Index to Volumes 39 and 40

Volume 39
A new family of rational surfaces in $\mathbb{P}^4$, 51
A new symbolic method for solving linear two-point boundary value problems on the level of operators, 171
A reconstruction and extension of Maple’s assume facility via constraint contextual rewriting, 503
Abbott, J., Kreuzer, M. and Robbiano, L., Computing zero-dimensional schemes, 31
Alcázar, J.G. and Sendra, J.R., Computation of the topology of real algebraic space curves, 719
Algebraic geometry of Bayesian networks, 331
Algorithmic stratification of $R\mathcal{H}om_D (M,N)$ for regular algebraic $D$-modules on $\mathbb{C}^n$, 493
Algorithms for graded injective resolutions and local cohomology over semigroup rings, 373
An algorithm for constructing representations of finite groups, 671
Applicability of the $q$-analogue of Zeilberger’s algorithm, 155
Armando, A. and Ballarin, C., A reconstruction and extension of Maple’s assume facility via constraint contextual rewriting, 503
Auerbach, R.L., The Gröbner fan and Gröbner walk for modules, 127
Automated conjecture making in number theory using HR, Otter and Maple, 593
Beeson, M. and Wiedijk, F., The meaning of infinity in calculus and computer algebra systems, 523
Bezoutian and quotient ring structure, 397
Birational properties of the gap subresultant varieties, 61
Busé, L. and Galligo, A., Semi-implicit representations of surfaces in $\mathbb{P}^3$, resultants and applications, 317
Caprotti, O. and Sorge, V., Integration of automated reasoning and computer algebra systems, 501

0747-7171/S - see front matter
doi:10.1016/S0747-7171(05)00161-6
CHEN, F., COX, D. and LIU, Y., The \( \mu \)-basis and implicitization of a rational parametric surface, 689

CHEN, W.Y.C., HOU, Q.-H. and MU, Y.-P., Applicability of the \( q \)-anlogue of Zeilberger's algorithm, 155

COHEN, A.M., GREUEL, G.-M. and ROY, M.-F., Preface, 257

COLTON, S., Automated conjecture making in number theory using HR, Otter and Maple, 593

Computation of the topology of real algebraic space curves, 719

Computing zero-dimensional schemes, 31

Constructing transitive permutation groups, 1

Cyclic resultants, 653

D’ANDREA, C. and JERONIMO, G., Subresultants and generic monomial bases, 259

DABBAGHIAN-ABDOLY, V., An algorithm for constructing representations of finite groups, 671

DAMGÅRD, I.B. and FRANDSEN, G.S., Efficient algorithms for the gcd and cubic residuosity in the ring of Eisenstein integers, 643

Dealing with algebraic expressions over a field in Coq using Maple, 569

DELAHAYE, D. and MAYERO, M., Dealing with algebraic expressions over a field in Coq using Maple, 569

DERKSEN, H., JEANDEL, E. and KOIRAN, P., Quantum automata and algebraic groups, 357

DRAISMA, J., Representation theory on the open Bruhat cell, 279

Effective analytic functions, 433

Efficient algorithms for the gcd and cubic residuosity in the ring of Eisenstein integers, 643

EL. KAHoui, M., Birational properties of the gap subresultant varieties, 61

Equations of parametric surfaces with base points via syzygies, 73

Factoring polynomials over global fields I, 617

FORTUNA, E., GIANNI, P. and TRAGER, B., Irreducible decomposition of polynomial ideals, 305

Galois theory and algorithms for linear differential equations, 451

GARCIA, L.D., STILLMAN, M. and STURMFELS, B., Algebraic geometry of Bayesian networks, 331

Good bases for tame polynomials, 103

GOTTLIEBSEN, H., KELSEY, T. and MARTIN, U., Hidden verification for computational mathematics, 539

GRAF V. BOTHMER, H.-C., ERDENBERGER, C. and LUDWIG, K., A new family of rational surfaces in \( \mathbb{P}^4 \), 51

GRANGER, M., OAKU, T. and TAKAYAMA, N., Tangent cone algorithm for homogenized differential operators, 417

HELM, D. and MILLER, E., Algorithms for graded injective resolutions and local cohomology over semigroup rings, 373

Hidden verification for computational mathematics, 539

HILLAR, C.J., Cyclic resultants, 653

Homotopy classification of maps between simply connected four manifolds, 631

HULPEKE, A., Constructing transitive permutation groups, 1
Integration of automated reasoning and computer algebra systems, 501
Irreducible decomposition of polynomial ideals, 305
Lombardi, H. and Yengui, I., Suslin’s algorithms for reduction of unimodular rows, 707
Mohammed, M. and Zeilberger, D., Sharp upper bounds for the orders of the recurrences output by the Zeilberger and $q$-Zeilberger algorithms, 201
Mourrain, B., Bezoutian and quotient ring structure, 397
On constructive desingularization, 465
Pohst, M.E., Factoring polynomials over global fields I, 617
Preface, 257
Quantum automata and algebraic groups, 357
Representation theory on the open Bruhat cell, 279
Rosenkranz, M., A new symbolic method for solving linear two-point boundary value problems on the level of operators, 171
Schulze, M., Good bases for tame polynomials, 103
Semi-implicit representations of surfaces in $\mathbb{P}^3$, resultants and applications, 317
Sharp upper bounds for the orders of the recurrences output by the Zeilberger and $q$-Zeilberger algorithms, 201
Subresultants and generic monomial bases, 259
Suslin’s algorithms for reduction of unimodular rows, 707
Tangent cone algorithm for homogenized differential operators, 417
The $\mu$-basis and implicitization of a rational parametric surface, 689
The Gröbner fan and Gröbner walk for modules, 127
The meaning of infinity in calculus and computer algebra systems, 523
Towards a unified model of search in theorem-proving: subgoal-reduction strategies, 209
Van der Hoeven, J., Effective analytic functions, 433
Van der Put, M., Galois theory and algorithms for linear differential equations, 451
Villamayor U., O., On constructive desingularization, 465
Walther, U., Algorithmic stratification of $\mathbb{R} Hom_D (M, N)$ for regular algebraic $D$-modules on $\mathbb{C}^n$, 493
Zhao, X.A., Gao, H. and Su, X., Homotopy classification of maps between simply connected four manifolds, 631

Volume 40

A survey of strategies in rule-based program transformation systems, 831
Albert, E., Hanus, M., Huch, F., Oliver, J. and Vidal, G., Operational semantics for declarative multi-paradigm languages, 795
Alvarez Montaner, J., Operations with regular holonomic $D$-modules with support a normal crossing, 999
Antoy, S., Evaluation strategies for functional logic programming, 875
Apel, J. and Hemmecke, R., Detecting unnecessary reductions in an involutive basis computation, 1131
ASSMANN, B. and EICK, B., Computing polycyclic presentations for polycyclic rational matrix groups, 1269
Asymptotic invariant tori of perturbed two-body problems, 1256
BUSÉ, L. and CHARDIN, M., Implicitizing rational hypersurfaces using approximation complexes, 1150
CHEN, W.Y.C. and SAAD, H.L., On the Gosper–Petkovšek representation of rational functions, 955
Comparison of theoretical complexities of two methods for computing annihilating ideals of polynomials, 1076
Computational algebra for bifurcation theory, 1180
Computing instanton numbers of curve singularities, 965
Computing polycyclic presentations for polycyclic rational matrix groups, 1269
Computing subgroups of bounded index in a finite group, 1013
CONCA, A. and SIDMAN, J., Generic initial ideals of points and curves, 1023
Conquering inseparability: Primary decomposition and multivariate factorization over algebraic function fields of positive characteristic, 1053
Decidability of bounded higher-order unification, 905
Detecting unnecessary reductions in an involutive basis computation, 1131
Eigenvalues of a real supersymmetric tensor, 1302
Enumeration and 3D representation of the stereo-isomers of alkane molecules, 1225
ER-RIANI, M. and SERO-GUILLAUME, O., Shapes of liquid drops obtained using symbolic computation, 1340
Evaluation strategies for functional logic programming, 875
Factoring polynomials over global fields II, 1325
FORTUNA, E., GIANNI, P. and PARENTI, P., Some constructions for real algebraic curves, 1169
Foreword to the special issue on applications of computer algebra, 1129
GAGO-VARGAS, J., HARTILLO-HERMOSO, M.I. and UCHA-ENRÍQUEZ, J.M., Comparison of theoretical complexities of two methods for computing annihilating ideals of polynomials, 1076
GANN, S. and HAUSER, H., Perfect bases for differential equations, 979
GASPARIM, E. and SWANSON, I., Computing instanton numbers of curve singularities, 965
GATERMANN, K., EISWIRTH, M. and SENSSE, A., Toric ideals and graph theory to analyze Hopf bifurcations in mass action systems, 1361
GATERMANN, K. and HOSTEN, S., Computational algebra for bifurcation theory, 1180
Generic initial ideals of points and curves, 1023
GOMEZ-DIAZ, R. and REAL, P., Simplification techniques for maps in simplicial topology, 1208
GRAMLICH, B. and LUCAS, S., Reduction strategies in rewriting and programming, 745
Gröbner bases and syzygies on bimodules over PBW algebras, 1039
Implicitizing rational hypersurfaces using approximation complexes, 1150
KOTSIARES, I.S., AKRITAS, A.G., STEINBERG, S.L. and WESTER, M.J., Foreword to
the special issue on applications of computer algebra, 1129
Linear groupoids and the associated wreath products, 1106
LYGEROS, N., MARCHAND, P.-V. and MASSOT, M., Enumeration and 3D representation
of the stereo-isomers of alkane molecules, 1225
MÉNDEZ OMAÑA, J. and POHST, M.E., Factoring polynomials over global fields II, 1325
MOECKEL, R., Sturm’s algorithm and isolating blocks, 1242
Numerical stability of surface implicitization, 1291
On ordering free groups, 1285
On the Gosper–Petkovšek representation of rational functions, 955
Operational semantics for declarative multi-paradigm languages, 795
Operations with regular holonomic $D$-modules with support a normal crossing, 999
Out of order quantifier elimination for Standard Quantified Linear Programs, 1383
PALACÍAN, J.F. and YANGUAS, P., Asymptotic invariant tori of perturbed two-body
problems, 1256
Perfect bases for differential equations, 979
PHILLIPS, J.D. and VOJTÉCHOVSKÝ, P., Linear groupoids and the associated wreath
products, 1106
Qi, L., Eigenvalues of a real supersymmetric tensor, 1302
Reduction strategies in rewriting and programming, 745
RÉTY, P. and VUOTTO, J., Tree automata for rewrite strategies, 749
ROMÁN, M.G. and ROMÁN, S.G., Gröbner bases and syzygies on bimodules over PBW
algebras, 1039
SCHICHO, J. and SZILÁGYI, I., Numerical stability of surface implicitization, 1291
SCHMIDT-SCHAUß, M. and SCHULZ, K.U., Decidability of bounded higher-order
unification, 905
Shapes of liquid drops obtained using symbolic computation, 1340
Simplification techniques for maps in simplicial topology, 1208
SMITH, L.H., On ordering free groups, 1285
Some constructions for real algebraic curves, 1169
STEEL, A., Conquering inseparability: Primary decomposition and multivariate
factorization over algebraic function fields of positive characteristic, 1053
Sturm’s algorithm and isolating blocks, 1242
SUBRAMANI, K. and DESOVSKI, D., Out of order quantifier elimination for Standard
Quantified Linear Programs, 1383
Toric ideals and graph theory to analyze Hopf bifurcations in mass action systems, 1361
TORSTENSSON, A., UFNAROVSKI, V. and ÖFVERBECK, H., Using resultants for SAGBI
basis verification in the univariate polynomial ring, 1087
Tree automata for rewrite strategies, 749
Using resultants for SAGBI basis verification in the univariate polynomial ring, 1087
VISser, E., A survey of strategies in rule-based program transformation systems, 831
