Are Anaplastic Lymphoma Kinase Gene Rearrangements in Non-small Cell Lung Cancer Prognostic, Predictive, or Both?: Erratum
In the editorial that appeared on page 1 of the January 2012 issue of the Journal of Thoracic Oncology, there was a typographical error in line 13 of the second paragraph. This sentence should read: In this cohort of predominantly early-stage tumors (191/300 stage I/II, 62/300 stage III, and 47/300 stage IV), 22 patients (8.2%) were determined to be ALK-positive by FISH.
