Preface. Outline. 1. Introduction 1.1 Motivation 1.2 Description of the Task 1.3 Previous Work in NLP for Questioning Answering 1.4 Question Answering at the Text Retrieval Conference 1.4.1 Test Collection 1.4.2 Gold Standard 1.4.3 Scoring Metrics 1.5 Book Overview 2. An Approach to Open-Domain Question Answering 2.1 Introduction 2.2 Document Retrieval versus Answer Extraction 2.2.1 A Generic Document Retrieval Architecture 2.2.2 A Generic Question Answering Architecture 2.3 A Complete Architecture for Open-Domain Question Answering 2.3.1 Background on External Resources 2.3.2 Architecture Description 2.4 Answering Natural Language Questions: An Example 2.5 Alternative Perspectives on Question Answering 2.5.1 Review of Information Retrieval (IR) for QA 2.5.2 Review of Information Extraction (IE) for QA 2.5.3 Review of Text-Based Inference (TI) for QA 2.5.4 Impact on QA Subproblems 2.6 Summary 3. Question Processing 3.1 Introduction 3.2 Information Conveyed by Natural-Language Questions 3.2.1 Layer 1: Lexical Terms 3.2.2 Layer 2: Inter-Term Relations 3.2.3 Layer 3: Question Stems and Expected Answer Types 3.2.4 Layer 4: Semantic Questions 3.3 A Dependency Representation Model 3.3.1 Model Description 3.3.2 Semantic Operators 3.3.3 Application to Answer Extraction 3.4 Construction of Dependency Representations 3.4.1 Preprocessing 3.4.2 Derivation of Relations 4. Answer Type Determination 4.1 Introduction 4.2 A Hierarchy of Answer Types 4.2.1 Overview of the Hierarchy 4.2.2 Connecting the Answer Types with WordNet Hierarchies 4.2.3 Correlation between Answer Types and Named Entities 4.3 Building the Answer Type Hierarchy 4.3.1 Part of Speech Coverage 4.3.2 Selection of Word Senses 4.3.3 Refinement of the Hierarchy Nodes 4.4 Derivation of the Expected Answer Type of a Question 4.4.1 Derivation of the Question Stem and Answer Type Term 4.4.2 Hierarchy Filtering Based on the Question Stem 4.4.3 Hierarchy Search Guided by the Answer Type Term 4.4.4 Extraction of the Expected Answer Type 4.5 Limitations and Extensions 4.5.1 Refining the Hierarchy of Answer Types 4.5.2 Dynamic Answer Type Categories 4.5.3 Pattern-Based Answer Type Recognition 4.6 Evaluation 4.7 Summary 5. Passage Retrieval 5.1 Introduction 5.2 Conversion of Questions into Ordered Sequences of Keywords 5.2.1 Factors in the Selection of Question Terms as Keywords 5.2.2 High-Relevance Terms 5.2.3 Medium-Relevance Terms 5.2.4 Low-Relevance Terms 5.2.5 Assembling Ordered Sequences of Keywords 5.3 Passage Retrieval Through Dynamic Query Adjustment 5.3.1 Query Definition 5.3.2 The Passage Retrieval Loop 5.3.3 Control of Passage Granularity 5.4 Summary 6. Answer Extraction 6.1 Introduction 6.2 Question-Driven Passage Ranking 6.2.1 Matching the Question on a Passage 6.2.2 Lexical-Matching Relevance Features for Passage Ranking 6.2.3 Passage Ranking Scheme 6.3 Identification of Candidate Answers 6.3.1 Named-Entity Based Identification of Candidate Answers 6.3.2 Pattern-Based Identification of Candidate Answers 6.4 Extraction of Answer Strings 6.5 Empirical Ranking of Candidate Answers 6.5.1 Semantic-Matching Relevance Features for Answer Ranking 6.5.2 An Empirical Answer Scoring Formula 6.5.3 Evaluation 6.6 A Machine Learning Approach to Answer Ranking 6.6.1 Perceptron-Based Learning for Answer Ranking 6.6.2 Evaluation 7. Answer Extraction from Web Documents 7.1 Introduction 7.2 Finding Relevant Answers on the Web 7.2.1 Architecture Overview 7.2.2 Retrieval of Text Passages from Web Search Engines 7.3 Evaluation 7.3.1 Results in Terms of Precision/MRR 7.3.2 Results in Terms of Time Saving 7.4 Summary 8. Related Work 8.1 Question Processing 8.2 Passage Retrieval 8.3 Answer Extraction 9. Conclusion References. Name Index. Subject Index.

Contents:
Preface. Outline. 1. Linear Systems 1.1 Solution of Triangular Systems 1.2 Gaussian Elimination 1.3 Pivoting Strategies and Iterative Refinement 1.4 Cholesky Decomposition for Symmetric Positive Definite Matrices Exercises. 2. Error Analysis 2.1 Sources of Errors 2.2 Condition of Problems 2.2.1 Normwise Condition Analysis 2.2.2 Componentwise Condition Analysis 2.3 Stability of Algorithms 2.3.1 Stability Concepts 2.3.2 Forward Analysis 2.3.3 Backward Analysis 2.4 Application to Linear Systems 2.4.1 A Zoom into Solvability 2.4.2 Backward Analysis of Gaussian Elimination 2.4.3 Assessment of Approximate Solutions Exercises. 3. Linear Least-Squares Problems 3.1 Least-Squares Method of Gauss 3.1.1 Formulation of the Problem 3.1.2 Normal Equations 3.1.3 Condition 3.1.4 Solution of Normal Equations 3.2 Orthogonalization Methods 3.2.1 Givens Reflections 3.2.2 Householder Reflections 3.3 Generalized Inverses Exercises. 4. Nonlinear Systems and Least-Squares Problems 4.4 Nonlinear Systems Depending on Parameters 4.4.1 Solution Structure 4.4.2 Continuation Methods Exercises. 5. Linear Eigenvalue Problems 5.1 Condition of General Eigenvalue Problems 5.2 Power Method 5.3 QR-Algorithm for Symmetric Eigenvalue Problems 5.4 Singular Value Decomposition 5.5 Stochastic Eigenvalue Problems.
