Subject Index: Volume 1

Abstracts
See American College of Cardiology

Action potentials
Supernormal response and conduction in depressed isolated canine ventricular muscle exposed to high potassium concentration, 830

Adenine
Antiarrhythmic action of labetalol and its effect on adenosine metabolism in the isolated rat heart, 1296

Adenosine triphosphate
Time course of functional and biochemical recovery of myocardium salvaged by reperfusion, 1047

Air gap sign
Echocardiographic detection of pneumomediastinum and pneumopericardium, the air gap sign, 916

Alcohol abuse
Effect of whiskey on atrial vulnerability and "holiday heart," 816

Alpha-adrenoceptor antagonists
The effect of alpha- and beta-adrenoceptor antagonist agents on reperfusion ventricular fibrillation and metabolic status in the isolated perfused rat heart, 1056

American College of Cardiology
See also Journal of the American College of Cardiology
Abstracts of papers to be presented at the 32nd Annual Scientific Session of the American College of Cardiology, 577
Abstracts: young investigators' awards competition, 1183
New members of the college, 977
1983-1984 committee appointments, 1536
President's page: the next challenge: balancing individual quality care with community resources, 972
President's page: on the occasion of the 25th year of the Journal of the American College of Cardiology, 1

Aminone
Hemodynamic and regional blood flow distribution responses to dextran, hydralazine, isoproterenol and aminone during experimental cardiac tamponade, 1461

Anemia
Severe hemolytic anemia in patients with a porcine aortic valve prosthesis, 1174

Aneurysms
Hypertension and arterial aneurysm, 533

Angina pectoris
See also Chest pain
Angina caused by reduced vasodilator reserve of the small coronary arteries, 1359
A clinically relevant classification of chest discomfort, 574 (letter)
Clinical value of calcium antagonists in treatment of cardiovascular disorders, 355
Impairment of myocardial perfusion and function during painless myocardial ischemia, 924
Nonatherosclerotic myocardial ischemia, 1534 (editorial)
Objective evaluation of three dose levels of diltiazem in patients with chronic stable angina, 1144
Prevention of cardiovascular events in variant angina by long-term diltiazem therapy, 1507
Randomized, double-blind comparison of propranolol alone and a propranolol-verapamil combination in patients with severe angina of effort, 493
Silent myocardial ischemia during ambulatory electrocardiographic monitoring in patients with effort angina, 934
Variability in coronary hemodynamics in response to ergonovine in patients with normal coronary arteries and atypical chest pain, 797

Angiography
Cineangiography of the perimembranous ventricular septal defect with left ventricular-right atrial shunt, 1129
Digital subtraction intravenous left ventricular angiography: comparison with conventional intraventricular angiography, 858
Quantitative contrast angiography for assessment of ventricular performance in heart disease, 73
Two-dimensional echocardiographic and angiographic diagnosis of subpulmonary stenosis due to tricuspid valve pouch in complete transposition of the great arteries, 484

Angiography, intravenous digital
Digital subtraction intravenous left ventricular angiography: comparison with conventional intraventricular angiography, 858

Angiography, radionuclide
Evaluation of left ventricular function by radionuclide angiography during exercise in normal subjects and in patients with chronic coronary heart disease, 1518
Relative value of isotopic and isometric exercise radionuclide angiography to detect coronary artery disease, 790

Angioplasty, coronary
Coronary circulation dynamics before and after successful coronary angioplasty, 1268
Intraoperative angioplasty in the treatment of coronary artery disease, 970 (editorial)

Angioscopy
In vivo coronary angiography, 1311

Angiotensin-converting enzyme
Evaluation of a long-acting converting enzyme inhibitor (enalapril) for the treatment of chronic congestive heart failure, 1154
Hypertension and congestive heart failure: benefits of converting enzyme inhibition (captopril), 518

Anoxia
Effects of diltiazem on anoxic injury in the isolated rat heart, 1081

Antiarrhythmic drugs
Clinical factors predicting successful electrophyslogic-pharmacologic study in patients with ventricular tachycardia, 409
Perspectives and future trends in cellular electrophysiology: implications for the clinician, 317
Pharmacologic treatment of cardiac arrhythmias: 25 years of progress, 365
Predictors of the success or failure of medical therapy in patients with chronic recurrent sustained ventricular tachycardia: a discriminant analysis, 401

Antihypertensive therapy
Achievements in hypertension: a 25 year overview, 225
Hypertension and myocardial infarction, 528
Hypertension and stroke, 521

Antimicrobial therapy
Infective endocarditis: a 25 year overview of diagnosis and therapy, 280

Aortic atresia
Successful surgical repair of aortic atresia associated with normal left ventricle, 1503

Aortic dissection
Hypertension and arterial aneurysm, 533

Aortic insufficiency
Influence of acute aortic insufficiency on the hemodynamic importance of a coronary artery narrowing. II. Various magnitudes of aortic insufficiency, 1281

Aortic regurgitation
Chronic aortic regurgitation: prognostic value of left ventricular end-systolic dimension and end-diastolic radius/thickness ratio, 775
Left ventricular function in chronic aortic regurgitation, 1374

Aortic stenosis
Aortic stenosis and rupture of mitral chordae tendineae, 1018
Asymmetric septal hypertrophy in patients with aortic stenosis: an adaptive mechanism or a coexistence of hypertrophic cardiomyopathy? 783
Clinical and hemodynamic follow-up of left ventricular to aortic conduits in patients with aortic stenosis, 1135
Estimation of the severity of aortic valve stenosis by frequency analysis of the frequency response, 574 (letter)
murmur, 1315
Left ventricular outflow obstruction after aortic valve replacement: detection with continuous wave Doppler ultrasound recording, 550

Aortic valve disease
Evaluation of platelet reactivity in patients with valvular heart disease, 1381

Aortic valve replacement
Chronic aortic regurgitation: prognostic value of left ventricular end-systolic dimension and end-diastolic radius/thickness ratio, 775
Left ventricular outflow obstruction after aortic valve replacement: detection with continuous wave Doppler ultrasound recording, 550
Severe hemolytic anemia in patients with a porcine aortic valve prosthesis, 1174

Apoplexy
Chance and sudden death, 164

Arginine vasopressin
Increased plasma arginine vasopressin levels in patients with congestive heart failure, 1385

Arrhythmias
See also Ventricular arrhythmias
Characterization of left ventricular mechanical function during arrhythmias by two-dimensional echocardiography. II. Location of the site of onset of premature ventricular systoles, 819
Clinical value of calcium antagonists in treatment of cardiovascular disorders, 355
Effect of whiskey on atrial vulnerability and “holiday heart,” 816
Electrocardiography of arrhythmias: from deductive analysis to laboratory confirmation—Twenty-five years of progress, 306
Perspectives and future trends in cellular electrophysiology: implications for the clinician, 317
Pharmacologic treatment of cardiac arrhythmias: 25 years of progress, 365
Twenty-five years of progress in the medical treatment of pediatric and congenital heart disease, 264

Ashman phenomenon
Electrocardiography of arrhythmias: from deductive analysis to laboratory confirmation—Twenty-five years of progress, 306

Asymptomatic coronary artery disease
Seminar on asymptomatic coronary artery disease: introduction, 922

Atherosclerosis
See also Coronary heart disease
Contribution of the risk factor concept to patient care in coronary heart disease, 13
Nonatherosclerotic myocardial ischemia, 113
Verapamil suppresses atherosclerosis in cholesterol-fed rabbits, 1453

Atrial appendages
Left juxtaposed atrial appendages: diagnostic two-dimensional echocardiographic features, 1330

Atrial fibrillation
Effect of whiskey on atrial vulnerability and “holiday heart,” 816

Atrial pacing
See Pacing, atrial

Atrial systolic notch
Atrial systolic notch on the interventricular septal echogram: an echocardiographic sign of constrictive pericarditis, 907

Atrioventricular block
Myocardial bridging as a cause of parasympathetic atrioventricular block, 965

Atrioventricular canal defect
Complete atrioventricular canal defect associated with congenitally corrected transposition of the great arteries: two-dimensional echocardiographic identification, 1123

Atrioventricular conduction
Bradycardias: clinical significance and management, 327
Clinical electrophysiology—a decade of progress, 292

Atrioventricular node
Effect of ouabain on the antriglorious refractory period of accessory atrioventricular connections in children, 1359
Lymphatic drainage from the ventricular septum to the atrioventricular node in human beings, 1119
Atrium
Atrial transport function in coronary artery disease: relation to left ventricular function, 1011
Clinical electrophysiology—a decade of progress, 292
Diagnosis of lipomatous hypertrophy of the atrial septum by two-dimensional echocardiography, 1352
Electrocardiography of arrhythmias: from deductive analysis to laboratory confirmation—twenty-five years of progress, 306
Atrium, left
Echocardiographic findings in 25 patients with left atrial myxoma, 1162
Left atrial myxoma and unrelated mitral valve disease, 1170
Atrium, right
Echocardiographic diagnosis of right atrial thromboembolism, 1167

Auscultation
The physiologic mechanisms of cardiac and vascular physical signs, 184

Balloon atrial septotomy
Twenty-five years of progress in the medical treatment of pediatric and congenital heart disease, 264

Baroreflexes
The Bezold-Jarisch reflex revisited. clinical implications of inhibitory reflexes originating in the heart, 90

Beta-adrenergic agonists
Regulation of myocardial contractility 1958–1983: an odyssey, 42

Beta-adrenergic blockade
Beta-adrenergic blocking agents after myocardial infarction: an undocumented need in patients at lowest risk, 1530
The effect of alpha- and beta-adrenergic antagonist agents on repolarization ventricular fibrillation and metabolic status in the isolated perfused rat heart, 1056
Intrinsic sympathomimetic activity and the effects of beta-adrenergic blocking drugs on vulnerability to ventricular fibrillation, 1442
Twenty-five years of progress in the medical treatment of pediatric and congenital heart disease, 264

Beta-adrenergic receptors
Recent advances in knowledge about beta-adrenergic receptors: application to clinical cardiology, 82

Bezold-Jarisch reflex
The Bezold-Jarisch reflex revisited: clinical implications of inhibitory reflexes originating in the heart, 90

Blacks
Racial differences in cardiac adaptation to essential hypertension determined by echocardiographic indexes, 1348

Blood flow
Angina caused by reduced vasodilator reserve of the small coronary arteries, 1359

Hemodynamic and regional blood flow distribution responses to dextran, hydralazine, isoproterenol and amrinone during experimental cardiac tamponade, 1461

Quantitative assessment of the effects of a fixed 50% coronary artery stenosis on regional myocardial flow reserve and transmural distribution of blood flow, 1273

Regional blood flow response to orthostasis in patients with congestive heart failure, 1391

Blood flow, coronary
Dobutamine and hydralazine: comparative influences of positive inotropy and vasodilation on coronary blood flow and myocardial energetics in nonischemic congestive heart failure, 499
Effects of chronic tobacco smoking on the coronary circulation, 421
Measurements of coronary blood flow and degree of stenosis: current clinical implications and continuing uncertainties, 31

Body surface area
Coronary artery surgery in women compared with men: analyses of risks and long-term results, 383

Bradycardia
Bradycarrhythmias: clinical significance and management, 327

Bundle branch block
Excess mortality and morbidity associated with right bundle branch and left anterior fascicular block, 1207
Right bundle branch block: long-term prognosis in apparently healthy men, 887

CADENZA
Computer-assisted diagnosis in the noninvasive evaluation of patients with suspected coronary artery disease, 444
Calcium
Changes in QTC interval induced with Renografin-76 and Hypaque-76 during coronary arteriography, 1489
Regulation of myocardial contractility 1958-1983: an odyssey, 42
Captopril
Cardiac function
Cardiac mechanics
Cardiac output
Cardiac tamponade
Cardiologists
Cardiomyopathy
Cardiac function
Cardiac function and myocardial contractility: a perspective, 52
Cardiac mechanics
Regulation of myocardial contractility 1958-1983: an odyssey, 42
Cardiac output
Hemodynamic measurements in clinical practice: a decade in review, 103
Cardiac reflexes
The Bezold-Jarisch reflex revisited: clinical implications of inhibitory reflexes originating in the heart, 90
Cardiac tamponade
Cardiac tamponade by loculated pericardial hematoma: limitations of M-mode echocardiography, 913
Contribution of echocardiography to the understanding of the pathophysiology of cardiac tamponade, 1180 (editorial)
Hemodynamic and regional blood flow distribution responses to dextran, hyaluronic acid, isoproterenol and amphetamine during experimental cardiac tamponade, 1461
The normal and diseased pericardium: current concepts of pericardial physiology, diagnosis and treatment, 240
Cardiologists
Patient reactions to the diagnosis of asymptomatic coronary artery disease: implications for the primary physician and consultant cardiologist, 956
The patient with heart disease and the cardiovascular physician and surgeon: 1958-1983, 6
Cardiomyopathy
Asymmetric septal hypertrophy in patients with aortic stenosis, an adaptive mechanism or a coexistence of hypertrophic cardiomyopathy? 783
Cardiomyopathy: how far have we come in 25 years, how far yet to go? 252
Differentiation of constrictive pericarditis and restrictive cardiomyopathy using digitized echocardiography, 541
Interventricular septal and free wall dynamics in hypertrophic cardiomyopathy, 1024
Cardioneuropathy
Chance and sudden death, 164
Cardiovascular training programs
Adult cardiovascular training programs in the United States, 565
Cardioversion
Adverse acute and chronic effects of electrical defibrillation and cardioversion on implanted unipolar cardiac pacing systems, 1413
Catecholamines
Exercise-induced myocardial ischemia in patients with coronary artery disease. lack of evidence for platelet activation or fibrin formation in peripheral venous blood, 1185
Intrinsic sympathomimetic activity effects of Beta-blocking drugs on vulnerability to ventricular fibrillation, 1442
Catheters
Hemodynamic measurements in clinical practice: a decade in review, 103
Intracardiac recording by catheter electrode of accessory pathway dephosphorylation, 468
Predictors of the success or failure of medical therapy in patients with chronic recurrent sustained ventricular tachycardia: a discriminant analysis, 401
Twenty-five years of progress in the medical treatment of pediatric and congenital heart disease, 264
Chest pain
A clinically relevant classification of chest discomfort, 574 (letter)
Experimental pain measurement in patients with asymptomatic myocardial ischemia, 940
Prognostic value of exercise thallium-201 imaging in patients presenting for evaluation of chest pain, 994
Variability in coronary hemodynamics in response to ergonovine in patients with normal coronary arteries and atypical chest pain, 797
Cholesterol
Contribution of the risk factor concept to patient care in coronary heart disease, 13
Verapamil suppresses atherosclerosis in cholesterol-fed rabbits, 1453
Cineangiography
Cineangiography of the perimembranous ventricular septal defect with left ventricular-right atrial shunt, 1129
Cold pressor test
Prevention by nifedipine of cold pressor-induced decrease in left ventricular ejection fraction, 1512
Computer methods
Computer-assisted diagnosis in the noninvasive evaluation of patients with suspected coronary artery disease, 444
Concealed conduction
Electrocardiography of arrhythmias: from deductive analysis to laboratory confirmation—twenty-five years of progress, 306
Congenital heart defects
See also Pediatric cardiology and specific defects
Complete atrioventricular canal defect associated with congenitally corrected transposition of the great arteries: two-dimensional echocardiographic identification, 1123
Left juxtaposed atrial appendages: diagnostic two-dimensional echocardiographic features, 1330
Morphologic features of the ductus arteriosus after prostaglandin E1 administration for ductus-dependent congenital heart defects, 471
Twenty-five years of progress in the medical treatment of pediatric and congenital heart disease, 264
Congestive heart failure
Dobutamine and hyaluronic acid: comparative influences of positive inotropy and vasodilation on coronary blood flow and myocardial energetics in nonsystemic congestive heart failure, 499
Evaluation of a long-acting converting enzyme inhibitor (enalapril) for the treatment of chronic congestive heart failure, 1154
Hypertension and congestive heart failure: benefits of converting enzyme inhibition (captopril), 518
Increased plasma arginine vasopressin levels in patients with congestive heart failure, 1385
Regional blood flow response to orthostasis in patients with congestive heart failure, 1391
Vasodilator therapy for acute myocardial infarction and chronic congestive heart failure, 133
Coronary arteries
Angina caused by reduced vasodilator reserve of the small coronary arteries, 1359
In vivo coronary angiography, 1311
Retrograde lysis of coronary artery thrombus by coronary venous streptokinase administration, 1262
Variability in coronary hemodynamics in response to ergonovine in patients with normal coronary arteries and atypical chest pain, 797
Coronary artery disease
Atrial transport function in coronary artery disease: relation to left ventricular function, 1011
Computer-assisted diagnosis in the noninvasive evaluation of patients with suspected coronary artery disease, 444
Contribution of the risk factor concept to patient care in coronary heart disease, 13
Diagnostic and prognostic significance of exercise-induced premature ventricular complexes in men and women: a four year follow-up, 1201
Dynamic vascular factors in the genesis of myocardial ischemia, 897
Effect of atrial pacing on intracoronary thrombomax production in coronary artery disease, 1194
Evaluation of left ventricular function by radionuclide angiography during exercise in normal subjects and in patients with chronic coronary heart disease, 1518

Exercise-induced myocardial ischemia in patients with coronary artery disease: lack of evidence for platelet activation or fibrin formation in peripheral venous blood, 1185

Influence of acute aortic insufficiency on the hemodynamic importance of a coronary artery narrowing. II. Various magnitudes of aortic insufficiency, 1281

Intraoperative angioplasty in the treatment of coronary artery disease, 970 (editorial)

Patient reactions to the diagnosis of asymptomatic coronary artery disease: implications for the primary physician and consultant cardiologist, 956

Quantitative contrast angiography for assessment of ventricular performance in heart disease, 73

Relative value of isotonic and isometric exercise radionuclide angiography to detect coronary artery disease, 790

Screening for asymptomatic coronary artery disease, 946

Seminar on asymptomatic coronary artery disease: introduction, 922

Significance of the upright T wave in precordial lead V1 in adults with coronary artery disease, 1213

Split dose thallium-201 dipyridamole imaging: a new technique for obtaining thallium images before and immediately after an intervention, 1302

Value of left ventricular ejection fraction during exercise in predicting the extent of coronary artery disease, 1002

Coronary blood flow

See Blood flow, coronary

Coronary bypass surgery

See Surgery, coronary bypass

Coronary care

Advances in clinical management of acute myocardial infarction in the past 25 years, 126

President’s page: the next challenge. balancing individual quality care with community resources, 972

Coronary circulation

Coronary circulation dynamics before and after successful coronary angioplasty, 1268

Effect of atrial pacing on intracoronary thrombopexy production in coronary disease, 1194

Effects of chronic tobacco smoking on the coronary circulation, 421

Symbiotic circulation, 975 (letter)

Coronary occlusion

Deleterious effects of incomplete myocardial reperfusion on ventricular arrhythmias, 1111

Intramyocardial current flow in acute coronary occlusion in the canine heart, 436

Systemic versus intracoronary streptokinase infusion in the treatment of acute myocardial infarction, 1254

Coronary reperfusion

See Myocardial reperfusion

Coronary stenosis

Electrocardiographic effects of myocardial ischemia induced by atrial pacing in dogs with coronary stenosis, 1

Repolarization changes with progressive left circumflex coronary artery narrowing, 1090

Measurements of coronary blood flow and degree of stenosis: current clinical implications and continuing uncertainties, 31

Quantitative assessment of the effects of a fixed 50% coronary artery stenosis on regional myocardial flow reserve and transmural distribution of blood flow, 1273

Value of left ventricular ejection fraction during exercise in predicting the extent of coronary artery disease, 1002

Coronary thrombosis

Coronary artery thrombosis: historical aspects, 893

Corrections

Adult cardiovascular training programs in the United States, 1184

Corrections, 1539

Cox classification model

Evaluation of prognosis one year after myocardial infarction, 985

Creatine kinase

Comparison of radionuclide and enzymatic estimate of infarct size in patients with acute myocardial infarction, 1405

Cyanotic heart disease

Surgery for cyanotic heart disease in the first year of life, 274

Dack, Simon

The Journal and Simon Dack, 5

Death, sudden

Chance and sudden death, 164

Excess mortality and morbidity associated with right bundle branch and left anterior fascicular block, 1207

Prevention of cardiovascular events in variant angina by long-term diltiazem therapy, 1507

Sudden death in three teenagers: conduction system studies, 879

Defibrillation

Adverse acute and chronic effects of electrical defibrillation and cardioversion on implanted unipolar cardiac pacing systems, 1413

Dextran

Hemodynamic and regional blood flow distribution responses to dextran, hyaluronic acid, and arachidonic acid experimental canine tamponade, 1461

Diastole

Appraisal of a low noise electrocardiogram, 456

Chronic aortic regurgitation: prognostic value of left ventricular end-systolic dimension and end-diastolic radius/thickness ratio, 775

Intramyocardial current flow in acute coronary occlusion in the canine heart, 436

Digitalis

Digitalis poisoning, historical and forensic aspects, 506

Extrastimulus-related shortening of the first postpacing interval in digitalis-induced ventricular tachycardia. Observations during programmed electrical stimulation in the conscious dog, 840

Diltiazem

Effects of diltiazem on anoxic injury in the isolated rat heart, 1081

Objective evaluation of three dose levels of diltiazem in patients with chronic stable angina, 1144

Prevention of cardiovascular events in variant angina by long-term diltiazem therapy, 1507

Dipyridamole

Split dose thallium-201 dipyridamole imaging: a new technique for obtaining thallium images before and immediately after an intervention, 1302

Discriminant analysis

See Statistical analysis

Dobutamine

Dobutamine and hyaluronic acid, comparative influences of positive inotropic and vasodilatory effects on coronary blood flow and myocardial energetics in nonischemic congestive heart failure, 499

Doppler ultrasound

Echocardiography. an overview, 216

Left ventricular outflow obstruction after aortic valve replacement. detection with continuous wave Doppler ultrasound recording, 550

Droxicainide

Effects of lidocaine and droxicainide on myocardial necrosis: a comparative study, 1447

Dual-chamber pacemakers

Cardiac pacing in the 1980s. treatment and techniques in transition, 339

Ductus arteriosus

Morphologic features of the ductus arteriosus after prostaglandin E1 administration for ductus-dependent congenital heart defects, 471

Echocardiography

See also Doppler ultrasound

Atrial systolic notch on the interventricular septal echogram: an echographic sign of constrictive pericarditis, 907

Cardiac tamponade: limitations of M-mode echocardiography, 913

Characterization of left ventricular mechanical function during arrhythmias by two-dimensional echocardiography. II. Location of the site of onset of premature ventricular systoles, 819

Complete atrioventricular canal defect associated with congenitally corrected transposition of the great arteries: two-
Education

Ejection fraction

Global and regional ventricular ejection fraction abnormalities during exercise in patients with silent myocardial ischemia, 931

Limitations of electrocardiographic scoring systems for estimation of left ventricular function, 1479

Prevention by nifedipine of cold pressor-induced decrease in left ventricular ejection fraction, 1512

Prognostic value of exercise thallium-201 imaging in patients presenting for evaluation of chest pain, 994

Relative value of isometric and isotonic exercise radionuclide angiography to detect coronary artery disease, 790

Reliability of bedside evaluation in determining left ventricular function: correlation with left ventricular ejection fraction determined by radionuclide ventriculography, 417

Value of left ventricular ejection fraction during exercise in predicting the extent of coronary artery disease, 1002

Electrocardiography

Appraisal of a low noise electrocardiogram, 456

Diagnostic and prognostic significance of exercise-induced premature ventricular complexes in men and women. a four-year follow-up, 1201

Electrocardiographic effects of myocardial ischemia induced by atrial pacing in dogs with coronary stenosis. I. Repolarization changes with progressive left circumflex coronary artery narrowing, 1090

Electrocardiography of arrhythmias: from deductive analysis to laboratory confirmation—twenty-five years of progress, 306

The first textbook of electrocardiography. Thomas Lewis: “Clinical Electrocardiography,” 1160

Impairment of myocardial perfusion and function during painless myocardial ischemia, 924

Induction of ventricular tachycardia during electrophysiologic study after repair of tetralogy of Fallot, 1493

Intracardiac recording by catheter electrode of accessory pathway depolarization, 468

Intramyocardial current flow in acute coronary occlusion in the canine heart, 436

Perspectives and future trends in cellular electrophysiology: implications for the clinician, 317

Pharmacologic treatment of cardiac arrhythmias: 25 years of progress, 365

Predictors of the success or failure of medical therapy in patients with chronic recurrent sustained ventricular tachycardia: a discriminant analysis, 403

Sudden death in three teenagers: conduction system studies, 879

Enalapril

Evaluation of a long-acting converting enzyme inhibitor (enalapril) for the treatment of chronic congestive heart failure, 1154

Endocarditis

Infective endocarditis—a 25 year overview of diagnosis and therapy, 280

Endorphins

Experimental pain measurement in patients with asymptomatic myocardial ischemia, 940

Endoscopy

In vivo coronary angioscopy, 1311

Epicardial mapping

Localization of septal pacing sites in the dog acute heart by epicardial mapping, 1423

Epidemiology

Hypertension and stroke, 521

Ergonovine

Variability in coronary hemodynamics in response to ergonovine in patients with normal coronary arteries and atypical chest pain, 797
