A CALL TO ACTION:
REDUCING VENOUS ULCERS BY FIFTY PERCENT IN 10 YEARS

CONTENTS

GUEST EDITOR       Peter Henke, MD

SPONSOR:       The American Venous Forum

The Pacific Vascular Symposium 6: The Venous Ulcer Summit in perspective  
Peter Henke, MD, on behalf of the Pacific Vascular Symposium 6 faculty, Ann Arbor, Mich 1S

The structure and processes of the Pacific Vascular Symposium 6  
Fedor Lurie, MD, Robert L. Kistner, MD, Bo Eklof, MD, PhD, Thomas Wakefield, MD, and Anthony Comerota, MD, Honolulu, Hawaii; Ann Arbor, Mich; and Toledo, Ohio 3S

Venous ulcer diagnosis, treatment, and prevention of recurrences  
David L. Gillespie, MD, on behalf of writing group III of the Pacific Vascular Symposium 6, Rochester, NY 8S

Prevention and treatment of venous ulcers in primary chronic venous insufficiency  
Peter Neglen, MD, PhD, on behalf of writing group II of the Pacific Vascular Symposium 6, Flowood, Miss 15S

Prevention and treatment of the postthrombotic syndrome  
Peter Henke, MD, on behalf of writing group I of the Pacific Vascular Symposium 6, Ann Arbor, Mich 21S

Non-medical initiatives to decrease venous ulcers prevalence  
Marc A. Passman, MD, on behalf of writing group IV of the Pacific Vascular Symposium 6, Birmingham, Ala 29S
Reducing venous stasis ulcers by fifty percent in 10 years: The next steps
Peter Henke, MD, Bob Kistner, MD, Thomas W. Wakefield, MD, Bo Eklof, MD, and Fedor Lurie, MD, Ann Arbor, Mich; Honolulu, Hawaii; and Toledo, Ohio

The opinions or views expressed in this professional education supplement are those of the authors and do not necessarily reflect the opinions or recommendations of the Society or the Publisher.

Dosages, indications, and methods of use for products that are referred to in the supplement by the authors may reflect their clinical experience or may be derived from the professional literature or other clinical sources. Because of the differences between in vitro and in vivo systems and between laboratory animal models and clinical data in humans, in vitro and animal data may not necessarily correlate with clinical results.
