Subject Index: Volume 3

Acetylcholine
Evidence for prejunctional and postjunctional antagonism of the sympathetic neuroeffector junction by acetylcholine in the canine cardiac Purkinje fibers, 760

Adenosine
Paroxysmal supraventricular tachycardia with Wenckebach block: evidence for reentry within the upper portion of the atrioventricular node, 1551

Aequorin
Intracellular calcium transients in human working myocardium as detected with aequorin, 410

Afterdepolarizations
Afterdepolarizations as a mechanism for the long QT syndrome: electrophysiologic studies of a case, 1556

Ahlquist, Raymond
From adrenoceptor mechanisms to clinical therapeutics: Raymond Ahlquist, PhD, 1914–1983, 419

Alcoholism
Cardiac function in alcoholics with cirrhosis: absence of overt cardiomyopathy—myth or fact?, 696

Alpha-adrenergic antagonists
Platelet-mediated thrombosis in stenosed canine coronary arteries: inhibition by nicergoline, a platelet-active alpha-adrenergic antagonist, 1417

American College of Cardiology news
Abstracts: young investigators' awards competition, 1183
American College of Cardiology extramural programs, 1101
1984–1985 board of Governors, 1354
1984–1985 committee appointments, 1583
In appreciation, 1102
New members of the college, 876
President’s page: why a convocation?, 1099

American Society of Echocardiography
The safety of contrast echocardiography: report of the Committee on Contrast Echocardiography for the American Society of Echocardiography, 6

Amiodarone
Amiodarone: electrophysiologic actions, pharmacokinetics and clinical effects, 1059
Electrophysiologic basis for the suppression by amiodarone of orthodromic supraventricular tachycardias complicating pre-excitation syndromes, 1298

Amrinone
Amrinone in the treatment of chronic cardiac failure, 1282

Amyloidosis
Cardiac arrhythmias in systemic amyloidosis: correlation with echocardiographic abnormalities, 107

Aneurysms
Aneurysmal degeneration of Blalock-Taussig shunts: identification and surgical treatment options, 1277
Aneurysms of sinus of Valsalva: two-dimensional echocardiographic diagnosis of rupture into the right heart cavities, 1227
Left ventricular aneurysm subsequent to cleavage of myocardial bridging of a coronary artery artery, 1345
Long-term survival of patients with treated aortic dissection, 1026

Angina
Changes in cardiac functional capacity after coronary bypass surgery in relation to adequacy of revascularization, 47
Coronary Artery Surgery Study (CASS): a randomized trial of coronary artery bypass surgery. Comparability of entry characteristics and survival in randomized patients and nonrandomized patients meeting randomized criteria, 114
Coronary revascularization in the elderly patient, 1398
‘Maximal’ drug therapy is not necessarily optimal in chronic angina pectoris, 1051
Regional myocardial dysfunction in patients with angina at rest and response to isosorbide-5-mononitrate assessed by phase analysis of radionuclide ventriculograms, 1357

Angiography
Accuracy and interobserver variability of coronary cineangiography: a comparison with postmortem evaluation, 1145
Angiographic diagnosis of posterior mitral valve leaflet prolapse, 1085
Clinical and angiographic factors associated with progression of coronary artery disease, 659
Comparison of exercise perfusion and ventricular function imaging: an analysis of factors affecting the diagnostic accuracy of each technique, 272
Comparison of two-dimensional echocardiography with gated radionuclide ventriculography in evaluation of global and regional left ventricular function in acute myocardial infarction, 243
Correlation among right ventricular preload, afterload and ejection fraction in mitral valve disease: radionuclide, echocardiographic and hemodynamic exercise variables in detecting significant coronary artery disease in asymptomatic men, 887
Double-outlet right atrium with two atriointerventricular valves and left atrial outlet atresia, 375
 Intravenous digital subtraction angiography in the assessment of patients with left to right shunts before and after surgical correction, 1507
Myocardial infarction in patients with previous coronary artery bypass surgery, 909
Origin of the left anterior descending coronary artery from the pulmonary artery. 3 year angiographic follow-up after saphenous vein bypass graft and proximal ligation, 211
Right ventricular ejection fraction response to exercise in patients with coronary artery disease: influence of both right coronary artery disease and exercise-induced changes in right ventricular afterload, 895
Unsettled indications for coronary angiography (editorial), 1575

Angiography, radionuclide
Accurate estimates of absolute left ventricular volumes from equilibrium radionuclide angiographic count data using simple geometric attenuation correction, 789
Right ventricular function: methodologic and clinical considerations in noninvasive scintigraphic assessment, 1072

Angioplasty
Angioplasty in total coronary artery occlusion, 845
Criteria for successful coronary angioplasty as assessed by alterations in coronary vasodilatory reserve, 1382
Transluminal carbon dioxide-laser catheter angioplasty for dissolution of atherosclerotic plaques, 135

Anomalous right superior vena cava drainage to the left atrium
Anomalous right superior vena cava drainage to the left atrium, 467

Anoxia
Cardiac injury in short duration anoxia and modification by diltiazem, a calcium channel blocking agent, 1237

Antiarrhythmic agents
Amiodarone: electrophysiologic actions, pharmacokinetics and clinical effects, 1059
Lorcainide in patients with refractory ventricular tachyarrhythmia, 1531

Aortic dissection
Long-term survival of patients with treated aortic dissection, 1026

Aortic insufficiency
Effects of dynamic and isometric exercise
Aortic valve

Absence of the aortic valve: antenatal and postnatal two-dimensional and Doppler echocardiographic features, 833

Aortic valve replacement

Bileaflet, tilting disc and porcine aortic valve substitutes: in vitro hydrodynamic characteristics, 313

Cardiac catheterization before aortic valve replacement in patients with aortic stenosis (editorial), 1096

Determinants of prognosis of patients with aortic reurgitation who undergo aortic valve replacement, 1118

Septal myomectomy and mitral valve replacement for idiopathic hypertrophic subaortic stenosis: short- and long-term follow-up, 1127

Arrhythmias

See also specific type

Amiodarone: electrophysiologic actions, pharmacokinetics and clinical effects, 1059

Cardiac arrhythmias in systemic amyloidosis: correlation with echocardiographic abnormalities, 107

Cardiac rhythm and conduction in Duchenne’s muscular dystrophy: a prospective study of 20 patients, 1263

Electrocardiographic findings in experimental myocarditis in DBA/2 mice: complete atrioventricular block in the acute stage, low voltage of the QRS complex in the subacute stage and arrhythmias in the chronic stage, 1461

Entrainment as an electrophysiologic phenomenon (editorial), 451

Maturational changes in ventriculoatrial conduction in the intact canine heart, 162

Arrhythmias, ventricular

See also Fibrillation, ventricular and Tachycardia, ventricular

Clinical efficacy and electrophysiologic effects of cibenzoline therapy in patients with ventricular arrhythmias, 857

Factors related to the induction of ventricular fibrillation in the normal canine heart by programmed electrical stimulation, 751

Arterial distensibility

Forearm arterial distensibility in systolic hypertension, 387

Arterial thrombosis

Platelet-mediated thrombosis in stenosed canine coronary arteries: inhibition by nicergoline, a platelet-active alpha-antagonist, 1417

Arteriosclerosis

Timing, mechanism and clinical setting of witnessed deaths in postmyocardial infarction patients, 1111

Anatomic-ultrasound correlations for intraoperative open chest imaging of coronary artery atherosclerotic lesions in human beings, 1169

Clinical and angiographic factors associated with progression of coronary artery disease, 659

Clinical and angiographic factors associated with progression of coronary artery disease, 659

Left ventricular aneurysm subsequent to cleavage of myocardial bridging of a coronary artery, 1345

Suppression of experimental atherosclerosis in rabbits by interferon-inducing agents, 129, (correction, 1109)

Transmural carbon dioxide-laser catheter angioplasty for dissolution of atherosclerotic plaques, 135

Atrial septal defect

Clinical utility of two-dimensional Doppler echocardiographic techniques for estimating pulmonary to systemic blood flow ratios in children with left to right shunting atrial septal defect, ventricular septal defect or patent ductus arteriosus, 169

Two-dimensional echocardiographic spectrum of Ebstein’s anomaly: detailed anatomic assessment, 356

Ultrasonic contrast studies for the detection of cardiac shunts, 978

Atrial thrombi

Two-dimensional echocardiographic imaging of left atrial appendage thrombi, 1340

Atrioventricular node conduction

Short PR interval and narrow QRS complex associated with pheochromocytoma: electrophysiologic observations, 872

Atrioventricular node

Paroxysmal supraventricular tachycardia with Wenckebach block: evidence for reentry within the upper portion of the atrioventricular node, 1551

Atrioventricular node function

Maturational changes in ventriculoatrial conduction in the intact canine heart, 162

Atrioventricular valve

Double-outlet right atrium with two atrioventricular valves and left atrial outlet atresia, 375

Atrium

Double-outlet right atrium with two atrioventricular valves and left atrial outlet atresia, 375

Atropine

Paroxysmal supraventricular tachycardia with Wenckebach block: evidence for reentry within the upper portion of the atrioventricular node, 1551

Autonomic dysfunction

Increased vascular beta-adrenoceptor responsiveness in autonomic dysfunction, 850

Balloon embolization

Balloon embolization to occlude a Blalock-Taussig shunt, 200

Bayes’ theorem

Use of electrocardiographic-thallium exercise testing in clinical practice, 262

Beta-adrenergic blocking agents

Effect of nifedipine on myocardial blood flow during exercise in dogs with chronic coronary artery occlusion, 143

Enhancement of salvage of reperfused myocardium by early beta-adrenergic blockade (timolol), 1438

From adrenoceptor mechanisms to clinical therapeutics: Raymond Ahlquist, PhD, 1914–1983, 419

Safety and efficacy of esmolol (ASL-8052: an ultrashort-acting beta-adrenergic blocking agent) for control of ventricular rate in supraventricular tachycardias, 394

Beta-adrenoceptors

Increased vascular beta-adrenoceptor responsiveness in autonomic dysfunction, 850

Blood flow

Blood flow to infarct and surviving myocardium: implications regarding the action of verapamil on the acutely ischemic dog heart, 956

Clinical utility of two-dimensional Doppler echocardiographic techniques for estimating pulmonary to systemic blood flow ratios in children with left to right shunting atrial septal defect, ventricular septal defect or patent ductus arteriosus, 169

Correlation of myocardial echo contrast disappearance rate (“washout”) and severity of experimental coronary stenosis, 39

Effect of decreased blood flow and ischemia on myocardial thallium clearance, 744

Effect of nifedipine on myocardial blood flow during exercise in dogs with chronic coronary artery occlusion, 143

Effects of intraaortic balloon counterpulsation on myocardial blood flow in patients with severe coronary artery disease, 1367

Influence of nifedipine on collateral blood flow during acute ischemia in the dog, 334

Microbubbles have intracardiac velocities similar to those of red blood cells, 28

Myocardial contrast two-dimensional echocardiography: experimental examination at different coronary flow levels, 1219

Reductions in coronary flow under resting conditions in collateral-dependent myocardium of patients with complete occlusion of the left anterior descending coronary artery, 568

Blood pressure

Left ventricular diastolic function in hypertension: relation to left ventricular mass and systolic function, 1500

Bradbury-Eggleson syndrome

Increased vascular beta-adrenoceptor responsiveness in autonomic dysfunction, 850

Bundle branch block

Bundle branch block after ventricular tachycardia: a manifestation of “fatigue” or “overdrive suppression”, 1562
CADENZA
Computer-assisted diagnosis in noninvasive ev:ection of coronary artery disease (le:...), 465

Calcium
Cardiac injury in short duration anoxia and modification by diltiazem, a calcium channel blocking agent, 1237
Effects of verapamil on contraction and relaxation of cultured chick embryo ventricular cells during calcium overload, 341
Intracellular calcium transients in human working myocardium as detected with aequorin, 410

Calcium channel blocking agents
Beneficial hemodynamic effects of intravenous and oral diltiazem in severe congestive heart failure, 1044
Calcium channel blockers and drug interactions (letter), 1352
Effects of diltiazem, a calcium channel inhibitor, in retarding cellular damage produced during early myocardial ischemia in pigs: a morphometric and ultrastructural analysis, 1427

Captopril
Relation between serum sodium concentration and the hemodynamic and clinical responses to converting enzyme inhibition with captopril in severe heart failure, 1035

Carbon dioxide-laser energy
Transluminal carbon dioxide-laser catheter angioplasty for dissolution of atherosclerotic plaques, 135

Cardiac function
Cardiac function in alcoholics with cirrhosis: absence of overt cardiomyopathy—myth or fact?, 696

Cardiac metastasis
Right to left intracardiac shunt: a unique presentation of metastatic cardiac disease, 865

Cardiac output
Changes in cardiac functional capacity after coronary bypass surgery in relation to adequacy of revascularization, 47
DVI versus VVI pacing in heart block with low cardiac output (letter), 1108
In vivo correlation of thermodilution cardiac output and videodensitometric indicator-dilution curves obtained from echocardiograms, 999

Cardiac transplantation
Sinoatrial function after cardiac transplantation, 712

Cardiac tumors
Primary right ventricular tumor (fibroma) simulating cyanotic heart disease in a newborn, 868
Prognosis in cardiac tumors in infants and children (letter), 1105

Cardiomyopathy
Cardiac function in alcoholics with cirrhosis: absence of overt cardiomyopathy—myth or fact?, 696
High incidence of myocarditis by endomyocardial biopsy in patients with idiopathic congestive cardiomyopathy, 63
Isovolumic relaxation period in hypertrophic cardiomyopathy, 71
Oral beta-adrenergic blockade with metoprolol in chronic severe dilated cardiomyopathy, 203

Cardiovascular training programs
Adult cardiovascular training programs in the United States, 455

Cardioversion
Self-adhesive preapplied electrode pads for defibrillation and cardioversion, 815

Catecholamines
Sympathetic nervous system and exercise tolerance response in normotensive and hypertensive adolescents, 381

Catheterization
Accuracy and interobserver variability of coronary cineangiography: a comparison with postmortem evaluation, 1145
Aneurysms of sinuses of Valsalva: two-dimensional echocardiographic diagnosis of rupture into the right heart chambers, 1252
Balloon embolization to occlude a Blalock-Taussig shunt, 200
Cardiac catheterization before aortic valve replacement in patients with aortic stenosis (editorial), 1096
Clinical and angiographic factors associated with progression of coronary artery disease, 659
Evaluation of aortic stenosis by continuous wave Doppler ultrasound, 150
Factors related to the induction of ventricular fibrillation in the normal canine heart by programmed electrical stimulation, 751
Noninvasive determination of pressure gradients in children: two methods employing pulsed Doppler echocardiography, 179
Noninvasive quantification of stenotic semilunar valve areas by Doppler echocardiography, 1256
The pacing stress test reexamined: correlation of pacing-induced hemodynamic changes with the amount of myocardium at risk, 1469
Primary surgical closure of ventricular septal defects in the first year of life: results in 128 infants, 1269
Quantitative analysis of seven-pinhole tomographic thallium-201 scintigrams: improved sensitivity and estimation of the extent of coronary involvement by evaluation of radiotracer uptake and clearance, 1178
Relation between serum sodium concentration and the hemodynamic and clinical responses to converting enzyme inhibition with captopril in severe heart failure, 1035

Cholesterol
Suppression of experimental atherosclerosis in rabbits by interferon-inducing agents, 129

Cisbenzolone
Clinical efficacy and electrophysiological effects of cisbenzolone therapy in patients with ventricular arrhythmias, 857

Cigarette smoking
Acute coronary hemodynamic response to cigarette smoking in patients with coronary artery disease, 879

Cineangiography
Accuracy and interobserver variability of coronary cineangiography: a comparison with postmortem evaluation, 1145
Accurate estimates of absolute left ventricular volumes from equilibrium radionuclide angiographic count data using simple geometric attenuation, 789

Cirrhosis
Cardiac function in alcoholics with cirrhosis: absence of overt cardiomyopathy—myth or fact?, 696

Computed tomography
See Tomography

Computerized videodensitometry
See Videodensitometry

Computers
Computer methods for myocardial contrast two-dimensional echocardiography, 1212
Echocardiographic detection of ischemic and infarcted myocardium, 733
Effect of decreased blood flow and ischemia on myocardial thallium clearance, 744
Quantitation of myocardial infarct size from thallium-201 images: validation of a new approach in an experimental model, 948

Conduction system
Maturational changes in ventriculoatrial conduction in the intact canine heart, 162

Congenital heart defects
Balloon embolization to occlude a Blalock-Taussig shunt, 200
Long-term prostaglandin E1 therapy in congenital heart defects, 838
Origin of the left anterior descending coronary echocardiogram from the pulmonary artery: 3 year angiographic follow-up after saphenous vein bypass graft and proximal ligation, 219
Congenital pulmonary vein stenosis: structural changes in a patient with normal pulmonary artery wedge pressure, 193
Improved prediction of peak left ventricular pressure by echocardiography in children with aortic stenosis, 349

Congestive heart failure
Amrinone in the treatment of chronic cardiac failure, 1282
Beneficial hemodynamic effects of intravenous and oral diltiazem in severe congestive heart failure, 1044
Evaluating the efficacy of new inotropic agents, 1527
Hemodynamic effects of vasodilators and long-term response in heart failure, 1521
Relation between serum sodium concentration and the hemodynamic and clinical responses to converting enzyme inhibition with captopril in severe heart failure, 1035
Contrast echocardiography
Seminar on contrast two-dimensional echocardiography, 1, 978, 1212

Coronary artery anomalies
Acute takeoffs of the coronary arteries along the aortic wall and congenital coronary ostial valve-like ridges: association with sudden death, 766
Origin of both coronary arteries from the pulmonary trunk associated with hypoplasia of the aortic tract complex: a new entity, 437, (correction, 1353)
Origin of the left coronary artery from the right pulmonary artery, 1565

Coronary artery disease
A practical approach to exercise echocardiography: immediate postexercise echocardiography, 284
Acute coronary hemodynamic response to cigarette smoking in patients with coronary artery disease, 879
Acute takeoffs of the coronary arteries along the aortic wall and congenital coronary ostial valve-like ridges: association with sudden death, 766
Anatomic-ultrasound correlations for intraoperative open chest imaging of coronary artery atherosclerotic lesions in human beings, 1169
Angioplasty in total coronary artery occlusion, 1252
Clinical and angiographic factors associated with progression of coronary artery disease, 659
Comparison of exercise perfusion and ventricular function imaging: an analysis of factors affecting the diagnostic accuracy of each technique, 272
Comparison of two-dimensional echocardiography with gated radionuclide ventriculography in evaluation of global and regional left ventricular function in acute myocardial infarction, 243
Computer-assisted diagnosis in noninvasive evaluation of coronary artery disease (letter), 465
Coronary artery bypass surgery morbidity, 1391
Coronary Artery Surgery Study (CASS): a randomized trial of coronary artery bypass surgery. Comparability of entry characteristics and survival in randomized patients and nonrandomized patients meeting randomized criteria, 114
Discriminant value of clinical and exercise variables in detecting significant coronary artery disease in asymptomatic men, 887
Effects of intraaortic balloon counterpulsation on myocardial blood flow in patients with severe coronary artery disease, 1367
Effects of propranolol and timolol on left ventricular volumes during exercise in patients with coronary artery disease, 210
Functional and anatomical correlates of markedly abnormal stress tests, 1375
Improved regional ventricular function after successful surgical revascularization.
Left ventricular function in coronary artery disease. Evaluation of slope of end-systolic pressure-volume line (E_{max}) and ratio of peak systolic pressure to end-systolic volume (P/V_{min}), 781
Limitation of exercise-induced R wave amplitude changes in detecting coronary artery disease in asymptomatic men, 821
Mechanism and significance of a decrease in ejection fraction during exercise in patients with coronary artery disease and left ventricular dysfunction at rest, 88
The pacing stress test: thallium-201 myocardial imaging after atrial pacing: diagnostic value in detecting coronary artery disease compared with exercise testing, 1197
Prognostic importance of a clinical profile and exercise test in medically treated patients with coronary artery disease, 772
Quantitative analysis of seven-pinhole tomographic thallium-201 scintigrams: improved sensitivity and estimation of the extent of coronary involvement by ejection fraction, 845, 1178
R-wave amplitude: a new determinant of failure of patients with coronary heart disease to manifest ST segment depression during exercise, 1155
Reductions in coronary flow under resting conditions in collateral-dependent myocardium of patients with complete occlusion of the left anterior descending coronary artery, 668
Right ventricular ejection fraction response to exercise in patients with coronary artery disease: influence of both right coronary artery disease and exercise-induced changes in right ventricular afterload, 895
Seminar on contrast two-dimensional echocardiography, 1, 978, 1212
Three-dimensional analysis of regional myocardial function in response to nitroglycerin in patients with coronary artery disease, 1187
Coronary circulation
Origin of the left anterior descending coronary artery from the pulmonary artery. 3 year angiographic follow-up after saphenous vein bypass graft and proximal ligature, 219
Coronary occlusion
Angioplasty in total coronary artery occlusion, 845
Blood flow to infarct and surviving myocardium: implications regarding the action of verapamil on the acutely ischemic dog heart, 956
Correlation of myocardial echo contrast disappearance rate ("washout") and severity of experimental coronary stenosis, 39
Kinetics of thallium-201 in reperfused canine myocardium after coronary artery occlusion, 1252
Myocardial infarct size determined by computed transmission tomography in canine infants of various ages and in the presence of coronary reperfusion, 138
Reductions in coronary flow under resting conditions in collateral-dependent myocardium of patients with complete occlusion of the left anterior descending coronary artery, 668
Corrections
Adult cardiovascular training programs in the United States, 1353
Origin of both coronary arteries from the pulmonary trunk associated with hypoplasia of the aortic tract complex: a new entity, 1582
Parasympathetic effects on electrophysiologic properties of cardiac ventricular tissue (J Am Coll Cardiol 1983;2:1209-9, 878)
Suppression of experimental atherosclerosis in rabbits by interferon-inducing agents (J Am Coll Cardiol 1984;3:129-34), 1109
Transeosophageal two-dimensional echocardiography in the diagnosis of coronary arteries (author statement), 1109
Cortical hyperostosis
Long-term prostaglandin E therapy in congenital heart defects, 838
Cox's proportional hazard model
Evaluation of prognosis 1 year after myocardial infarction (letter), 1107
Creatine kinase
Patterns of creatine kinase release during acute myocardial infarction after nonsurgical reperfusion: comparison with conventional treatment and correlation with infarct size, 675
Cryosurgery
Surgical correction of the Wolff-Parkinson-White syndrome in the closed heart using cryosurgery: a simplified approach, 408
Cyanotic heart disease
Shared coronary arteries and coronary venous drainage in thoracopagus twins, 4019
Diastole
Ventricular diastolic pressure-volume shifts during acute ischemic left ventricular failure in dogs, 966
Diastolic time intervals
Isovolumic relaxation period in hypertrophic cardiomyopathy, 71
Digitalis
Prognostic importance of digitalis after acute myocardial infarction, 681
Diltiazem
Beneficial hemodynamic effects of intravenous and oral diltiazem in severe congestive heart failure, 1044
Calcium channel blockers and drug interactions (letter), 1352
Cardiac injury in short duration anoxia and modification by diltiazem, a calcium channel blocking agent, 1237
Effects of diltiazem, a calcium channel inhibitor, in retarding cellular damage produced early myocardial ischemia in pigs: a morphometric and ultrastructural analysis, 1427
Doppler ultrasound
Accuracy of combined two-dimensional echocardiography and continuous wave Doppler recordings in the estimation of pressure gradient in right ventricular outlet obstruction, 1013
Evaluation of aortic stenosis by continuous wave Doppler ultrasound, 150
Good science is not always the best medicine (editorial), 1097
Noninvasive determination of pressure gradients in children: two methods employing pulsed Doppler echocardiography, 179
Duchenne's muscular dystrophy
Cardiac rhythm and conduction in Duchenne's muscular dystrophy: a prospective study of 20 patients, 1263
Ductus arteriosus
Clinical utility of two-dimensional Doppler echocardiographic techniques for estimating pulmonary to systemic blood flow ratios in children with left to right shunting atrial septal defect, ventricular septal defect, or patent ductus arteriosus, 169
Combined posteroanterior subepicardial fat attenuation by echocardiography, 1219
Unsettled indications for coronary stenting, 1096

Drug interactions
Calcium channel blockers and drug interactions (letter), 1352

Ebstein's anomaly
Two-dimensional echocardiographic spectrum of Ebstein's anomaly: detailed anatomic assessment, 356

Echocardiography
See also Doppler ultrasound
A practical approach to exercise echocardiography: immediate postexercise echocardiography, 284
Absence of the aortic valve: antenatal and postnatal two-dimensional and Doppler echocardiographic features, 833
Aneurysms of sinuses of Valsalva: two-dimensional echocardiographic diagnosis of rupture into the right heart cavities, 1227
Angled interventricular septum on echocardiography (letter), 878
Anomalous right superior vena cava drainage to the left atrium (letter), 467
Cardiac arrhythmias in systemic amyloidosis: correlation with echocardiographic abnormalities, 107
Chronologic regurgitation: predictive value of regenerative echocardiographic indexes of left ventricular function and wall stress, 235
Clinical utility of two-dimensional Doppler echocardiographic techniques for estimating pulmonary to systemic blood flow and pressure gradients in children: two methods employing pulsed Doppler echocardiography, 179
Primary right ventricular tumor (fibroma) simulating cyanotic heart disease in a newborn, 868
Pseudoaneurysm of the pulmonary artery after the banding procedure: two-dimensional echocardiographic description, 371
Regression of left ventricular hypertrophy: partial answers for persistent questions (editorial), 1349
Reverse doming of the anterior mitral leaflet with severe aortic regurgitation, 431
Seminar on contrast two-dimensional echocardiography, 1, 978, 1212
Superior intensity and reproducibility of SHU 454, a new right heart contrast agent, 992
The safety of contrast echocardiography: report of the Committee on Contrast Echocardiography for the American Society of Echocardiography, 6
Tricuspid regurgitation: noninvasive techniques for determining causes and severity, 1540
Two-dimensional contrast echocardiography
I. In vitro development and quantitative analysis of echo contrast agents, 14
Two-dimensional contrast echocardiography
II. Transpulmonary studies, 21
Two-dimensional echocardiographic assessment of complications involving the Ionescu-Shiley pericardial valve in the mitral position, 328
Two-dimensional echocardiographic contrast assessment of pacing-induced mitral regurgitation: relation to altered regional left ventricular function, 986
Two-dimensional echocardiographic diagnosis of intracardiac masses in infancy, 827
Two-dimensional echocardiographic imaging of left atrial appendage thrombi, 1340
Two-dimensional echocardiographic anatomic overview of Ebstein's anomaly: detailed anatomic assessment, 356
Ultrasonic contrast studies for the detection of cardiac shunts, 978
Verification of myocardial contrast two-dimensional echocardiographic assessment of perfusion defects in ischemic myocardium, 34

Myocardial infarction in patients with previous coronary artery bypass surgery, 909
QRS scoring systems for estimating ventricular function (letter), 1106
R wave amplitude: a new determinant of failure of patients with coronary heart disease to manifest ST segment depression during exercise, 1340
ST segment changes in lead aVR (letter), 1106
Surface electrocardiographic clues suggesting presence of a nodofascicular Mahaim fiber, 1161
angiography, 1575
What do we gain from the analysis of right ventricular function?, 1082
Education
Adult cardiovascular training programs in the United States, 455, (correction, 1353)
American College of Cardiology extramural programs, 1101
President's page: why a convocation, 1099
Ejection fraction
Coronary artery bypass surgery morbidity, 1391
Relation between exercise-induced changes in ejection fraction and systolic loading conditions at rest in aortic regurgitation, 924
Right ventricular ejection fraction response to exercise in patients with coronary artery disease: influence of both right coronary artery disease and exercise-induced changes in right ventricular afterload, 895
Treadmill performance and cardiac function in selected patients with coronary heart disease, 253
What do we gain from the analysis of right ventricular function? (editorial), 1082
Ejection time
Duration of ejection in aortic stenosis: effect of stroke volume and pressure gradient, 157
Ejection time and heart rate in aortic stenosis (letter), 1581
Electrocardiography
Afterdepolarizations as a mechanism for the long QT syndrome: electrophysiologic studies of a case, 1556
Electrocardiographic detection of left ventricular hypertrophy using echocardiographic determination of left ventricular mass as the reference standard. Comparison of standard criteria, computer diagnosis and physician interpretation, 82
Electrocardiographic findings in experimental myocarditis in DBA/2 mice: complete atrioventricular block in the acute stage, low voltage of the QRS complex in the subacute stage and arrhythmias in the chronic stage, 1461
How to record an electrocardiogram without muscle artifacts (letter), 232
Limitation of exercise-induced R wave amplitude changes in detecting coronary artery disease in asymptomatic men, 821
Myocardial infarction in patients with previous coronary artery bypass surgery, 909
QRS scoring systems for estimating ventricular function (letter), 1106
R wave amplitude: a new determinant of failure of patients with coronary heart disease to manifest ST segment depression during exercise, 1340
ST segment changes in lead aVR (letter), 1106
Surface electrocardiographic clues suggesting presence of a nodofascicular Mahaim fiber, 1161
Use of electrocardiographic-thallium exercise testing in clinical practice, 262
Electrodes
Self-adhesive preapplied electrode pads for defibrillation and cardioversion, 815
Electron microscopy
Cardiac injury in short duration on anoxia and modification by diltiazem, a calcium channel blocking agent, 1237
Effects of diltiazem, a calcium channel inhibitor, in retarding cellular damage produced early myocardial ischemia in pigs: a morphometric and ultrastructural analysis, 1427
Electrophysiologic studies
Afterdepolarizations as a mechanism for the long QT syndrome: electrophysiologic studies of a case, 1556
Clinical efficacy and electrophysiologic effects of cibenzoline therapy in patients with ventricular arrhythmias, 857
Electrophysiologic and hemodynamic effects of intravenous propafenone in patients with recurrent ventricular tachycardia, 1291
Electrophysiologic basis for the suppression by anamoradone of orthodromic supraventricular tachycardias complicating pre-excitation syndromes, 1298
Entrainment as an electrophysiologic phenomenon (editorial), 451
Short PR interval and narrow QRS complex associated with pheochromocytoma: electrophysiologic observations, 872
Embolization
The safety of contrast echocardiography: report of the Committee on Contrast Echocardiography for the American Society of Echocardiography, 6
Endomyocardial biopsy
High incidence of myocarditis by endomyocardial biopsy in patients with idiopathic congestive cardiomyopathy, 63
Esmolol
Safety and efficacy of esmolol (ASL-8052: an ultrashort-acting beta-adrenergic blocking agent) for control of ventricular rate in supraventricular tachycardias, 394
Ethics
Good science is not always the best medicine (editorial), 1097
Exercise testing
A practical approach to exercise echocardiography: immediate postexercise echocardiography, 284
Amrinone in the treatment of chronic cardiac failure, 1282
Changes in cardiac functional capacity after coronary bypass surgery in relation to adequacy of revascularization, 47
Discriminant value of clinical and exercise variables in detecting significant coronary artery disease in asymptomatic men, 887
Effects of dynamic and isometric exercise on the radionuclide-determined regurgitant fraction in aortic insufficiency, 98
Effects of propranolol and timolol on left ventricular volumes during exercise in patients with coronary artery disease, 210
Functional and anatomical correlates of markedly abnormal stress tests, 1375
Hemodynamic effects of vasodilators and long-term response in heart failure, 1351
Limitation of exercise-induced R wave amplitude changes in detecting coronary artery disease in asymptomatic men, 821
"Maximal" drug therapy is not necessarily optimal in chronic angina pectoris, 1051
Mechanism and significance of a decrease in ejection fraction during exercise in patients with coronary artery disease and left ventricular dysfunction at rest, 88
Oral beta-adrenergic blockade with metoprolol in chronic severe dilated cardiomyopathy, 203
Prognostic importance of a clinical profile and exercise test in medically treated patients with coronary artery disease, 772
R-wave amplitude: a new determinant of failure of patients with coronary heart disease to manifest ST segment depression during exercise, 1155
Relation between exercise-induced changes in ejection fraction and systolic loading conditions at rest in aortic regurgitation, 924
Right ventricular ejection fraction response to exercise in patients with coronary artery disease compared with exercise-induced changes in right ventricular afterload, 895
Right ventricular functional methodologic and clinical considerations in noninvasive scintigraphic assessment, 1072
Sympathetic nervous system and exercise tolerance response in normotensive and hypertensive adolescents, 381
The pacing stress test: thallium-201 myocardial imaging after atrial pacing: diagnostic value in detecting coronary artery disease compared with exercise testing, 1197
Treadmill performance and cardiac function in selected patients with coronary heart disease, 253
Use of electrocardiographic-thallium exercise testing in clinical practice, 262
Fibrillation, atrial
Ventricular response to atrial fibrillation (letter), 1105
Fibrillation, ventricular
Factors related to the induction of ventricular fibrillation in the normal canine heart by programmed electrical stimulation, 751
Late induction of tachycardia in patients
Hypertension, adolescent

Hypoplasia
Origin of both coronary arteries from the pulmonary trunk associated with hypoplasia of the aortic tract complex: a new entity, 437, (correction, 1353)

IBM Bonner program
Electrocardiographic detection of left ventricular hypertrophy using echocardiographic determination of left ventricular mass as the reference standard. Comparison of standard criteria, computer diagnosis and physician interpretation, 82

Inotropic agents
Evaluating the efficacy of new inotropic agents, 1570

Intracardiac mass
Two-dimensional echocardiographic imaging of left atrial appendage thrombi, 1340

Intraaortic balloon counterpulsation
Effects of intraaortic balloon counterpulsation on myocardial blood flow in patients with severe coronary artery disease, 1367

Ischemia
Blood flow to infarct and surviving myocardium: implications regarding the action of verapamil on the acutely ischemic dog heart, 956

Echocardiographic detection of ischemic and infarcted myocardium, 733

Effect of decreased blood flow and ischemia on myocardial thallium clearance, 744

Effect of nifedipine on myocardial blood flow during exercise in dogs with chronic coronary artery occlusion, 143

Effects of diltiazem, a calcium channel inhibitor, in retarding cellular damage produced early myocaridial ischemia in pigs: a morphometric and ultrastructural analysis, 1427

Enhancement of salvage of reperfused myocardium by early beta-adrenergic blockade (timolol), 1438

Influence of nifedipine on collateral blood flow during acute ischemia in the dog, 334

Mechanism and significance of a decrease in ejection fraction during exercise in patients with coronary artery disease and left ventricular dysfunction at rest, 88

The pacing stress test reexamined: correlation of pacing-induced hemodynamic changes with the amount of myocardium at risk, 1469

Prostaglandin E1 coronary venous retroperfusion in acute myocardial ischemia: effects on regional left ventricular function and infarct size, 939

Right ventricular rupture in pulmonary valve atresia with intact ventricular septum (letter), 232

Ventricular diastolic pressure-volume shifts during acute ischemic left ventricular failure in dogs, 966

Isoproterenol
Bileaflet, tilting disc in porcine aortic valve substitutes in vivo: hydrodynamic characteristics, 321

Iosorbide dinitrate
“Maximal” drug therapy is not necessarily optimal in chronic angina pectoris, 1051

Regional myocardial dysfunction in patients with angina at rest and response to isosorbide dinitrate assessed by phase analysis of radionuclide ventriculograms, 1357

Isosorbine dinitrate
Isosorbine dinitrate: intravenous injection in hypertrophic cardiomyopathy, 71

Left ventricular function
Oral beta-adrenergic blockade with metoprolol in chronic severe dilated cardiomyopathy, 203

Left ventricular volume
Accurate estimates of absolute left ventricular volume from equilibrium radionuclide angiographic count data using a simple geometric attenuation correction, 789

Lorcainide
Lorcainide in patients with refractory ventricular tachyarrhythmia, 1531

Mahaim fiber
Surface electrocardiographic clues suggesting presence of a nodofascicular Mahaim fiber, 1161

Metoprolol
Oral beta-adrenergic blockade with metoprolol in chronic severe dilated cardiomyopathy, 203

Microbubbles
Microbubbles have intracardiac velocities similar to those of red blood cells, 28

Two-dimensional contrast echocardiography. I. In vitro development and quantitative analysis of echo contrast agents, 14

Microspheres
Effect of nifedipine on myocardial blood flow during exercise in dogs with chronic coronary artery occlusion, 143

Mitral insufficiency
Natural history of chronic mitral insufficiency: relation of peak systolic pressure end-systolic volume ratio to morbidity and mortality, 1412

Mitral valve
Reverse doming of the anterior mitral leaflet with severe aortic regurgitation, 431

Mitral valve prolapse
Angiographic diagnosis of posterior mitral valve leaflet prolapse, 1085

Cardiac rhythm and conduction in Duchenne's muscular dystrophy: a prospective study of 20 patients, 1263
Morbidity
Coronary artery bypass surgery morbidity, 1391

Myocardial contraction
Intracellular calcium transients in human working myocardium as detected with aequorin, 410

Myocardial edema
Increased regional end-diastolic wall thickness early after reperfusion; a sign of irreversibly damaged myocardium, 1444

Myocardial function
Beneficial hemodynamic effects of intravenous and oral diltiazem in severe congestive heart failure, 1044
Differences in myocardial performance and load between patients with similar amounts of chronic aortic versus chronic mitral regurgitation, 916
Increased regional end-diastolic wall thickness early after reperfusion; a sign of irreversibly damaged myocardium, 1444
Kinetics of thallium-201 in reperfused canine myocardium after coronary artery occlusion, 1245
Regional myocardial dysfunction in patients with angina at rest and response to isosorbide dinitrate assessed by phase analysis of radionuclide ventriculograms, 1357
Three-dimensional analysis of regional myocardial function in response to nitroglycerin in patients with coronary artery disease, 1187

Myocardial infarction
Angioplasty in total coronary artery occlusion, 845
Comparison of two-dimensional echocardiography with gated radionuclide ventriculography in evaluation of global and regional left ventricular function in acute myocardial infarction, 243
Coronary Artery Surgery Study (CASS): a randomized trial of coronary artery bypass surgery. Comparability of entry characteristics and survival in randomized patients and nonrandomized patients meeting randomized criteria, 114
Echocardiographic detection of ischemic and infarcted myocardium, 733
Enhancement of salvage of reperfused myocardium by early beta-adrenergic blockade (timolol), 1438
Evaluation of progesin 1 year after myocardial infarction (letter), 1107
Graft patency in patients with coronary artery bypass operation complicated by perioperative myocardial infarction, 55
Late induction of tachycardia in patients with ventricular fibrillation associated with acute myocardial infarction, 690
Myocardial infarct size determined by computed transmission tomography in canine infarcts of various ages and in the presence of coronary reperfusion, 138
Myocardial infarction in patients with previous coronary artery bypass surgery, 900
Patterns of creatine kinase release during acute myocardial infarction after nonsurgical reperfusion: comparison with conventional treatment and correlation with infarct size, 675
Prognostic importance of digitalis after acute myocardial infarction, 681
Quantitation of myocardial infarct size from thallium-201 images: validation of a new approach in an experimental model, 948
Right ventricular rupture in pulmonary valve atresia with intact ventricular septum (letter), 232
ST change in myocardial infarction (letter), 466
Timing, mechanism and clinical setting of witnessed deaths in postmyocardial infarction patients, 1111
Myocardial necrosis
Verification of myocardial contrast two-dimensional echocardiographic assessment of perfusion defects in ischemic myocardium, 34
Myocardial opacification
Two-dimensional contrast echocardiography, II. Transpulmonary studies, 21
Myocardial perfusion
Improved regional ventricular function after successful surgical revascularization, 902
Introduction, 1
Myocardial contrast two-dimensional echocardiography: experimental examination at different coronary flow levels, 1219
Two-dimensional contrast echocardiography, I. In vitro development and quantitative analysis of echo contrast agents, 14
Verification of myocardial contrast two-dimensional echocardiographic assessment of perfusion defects in ischemic myocardium, 34
Myocardial reperfusion
Increased regional end-diastolic wall thickness early after reperfusion: a sign of irreversibly damaged myocardium, 1444
Myocardial infarct size determined by computed transmission tomography in canine infarcts of various ages and in the presence of coronary reperfusion, 138
Myocardial risk area
Verification of myocardial contrast two-dimensional echocardiographic assessment of perfusion defects in ischemic myocardium, 34
Myocarditis
Electrocardiographic findings in experimental myocarditis in DBA/2 mice: complete ativoventricular block in the acute stage, low voltage of the QRS complex in the subacute stage and arrhythmias in the chronic stage, 1461
High incidence of myocarditis by endomyocardial biopsy in patients with idiopathic congestive cardiomyopathy, 63

Myomectomy
Septal myomectomy and mitral valve replacement for idiopathic hypertrophic subaortic stenosis: short- and long-term follow-up, 1127

Nicergoline
Platelet-mediated thrombosis in stenosed canine coronary arteries: inhibition by nicergoline, a platelet-active alpha-antagonist, 1417

Nifedipine
Influence of nifedipine on collateral blood flow during acute ischemia in the dog, 134
"Maximal" drug therapy is not necessarily optimal in chronic angina pectoris, 1051
Nifedipine in primary hypertension (letter), 1581

Nitroglycerin
Matching of myocardial oxygen consumption to mechanical load in human left ventricular hypertrophy and dysfunction, 291
Three-dimensional analysis of regional myocardial function in response to nitroglycerin in patients with coronary artery disease, 1187
Ventricular diastolic pressure-volume shifts during acute ischemic left ventricular failure in dogs, 966

Norepinephrine
Evidence for prejunctional and postjunctional antagonism of the sympathetic neuroeffector junction by acetylcholine in the canine cardiac Purkinje fibers, 760

Nuclear cardiology
Treadmill performance and cardiac function in selected patients with coronary heart disease, 253

Overdrive suppression
Bundle branch block after ventricular tachycardia: a manifestation of "fatigue" or "overdrive suppression", 1562

Pacemakers
Difficulty of extraction of chronically implanted tined ventricular endocardial leads, 724
DVI versus VVI pacing in heart block with low cardiac output (letter), 1108
Functional characteristics of retrograde conduction in a pacing model of "endless loop tachycardia", 1488
Treatment of ventricular tachycardia using an automatic scanning extrasinus pacemaker, 225
The 1981 United States survey of cardiac pacing practices, 1321
Pacing, atrial
Demonstration of the mechanism of transient entrainment and interruption of ventricular tachycardia with rapid atrial pacing, 422
The pacing stress test reexamined: correlation of pacing-induced hemodynamic changes with the amount of myocardium at risk, 1469
The pacing stress test: thallium-201 myocardial imaging after atrial pacing: diagnostic value in detecting coronary artery disease compared with exercise testing, 1197
Potentiation of coronary vascular platelet adhesion by atrial pacing in the presence of arterial stenosis in dogs, 1252

Pacing, cardiac
Difficulty of extraction of chronically implanted tined ventricular endocardial leads, 724
Two-dimensional echocardiographic contrast assessment of pacing-induced mitral regurgitation: relation to altered regional left ventricular function, 986
The 1981 United States survey of cardiac pacing practices, 1321

Pacing, ventricular
Factors related to the induction of ventricular fibrillation in the normal canine heart by programmed electrical stimulation, 751

Patent ductus arteriosus
Ultrasound contrast studies for the detection of cardiac shunts, 978

Pediatric cardiology
Absence of the aortic valve: antenatal and postnatal two-dimensional and Doppler echocardiographic features, 833
Cardiac rhythm and conduction in Duchenne’s muscular dystrophy: a prospective study of 20 patients, 1263
Echocardiographic evidence of left ventricular bands in infants and children, 1515
Improved prediction of peak left ventricular pressure by echocardiography in children with aortic stenosis, 349
Maturational changes in ventriculoatrial conduction in the intact canine heart, 162
Noninvasive determination of pressure gradients in children: two methods employing pulsed Doppler echocardiography, 179
Noninvasive quantification of stenotic semilunar valve areas by Doppler echocardiography, 1256
Origin of the left coronary artery from the right pulmonary artery, 1565
Percutaneous balloon valvuloplasty for treatment of congenital pulmonary valvular stenosis in children, 1005
Primary right ventricular tumor (fibroma) simulating cyanotic heart disease in a newborn, 868
Primary surgical closure of ventricular septal defects in the first year of life: results in 128 infants, 1269
Prognosis in cardiac tumors in infants and children (letter), 1105

Pseudoaneurysm of the pulmonary artery after the banding procedure: two-dimensional echocardiographic description, 371
Shared coronary arteries and coronary venous drainage in thoracopagus twins, 1019
Two-dimensional echocardiographic diagnosis of intracardiac masses in infancy, 827
Pericardial effusion
Combined posteroanterior subepicardial fat simulating the echocardiographic diagnosis of pericardial effusion, 1333
Pharmacology
Intracellular calcium transients in human working myocardium as detected with aequorin, 410
Mild hypertension: to treat or not to treat, 447
Suppression of experimental atherosclerosis in rabbits by interferon-inducing agents, 129
Phenytoine
Matching of myocardial oxygen consumption to mechanical load in human left ventricular hypertrophy and dysfunction, 291
Phenyltoin
Nifedipine–phenytoin interaction (letter), 1582
Pheochromocytoma
Short PR interval and narrow QRS complex associated with pheochromocytoma: electrophysiologic observations, 872
Platelet aggregation
Potential of coronary vascular platelet aggregation by atrial pacing in the presence of arterial stenosis in dogs, 1252
Postmortem studies
Accuracy and interobserver variability of coronary cineangiography: a comparison with postmortem evaluation, 1145
Pressure/volume ratio
Natural history of chronic mitral insufficiency: relation of peak systolic pressure end-systolic volume ratio to morbidity and mortality, 1412
Prognosis
Prognostic importance of digitalis after acute myocardial infarction, 681
Programmed electrical stimulation
Late induction of tachycardia in patients with ventricular fibrillation associated with acute myocardial infarction, 690
Propafenone
Electrophysiologic and hemodynamic effects of intravenous propafenone in patients with recurrent ventricular tachycardia, 1291
Propranolol
Effects of propranolol and timolol on left ventricular volumes during exercise in patients with coronary artery disease, 210
“Maximal” drug therapy is not necessarily optimal in chronic angina pectoris, 1051
Prostaglandin E
Long-term prostaglandin E therapy in congenital heart defects, 838
Prostaglandin E coronary venous retroperfusion in acute myocardial ischemia: effects on regional left ventricular function and infarct size, 939
Pseudoaneurysm
Pseudoaneurysm of the pulmonary artery after the banding procedure: two-dimensional echocardiographic description, 371
Pulmonary artery bands
Pseudoaneurysm of the pulmonary artery after the banding procedure: two-dimensional echocardiographic description, 371
Pulmonary valve atresia
Right ventricular rupture in pulmonary valve atresia with intact ventricular septum (letter), 232
Pulmonary wedge pressure
Congenital pulmonary vein stenosis: structural changes in a patient with normal pulmonary artery wedge pressure, 193
Pulse wave velocity
Forearm arterial distensibility in systemic hypertension, 387

Purkinje fibers
Evidence for prejunctional and postjunctional antagonism of the sympathetic neuroeffector junction by acetylcholine in the canine cardiac Purkinje fibers, 760

R wave amplitude
R wave amplitude: a new determinant of failure of patients with coronary heart disease to manifest ST segment depression during exercise, 1155

Radionuclide techniques
Anomalous right superior vena cava drainage to the left atrium, 467
Dynamic fluctuations in blood and spleen radioactivity: splenic contraction and relation to clinical radionuclide volume calculations, 1205
Regurgitation, aortic
Determinants of prognosis of patients with aortic regurgitation who undergo aortic valve replacement, 1118
Differences in myocardial performance and load between patients with similar amounts of chronic aortic versus chronic mitral regurgitation, 916
Effects of dynamic and isometric exercise on the radionuclide-determined regurgitant fraction in aortic insufficiency, 98
Relation between exercise-induced changes in ejection fraction and systolic loading conditions at rest in aortic regurgitation, 924
Reverse doming of the anterior mitral leaflet with severe mitral regurgitation, 431

Regurgitation, mitral
Chronic mitral regurgitation: predictive value of preoperative echocardiographic indexes of left ventricular function and wall stress, 235
Differences in myocardial performance and...
load between patients with similar amounts of chronic aortic versus chronic mitral regurgitation, 916

Two-dimensional echocardiographic contrast assessment of pacing-induced mitral regurgitation: relation to altered regional left ventricular function, 986

Regurgitation, tricuspid

Tricuspid regurgitation: noninvasive techniques for determining causes and severity, 1540

Regurgitation, valvular

Microbubbles have intracardiac velocities similar to those of red blood cells, 28

Validation of Fourier amplitude ratio to quantitate valvular regurgitation, 1482

Reperfusion

Enhancement of salvage of reperfused myocardium by early beta-adrenergic blockade (timolol), 1438

Kinetics of thallium-201 in reperfused canine myocardium after coronary artery occlusion, 1245

Patterns of creatine kinase release during acute myocardial infarction after nonsurgical reperfusion: comparison with conventional treatment and correlation with infarct size, 675

Retrograde conduction

Functional characteristics of retrograde conduction in a pacing model of “endless loop tachycardia”, 1488

Retropertusion

Prostaglandin E1 coronary venous retropertusion in acute myocardial ischemia: effects on regional left ventricular function and infarct size, 939

Revascularization

Changes in cardiac functional capacity after coronary bypass surgery in relation to adequacy of revascularization, 47

Coronary revascularization in the elderly patient, 1398

Criteria for successful coronary angioplasty as assessed by alterations in coronary vasodilatory reserve, 1382

Seminar on contrast two-dimensional echocardiography, 1, 978, 1212

Septal defects

Primary surgical closure of ventricular septal defects in the first year of life: results in 128 infants, 1269

Serum sodium concentration

Relation between serum sodium concentration and the hemodynamic and clinical responses to converting enzyme inhibition with captopril in severe heart failure, 1035

SHU-454

Superior intensity and reproducibility of SHU-454, a new right heart contrast agent, 992

Shunts

Anurensal degenaration of Blalock-Taussig shunts: identification and surgical treatment options, 1277

Balloon embolization to occlude a Blalock-Taussig shunt, 200

Clinical utility of two-dimensional Doppler echocardiographic techniques for estimating pulmonary to systemic blood flow ratios in children with left to right shunting atrial septal defect, ventricular septal defect or patent ductus arteriosus, 169

Intravenous digital subtraction angiography in the assessment of patients with left to right shunts before and after surgical correction, 1507

Right to left intracardiac shunt: a unique presentation of metastatic cardiac disease, 865

Sinus node function

Sinus atrial function after cardiac transplantation, 712

Sinus tachycardia

Refractory paroxysmal sinus tachycardia: management by subtotal right atrial exclusion, 400

Sonication

Two-dimensional contrast echocardiography. 1. In vitro development and quantitative analysis of echo contrast agents, 14

Stenosis

Accuracy of combined two-dimensional echocardiography and continuous wave Doppler recordings in the estimation of pressure gradient in right ventricular outlet obstruction, 1013

Are noninvasive tests sufficient for preoperative evaluation of aortic stenosis? (editorial), 1092

Cardiac catheterization before aortic valve replacement in patients with aortic stenosis (editorial), 1096

Comparison of the echocardiographic and hemodynamic diagnosis of rheumatic tricuspid stenosis, 1135

Congenital pulmonary vein stenosis: structural changes in a patient with normal pulmonary artery wedge pressure, 193

Correlation of myocardial echo contrast disappearance rate (“washout”) and severity of experimental coronary stenosis, 39

Criteria for successful coronary angioplasty as assessed by alterations in coronary vasodilatory reserve, 1382

Duration of ejection in aortic stenosis; effect of stroke volume and pressure gradient, 157

Ejection time and heart rate in aortic stenosis (letter), 1581

Evaluation of aortic stenosis by continuous wave Doppler ultrasound, 150

Improved prediction of peak left ventricular pressure by echocardiography in children with aortic stenosis, 349

Left ventricular aneurysm subsequent to cleavage of myocardial bridging of a coronary artery, 1345

Left ventricular performance in patients with coexistent mitral stenosis and aortic insufficiency, 703

Noninvasive quantification of stenotic semilunar valve areas by Doppler echocardiography, 1256

Percutaneous balloon valvuloplasty for treatment of congenital pulmonary valvular stenosis in children, 1005

Platelet-mediated thrombosis in stenosed canine coronary arteries: inhibition by nicergoline, a platelet-active alpha-antagonist, 1417

Potentiation of coronary vascular platelet adhesion by atrial pacing in the presence of arterial stenosis in dogs, 1252

Septal myomectomy and mitral valve replacement for idiopathic hypertrophic subaortic stenosis: short-term and long-term follow-up, 1127

Two-dimensional echocardiographic imaging of left atrial appendage thrombi, 1340

Subepicardial fat

Combined posteroanterior subepicardial fat simulating the echocardiographic diagnosis of pericardial effusion, 1333

Subtotal right atrial exclusion

Refractory paroxysmal sinus tachycardia: management by subtotal right atrial exclusion, 400

Sudden death

Acute takeoffs of the coronary arteries along the aortic wall and congenital coronary ostial valve-like ridges: association with sudden death, 766

Cardiac arrhythmias in systemic amyloidosis: correlation with echocardiographic abnormalities, 107

Holtor-monitored sudden death (letter), 1352

Timing, mechanism and clinical setting of witnessed deaths in postmyocardial infarction patients, 1111

Surgery

Aortic and mitral valve incompetence: long-term follow-up (10 to 19 years) of patients treated with the Starr-Edwards prosthesis, 930

Aneureysmal degenaration of Blalock-Taussig shunts: identification and surgical treatment options, 1277

Aneurysms of sinus Valsalva: two-dimensional echocardiographic diagnosis of rupture into the right heart cavities, 1227

Bileaflet, tilting disc and porcine aortic valve substitutes: in vitro hydrodynamic characteristics, 313
Bileaflet tilting disc and porcine aortic valve substitutes: in vivo hydrodynamic characteristics, 321

Chronic mitral regurgitation: predictive value of preoperative echocardiographic indexes of left ventricular function and wall stress, 235

Coronary artery bypass surgery morbidity, 1391

Coronary Artery Surgery Study (CASS): a randomized trial of coronary artery bypass surgery. Comparability of entry characteristics and survival in randomized patients and nonrandomized patients meeting randomized criteria, 902

Coronary revascularization in the elderly patient, 1398

Determinants of prognosis of patients with aortic regurgitation who undergo aortic valve replacement, 1118

Graft patency in patients with coronary artery bypass operation complicated by perioperative myocardial infarction, 55

Improved regional ventricular function after successful surgical revascularization, 902

Intermittent poppet dislodgment in a Braunwald-Cutter prosthesis: noninvasive diagnosis and successful surgical treatment, 442

Intravenous digital subtraction angiography in the assessment of patients with left to right shunts before and after surgical correction, 1507

Left ventricular aneurysm subsequent to cleavage of myocardial bridging of a coronary artery, 1345

Long-term survival of patients with treated aortic dissection, 1026

Myocardial infarction in patients with previous coronary artery bypass surgery, 909

Origin of both coronary arteries from the pulmonary trunk associated with hypoplasia of the aortic tract complex: a new entity, 437

Primary surgical closure of ventricular septal defects in the first year of life: results in 128 infants, 1269

Refactory paroxysmal sinus tachycardia: management by subtotal right atrial exclusion, 400

Septal myomectomy and mitral valve replacement for idiopathic hypertrophic subaortic stenosis: short- and long-term follow-up, 1127

Shared coronary arteries and coronary venous drainage in thoracopagus twins, 1019

Surgical correction of the Wolff-Parkinson-White syndrome in the closed heart using cryosurgery: a simplified approach, 405

Sympathetic nervous system

Evidence for prejunctional and postjunctional antagonism of the sympathetic neuroeffector junction by acetylcholine in the canine cardiac Purkinje fibers, 760

Sympathetic nervous system and exercise tolerance response in normotensive and hypertensive adolescents, 381

Systole

Left ventricular function in coronary artery disease. Evaluation of slope of end-systolic pressure-volume line ($E_{soc}$) and ratio of peak systolic pressure to end-systolic volume ($P/V_{soc}$), 781

Relation between exercise-induced changes in ejection fraction and systolic loading conditions at rest in aortic regurgitation, 924

Tachycardia

See Ventricular tachycardia

Thallium-201

Comparison of exercise perfusion and ventricular function imaging: an analysis of factors affecting the diagnostic accuracy of each technique, 272

Effect of decreased blood flow and ischemia on myocardial thallium clearance, 744

Kinetics of thallium-201 in reperfused canine myocardium after coronary artery occlusion, 1245

The pacing stress test: thallium-201 myocardial imaging after atrial pacing: diagnostic value in detecting coronary artery disease compared with exercise testing, 1197

Quantitative analysis of seven-pinhole tomographic thallium-201 scintigrams: improved sensitivity and estimation of the extent of coronary involvement by evaluation of radiotracer uptake and cardiac output, 948

Use of electrocardiographic-thallium exercise testing in clinical practice, 262

Thermomodulation

In vivo correlation of thermomodulation cardiac output and videodensitometric indicator-dilution curves obtained from contrast two-dimensional echocardiograms, 999

Thiazide diuretic agents

Forearm arterial distensibility in systolic hypertension, 387

Thoracopagus twins

Shared coronary arteries and coronary venous drainage in thoracopagus twins, 1019

Timolol

Effects of propranolol and timolol on left ventricular volumes during exercise in patients with coronary artery disease, 210

Tomography

Anusynymal degeneration of Blalock-Taussig shunts: identification and surgical treatment options, 1275

Graft patency in patients with coronary artery bypass operation complicated by perioperative myocardial infarction, 55

Myocardial infarct size determined by computed transmission tomography in canine infarcts of various ages and in the presence of coronary reperfusion, 138

Ventricular diastolic pressure-volume shifts during acute ischemic left ventricular failure in dogs, 966

Transient entrainment

Demonstration of the mechanism of transient entrainment and interruption of ventricular tachycardia with rapid atrial pacing, 422

Entrainment as an electrophysiologic phenomenon (editorial), 451

Transpulmonary studies

Two-dimensional contrast echocardiography, Part II. Transpulmonary studies, 21

Tricuspid valve

Two-dimensional echocardiographic spectrum of Ebstein’s anomaly: detailed anatomic assessment, 356

Ultrasound

Bileaflet, tilting disc and porcine aortic valve substitutes: in vivo hydrodynamic characteristics, 321

Intermittent poppet dislodgment in a...
Valvuloplasty
Percutaneous balloon valvuloplasty for treatment of congenital pulmonary valvular stenosis in children, 1005

Valvular bands
Echocardiographic evidence of left ventricular bands in infants and children, 1515

Ventricular bands
Difficulty of extraction of chronically implanted tined left ventricular endocardial leads, 724

Ventricular function
Amrinone in the treatment of chronic mitral regurgitation, 1282

Ventricular septal defects
Ultrasonic contrast studies for the detection of cardiac shunts, 978

Ventricular tachycardia
Afterdepolarizations as a mechanism for the long QT syndrome: electrophysiologic studies of a case, 1556

Ventricular extrasystoles
Phase image evaluation of patients with ventricular pre-excitation syndromes, 799

Ventriculography, radionuclide
Effects of dynamic and isometric exercise on the radionuclide-determined regional blood flow during acute ischemia in the dog, 334

Ventriculography
Three-dimensional analysis of regional myocardial function in response to nitroglycerin in patients with coronary artery disease, 1187

Ventriculography
Surface electrocardiographic clues suggestive of the presence of a nodofascicular Mahaim fiber, 1161

Ventricular rate
Treatment of ventricular tachycardia using an automatic scanning extrastimulus pacemaker, 225

Ventricular response
Ventricular response to atrial fibrillation (letter), 1105

Ventricular septal dysfunction
What do we gain from the analysis of right ventricular pressure-volume diagrams afterload and ejection fraction in mitral valve disease: radionuclide, wall stress, 235

Ventricular septal dysfunction
Regional myocardial dysfunction in patients with angiina at rest and response to intravenous nitroglycerin assessed by phase analysis of radionuclide ventriculograms, 1357

Ventricular septal dysfunction
Validation of Fourier amplitude ratio to quantitate valvular regurgitation, 1482

Ventricular septal dysfunction
Blood flow to infarct and surviving myocardium: implications regarding the action of verapamil on the acutely ischemic dog heart, 956

Ventricular septal dysfunction
Effects of verapamil on contraction and relaxation of cultured chick embryo ventricular cells during calcium overload, 341

Ventricular septal dysfunction
Paroxysmal supraventricular tachycardia with Wenckebach block: evidence for reentry within the upper portion of the atrioventricular node, 1551

Ventricular septal dysfunction
Computer methods for myocardial contrast two-dimensional echocardiography, 1212

Ventricular septal dysfunction
Myocardial contrast two-dimensional echocardiography: experimental examination at different coronary flow levels, 1219

Ventricular septal dysfunction
Superior intensity and reproducibility of SHU-454, a new right heart contrast agent, 992

Ventricular septal dysfunction
Two-dimensional contrast echocardiography. II. Transpulmonary studies, 21

Ventricular septal dysfunction
Surgical correction of the Wolff-Parkinson-White syndrome in the closed heart using cryosurgery: a simplified approach, 405
