337 Serial Doppler echocardiographic evaluation of small-sized Sorin Bicarbon prostheses
Marco De Carlo, MD, Aldo D. Milano, MD, PhD, Carmela Nardi, MD, Gianclaudio Mecozzi, MD, and Uberto Bortolotti, MD, Pisa, Italy

The present study reports serial echocardiographic measurements for 21-mm and 23-mm Sorin Bicarbon prostheses (Sorin Biomedica, Saluggia, Italy). The effective orifice area values might be useful for AVR in patients with a small aortic annulus to avoid patient-prosthesis mismatch.
