Publisher note on the article: “Approach theory meets probability theory” [Topology Appl. 158 (7) (2011) 836–852]

B. Berckmoes*, R. Lowen, J. Van Casteren

Department of Mathematics and Computer Science, University of Antwerp, Belgium

The editors of *Topology and its Applications* and the *Journal of Mathematical Analysis and Applications* have learned that there are significant similarities in several parts of published work by B. Berckmoes, B. Lowen, and J. Van Casteren. The exact references are: “Approach theory meets probability theory” [*Topology Appl.* 158 (7) (2011) 836–852], and “Distances on probability measures and random variables” [*J. Math. Anal. Appl.* 374 (2) (2011) 412–428]. The editors of both journals are satisfied that this unfortunate situation was an innocent mistake caused by inattention by the authors. This occurrence is deeply regretted by all parties.
