In the paper entitled “Rational normal forms and minimal decompositions of hypergeometric terms” by S.A. Abramov and M. Petkovšek (J. Symbolic Comput. 33 (2002) 521–543), replace the last seven lines on p. 534 (starting with “if  $E^{-1}d_1 \mid v_2$ ”) and the first line on p. 535 by the following four lines:

$$\begin{aligned}w_1 &:= \gcd(E^{-1}d_1, v_2); \\v_2 &:= v_2/w_1; \quad f_1 := (d_1/Ew_1)w_1; \\w_2 &:= \gcd(d_2, v_2); \\v_2 &:= v_2/w_2; \quad f_2 := (d_2/w_2)Ew_2;\end{aligned}$$
