E−/− mice have delayed skeletal muscle healing after hind limb ischemia–reperfusion (Kang et al). 2008;48:701-8

Assessment of the medial head of the gastrocnemius muscle in functional compression of the popliteal artery (Pillai et al). 2008;48:1189-96

Muscle, smooth, vascular
Adenovirus-mediated intra-arterial delivery of cellular represor of E1A-stimulated genes inhibits neointima formation in rabbits after balloon injury (Handa et al). 2008;48:201-9

Myocardial infarction
N-terminal pro B-type natriuretic peptide is an independent predictor of postoperative myocardial injury in patients undergoing major vascular surgery (Rajagopalan et al); (Mackey) (Commentary). 2008;48:912-7

Myocytes, smooth muscle

N

Natriuretic peptide, brain
N-terminal pro B-type natriuretic peptide is an independent predictor of postoperative myocardial injury in patients undergoing major vascular surgery (Rajagopalan et al); (Mackey) (Commentary). 2008;48:912-7
Neck
Endovascular treatment for carotid artery stenosis after neck irradiation (Favré et al). 2008;48:852-8

Negative-pressure wound therapy
Use of vacuum assisted closure (VAC) therapy in treating lymphatic complications after vascular procedures: new approach for lymphocele (Hamed et al). 2008;48:1520-3

Nephrectomy
Repair of complex renal artery aneurysms by laparoscopic nephrectomy with ex vivo repair and autotransplantation (Gallagher et al). 2008;48:1408-13

Neutrophils
Preprocedural neutrophil count predicts outcome in patients with advanced peripheral vascular disease undergoing percutaneous transluminal angioplasty (Toor et al). 2008;48:1504-8

Nutrition surveys
Nutrition impacts the prevalence of peripheral arterial disease in the United States (Lane et al). 2008;48:897-904

O
Obesity
The role of the prosthetic axilloaxillary loop access as a tertiary arteriovenous access procedure (Kendall, Jr et al). 2008;48:389-93

Osteosarcoma
Combined replacement of infrarenal aorta and inferior vena cava after en bloc resection of retroperitoneal extraosseous osteosarcoma (Schneider et al). 2008;48:478-9

Outcome assessment (health care); see also Treatment outcome
A prospective evaluation of the outcome after small saphenous varicose vein surgery with one-year follow-up (O’Hare et al); (Kistner) (Commentary). 2008;48:669-74
Prospective randomized trial of ACUSEAL (Gore-Tex) vs Finesses (Hemashield) patching during carotid endarterectomy: long-term outcome (AbuRahma et al). 2008;48:99-103

Oximetry
Cerebral oximetry does not correlate with electroencephalography and somatosensory evoked potentials in determining the need for shunting during carotid endarterectomy (Friedell et al). 2008;48:601-6

Oxygen
Reference value of transcutaneous oxygen measurement in diabetic patients compared with nondiabetic patients (de Meijer et al); (Rockman) (Commentary). 2008;48:382-8

P
Pain
Impact of runoff on superficial femoral artery endoluminal interventions for rest pain and tissue loss (Davies et al). 2008;48:619-26

Paraplegia
Paraplegia with lumbar artery compression by the diaphragmatic crus (Batt et al). 2008;48:1017-21 (Case rep.)

Percutaneous transluminal angioplasty; see Angioplasty, balloon

Pericardial effusion

Perioperative care
The effect of implementation of an optimized care protocol on the outcome of arteriovenous hemodialysis access surgery (Flu et al). 2008;48:659-68

Peripheral arterial diseases; see Peripheral vascular diseases

Peripheral vascular diseases
The association between elevated ankle systolic pressures and peripheral occlusive arterial disease in diabetic and nondiabetic subjects (Aboyans et al). 2008;48:1197-203
Corridor-based functional performance measures correlate better with physical activity during daily life than treadmill measures in persons with peripheral arterial disease (McCormick et al). 2008;48:1231-7
Impact of protein deficiency on venous ulcer healing (Legendre et al). 2008;48:688-93
Incidence of ipsilateral postoperative deep venous thrombosis in the amputated lower extremity of patients with peripheral obstructive arterial disease (Matiello et al). 2008;48:1514-9
Isolated spontaneous dissection of the splanchic arteries (Takayama et al). 2008;48:329-33
Nutrition impacts the prevalence of peripheral arterial disease in the United States (Lane et al). 2008;48:897-904
A percutaneous arterial closure protocol can decrease complications after endovascular interventions in vascular surgery patients (Goodney et al). 2008;48:1481-8
Polyoxymethylene urethane (PDURN) restores blood flow in an experimental model of peripheral artery occlusive disease (Bitto et al). 2008;48:1292-300
Preprocedural neutrophil count predicts outcome in patients with advanced peripheral vascular disease undergoing percutaneous transluminal angioplasty (Toor et al). 2008;48:1504-8
Regarding “Pharmacologic risk factor management in peripheral arterial disease: A vade mecum for vascular surgeons” (Paraskevas) (Letter); (Rehring et al) (Reply). 2008;48:776-7
Successful lower extremity angioplasty improves brachial artery flow-mediated dilation in patients with peripheral arterial disease (Husmann et al). 2008;48:1211-6
Through-knee amputation in patients with peripheral arterial disease: a review of 50 cases (Morse et al). 2008;48:638-643

Permeability
Regarding “Internal endoconduit: an innovative technique to address unfavorable iliac artery anatomy encountered during thoracic endovascular aortic repair” (Ysa et al) (Letter); (Peterson and Matsunaga) (Reply). 2008;48:253

Peroneal artery; see Tibial arteries

Phlebotomy

Physical activity
Corridor-based functional performance measures correlate better with physical activity during daily life than treadmill measures in persons with peripheral arterial disease (McCormick et al). 2008;48:1231-7
Subject Index

Platelet-derived endothelial cell growth factor; see Thymidine phosphorylase

Platelet-derived growth factor

Platelet factor 4
Heparin–platelet factor 4 antibodies are frequent after vascular surgery but are not a frequent cause of graft thrombosis or thrombocytopenia (Alexy et al). 2008;48:377-81

Polydeoxyribonucleotides
Polydeoxyribonucleotide (PDRN) restores blood flow in an experimental model of peripheral artery occlusive disease (Bitto et al). 2008;48:1292-300

Polyethylene terephthalates
Polyethylene terephthalate (PDTA) or polyethylene glycol (PEG) dialysis polytetrafluoroethylene graft seromas (Gargiulo et al). 2008;48:43-6

Polyethylene terephthalate
Prospective randomized trial of ACUSEAL (Gore-Tex) vs Finesse (Hemashield) patching during carotid endarterectomy: long-term outcome (AbuRahma et al). 2008;48:99-103

Polymorphism, genetic
Celiac artery thrombosis in a young patient with multiple platelet receptor polymorphisms and local compression syndrome (Rudolph et al). 2008;48:1335-7 (Case rep.)

Polytetrafluoroethylene
Experience with covered stents for the management of hemothysis polytetrafluoroethylene graft seromas (Gargiulo et al). 2008;48:216-17 (Case rep.)

Post STEMI
Prospective randomized trial of ACUSEAL (Gore-Tex) vs Finesse (Hemashield) patching during carotid endarterectomy: long-term outcome (AbuRahma et al). 2008;48:99-103

Stenting vs above knee polytetrafluoroethylene bypass for TransAtlantic Inter-Society Consensus II C and D superficial femoral artery disease (Doshougli et al). 2008;48:1166-74

Popliteal artery
Assessment of the medial head of the gastrocnemius muscle in functional compression of the popliteal artery (Pillai et al). 2008;48:1189-96

Cryoplastic therapy of the superficial femoral and popliteal arteries: a reappraisal after 44 months’ experience (Samson et al). 2008;48:634-7

Infrapopliteal angioplasty for critical limb ischemia: relation of TransAtlantic Inter-Society Consensus class to outcome in 176 limbs (Giles et al). 2008;48:128-36

Outcomes of endovascular interventions for TASC II B and C femoropopliteal lesions (Baril et al). 2008;48:627-33

Regarding “Cilostazol reduces restenosis after endovascular therapy in patients with femoropopliteal lesions” (Dindyal et al) (Letter); (Iida) (Reply). 2008;48:1357

Regarding “Stenting for femoropopliteal lesions” (Schillinger and Minar) (Letter); (Mwipatayi) (Reply). 2008;48:252-3

Popliteal vein
Fatal pulmonary embolus associated with asymptomatic popliteal venous aneurysm (Cox et al). 2008;48:1040

Population surveillance
Distribution and prevalence of reflux in the superficial and deep venous system in the general population – results from the Bonn Vein Study, Germany (Maurins et al). 2008;48:680-7

Surveillance of arteriovenous hemodialysis access: a systematic review and meta-analysis (Casey et al). 2008;48:S48-S54

Positron-emission tomography
Giant cell arteritis: heterogeneity in clinical presentation and imaging results (Jansen et al). 2008;48:1025-31 (Case rep.)

Increased 18F-fluorodeoxyglucose uptake in abdominal aortic aneurysms in positron emission/computed tomography is associated with inflammation, aortic wall instability, and acute symptoms (Reeps et al); (Dardik) (Commentary). 2008;48:417-24

Postoperative care
Redefining postoperative surveillance after endovascular aneurysm repair: recommendations based on 5-year follow-up in the US Zenith multicenter trial (Stemmerd III et al); (Rockman) (Commentary). 2008;48:278-85

Postoperative complications

Colonic ischemia complicating open vs endovascular abdominal aortic aneurysm repair (Perry et al). 2008;48:272-7

A percutaneous arterial closure protocol can decrease complications after endovascular interventions in vascular surgery patients (Goodney et al). 2008;48:1481-8

Perimalleolar and pedal thromboembolectomy and bypasses to treat distal embolization during aortoiliac aneurysm repairs (Gargiulo et al). 2008;48:43-6

Treatment for peripheral arterial obstructive disease: an appraisal of the economic outcome of complications (Flu et al). 2008;48:368-76, 368.e1-e11

Use of vacuum assisted closure (VAC) therapy in treating lymphatic complications after vascular procedures: new approach for lymphoceles (Hamed et al). 2008;48:1520-3

Postthrombotic syndrome

Lower extremity arterial inflow is adversely affected in patients with venous disease (Paolini et al). 2008;48:960-4

Posture
Validity of a method for determination of the ankle-brachial index in the seated position (Gornik et al). 2008;48:1204-10
Powerlink system; see Blood vessel prosthesis

Practice guideline
Arteriovenous hemodialysis access: the Society for Vascular Surgery practice guidelines (Sidawy). 2008;48:S1
Methodology for clinical practice guidelines for the management of arteriovenous access (Murad et al). 2008;48:S26-30

Professional role

Progenitor cells; see Stem cells

Prognosis
Regarding “Growth predictors and prognosis of small abdominal aortic aneurysms” (Paraskevas) (Letter); (Schlös al et al) (Reply). 2008;48:1067

Prostheses and implants
Impaired graft healing due to hypercholesterolemia is prevented by dietary supplementation with α-tocopherol (Miyazaki et al). 2008;48:986-93

Prosthesis design

Prosthesis failure
First report of a late type III endoleak from fabric tears of a Zenith stent graft (Wanhainen et al). 2008;48:723-6 (Case rep.)
Spontaneous re-expansion of a collapsed thoracic endoprosthesis: case report (Pontón et al). 2008;48:1585-8 (Case rep.)
A technique for increased accuracy in the placement of the “giant” Palmaz stent for treatment of type IA endoleak after endovascular abdominal aneurysm repair (Kim et al). 2008;48:755-7 (Tech. Note)

Prosthesis-related infections
Brachial artery ligation with total graft excision is a safe and effective approach to prosthetic arteriovenous graft infections (Schanzer et al). 2008;48:655-8

Protein deficiency
Impact of protein deficiency on venous ulcer healing (Legnendre et al). 2008;48:688-93

Pseudoaneurysm; see Aneurysm, false

Pulmonary embolism
Fatal pulmonary embolus associated with asymptomatic popliteal venous aneurysm (Cox et al). 2008;48:1040

Pulsatile flow
Experimental study of hemodynamics in procedures to treat access-related ischemia (Zanow et al). 2008;48:1559-65

R

Radiation injuries
Endovascular treatment for carotid artery stenosis after neck irradiation (Favre et al). 2008;48:852-8

Receptors, lepin
Leptin receptor is elevated in carotid plaques from neurologically symptomatic patients and positively correlated with augmented macrophage density (Schneiderman et al). 2008;48:1146-55

Reconstructive surgical procedures

Reflex
Integrity of veno-arteriolar reflex determines level of microvascular flow enhancement by intermittent pneumatic compression (Husmann et al). 2008;48:1509-13

Regional blood flow
Correlation of intraoperative blood flow measurement with autogenous arteriovenous fistula outcome (Lin et al). 2008;48:167-72

Reimbursement mechanisms

Renal artery
Endovascular management of atherosclerotic renovascular disease: early results following primary intervention (Corriere et al). 2008;48:580-8
Intra-abdominal fat and metabolic syndrome are associated with larger infrarenal aortic diameters in patients with clinically evident arterial disease (Gorter et al). 2008;48:114-20
Regarding “Endovascular repair of para-anastomotic aortic aneurysms” (Scurr et al) (Letter); (Sachdev and Marin) (Reply). 2008;48:258-9
Renal artery saccular aneurysm (Park et al). 2008;48:226
Repair of complex renal artery aneurysms by laparoscopic nephrectomy with ex vivo repair and autotransplantation (Gallagher et al). 2008;48:1408-13
Saphenous vein graft aneurysm with graft-enteric fistula after renal artery bypass (Levy et al). 2008;48:738-40 (Case rep.)

Renal artery obstruction
Evaluation of renal artery stenosis with hemodynamic parameters of Doppler sonography (Li et al). 2008;48:323-8
The long-term outcomes of percutaneous therapy for renal artery fibromuscular dysplasia (Davies et al). 2008;48:865-71

Renal artery stenosis; see Renal artery obstruction

Renal insufficiency, chronic
Effect of chronic renal insufficiency on outcomes of carotid endarterectomy (Sidawy et al). 2008;48:1423-30

Reperfusion injury
Apolipoprotein E−/− mice have delayed skeletal muscle healing after hind limb ischemia–reperfusion (Kang et al). 2008;48:701-8

Repressor proteins
Adenovirus-mediated intra-arterial delivery of cellular repressor of E1A-stimulated genes inhibits neointima formation in rabbits after balloon injury (Han et al). 2008;48:201-9

Resuscitation orders
How far goes DNR? (Jones and McCullough). 2008;48:1630-1
Resveratrol; see Stillbenes
RNA, messenger

Resveratrol attenuates ischemic brain damage in the delayed phase after stroke and induces messenger RNA and protein expression for angiogenic factors (Dong et al). 2008;48:709-14

S

Saphenous vein

An anatomical study of femoral vein valves near the saphenofemoral junction (Mühlberger et al). 2008;48:994-9

Aneurysmal dilatation of the great saphenous vein stump after endovenous laser ablation (Eidson et al). 2008;48:1037-9 (Case rep.)

Assessment of techniques to reduce sclerosant foam migration during ultrasound-guided sclerotherapy of the great saphenous vein (Hill et al). 2008;48:934-9

Duplex ultrasound changes in the great saphenous vein after endosaphenous laser occlusion with 808-nm wavelength (Cocoros et al). 2008;48:1262-71

Endovenous ablation with laser for great saphenous vein insufficiency and tributary varices: a retrospective evaluation (Lu et al). 2008;48:675-9

Endovenous laser and echo-guided foam ablation in great saphenous vein reflux: one-year follow-up results (Gonzalez-Zeh et al). 2008;48:940-6

The importance of deep venous reflux velocity as a determinant of outcome in patients with combined superficial and deep venous reflux treated with endovenous saphenous ablation (Marston et al). 2008;48:400-6

The present status of surgery of the superficial venous system in the management of venous ulcer and the evidence for the role of perforator interruption (O'Donnell, Jr). 2008;48:1044-52 (Review)

A prospective evaluation of the outcome after small saphenous varicose vein surgery with one-year follow-up (O'Hare et al); (Kistner) (Commentary). 2008;48:669-74

Saphenous vein graft aneurysm with graft-enteric fistula after renal artery bypass (Ley et al). 2008;48:738-40 (Case rep.)

Sclerotherapy

Assessment of techniques to reduce sclerosant foam migration during ultrasound-guided sclerotherapy of the great saphenous vein (Hill et al). 2008;48:934-9

Endovenous laser and echo-guided foam ablation in great saphenous vein reflux: one-year follow-up results (Gonzalez-Zeh et al). 2008;48:940-6

Incidence of soft tissue injury and neuropathy after embolo/sclerotherapy for congenital vascular malformation (Lee et al). 2008;48:1286-91

Seroma

Experience with covered stents for the management of hemodialysis polytetrafluoroethylene graft seromas (Gargiulo et al). 2008;48:216-17 (Case rep.)

Severity of illness index

Sex factors

Percutaneous intervention for infragenital occlusive disease in women: equivalent outcomes despite increased severity of disease compared with men (DeRubertis et al). 2008;48:150-8

Smoking

Substitution of smokeless tobacco for cigarettes in Buerger’s disease does not prevent limb loss (Lawrence et al). 2008;48:210-12 (Case rep.)

Society for Clinical Vascular Surgery

Without prejudice (Calligaro). 2008;48:237-43 (Presidential Address)

Society for Vascular Surgery

Soft tissue injuries

Incidence of soft tissue injury and neuropathy after embolo/sclerotherapy for congenital vascular malformation (Lee et al). 2008;48:1286-91

Spinal cord

Magnetic resonance angiography of collateral blood supply to spinal cord in thoracic and thoracoabdominal aortic aneurysm patients (Backes et al). 2008;48:261-71

Spinal cord ischemia

Interleukin-1 receptor antagonist attenuates the severity of spinal cord ischemic injury in rabbits (Akuwada et al). 2008;48:694-700

Strategies to improve spinal cord ischemia in endovascular

Spinal fusion
Vascular injury during anterior exposure of the spine (Hamdan et al). 2008;48:650-4

Splanchnic artery; see Celiac artery; Mesenteric arteries
Splenicectomy
An unusual presentation of pedunculated thrombus in the distal arch of the aorta after splenectomy for B-cell lymphoma (Rafiq et al). 2008;48:1603-4

Splenic artery
Successful treatment tailored to each splanchnic arterial lesion due to segmental arterial mediolysis (SAM): report of a case (Hashimoto et al). 2008;48:1338-41 (Case rep.)

Stents
Alert for increased long-term follow-up after carotid artery stenting: results of a prospective, randomized, single-center trial of carotid artery stenting vs carotid endarterectomy (Steinbauer et al). 2008;48:93-8
Angioplasty with stent graft versus bare stent for recurrent cecal arch stenosis in autogenous arterial access for hemodialysis: a prospective randomized clinical trial (Shemesh et al). 2008;48:1524-31
Basic fibroblast growth factor slow release stent graft for endovascular aortic aneurysm repair: a canine model experiment (Kajimoto et al). 2008;48:1306-14
Carotid artery stenting: a promising therapeutic option for carotid artery stenosis or a bubble about to burst? (Paraskevas) (Letter); (Steinbauer et al) (Reply). 2008;48:1641
Carotid artery stenting has increased rates of post-procedure stroke, death, and resource utilization than does carotid endarterectomy in the United States, 2005 (McPhee et al). 2008;48:1442-50
Carotid endarterectomy with adjunctive cephalad carotid stenting: complementary, not competitive, techniques (Tameo et al). 2008;48:351-4
Coil-assisted false lumen thrombosis in complicated chronic type B dissection (Hager et al). 2008;48:465-8 (Case rep.)
Early and midterm results after endovascular stent graft repair of penetrating aortic ulcers (Geisbusch et al). 2008;48:1361-8
Endovascular management of atherosclerotic renovascular disease: early results following primary intervention (Corriere et al). 2008;48:580-8
Endovascular repair of stent-graft collapse by stent-protected angioplasty using a femoral-brachial guidewire (Kotelis et al). 2008;48:1609-12 (Case rep.)
Endovascular treatment of arch and proximal thoracic aortic lesions (Wang et al). 2008;48:64-8
Endovenous stent-assisted coil embolization for a symptomatic femoral vein aneurysm (Ross et al). 2008;48:1032-6 (Case rep.)
Experience with covered stents for the management of hemodialysis polytetrafluoroethylene graft seromas (Gargiulo et al). 2008;48:216-17 (Case rep.)
First report of a late type III endoleak from fabric tears of a Zenith stent graft (Wanhaiangen et al). 2008;48:723-6 (Case rep.)
Physiologic coarctation of the aorta resulting from proximal protrusion of thoracic aortic stent grafts into the arch (Go et al). 2008;48:1007-11 (Case rep.)
Regarding “A randomized trial of carotid artery stenting with and without cerebral protection” (Kastrup et al) (Letter); (Makaroun) (Reply). 2008;48:504-5
and without cerebral protection” (Kastrup et al) (Letter); (Makaroun) (Reply). 2008;48:505; Setacci and de Donato) (Letter); (Makaroun) (Reply). 2008;48:504-5
Regarding “A randomized trial of carotid stenting with and without cerebral protection” (LoGerfo) (Letter). 2008;48: 775
Regarding “In-stent restenosis after carotid artery stenting is asymptomatic because of low embolic potential” (Gallerini et al) (Letter); (Lal) (Reply). 2008;48:257-8
Regarding “Stenting for femoropopliteal lesions” (Schillinger and Minar) (Letter); (Mwipatayi) (Reply). 2008;48:252-3
Selective stenting in subintimal angioplasty: analysis of primary stent outcomes (Schmieder et al). 2008;48:1175-81
Stenting vs above knee polytetrafluoroethylene bypass for TransAtlantic Inter-Society Consensus-II C and D superficial femoral artery disease (Dosluoglu et al). 2008;48: 1166-74
Successful devascularization of carotid body tumors by covered stent placement in the external carotid artery (Scanlon et al). 2008;48:1322-4 (Case rep.)
Venous stenting across the inguinal ligament (Neglén et al). 2008;48:1255-61
Surgical flaps
Resveratrol attenuates ischemic brain damage in the delayed phase after stroke and induces messenger RNA and protein expression for angiogenic factors (Dong et al). 2008;48:709-14

Stress, mechanical
Measurement and analysis of ultimate mechanical properties, stress-strain curve fit, and elastic modulus formula of human abdominal aortic aneurysm and nonaneurysmal abdominal aorta (Xiong et al). 2008;48:189-95

Stroke; see Cerebrovascular accident
Carotid artery stenting has increased rates of post-procedure stroke, death, and resource utilization than does carotid endarterectomy in the United States, 2005 (McPhee et al). 2008;48:1442-50
Occam’s razor: intervene early to prevent more strokes! (Naylor). 2008;48:1053
Regarding “Symptomatic acute occlusion of the internal carotid artery: reappraisal of urgent vascular reconstruction based on current stroke imaging” (Lev) (Letter); (Weis-Müller and Sandmann) (Reply). 2008;48:1068-9

Subclavian artery

Subscapular artery; see Axillary artery
Superior mesenteric artery; see Mesenteric artery, superior

Surgical Ethics Challenges
Resolution of retribution (Jones and McCullough). 2008;48:244-5
Surgical education: Eschewing the doing (Jones and McCullough). 2008;48:1060-1

Surgical flaps

Surgical procedures, elective

Technical Notes

Tetrazoles
Regarding “Cilostazol reduces restenosis after endovascular therapy in patients with femoropopliteal lesions” (Dindyal et al) (Letter); (Iida) (Reply). 2008;48:1357

Thoracic aortic aneurysm; see Aortic aneurysm, thoracic

Thoracic duct

Thoracic injuries
Regarding “Delayed presentation of aortic injury by pedicle screws: report of two cases and review of the literature” (Samdani) (Letter); (Kakkos and Shepard) (Reply). 2008;48:1067-8

Thromboangiitis obliterans
Substitution of smokeless tobacco for cigarettes in Buerger’s disease does not prevent limb loss (Lawrence et al). 2008;48:210-12 (Case rep.)

Thrombocytopenia
Heparin-platelet factor 4 antibodies are frequent after vascular surgery but are not a frequent cause of graft thrombosis or thrombocytopenia (Alexy et al). 2008;48:377-81

Thromboembolism
The antithrombotic effect of dextran-40 in man is due to enhanced fibrinolysis in vivo (Jones et al). 2008;48:715-22

Thrombolysis
The quantitative benefit of isolated, segmental, pharmacomechanical thrombolysis for iliofemoral venous thrombosis (Martinez Trabal et al). 2008;48:1532-7

Thrombosis
An unusual presentation of pedunculated thrombus in the distal arch of the aorta after splenectomy for B-cell lymphoma (Rafiq et al). 2008;48:1603-4
Arginase blockade lessens endothelial dysfunction after thrombosis (Lewis et al). 2008;48:441-6
Bleeding into the intraluminal thrombus in abdominal aortic aneurysms is associated with rupture (Roy et al). 2008;48:1108-13
Cardiovascular risk profile and outcome of patients with abdominal aortic aneurysm in out-patients with atherothrombosis: data from the Reduction of Atherothrombosis for Continued Health (REACH) Registry (Baumgartner et al). 2008;48:808-14
Celiac artery thrombosis in a young patient with multiple platelet receptor polymorphisms and local compression syndrome (Rudolph et al). 2008;48:1355-7 (Case rep.)
 Coil-assisted false lumen thrombosis in complicated chronic type B dissection (Hager et al). 2008;48:465-8 (Case rep.)
Failure properties of intraluminal thrombus in abdominal aortic aneurysm under static and pulsating mechanical loads (Gasser et al). 2008;48:179-88
Heparin-platelet factor 4 antibodies are frequent after vascular surgery but are not a frequent cause of graft thrombosis or thrombocytopenia (Alexy et al). 2008;48:377-81
Superficial femoral artery thrombosis as a cause for distal embolism in primary antiphospholipid syndrome (Lauvao et al). 2008;48:472-7 (Case rep.)

Thymidine phosphorylase

Tibial arteries
Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients with tissue loss (Dosluoglu et al). 2008;48:137-43
Regarding “Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients with tissue loss” (Dardik) (Letter); (Dosluoglu et al) (Reply). 2008;48:1644

Tissue engineering
An endogenously deposited fibrin scaffold determines con-
Tobacco, smokeless
Substitution of smokeless tobacco for cigarettes in Buerger’s disease does not prevent limb loss (Lawrence et al. 2008; 48:210–12 (Case rep.).

alpha-Tocopherol
Impaired graft healing due to hypercholesterolemia is prevented by dietary supplementation with α-tocopherol (Miyazaki et al. 2008; 48:986–93.

Tomography, emission-computed
Reappraisal of velocity criteria for carotid bulb/internal carotid artery stenosis utilizing high-resolution B-mode ultrasound validated with computed tomography angiography (Shaanal et al.); (Rockman) (Commentary). 2008; 48: 104–13

Tomography, X-ray computed
Incidence and significance of nonaneurysmal-related computed tomography scan findings in patients undergoing endovascular aortic aneurysm repair (Indes et al. 2008; 48: 286–90

Simultaneous sizing and preoperative risk stratification for thoracic endovascular aneurysm repair: role of gated computed tomography (Schloesser et al. 2008; 48:561–70

Transcranial Doppler ultrasonography; see Ultrasonography, Doppler, transcranial

Transient ischemic attack; see Ischemic attack, transient

Transluminal angioplasty; see Angioplasty, balloon

Trauma; see Wounds and injuries

Treatment outcome; see also Outcome assessment (health care)
Functional outcome after thoracoabdominal aneurysm repair (Crawford et al. 2008; 48:828–35

The long-term outcomes of percutaneous therapy for renal artery fibromuscular dysplasia (Davies et al. 2008; 865–71

Long-term results of combined common femoral endarterectomy and iliac stenting/stent grafting for occlusive disease (Chang et al. 2008; 48:362–7

Midterm outcome after the distal revascularization and interval ligation (DRIL) procedure (Huber et al. 2008; 48:926–33

Outcomes after endarterectomy for chronic mesenteric ischemia (Mell et al. 2008; 48:1132–8

Outcomes of endovascular interventions for TASC II B and C femoropopliteal lesions (Baril et al. 2008; 48:627–33

Outcomes of surgical management for popliteal artery aneurysms: an analysis of 583 cases (Johnson III et al. 2008; 48: 845–51

Pivotal results of the Medtronic Vascular Talent Thoracic Stent Graft System: the VALOR trial (Fairman et al. 2008; 48: 546–54

Regarding “Radiocephalic and brachiocephalic arteriovenous fistula outcomes in the elderly” (Lazarides et al) (Letter); (Weale) (Reply). 2008; 48:251–2

Thoracic aortic lesions treated with the Zenith TX1 and TX2 thoracic devices: intermediate- and long-term outcomes (Morales et al. 2008; 48:54–63

Trends and outcomes of concurrent carotid revascularization and coronary bypass (Timaran et al. 2008; 48:355–61, 355.e1–e8

Tuberculosis
Elastic fibers reconstructed using adenovirus-mediated expression of tropoelastin and tested in the elastase model of abdominal aortic aneurysm in rats (Xiong et al. 2008; 965–73

U

Ulcer
Early and midterm results after endovascular stent graft repair of penetrating aortic ulcers (Geisbüsch et al. 2008; 48:1361–8

Ultrasonography, Doppler, color
Evaluation of renal artery stenosis with hemodynamic parameters of Doppler sonography (Li et al. 2008; 48:323–8

Ultrasonography, Doppler, duplex
Duplex ultrasound changes in the great saphenous vein after endosaphenous laser occlusion with 808-nm wavelength (Corcos et al. 2008; 48:1262–71

Efficacy of duplex ultrasound surveillance after infrainguinal vein bypass may be enhanced by identification of characteristics predictive of graft stenosis development (Tinder et al. 2008; 48:613–18

On the mechanism of action of pneumatic compression devices: combined magnetic resonance imaging and duplex ultrasound investigation (Lurie et al. 2008; 48:1000–6

Optimal carotid duplex velocity criteria for defining the severity of carotid in-stent restenosis (AbuRahma et al. 2008; 48: 589–94

Reappraisal of velocity criteria for carotid bulb/internal carotid artery stenosis utilizing high-resolution B-mode ultrasound validated with computed tomography angiography (Shaanal et al); (Rockman) (Commentary). 2008; 48:104–13

Ultrasonography, Doppler, transcranial
Transcranial Doppler ultrasonography of the basilar artery utilizing high-resolution B-mode ultrasound validated with computed tomography angiography (Shaalan et al); (Rockman) (Commentary). 2008; 48:257–8

Ultrasonography, interventional
Assessment of techniques to reduce sclerosant foam migration during ultrasound-guided sclerotherapy of the great saphenous vein (Hill et al. 2008; 48:934–9

Regarding “Bedside vena cava filter placement with intravascu-
lar ultrasound: a simple, accurate, single venous access method” (Passman) (Letter); (Jacobs) (Reply). 2008;48:257

Ureteral obstruction

Urologic surgical procedures

Vacuum assisted closure

Vacuose ulcer

The present status of surgery of the superficial venous system in the management of venous ulcer and the evidence for the role of perforator interruption (O’Donnell, Jr). 2008;48:1044-52 (Review)

Varicose veins

Endovenous ablation with laser for great saphenous vein insufficiency and tributary varices: a retrospective evaluation (Lu et al). 2008;48:675-9

Prolonged increases in vein wall tension increase matrix metalloproteinases and decrease constriction in rat vena cava: potential implications in varicose veins (Raffetto et al). 2008;48:447-56

A prospective evaluation of the outcome after small saphenous vein surgery with one-year follow-up (O’Hare et al); (Kistner) (Commentary). 2008;48:669-74

Vascular diseases
Endovascular management of atherosclerotic renovascular disease: early results following primary intervention (Corriere et al). 2008;48:580-8

Insurance status predicts access to care and outcomes of vascular disease (Giacovelli et al). 2008;48:905-11

Vascular injury during anterior exposure of the spine (Hamdan et al). 2008;48:650-4

Vascular Images
An unusual presentation of pedunculated thrombus in the distal arch of the aorta after splenectomy for B-cell lymphoma (Rafiq et al). 2008;48:1603-4

Combined replacement of infrarenal aorta and inferior vena cava after en bloc resection of retroperitoneal extrarenal osteosarcoma (Schneider et al). 2008;48:478-9

Ergotism (Branccacio et al). 2008;48:754

Fatal pulmonary embolus associated with asymptomatic popliteal venous aneurysm (Cox et al). 2008;48:1040

Renal artery saccular aneurysm (Park et al). 2008;48:226

Vertebral erosion due to chronic contained rupture of an abdominal aortic aneurysm (Caynak et al). 2008;48:1342

Vascular malformation
Incidence of soft tissue injury and neuropathy after embol/sclerotherapy for congenital vascular malformation (Lee et al). 2008;48:1286-91

Vascular patency
Percutaneous intervention for infrarenal femoral perforation disease in women: equivalent outcomes despite increased severity of disease compared with men (DeRabberts et al). 2008;48:150-8

Regarding “Stenting for femoropopliteal lesions” (Schilling and Minar) (Letter); (Mwipatayi) (Reply). 2008;48:252-3

Venous stenting across the inguinal ligament (Neglén et al). 2008;48:1255-61

Vascular surgical procedures
Chronic type B dissecting aortoiliac aneurysm repair complicated by congenital pelvic kidney (Coney et al). 2008;48:727-9 (Case rep.)

Cognitive training improves clinically relevant outcomes during simulated endovascular procedures (Van Herzeele et al). 2008;48:1223-30

Early Palma procedure after iliac vein injury in abdominal penetrating trauma (Alcocer et al). 2008;48:745-8 (Case rep.)

The effect of implementation of an optimized care protocol on the outcome of aortoenteric hemodialysis access surgery (Flu et al). 2008;48:659-68

Endovascular vs open repair of acute abdominal aortic aneurysms—A systematic review and meta-analysis (Sadat et al). 2008;48:227-36 (Review)

Heparin-platelet factor 4 antibodies are frequent after vascular surgery but are not a frequent cause of graft thrombosis or thrombocytopenia (Alexy et al). 2008;48:377-81

Impact of runoff on superficial femoral artery endoluminal interventions for rest pain and tissue loss (Davies et al). 2008;48:619-26

Mortality of ruptured abdominal aortic aneurysm treated with open or endovascular repair (Verhoeven et al). 2008;48:1396-400

Open thoracic or thoracoabdominal aortic aneurysm repair after previous abdominal aortic aneurysm surgery (Schrösser et al). 2008;48:761-8 (Review)

A percutaneous arterial closure protocol can decrease complications after endovascular interventions in vascular surgery patients (Goodney et al). 2008;48:1481-8

Percutaneous intervention for infrarenal occlusive disease in women: equivalent outcomes despite increased severity of disease compared with men (DeRubertis et al). 2008;48: 150-8

Predictors of morbidity and mortality with endovascular and open thoracic aneurysm repair (Dillavou and Makaroun). 2008;48:1114-20

Regarding “Endovascular repair of para-anastomotic aortic aneurysms” (Scurr et al) (Letter); (Sachdev and Marin) (Reply). 2008;48:258-9

Regarding “Endovascular vs open repair of acute abdominal aortic aneurysms–A systematic review and meta-analysis” (Paraskevas) (Letter); (Sadat and Hayes) (Reply). 2008;48: 255-6

Regarding “Peroneal artery-only runoff following endovascular revascularizations is effective for limb salvage in patients with tissue loss” (Dardik) (Letter); (Doshouglu et al) (Reply). 2008;48:1644

Regarding “Statins are independently associated with reduced mortality in patients undergoing infrarenal bypass graft surgery for critical limb ischemia” (Maschirelli et al) (Letter); (Schanzer) (Reply). 2008;48:1639

Saphenous vein graft aneurysm with graft-enteric fistula after renal artery bypass (Levy et al). 2008;48:738-40 (Case rep.)

Supra-aortic hybrid endovascular procedures for complex thoracic aortic disease: single center early to midterm results (Chan et al). 2008;48:571-9

Timing of referral for vascular access placement: a systematic review (Mural et al). 2008;48:531-3

Total laparoscopic juxtarenal abdominal aortic aneurysm repair (Coggia et al). 2008;48:37-42

Use of vacuum assisted closure (VAC) therapy in treating lymphatic complications after vascular procedures: new approach for lymphoceles (Hamed et al). 2008;48:1520-3

Vasodilation

Successful lower extremity angioplasty improves brachial artery flow-mediated dilation in patients with peripheral arterial disease (Husmann et al). 2008;48:1211-6

Vena cava filters

Late complication from a retrievable inferior vena cava filter with associated caval, aortic, and duodenal perforation: a case report (Veroux et al). 2008;48:223-5 (Case rep.)

Regarding “Bedside vena cava filter placement with intravascular ultrasound: a simple, accurate, single venous access method” (Passman) (Letter); (Jacobs) (Reply). 2008;48: 257

Vena cava, inferior

Combined replacement of infrarenal aorta and inferior vena cava after en bloc resection of retroperitoneal extraosseous osteosarcoma (Schneider et al). 2008;48:478-9

Late complication from a retrievable inferior vena cava filter with associated caval, aortic, and duodenal perforation: a case report (Veroux et al). 2008;48:223-5 (Case rep.)

Prolonged increases in vein wall tension increase matrix metalloproteinases and decrease constriction in rat vena cava: potential implications in varicose veins (Raffetto et al). 2008;48:447-56

Thrombosed iliac venous aneurysm: a rare form of presentation of a congenital anomaly of the inferior vena cava (Ysa et al). 2008;48:218-22 (Case rep.)

Venous insufficiency

Distribution and prevalence of reflux in the superficial and deep venous system in the general population – results from the Bonn Vein Study, Germany (Maurins et al). 2008;48: 680-7

Endovenous ablation with laser for great saphenous vein insufficiency and tributary varices: a retrospective evaluation (Lu et al). 2008;48:675-9

Endovenous laser ablation improves venous outcomes irrespective of the presence of deep venous insufficiency (Knipp et al). 2008;48:1538-45

Endovenous laser and echo-guided foam ablation in great saphenous vein reflux: one-year follow-up results (Gonzalez-Zech et al). 2008;48:940-6

Hyperemic maximal venous outflow unmasks symptomatic lower extremity venous obstruction (Paolini et al). 2008;48:749-53 (Case rep.)

The importance of deep venous reflux velocity as a determinant of outcome in patients with combined superficial and deep venous reflux treated with endovenous saphenous ablation (Marston et al). 2008;48:400-6

Increasing awareness about venous disease: the American Venous Forum expands the National Venous Screening Program (McLafferty et al). 2008;48:394-9

Lower extremity arterial inflow is adversely affected in patients with venous disease (Paolini et al). 2008;48:960-4

The present status of surgery of the superficial venous system in the management of venous ulcer and the evidence for the role of perforator interruption (O’Donnell, Jr). 2008;48: 1044-52 (Review)

Venous thrombosis

Deep vein thrombosis resolution is impaired in diet-induced type 2 diabetic mice (Bouzeghrane et al). 2008;48: 1575-84

Duplex scan for deep vein thrombosis—defining who needs an examination of the contralateral asymptomatic leg (Pennell et al). 2008;48:413-6

Endovenous laser ablation improves venous outcomes irrespective of the presence of deep venous insufficiency (Knipp et al). 2008;48:1538-45

Incidence of ipsilateral postoperative deep venous thrombosis in the amputated lower extremity of patients with peripheral obstructive arterial disease (Matiello et al). 2008;48: 1514-9

Venous thrombosis

Deep vein thrombosis resolution is impaired in diet-induced type 2 diabetic mice (Bouzeghrane et al). 2008;48: 1575-84

Duplex scan for deep vein thrombosis—defining who needs an examination of the contralateral asymptomatic leg (Pennell et al). 2008;48:413-6

Endovenous laser ablation improves venous outcomes irrespective of the presence of deep venous insufficiency (Knipp et al). 2008;48:1538-45

Incidence of ipsilateral postoperative deep venous thrombosis in the amputated lower extremity of patients with peripheral obstructive arterial disease (Matiello et al). 2008;48: 1514-9
Increasing awareness about venous disease: the American Venous Forum expands the National Venous Screening Program (McLafferty et al). 2008;48:394-9
The quantitative benefit of isolated, segmental, pharmacomechanical thrombolysis for iliofemoral venous thrombosis (Martinez Trabal et al). 2008;48:1532-7
Thrombosed iliac venous aneurysm: a rare form of presentation of a congenital anomaly of the inferior vena cava (Ysa et al). 2008;48:218-22 (Case rep.)

Venous ulcer; see Varicose ulcer

Venous valves
An anatomical study of femoral vein valves near the saphenofemoral junction (Mühlberger et al). 2008;48:994-9

Vertebral artery
Transcranial Doppler ultrasonography of the basilar artery in patients with retrograde vertebral artery flow (Harper et al). 2008;48:859-64

Viscera

Walking
Association between daily ambulatory activity patterns and exercise performance in patients with intermittent claudication (Gardner et al). 2008;48:1238-44

Women’s health
More patients are treated for nonruptured abdominal aortic aneurysms, but the proportion of women remains unchanged (Larsson et al). 2008;48:802-7

Workload
Statistical modeling of the volume-outcome effect for carotid endarterectomy for 10 years of a statewide database (Nazarian et al); (Kresowik) (Commentary). 2008;48:343-50

Wound healing
Impact of protein deficiency on venous ulcer healing (Legendre et al). 2008;48:688-93
The relationship between cytokine concentrations and wound healing in chronic venous ulceration (Gohel et al). 2008;48:1272-7

Wounds and injuries
Late complication from a retrievable inferior vena cava filter with associated caval, aortic, and duodenal perforation: a case report (Veroux et al). 2008;48:223-5 (Case rep.)

Wounds, penetrating
Early Palma procedure after iliac vein injury in abdominal penetrating trauma (Alcocer et al). 2008;48:745-8 (Case rep.)
