Reviews

How understanding the control of energy metabolism can help investigation of mitochondrial dysfunction, regulation and pharmacology
M.P. Murphy (New Zealand)

1

Control of oxidative phosphorylation in skeletal muscle
W.S. Kunz (Germany)

12

What do mitochondrial diseases teach us about normal mitochondrial functions... that we already knew: threshold expression of mitochondrial defects
J.-P. Mazat, R. Rossignol, M. Malgat, C. Rocher, B. Faustin and T. Letellier (France)

20

Theoretical studies on the regulation of oxidative phosphorylation in intact tissues
B. Korzeniewski (Poland)

31

Regulation of mitochondrial respiration by nitric oxide inhibition of cytochrome *c* oxidase
G.C. Brown (UK)

46

Control of plant mitochondrial respiration
C. Affourtit, K. Krab and A.L. Moore (The Netherlands, UK)

58

Physiological regulation of the transport activity in the uncoupling proteins UCP1 and UCP2
E. Rial and M.M. González-Barroso (Spain)

70

UCP1: the only protein able to mediate adaptive non-shivering thermogenesis and metabolic inefficiency
J. Nedergaard, V. Golozoubova, A. Matthias, A. Asadi, A. Jacobsson and B. Cannon (Sweden)

82

Homologues of the uncoupling protein from brown adipose tissue (UCP1): UCP2, UCP3, BMCP1 and UCP4
F. Bouillaud, E. Couplan, C. Pecqueur and D. Ricquier (France)

107

Mitochondrial proton leak: a role for uncoupling proteins 2 and 3?
R.K. Porter (Ireland)

120

Uncoupling proteins: the issues from a biochemist point of view
M. Klingenberg and K.S. Echtay (Germany)

128

Mitochondrial proton leak and the uncoupling protein 1 homologues

J.A. Stuart, S. Cadenas, M.B. Jekabsons, D. Roussel and M.D. Brand (UK) 144

Mitochondrial efficiency: lessons learned from transgenic mice

M.-E. Harper and J. Himms-Hagen (Canada) 159

Rapid report

Evidence for a quinone binding site close to the interface between NUOD and NUOB subunits of Complex I

I. Prieur, J. Lunardi and A. Dupuis (France) 173

Reviews

Fungal respiration: a fusion of standard and alternative components

T. Joseph-Horne, D.W. Hollomon and P.M. Wood (UK) 179

Generation and propagation of radical reactions on proteins

C.L. Hawkins and M.J. Davies (Australia) 196

Regular papers

Stoichiometry of subunit e in rat liver mitochondrial H⁺-ATP synthase and membrane topology of its putative Ca²⁺-dependent regulatory region

N. Arakaki, Y. Ueyama, M. Hirose, T. Himeda, H. Shibata, S. Futaki, K. Kitagawa and T. Higuti (Japan) 220

Temperature-induced decoupling of phycobilisomes from reaction centers

Y. Li, J. Zhang, J. Xie, J. Zhao and L. Jiang (People's Republic of China) 229

Modification of inhibitor binding sites in the cytochrome *b*f complex by directed mutagenesis of cytochrome *b*₆ in *Synechococcus* sp. PCC 7002

T.-X. Lee, S.U. Metzger, Y.S. Cho, J. Whitmarsh and T. Kallas (USA) 235

The rapid mode of calcium uptake into heart mitochondria (RaM): comparison to RaM in liver mitochondria <i>L. Buntinas, K.K. Gunter, G.C. Sparagna and T.E. Gunter (USA)</i>	248
The oxidation state of the photosystem II manganese cluster influences the structure of manganese stabilizing protein <i>S.K. Hong, S.A. Pawlikowski, K.A. Vander Meulen and C.F. Yocom (USA)</i>	262
Chloroplastic ascorbate peroxidase is the primary target of methylviologen-induced photooxidative stress in spinach leaves: its relevance to monodehydroascorbate radical detected with in vivo ESR <i>J. Mano, C. Ohno, Y. Domae and K. Asada (Japan)</i>	275
Photoreducible high spin iron electron paramagnetic resonance signals in dark-adapted Photosystem II: are they oxidised non-haem iron formed from interaction of oxygen with PSII electron acceptors? <i>J.H.A. Nugent (UK)</i>	288
Two functionally distinct manganese clusters formed by introducing a mutation in the carboxyl terminus of a photosystem II reaction center polypeptide, D1, of the green alga <i>Chlamydomonas reinhardtii</i> <i>A. Hatano-Iwasaki, J. Minagawa, Y. Inoue and Y. Takahashi (Japan)</i>	299
Long-lived charge-separated states in bacterial reaction centers isolated from <i>Rhodobacter sphaeroides</i> <i>F. van Mourik, M. Reus and A.R. Holzwarth (Germany)</i>	311
Evaluation of the hydrogen bonding interactions and their effects on the oxidation-reduction potentials for the riboflavin complex of the <i>Desulfovibrio vulgaris</i> flavodoxin <i>F.-C. Chang, L.H. Bradley and R.P. Swenson (USA)</i>	319
Reversible ischemic inhibition of F ₁ F ₀ -ATPase in rat and human myocardium <i>K. Ylitalo, A. Ala-Rämi, K. Vuorinen, K. Peuhkurinen, M. Lepojärvi, P. Kaukoranta, K. Kiviluoma and I. Hassinen (Finland)</i>	329
Identification of LhcB1/LhcB2/LhcB3 heterotrimers of the main light-harvesting chlorophyll <i>a/b</i> -protein complex of Photosystem II (LHC II) <i>G. Jackowski, K. Kacprzak and S. Jansson (Poland, Sweden)</i>	340
Heterocyclic <i>ortho</i> -quinones, a novel type of Photosystem II inhibitors <i>W. Oettmeier, K. Masson and H.-J. Hecht (Germany)</i>	346
Transmembrane orientation and topology of the NADH:quinone oxidoreductase putative quinone binding subunit NuoH <i>R. Roth and C. Hägerhäll (Sweden)</i>	352
Efficient large scale purification of his-tagged proton translocating NADH:ubiquinone oxidoreductase (complex I) from the strictly aerobic yeast <i>Yarrowia lipolytica</i> <i>N. Kashani-Poor, S. Kerscher, V. Zickermann and U. Brandt (Germany)</i>	363
Origin and properties of fluorescence emission from the extrinsic 33 kDa manganese stabilizing protein of higher plant water oxidizing complex <i>T. Shutova, G. Deikus, K.-D. Irrgang, V.V. Klimov and G. Renger (Germany, Lithuania, Russia)</i>	371
Functional complexes of mitochondria with Ca,MgATPases of myofibrils and sarcoplasmic reticulum in muscle cells <i>E.K. Seppet, T. Kaambre, P. Sikk, T. Tiivel, H. Vija, M. Tonkonogi, K. Sahlin, L. Kay, F. Appaix, U. Braun, M. Eimre and V.A. Saks (Estonia, France, Sweden)</i>	379
Changes of absorption spectra during heat-induced denaturation of Photosystem II core antenna complexes CP43 and CP47: revealing the binding states of chlorophyll molecules in these two complexes <i>J. Shan, J. Wang, X. Ruan, L. Li, Y. Gong, N. Zhao and T. Kuang (PR China)</i>	396
The manganese stabilizing protein (MSP) and the control of O ₂ evolution in the unicellular, diazotrophic cyanobacterium, <i>Cyanothece</i> sp. ATCC 51142 <i>D.L. Tucker, K. Hirsh, H. Li, B. Boardman and L.A. Sherman (USA)</i>	409
Plasma membrane electron transport coupled to Na ⁺ extrusion in the halotolerant alga <i>Dunaliella</i> <i>A. Katz and U. Pick (Israel)</i>	423
Accessibility of tyrosine Y _Z to exogenous reductants and Mn ²⁺ in various Photosystem II preparations <i>S. Chroni and D.F. Ghanotakis (Greece)</i>	432
Adenylate kinase activity in rod outer segments of bovine retina <i>L. Notari, I.M. Pepe, C. Cugnoli and A. Morelli (Italy)</i>	438
The energy level scheme for the ferryl heme in compound II of the peroxidase-catalase family as determined from analysis of low-temperature magnetic circular dichroism <i>Y.A. Sharonov (Russia)</i>	444
