
Expositiones Mathematicae

Managing Editor

Robert C. Dalang

Institut de mathématiques
Ecole Polytechnique Fédérale de Lausanne (EPFL)
Station 8
CH-1015 Lausanne
Switzerland
E-mail: robert.dalang@epfl.ch

Associate Editors

C. Berg, Copenhagen, Denmark (berg@math.ku.dk):
Real functions, measure and integration, potential
theory, special functions, approximations and
expansions, integral transforms.

L. Ge, Beijing, China, and Durham, NH, USA (liming
@math.unh.edu). Functional analysis, operator
theory.

R. Geoghegan, Binghamton, NY, USA (ross@math.
binghamton.edu). Topology, group theory and
generalisations.

D. Salamon, Zürich, Switzerland (salamon@math.
ethz.ch). Several complex variables and analytic
spaces, symplectic and differential geometry.

A. Valette, Neuchâtel, Switzerland (alain.valette@
unine.ch). K -theory for operator algebras, topological
groups, Lie groups, abstract harmonic analysis.

V.S. Varadarajan, Los Angeles, USA (vsv@math.
ucla.edu). Lie groups and Lie algebras, quantum
theory, number theory, ordinary differential
equations.

Editorial Board

S. Albeverio, Bonn, Germany
N. H. Bingham, Uxbridge, UK
P. Cartier, Paris, France
S. D. Chatterji, Lausanne, Switzerland
B. Edixhoven, Leiden, The Netherlands
J. Friedlander, Toronto, Canada
G. Gaudry, Sydney, Australia
K. Seip, Trondheim, Norway

Honorary Members

B. Fuglede, Copenhagen, Denmark
P. J. Hilton, Binghamton, NY, USA
R. V. Kadison, Philadelphia, PA, USA
D. G. Kendall, Cambridge, UK
F. Oort, Utrecht, The Netherlands
P. Ribenboim, Kingston, Canada
E. Zehnder, Zürich, Switzerland

This journal publishes articles in English, French or
German in all branches of mathematics under the
headings "Main Articles" and "Mathematical Notes".

Main Articles: These may be (I) expository essays,
(II) surveys, (III) original research articles, (IV)
historical studies concerning 19th and 20th century
mathematics.

Mathematical Notes: These are shorter articles
containing new results, new proofs of known theo-
rems or novel points of view.

Other material like literature surveys, letters to the
editor etc. will be published if and when suitable
material becomes available.

Editorial policy

Our aim is to publish papers of interest to a wide
mathematical audience, such as expository articles
that make research results more widely accessible, and
papers on topics with fairly broad appeal. Main articles
must be written in such a way that a research student
interested in the topic of the paper can read them
profitably. Mathematical notes can be at a slightly
higher level. Clarity of exposition, accuracy of details
and the relevance and interest of the subject matter
will be the decisive factors in our acceptance of an
article for publication. All papers are refereed.

Submission of manuscripts

Authors should send by electronic mail a .pdf file
of their paper to the appropriate Associate Editor
(with a copy to the Managing Editor) or directly
to the Managing Editor. Use of regular mail is
also possible. Once the article is accepted, the
author must provide the article as a LaTeX file, if
available.

Articles written in a language other than English
should be accompanied by a short abstract in English.
For further details concerning the preparation of
manuscripts consult "Instructions to authors".

Instructions to authors see the journal's home page
<http://www.elsevier.de/exmath>

Offprints

Fifty (50) offprints of each paper are supplied free
of charge. Issues or additional offprints will be
provided against payment.

There is no charge for published pages. Corrected proofs
will be available online (www.sciencedirect.com)
before the publication of the print edition.
