2010. How long does it take to establish a morphogen gradient? *Biophys. J.* 99:L59–L61.

There is a typographical mistake in one of the inequalities:

Because the Bcd gradient is formed in 90 min, the expression for  $\tau(x)$  provides an upper limit on the Bcd lifetime:  $\tau_r > 30$  min.

The sign of the inequality should be reversed to “<”.

The sentence should read:

Because the Bcd gradient is formed in 90 min, the expression for  $\tau(x)$  provides an upper limit on the Bcd lifetime:  $\tau_r < 30$  min.
