Subject Index: Volume 28

Ablation procedures
Catheter ablation of clinical intraatrial reentrant tachycardias resulting from previous atrial surgery: localizing and transecting the critical isthmus, 411
Conduction block in the inferior vena caval-tricuspid valve isthmus: association with outcome of radiofrequency ablation of type I atrial flutter, 1519
Selective ablation of slow atrioventricular node conduction pathways: how safe is the anatomic posterior approach? (letter), 1432
Slow pathway ablation in patients with documented but noninducible paroxysmal supraventricular tachycardia, 1000
Thrombogenicity of radiofrequency lesions: results with serial D-dimer determinations, 1257
ACC
“Roots” (Editor’s page), 536
ACC/AHA guidelines
ACC/AHA guidelines for the management of patients with acute myocardial infarction: a report of the American College of Cardiology/American Heart Association Task Force on Practice Guidelines (Committee on Management of Acute Myocardial Infarction), 1328
ACC Expert Consensus Document
Coronary artery stents, 782
Tilt table testing for assessing syncope, 263
ACC Managed Care Survey
Effect of managed care on cardiovascular specialists: involvement, attitudes and practice adaptations, 1884
ACC news
1994–1997 Committee appointments, 276
President’s page: recertification—its time has come, 260
President’s page: ACC and world cardiovascular medicine, 1049
President’s page: the College responds to change, 1430
President’s page: developing standards for the digital age: the DICOM Project, 1631
President’s page: the impact of health care system reform on clinical training of the physician, 537
President’s page: managing with managed care, 1897
President’s page: who is responsible for the cardiovascular patient?, 796
Accessory pathways
See also Ablation procedures
Electrophysiologic characteristics, electropharmacologic responses and radiofrequency ablation in patients with decremental accessory pathways, 732
Acronyms
Acronyms of clinical trials (letter), 1082
Action potential
Effect of magnesium on monophasic action potential during early ischemia in the in vivo human heart, 1765
Acute myocardial infarction
See Myocardial infarction
Adenosine
Adenosine: potential modulator for vasovagal syncope, 146
Detection of left anterior descending coronary artery stenosis in patients with left bundle branch block: exercise, adenosine or dobutamine imaging?, 543
Electrophysiologic characteristics, electropharmacologic responses and radiofrequency ablation in patients with decremental accessory pathways, 732
High dose adenosine stress echocardiography for noninvasive detection of coronary artery disease, 1689
Role of adenosine in pathogenesis of syndrome X: assessment with coronary hemodynamic measurements and thallium-201 myocardial single-photon emission computed tomography, 889
Stress echocardiography in elderly patients with coronary artery disease: applicability, safety and prognostic value of dobutamine and adenosine echocardiography in elderly patients, 52
Adrenergic activity
Impaired response of left ventricular relaxation to exercise-induced adrenergic stimulation in patients with hypertrophic cardiomyopathy, 1738
Myocardial adrenergic nervous activity is intensified in patients with heart failure without left ventricular volume or pressure overload, 371
Age factors
Aging-associated endothelial dysfunction in humans is reversed by I-arginine, 1796
Influence of age on the effect of bidirectional anastomosis on left ventricular volume, mass and ejection fraction, 1301
Albunex
Hemodynamic characteristics, myocardial kinetics and microvascular rheology of FS-069, a second-generation echocardiographic contrast agent capable of producing myocardial opacification from a venous injection, 1292
Aminophylline
Aminophylline reduces cardiac ischemic pain during percutaneous transluminal coronary angioplasty, 1725
Amiodarone
Intravenous amiodarone in treatment of recent-onset atrial fibrillation (letter), 1080
Amylornone
Amylornone stimulation test: ability to predict improvement in left ventricular ejection fraction after coronary artery bypass surgery in patients with poor baseline left ventricular function, 1488
Amyloidosis
Doppler index combining systolic and diastolic myocardial performance: clinical value in cardiac amyloidosis, 658
Anastomosis
Influence of age on the effect of bidirectional anastomosis on left ventricular volume, mass and ejection fraction, 1301
Angina pectoris
See also Syndrome X
Angiographic features of vein grafts versus ungrafted coronary arteries in patients with unstable angina and previous bypass surgery, 1493
Autonomic changes associated with spontaneous coronary spasm in patients with variant angina, 1249
Basal nitric oxide production by diseased coronary arteries (letter), 1637
Differential progression of complex culprit stenoses in patients with stable and unstable angina pectoris, 597
Focal myocardial ischemic necroses associated with unstable angina pectoris, 910
LDL oxidation and variant angina: role of methodological procedures of LDL oxidizability assessment (letter), (Napoli Nov 15)
Plasma immunoreactive endothelin concentration correlates with severity of coronary artery disease in patients with stable angina pectoris and normal ventricular function, 14
Prognostic value of dobutamine-atropine stress technetium-99m sestamibi perfusion scintigraphy in patients with chest pain, 447
Relation between severity of magnesium deficiency and frequency of anginal attacks in men with variant angina, 897
Susceptibility to pain during coronary angioplasty: usefulness of pulpal test, 903
Sympathetic nerve activity in the spasm-induced coronary artery region is associated with disease activity of vasospastic angina, 460
Variations in normal coronary vasodilatory reserve stratified by artery, gender, heart transplantation and coronary artery disease, 1154
Angiography
See also Cardiac catheterization
Angiographic findings and outcome in diabetic patients treated with thrombolytic therapy for acute myocardial infarction: the GUSTO-I experience, 1661
Comparison of angioscopy, intravascular ultrasound imaging and quantitative angiography in predicting clinical outcome after coronary intervention in high risk patients, 97
President’s page: Developing standards for the digital age: the DICOM Project, 1631
Short- and long-term clinical and quantitative angiographic results with the new, less shortening Wallstent for vessel reconstruction in chronic total occlusion: a quantitative angiographic study, 354
Angioplasty
See also Restenosis
Acute results of balloon angioplasty of native coarctation versus recurrent aortic obstruction are equivalent, 1810
Aminophylline reduces cardiac ischemic pain
during percutaneous transluminal coronary angioplasty, 1725

Comparison of angioscopy, intravascular ultrasound imaging and quantitative angiography in predicting clinical outcome after coronary intervention in high risk patients, 97

Coronary angioplasty and intracoronary thrombolysis are of limited efficacy in resolving early intracoronary stent thrombosis, 361

Coronary angioplasty versus repeat coronary artery bypass surgery for patients with previous bypass surgery, 1140

Coronary flow reserve during coronary angioplasty in patients with a recent myocardial infarction: relation to stenosis and myocardial viability, 1712

Coronary recalization by elective angioplasty prevents ventricular dilation after acute myocardial infarction, 837

Electrophysiologic effects of ischemic preconditioning on QT dispersion during coronary angioplasty, 70

Expression of polymorphonuclear leukocyte adhesion molecules and its clinical significance in patients treated with percutaneous transluminal coronary angioplasty, 1127

Importance of infarct-related artery patency for myocardial infarction, 837

Prevalence and timing of regional myocardial dysfunction after rotational coronary angioplasty, 70

Prevalence and timing of regional myocardial dysfunction after rotational coronary angioplasty, 70

Region myocardial perfusion in patients undergoing percutaneous revascularization of occluded coronary artery by bypass vein grafts, 1732

Initial cost of primary angioplasty for acute myocardial infarction, 882

Leukocyte activation with platelet adhesion after coronary angioplasty: a mechanism for recurrent disease?, 365

Low molecular weight heparin (reviparin) prevents ventricular dilation after coronary angioplasty, 97

Importance of infarct-related artery patency for myocardial infarction, 837

Prevalence and timing of regional myocardial dysfunction after rotational coronary angioplasty, 861

Relation between estrogen replacement therapy and restenosis after percutaneous coronary interventions, 1111

Short- and long-term clinical and quantitative angiographic results with the new, less shortening Wallstent for vessel reconstruction in chronic total occlusion: a quantitative angiographic study, 554

Stenting in chronic coronary occlusion (SICCO): a randomized, controlled trial of adding stent implantation after successful angioplasty, 1444

Successful treatment by percutaneous balloon angioplasty of Buda-Chiari syndrome caused by membranous obstruction of inferior vena cava: 8 year follow-up study, 1720

Susceptibility to pain during coronary angioplasty: usefulness of pulpal test, 903

Ten-year follow-up of percutaneous transluminal coronary angioplasty for proximal left anterior descending coronary stenosis in 351 patients, 82

Angioscopy

Angioscopic evaluation of atheroembolic plaques: Validation by histomorphologic analysis and association with stable and unstable coronary syndromes, 1

Comparison of angioscopy, intravascular ultrasound imaging and quantitative angiography in predicting clinical outcome after coronary intervention in high risk patients, 97

Angiotensin-converting enzyme gene

DD genotype of the angiotensin-converting enzyme gene is associated with increased mortality in idiopathic heart failure, 162

Insertion/deletion polymorphism in the angiotensin-converting enzyme gene and risk of and prognosis after myocardial infarction, 338

Angiotensin-converting enzyme inhibitors

See also specific agent

Do Angiotensin-converting enzyme inhibitors prolong life in patients with heart failure treated in clinical practice? (editorial review), 1323

Renin-angiotensin system and vascular hypertrophy, 803

Aortic dissection

Accuracy of biplane and multiplane transesophageal echocardiography in diagnosis of typical acute aortic dissection and intramural hematoma, 627

Aortic obstruction

Acute results of balloon angioplasty of native coarctation versus recurrent aortic obstruction are equivalent, 1810

Aortic root

Effects of menopause on aortic root function in hypertensive women, 1562

Aortic valve disease

Aortic regurgitation with extreme left ventricular dilation (letter), 798

Effects of dobutamine on Doppler echocardiographic indices of aortic stenosis, 1206

Vasoactive drugs in chronic regurgitant lesions of the mitral and aortic valves, 1083

Apheresis

Low density lipoprotein apheresis improves regional myocardial perfusion in patients with hypercholesterolemia and extensive coronary artery disease: the LDL-Apheresis Atherosclerosis Regression Study (LAARS), 1696

Arginase

Aging-associated endothelial dysfunction in vessels is reversed by l-arginine, 1796

Arginine restores nitric oxide activity and inhibits monocye accumulation after vascular injury in hypercholesterolemic rabbits, 1573

Basil nitric oxide production by diseased coronary arteries (letter), 1637

Arrhythmias, ventricular

Distinction between arrhythmic and nonarrhythmic death after acute myocardial infarction based on heart rate variability, signal-averaged electrocardiogram, ventricular arrhythmias and left ventricular ejection fraction, 296

Postextrasystolic U wave augmentation, a new marker of increased arrhythmic risk in patients without the long QT syndrome, 1746

Repeated 15-minute coronary occlusions in pigs increase occlusion arrhythmias but decrease reperfusion arrhythmias that are associated with extracellular hypokalemia, 1589

Value of quantitative measurement of signal-averaged electrocardiographic variables in arthrythogenic right ventricular dysplasia: correlation with echocardiographic right ventricular cavity dimensions, 713

Aspirin

Marked reduction in long-term cardiac deaths with aspirin after a coronary event, 326

Asestimol

Torsade de points with an antibiostable metabolite: potassium channel blockade with desmethylestinol, 1556

Atherectomy

Clinical and angiographic comparison of matched patients with successful directional coronary atherectomy or stent implantation for primary coronary artery lesions, 657

Effect of rotational atherectomy in noncalcified atherosclerotic plaque: a volumetric intravascular ultrasound study, 856

Effect of subintimal resection on initial outcome and restenosis for native coronary lesions and saphenous vein graft disease treated by directional coronary atherectomy: a report from the CAVAT II and II investigators, 645

Increased risk of non-Q-wave myocardial infarction after directional atherectomy is platelet dependent: evidence from the EPIC trial, 849

Prevalence and timing of regional myocardial dysfunction after rotational coronary atherectomy, 861

Relation between estrogen replacement therapy and restenosis after percutaneous coronary interventions, 1111

Atherosclerosis

Angioscopic evaluation of atheroembolic plaques: Validation by histomorphologic analysis and association with stable and unstable coronary syndromes, 1

Effect of rotational atherectomy in noncalcified atherosclerotic plaque: a volumetric intravascular ultrasound study, 856

Intrasurgical transesophageal echocardiography and epicardial ultrasound for assessment of atherosclerosis of the thoracic aorta, 942

Natural history of unheralded complex coronary plaques, 604

Plasma immunoreactive endothelin concentration correlates with severity of coronary artery disease in patients with stable angina pectoris and normal ventricular function, 14

Atresia

Echocardiographic assessment of pulmonary blood supply in patients with pulmonary stenosis and ventricular septal defect, 1308
Presentation and attrition in complex pulmonary atresia (letter), 539

Atrial fibrillation/flutter
Atrial dissection for atrial fibrillation: when, how much and where? (editorial comment), 991
Conduction block in the inferior vena cavatricuspid valve isthmus: association with outcome of radiofrequency ablation of type 1 atrial flutter, 1519
Effects of oral propafenone administration before electrical cardioversion of chronic atrial fibrillation: a placebo-controlled study, 700
Efficacy of intravenous ibutilide for rapid termination of atrial fibrillation and flutter: a dose-response study, 130
Feasibility of atrial fibrillation detection and use of a preceding synchronization interval as a criterion for shock delivery in humans with atrial fibrillation, 1532
Improving survival for patients with atrial fibrillation and advanced heart failure, 1458
Intravenous amiodarone in treatment of recent-onset atrial fibrillation (letter), 1080
Low energy cardioversion after failed conventional external cardioversion of atrial fibrillation
Prevention of recurrent atrial fibrillation with chronic dual-site right atrial pacing, 687
Risks and benefits of combined maze procedure for atrial fibrillation associated with organic heart disease, 985
Spontaneous onset of type I atrial flutter in patients, 707
Testing different biphasic waveform and capacitances: effect on atrial defibrillation threshold and pain perception, 695

Atrial tachycardia
Catheter ablation of clinical intratrial reentrant tachycardias resulting from pervious atrial surgery: localizing and transecting the critical isthmus, 411

Atrioventricular canal
Morphometric analysis of unbalanced common atrioventricular canal using two-dimensional echocardiography, 1017

Atrioventricular node
2:1 Atrioventricular block during atrioventricular node reentrant tachycardia, 725
Multiple anterograde atrioventricular node pathways in patients with atrioventricular node reentrant tachycardia, 1770
Selective ablation of slow atrioventricular node conduction pathways: how safe is the anatomic posterior approach? (letter), 1432
Slow pathway ablation in patients with documented but noninducible paroxysmal supraventricular tachycardia, 1000

Atrium
Detection of patients with sick sinus syndrome by use of low amplitude potentials early in filtered P wave, 738
Integrated backscatter for quantification of left atrial spontaneous echo contrast, 222

Atropine
Atropine augmentation in dobutamine stress echocardiography: role and incremental value in a clinical practice setting, 551
Prognostic value of dobutamine-atropine stress technetium-99m sestamibi perfusion scintigraphy in patients with chest pain, 447

Autonomic nervous system
Autonomic changes associated with spontaneous coronary spasm in patients with variant angina, 1249

BARI trial
Contemporary practice of coronary revascularization in U.S. hospitals and participating in the Bypass Angioplasty Revascularization Investigation (BARI), 609

Beta-adrenergic blocking agents
Acute- and long-term beta-adrenergic blockade for patients with neurocardiogenic syncope (letter), 798

Beta-adrenergic signaling
Myocardial sympathetic denervation prevents chamber-specific alteration of beta-adrenergic transmembrane signaling in rabbits with heart failure, 1314

Bicarbonate
Hemodynamic effects of epinephrine, bicarbonate, and calcium in the early postnatal period in a lamb model of single-ventricle physiology created in utero, 1877

Bisoprolol
Prognostic significance of transient ischemic episodes: response to treatment shows improved prognosis: results of the Total Ischemic Burden Bisoprolol Study (TIBBS) Follow-Up, 20

Blood flow
Dobutamine positron emission tomography: absolute quantitation of rest and dobutamine myocardial blood flow and correlation with cardiac work and percent diameter stenosis in patients with and without coronary artery disease, 565
Echocardiographic assessment of pulmonary blood supply in patients with pulmonary atresia and ventricular septal defect, 1308
Exercise-induced vasodilation in forearm circulation of normal subjects and patients with congestive heart failure: role of endothelin-derived nitric oxide, 585
Noninvasive Doppler echocardiographic evaluation of left ventricular filling pressures in patients with cardiomyopathies: a simultaneous Doppler echocardiographic and cardiac catheterization study, 1226
Quantiﬁcation of myocardial blood flow and flow reserve in children with a history of Kawasaki disease and normal coronary arteries using positron emission tomography, 757
Variations in normal coronary vasodilatory reserve stratified by artery, gender, heart transplantation and coronary artery disease, 1154

Blood volume
Central blood volume: an explanation of racial differences in left ventricular mass (letter), 539

Books received, 802, 1436, 1642

Bradycardia
Bradycardia after heart transplantation: reversal with theophylline, 396

Brain natriuretic peptide
Marked expression of plasma brain natriuretic peptide is a special feature of hypertrophic obstructive cardiomyopathy, 1234

Breathing
See Work of breathing; Respiration

Budd-Chiari syndrome
Successful treatment by percutaneous balloon angioplasty of Budd-Chiari syndrome caused by membranous obstruction of inferior vena cava: 8 year follow-up study, 1720

Bundle branch block
Detection of left anterior descending coronary artery stenosis in patients with left bundle branch block: exercise, adenosine or dobutamine imaging?, 543
Familial cardiomyopathy associated with right bundle branch block, ST segment elevation and sudden death (letter), 540

C-type natriuretic peptide
C-type natriuretic peptide-mediated coronary vasodilation: role of coronary nitric oxide and particulate guanylate cyclase systems, 1031

Calcium, calcification
Hemodynamic effects of epinephrine, bicarbonate, and calcium in the early postnatal period in a lamb model of single-ventricle physiology created in utero, 1877
Prognostic value of coronary calcification—I (letter), 383
Prognostic value of coronary calcification—II (letter), 383

Calcium channel
Calcium channel diversity in the cardiovascular system, 522

Calcium channel blocking agents
See also specific agent Calcium antagonists and mortality in patients with coronary artery disease: a cohort of 11,575 patients, 7
Whatever happened to the calcium antagonist controversy? (editorial comment), 12

Captopril
Captopril potentiates the myocardial infarct size-limiting effect of ischemic preconditioning through bradykinin B2 receptor activation, 1615
Long-range captopril treatment improves diastolic filling more than systolic performance in rats with large myocardial infarction, 773
Which patient benefits from early angiotensin-converting enzyme inhibition after myocardial infarction? Results of one-year serial echocardiographic follow-up from the Captopril and Thrombolysis Study (CATS), 114

Cardiac arrest
Myocardial dysfunction after resuscitation from cardiac arrest: an example of global myocardial stunning, 222

Cardiac catheterization
See also Angiography Impact of myocardial perfusion single-photon emission computed tomography in referral to catheterization of the very elderly: is there evidence of gender-related referral bias?, 680
Noninvasive Doppler echocardiographic evaluation of left ventricular filling pressures in patients with cardiomyopathies: a simultaneous Doppler echocardiographic and cardiac catheterization study, 1226

Cardiac conduction
Conduction block in the inferior vena cava-tricuspid valve isthmus: association with outcome of radiofrequency ablation of type I atrial flutter, 1519
Electrophysiologic characteristics,
Coronary ocdusion
Coronary flow reserve
Coronary flow reserve during coronary angioplasty in patients with a recent myocardial infarction: relation to stenosis and myocardial viability, 1712
Coronary flow reserve is impaired in young men with familial hypercholesterolemia, 1705
Quantification of myocardial blood flow and flow reserve in children with a history of Kawasaki disease and normal coronary arteries using positron emission tomography, 757
Coronary occlusion
Accuracy of dobutamine echocardiography for detection of myocardial viability in patients with an occluded left anterior descending coronary artery, 455
Aortic counterpulmonary may improve late patency of the occluded coronary artery in patients with early failure of thrombolytic therapy, 876
Has the time come to seek and open all occluded infarct-related arteries after myocardial infarction? (editorial comment), 847
Repeated 15-minute coronary occlusions in pigs increase occlusion arrhythmias but decrease reperfusion arrhythmias that are associated with extracellular hypokalemia, 1589
Short- and long-term clinical and quantitative angiographic results with the new, less shortening Wallstent for vessel reconstruction in chronic total occlusion: a quantitative angiographic study, 354
Stenting in chronic coronary occlusion (SICCO): a randomized, controlled trial of adding stent implantation after successful angioplasty, 1444
Coronary reperfusion
Myocardial kinetics of technetium-99m tetroxime in the presence of postsischemic injury, necrosis and low flow reperfusion, 487
Repeated 15-minute coronary occlusions in pigs increase occlusion arrhythmias but decrease reperfusion arrhythmias that are associated with extracellular hypokalemia, 1589
Tumor necrosis factor-alpha is released from the isolated heart undergoing ischemia and reperfusion, 247
Corrections

Parrissy WW. Report to the Board (Editor's page). J Am Coll Cardiol 1996;27:1813-4, 286
Cost factors
Cost-efficacy modeling of catheter reuse for percutaneous transluminal coronary angioplasty, 106
Cost-efficiency modeling of catheter re-use for PTCA (letter), (Lesh Nov 15)
Initial cost of primary angioplasty for acute myocardial infarction, 882
Cotransport inhibitort factor
Endogenous sodium-potassium-chloride cotransport inhibitort in congestive heart failure, 1464
Coudamin
Primary stent implantation with coumadin in acute myocardial infarction, 74
Coxsackievirus
Nitric oxide and murine coxsackievirus B3 myocardic: aggravation of myocarditis by inhibition of nitric oxide synthase, 1610
Creatine kinase
Creatine kinase-MB fraction and cardiac troponin T to diagnose acute myocardial infarction after cardiolipomyelogenic resuscitation, 1220
Cyanosis
Cerebrovascular events in adult patients with cyanotic congenital heart disease, 768
Cyclic guanosine monophosphate
C-type natriuretic peptide-mediated coronary vasodilation: role of coronary nitric oxide and particulate guanylate cyclase systems, 1031
Cytokines
Circulating levels of cytokines and their endogenous modulators in patients with mild to severe congestive heart failure due to coronary artery disease or hypertension, 904
D-dimer
Thrombogenicity of radiofrequency lesions: results with serial D-dimer determinations, 1257
Deceleration time
Independent and incremental prognostic value of Doppler-derived mitral deceleration time of early filling in both symptomatic and asymptomatic patients with left ventricular dysfunction, 383
Defibrillation
Direct current shocks to the heart generate free radicals: an electron paramagnetic resonance study, 1598
Feasibility of atrial fibrillation detection and use of a preceding synchronization interval as a criterion for shock delivery in humans with atrial fibrillation, 1532
Testing different biphasic waveforms and capacitances: effect on atrial defibrillation threshold and pain perception, 695
Dental pain
Susceptibility to pain during coronary angioplasty: usefulness of pulpal test, 903
Desmethyldoxemazine
Torsade de points with an antihistamine metabolite: potassium channel blockade and desmethyldoxemazine, 1256

Diabetes
Angiographic findings and outcome in diabetic patients treated with thrombolytic therapy for acute myocardial infarction: the GUSTO-I experience, 1661
Impaired vascular reactivity in insulin-dependent diabetes mellitus is related to disease duration and low density lipoprotein cholesterol levels, 573

Diagnostic accuracy
Emergency department–based protocol for rapidly ruling out myocardial ischemia reduces hospital time and expense: results of a randomized study (ROMIO), 25

Diastolic function
Long-range captopril treatment improves diastolic filling more than systolic performance in rats with large myocardial infarction, 773
Right ventricular diastolic function in children with pulmonary regurgitation after repair of tetralogy of Fallot: volumetric evaluation by magnetic resonance velocity mapping, 1827

Simvastatin
Low density lipoprotein apheresis improves regional myocardial perfusion in patients with hypertensive and extensive coronary artery disease: the LDL-Apheresis Atherosclerosis Regression Study (LAARS), 1696

Sinus node
Bradycardia after heart transplantation: reversal with theophylline, 396
Detection of patients with sick sinus syndrome by use of low amplitude potentials early in filtered P wave, 738
Sinus rhythm
Value of digoxin in heart failure and sinus rhythm: new features of an old drug?, 813

Skeletal muscle
Structure of skeletal muscle in heart transplant recipients, 980
Smoking
Deficiency in nitric oxide bioactivity in epicardial coronary arteries of cigarette smokers, 1161
Effect of smoking status on response to thrombolytic therapy (letter), 283
Smoking and prognosis after acute myocardial infarction in the thrombolytic era (Israel Thrombolytic National Survey), 1506
Spasm
See Vasospasm
Specialists
Effect of managed care on cardiovascular specialists: involvement, attitudes and practice adaptations (ACC Managed Care Survey), 1884
President's page: who is responsible for the cardiovascular patient?, 796

ST segment
Familial cardiomyopathy associated with right bundle branch block, ST segment elevation and sudden death (letter), 540
Prognostic significance of precordial ST segment depression during inferior myocardial infarction in the thrombolytic era: results in 16,521 patients, 305
Prognostic significance of precordial ST segment depression on admission electrocardiogram in patients with inferior wall myocardial infarction, 313
Repeated 15-minute coronary occlusions in pigs increase occlusion arrhythmias but decrease reperfusion arrhythmias that are associated with extracellular hypokalemia, 1589

Stenosis
See also Restenosis
Coronary flow reserve during coronary angioplasty in patients with a recent myocardial infarction: relation to stenosis and myocardial viability, 1712
Detection of left anterior descending coronary artery stenosis in patients with left bundle branch block: exercise, adenosine or dobutamine imaging?; 543
Differential progression of complex culprit stenoses in patients with stable and unstable angina pectoris, 597
Dobutamine positron emission tomography:
absolute quantitation of rest and dobutamine myocardial blood flow and correlation with cardiac work and percent diameter stenosis in patients with and without coronary artery disease, 565
Improved measurement of pressure gradients in aortic coarctation by magnetic resonance imaging, 1818
Ten-year follow-up of percutaneous transluminal coronary angioplasty for proximal left anterior descending coronary stenosis in 351 patients, 82

Stenting

Chronic arterial responses to stent implantation: a serial intravascular ultrasound analysis of Palmaz-Schatz stents in native coronary arteries, 1134
Clinical and angiographic comparison of matched patients with successful directional coronary arterectomy or stent implantation for primary coronary artery lesions, 637
Coronary angioplasty and intracoronary thrombolysis are of limited efficacy in resolving early intracoronary stent thrombosis, 361
Coronary artery stents (ACC Expert Consensus Document), 782
Coronary stent occlusion: thrombus horribilis (editorial comment), 368
Do we require a cure for "stenotonia"? (editorial comment), 827
Four-year follow-up of patients undergoing percutaneous balloon mitral commissurotomy: a report from the National Heart, Lung, and Blood Institute Balloon Valvuloplasty Registry, 1452
Long-term (4- to 6-year) outcome of Palmaz-Schatz stenting: paucity of late clinical stent-related problems, 820
Long-term clinical outcome after stent implantation in saphenous vein grafts, 89
Primary stent implantation with coumadin in acute myocardial infarction, 74
Results of coronary stenting for restenosis, 830
Short- and long-term clinical and quantitative angiographic results with the new, less shortening Wallstent for vessel reconstruction in chronic total occlusion: a quantitative angiographic study, 354
Stenting in chronic coronary occlusion (SICCO): a randomized, controlled trial of adding stent implantation after successful angioplasty, 1444
Stents wrapped in autologous vein: an experimental study, 1039

Stress, oxidative

Role of oxidative stress in transition of hypertrophy to heart failure, 506

Stress testing

Abnormal coronary vasomotion in hypertension: role of coronary artery disease, 935
Atropine augmentation in dobutamine stress echocardiography: role and incremental value in a clinical practice setting, 551
Detection of left anterior descending coronary artery stenosis in patients with left bundle branch block: exercise, adenosine or dobutamine imaging?, 543
Does stress echocardiography predict the site of future myocardial infarction? A large-scale multicenter study, 45
Effective risk stratification using exercise myocardial perfusion SPECT in women: gender-related differences in prognostic nuclear testing, 34
Effects of nifedipine and nitroglycerin on left ventricular systolic dysfunction and impaired diastolic filling after exercise-induced ischemia in humans, 915
Exercise limitation in chronic heart failure: central role of the periphery, 1092
High dose adenosine stress echocardiography for noninvasive detection of coronary artery disease, 1689
Impaired response of left ventricular relaxation to exercise-induced adrenergic stimulation in patients with hypertrophic cardiomyopathy, 1738
Kinetics of oxygen consumption during and after exercise in patients with dilated cardiomyopathy: new markers of exercise intolerance with clinical implications, 168
Oxygen uptake efficiency slope: a new index of cardiorespiratory functional reserve derived from the relation between oxygen uptake and minute ventilation during incremental exercise, 1567
Prediction of recovery of myocardial dysfunction after revascularization: comparison of fluorine-18 fluorodeoxyglucose/thallium-201 SPECT, thallium-201 stress-rejection SPECT and dobutamine echocardiography, 558
Prognostic value of dobutamine-atropine stress technetium-99m sestamibi perfusion scintigraphy in patients with chest pain, 447
QT interval–heart rate relation during exercise in normal men and women: definition by linear regression analysis, 1547
Right ventricular diastolic function in children with pulmonary regurgitation after repair of tetralogy of Fallot: volumetric evaluation by magnetic resonance velocity mapping, 1827
Role of adenosine in pathogenesis of syndrome X: assessment with coronary hemodynamic measurements and thallium-201 myocardial single-photon emission computed tomography, 890
Sensation of dyspnea during exercise is not determined by the work of breathing in patients with heart failure, 391
Stress echocardiography in elderly patients with coronary artery disease: applicability, safety and prognostic value of dobutamine and adenosine echocardiography in elderly patients, 52
Structure of skeletal muscle in heart transplant recipients, 980

Stunning

Myocardial dysfunction after resuscitation from cardiac arrest: an example of global myocardial stunning, 232

Sudden death

Familial cardiomyopathy associated with right bundle branch block, ST segment elevation and sudden death (letter), 540
Risk for sudden death associated with marathon running, 428
What is the risk of sudden cardiac death in patients presenting with hemodynamically stable sustained ventricular tachycardia after myocardial infarction?, 122

Surgery

Catheter ablation of clinical intraatrial reentrant tachycardias resulting from pervious atrial surgery, localizing and transecting the critical isthmus, 411
Pregnancy outcomes after the Fontan repair, 763

Surgery, arrhythmia

Atrial dissection for atrial fibrillation: when, how much and where? (editorial comment), 991
Risks and benefits of combined maze procedure for atrial fibrillation associated with organic heart disease, 985
