### To Identify Associations with Rare Variants, Just WHaIT: Weighted Haplotype and Imputation-Based Tests

Yun Li,<sup>\*</sup> Andrea E. Byrnes, and Mingyao Li

(The American Journal of Human Genetics 87, 728–735; November 12, 2010)

On page 729, the third formula on the left panel should be:

$$S_h = 1/\sqrt{N_{ct} \cdot f_{ct,h} \cdot (1 - f_{ct,h})}$$

The formula on the right panel should be:

$$WDS_i = \sum_{j=1}^M I(j \in \mathbf{M}_C) \cdot (-1)^{I(j \in \mathbf{M}_P)} \cdot W_j \cdot D_{i,j}$$

The authors apologize for the errors.
