CONTENTS OF VOLUME 257

Number 1, November 1, 2002

Weight sum formulae in Lie algebra representations 1
John M. Burns and Michael J. Clancy

Representations of finitary Lie algebras 13
H. Strade

Relations for the Grothendieck groups of triangulated categories 37
Jie Xiao and Bin Zhu

Wreath operations in the group of automorphisms of the binary tree 51
A.M. Brunner and Said Sidki

Surfaces in $\mathbb{P}^4$ with extremal general hyperplane section 65
Nadia Chiarli, Silvio Greco, and Uwe Nagel

Self-dual modules of semisimple Hopf algebras 88
Yevgenia Kashina, Yorck Sommerhäuser, and Yongchang Zhu

A square matrix is congruent to its transpose 97
Dragomir Ž. Đoković and Khakim D. Ikramov

Valuation methods in group rings and in skew fields, I 106
A.I. Lichtman

Weyl modules for the Schur algebra of the alternating group 168
A. Henke and A. Regev

Number 2, November 15, 2002

Special Issue in Honor of J.G. Thompson on the Occasion of His 70th Birthday

Finite groups of $G_2(3)$-type 197
Michael Aschbacher

Determinants of integral ideal lattices and automorphisms of given characteristic polynomial 215
Eva Bayer-Fluckiger

Sastry automorphisms 222
E. Bombieri

$SL(2, 11)$ is $\mathbb{Q}$-admissible 244
Walter Feit

An equivariant analogue of Glauberman’s $ZJ$-Theorem 249
Paul Flavell
Automorphisms of even unimodular lattices and unramified Salem numbers
Benedict H. Gross and Curtis T. McMullen

Cross characteristic representations of symplectic and unitary groups
Robert Guralnick, Kay Magaard, Jan Saxl, and Pham Huu Tiep

Classification of 2F-modules, I
Robert M. Guralnick and Gunter Malle

Linear groups and collineation groups of translation planes
Chat Yin Ho

Local control in fusion systems of $p$-blocks of finite groups
Radha Kessar, Markus Linckelmann, and Geoffrey R. Robinson

Toward a characterization of the sporadic groups of Suzuki and Thompson
Inna Korchagina, Richard Lyons, and Ronald Solomon

The expected number of random elements to generate a finite group
Alexander Lubotzky

Equivalences of derived categories for symmetric algebras
Jeremy Rickard

Complexes de chaînes étales et courbes de Deligne–Lusztig
Raphaël Rouquier

On the doubly transitive permutation representations of $\text{Sp}(2n, \mathbb{F}_2)$
N.S. Narasimha Sastry and Peter Sin

Groups with a central factor of Lie type
F.G. Timmesfeld

Clifford classes for some overgroups of the special linear groups
Alexandre Turull
