The authors regret that in the original published paper entitled “The efficacy of intranasal live attenuated influenza vaccine in children 2 through 17 years of age: A meta-analysis of 8 randomized controlled studies,” there were errors in Fig. 2. The Bracco Neto 2009 study was erroneously included in the “B (Original classification)” and “B (B variants as dissimilar)” sections. The Vesikari 2006 study was erroneously excluded from the “B (B variants as dissimilar)” section. These errors have been corrected in the revised figure and do not affect the integrity of the results or modify the conclusions.

The revised figure is reproduced here.

The authors would like to apologise for any inconvenience caused.
