

Discrete Mathematics

Volume 306, Issue 15, 6 August 2006

Contents

Contributions

- F. Gurski*
Linear layouts measuring neighbourhoods in graphs 1637
- T. Kamae, H. Rao, B. Tan and Y.-M. Xue*
Language structure of pattern Sturmian words 1651
- B. Lemaire and M. Le Menestrel*
Homothetic interval orders 1669
- V.E. Levit and E. Mandrescu*
On α -critical edges in König–Egerváry graphs 1684
- M.S. MacLean and P. Terwilliger*
Taut distance-regular graphs and the subconstituent algebra 1694
- D.Y. Oh*
A classification of the structures of some Sperner families and superimposed codes 1722
- A. Sapounakis, I. Tasoulas and P. Tsikouras*
Ordered trees and the inorder traversal 1732
- Y. Yang, X. Lin and J. Qiao*
The face pair of planar graphs 1742
- Notes**
- R.C. Brewster and G. MacGillivray*
Building blocks for the variety of absolute retracts 1758
- S. Eryilmaz*
A note on runs of geometrically distributed random variables 1765
- L. Kang, E. Shan and L. Caccetta*
Total minus domination in k -partite graphs 1771
- X. Le Breton*
Linear independence of automatic formal power series 1776
- Z. Li, Z. Li and Y. Cao*
Enumeration of symplectic and orthogonal injective partial transformations 1781

<i>R. Luo and Y. Zhao</i> A note on Vizing's independence number conjecture of edge chromatic critical graphs	1788
<i>C. Merino, G. Salazar and J. Urrutia</i> On the length of longest alternating paths for multicoloured point sets in convex position	1791
<i>Z. Wu and Z.-W. Sun</i> On the unique representability of spikes over prime fields	1798
<i>C. Zanella</i> Blocking sets in line Grassmannians	1805
<i>M. Zhao, L. Kang and G.J. Chang</i> Power domination in graphs	1812
