(Neuron 75, 1081–1093; September 20, 2012)

In the original publication of this paper, there was an error in the statement of rate constants for the model in Figure 7. The correct statement for the rate constant α should be $550 \cdot \exp(V/24)$. The correct rate constant was used for the calculations. The online version of the paper has been corrected. In addition, misplaced parentheses for the equations in Figure 7C have been corrected. The correct equations were used for the fits.

A Genome-wide Screen Identifies PAPP-AA-Mediated IGFR Signaling as a Novel Regulator of Habituation Learning

(Neuron 85, 1200–1211; March 18, 2015)

In the original publication, Figure 6 did not accurately reflect the *pappaa^{p170}* genotypes analyzed for habituation. The corrected version of the figure is shown below, and this has now been corrected in the article online.
