NUMBER 1/2

SIMULATION METHODS IN KINETIC THEORY

C. Cercignani and R. Illner	xiii	Preface
G. A. Bird	1	Recent Advances and Current Challenges for DSMC
K. Aoki, Y. Sone and Y. Waniguchi	15	A Rarefied Gas Flow Induced by a Temperature Field: Numerical Analysis of the Flow between Two Coaxial Elliptic Cylinders with Different Uniform Temperatures
H. Babovsky	29	Discretization and Numerical Schemes for Steady Kinetic Model Equations
S. Stefanov and C. Cercignani	41	Monte Carlo Simulation of the Propagation of a Disturbance in the Channel Flow of a Rarefied Gas
C. Buet, S. Cordier and P. Degond	55	Regularized Boltzmann Operators
S. M. Deshpande, P. S. Kulkarni and A. K. Ghosh	75	New Developments in Kinetic Schemes
R. Di Lisio, E. Grenier and M. Pulvirenti	95	The Convergence of the SPH Method
A. Frezzotti	103	Molecular Dynamics and Enskog Theory Calculation of Shock Profiles in Dense Hard Sphere Gas
M. S. Ivanov, S. F. Gimelshein and G. N. Markelov	113	Statistical Simulation of the Transition between Regular and Mach Reflection in Steady Flows
A. Klar	127	Asymptotic Analysis and Coupling Conditions for Kinetic and Hydrodynamic Equations
K. Koura	139	Improved Null-Collision Technique in the Direct Simulation Monte Carlo Method: Application to Vibrational Relaxation of Nitrogen
W. J. Morokoff and A. Kersch	155	A Comparison of Scattering Angle Models
S. Rjasanow and W. Wagner	165	A Generalized Collision Mechanism for Stochastic Particle Schemes Approximating Boltzmann-Type Equations

J. Struckmeier	179	Simulation of Boundary Value Problems for the Boltzmann Equation
S. Takata, Y. Sone, D. Lhuillier and M. Wakabayashi	193	Evaporation from or Condensation onto a Sphere: Numerical Analysis of the Boltzmann Equation for Hard-Sphere Molecules
F. G. Tcheremissine	215	Conservation Evaluation of the Boltzmann Collision Integral in Discrete Ordinates Approximation

NUMBER 3

S. Zhan and D. A. Murio	1	Identification of Parameters in One-Dimensional IHCP
M. Oh, V. I. Shin, Y. Lee and U. J. Choi	17	Suboptimal Discrete Filters for Stochastic Systems with Different Types of Observations
B. Chanane	29	Optimal Control of Nonlinear Systems: A Recursive Approach
R. Sacco and M. Stynes	35	Finite Element Methods for Convection-Diffusion Problems Using Exponential Splines on Triangles
S. Nath, P. R. Sengupta and L. Debnath	47	Magneto-Thermoelastic Surface Waves in Micropolar Elastic Media
J. Li and I. M. Navon	57	Uniformly Convergent Finite Element Methods for Singularly Perturbed Elliptic Boundary Value Problems I: Reaction-Diffusion Type
P. K. Jana and B. P. Sinha	71	Fast Parallel Algorithms for Graeffe's Root Squaring Technique
D. O'Regan	81	Singular Differential Equations with Linear and Nonlinear Boundary Conditions
D. Li, D. Cheung, X. Shi and V. Ng	99	Uncertainty Reasoning Based on Cloud Models in Controllers
V. Y. Pan	125	New Fast Algorithms for Polynomial Interpolation and Evaluation on the Chebyshev Node Set
R. Echevarría	131	The Numerical Solution of Some Elliptic Nonscalar Problems with Nonlinear Discontinuities

NUMBER 4

S.-R. Jun, Y.-H. Kwon and S. Kang	1	A Variational Spectral Method for the Two-Dimensional Stokes Problem
B. G. Zhang and C. J. Tian	19	Oscillation Criteria for Difference Equations with Unbounded Delay
D. O'Regan	27	New Fixed-Points Results for 1-Set Contractive Set Valued Maps

P. J. Y. Wong	35	Eventually Positive and Monotonely Decreasing Solutions of Partial Difference Equations
T. Kaczyński, M. Mrozek and M. Slusarek	59	Homology Computation by Reduction of Chain Complexes
J. L. Cruz Soto, M. C. Calzada Canalejo, M. Marín Beltrán and E. Fernández-Cara	71	A Convergence Result for a Parallel Algorithm for Solving the Navier-Stokes Equations
O. Rojo and E. Montaña	89	Some Results on h-Hypertournament Matrices
M. Ispány	95	Stationarity and Second-Order Properties of a Scalar-Valued Nonlinear Time Series with Gaussian Residuals
D. A. Clark	105	An Upper Bound of $\sum 1/(a_i \log a_i)$ for Quasi-Primitive Sequences
B. G. Zhang and J. S. Yu	111	Linearized Oscillation Theorems for Certain Nonlinear Delay Partial Difference Equations
S. Castillo and M. Pinto	117	Asymptotic Summation for Second-Order Finite Difference Systems
	131	Book Reports

NUMBER 5

D. A. Murio, C. E. Mejía and S. Zhan	1	Discrete Mollification and Automatic Numerical Differentiation
B. D. Craven	17	Optimal Control and Invexity
S. S. Cheng and G. H. Lin	27	Green's Function and Stability of a Linear Partial Difference Scheme
P. K. Moore, L. R. Petzold and Y. Ren	43	Regularization of Index-1 Differential-Algebraic Equations with Rank-Deficient Constraints
M. A. Noor	63	Generalized Multivalued Quasi-Variational Inequalities (II)
C. H. Cooke	79	The Adjoint Alternative for Matrix Operators
M.-P. Chen, H. Irmak and H. M. Srivastava	83	A Certain Subclass of Analytic Functions Involving Operators of Fractional Calculus
J. M. Hah and M. C. Yuang	93	A Delay and Loss Versatile Scheduling Discipline in ATM Switches
L. Gori, E. Santi and M. G. Cimatorni	107	Projector-Splines in the Numerical Solution of Integro-Differential Equations
R. S. Lin, M. C. Yuang and S. J. Hsu	117	Efficient Minimization of Homogeneous FSMs for Fault Diagnosis

Z.-X. Luo	125	C^1, C^2 -Smooth Interpolants on Curved Sides Element
	131	Book Reports

NUMBER 6

C. A. Mandal, P. P. Chakrabarti and S. Ghose	1	A Probabilistic Estimator for the Vertex Deletion Problem
A. V. Manickam, K. M. Moudgalya and A. K. Pani	5	Second-Order Splitting Combined with Orthogonal Cubic Spline Collocation Method for the Kuramoto-Sivashinsky Equation
P. Sarkar, B. K. Roy, P. P. Choudhury and R. Barua	27	Polynomial Division Using Left Shift Register
X. Song and L. Chen	33	Persistence and Global Stability for Nonautonomous Predator-Prey System with Diffusion and Time Delay
M. Frontini and L. Gotusso	41	Conservative Linear Models for the Vibrating String and Rod Free to Slide, at One End Point, on a Vertical Guide
Y.-M. Wang	51	Monotone Enclosure for a Class of Discrete Boundary Value Problems without Monotone Nonlinearities
Z. Q. Zhang	61	Notes and Corrections on “Asymptotic Constancy Criteria of Solution of Linear Parabolic Volterra Difference Equations”
J. S. Yu, M.-P. Chen and H. Zhang	65	Oscillation and Nonoscillation in Neutral Equations with Integrable Coefficients
R. Escalante and M. Raydan	73	Dykstra’s Algorithm for Constrained Least-Squares Rectangular Matrix Problems
C.-H. Lai, A. M. Cuffe and K. A. Pericleous	81	A Defect Equation Approach for the Coupling of Subdomains in Domain Decomposition Methods
A. Dębińska-Nagórska, A. Just and Z. Stempień	95	Analysis and Semidiscrete Galerkin Approximation of a Class of Nonlinear Parabolic Optimal Control Problems
R. P. Agarwal and S. S. Dragomir	105	The Property of Supermultiplicity for Some Classical Inequalities and Applications
P.-Q. Pan	119	A Dual Projective Simplex Method for Linear Programming
Y. Yamada and Y. Teraoka	137	An Optimal Design of Piping Route in a CAD System for Power Plant
M. P. Robinson	151	Corrigendum to “The Solution of Nonlinear Schrödinger Equations Using Orthogonal Spline Collocation”
	153	Book Reports

NUMBER 7

ADVANCED COMPUTING ON INTEL ARCHITECTURES

O. Yaşar	xiii	Preface
J. Glimm, M. J. Graham, J. Grove, X. L. Li, T. M. Smith, D. Tan, F. Tangerman and Q. Zhang	1	Front Tracking in Two and Three Dimensions
J. J. Dongarra, S. Hammarling and D. W. Walker	13	Key Concepts for Parallel Out-of-Core LU Factorization
A. K. Pfiffer	33	Moving Paragon™ Operating System to a New Hardware Platform
F. Saied and G. Mahinthakumar	45	Efficient Parallel Multigrid Based Solvers for Large Scale Groundwater Flow Simulations
H. Q. Ding and R. D. Ferraro	55	An 18 GFLOPS Parallel Climate Data Assimilation PSAS Package
C. C. Ober, R. A. Oldfield, D. E. Womble and J. Van Dyke	65	Seismic Imaging on the Intel Paragon
H. D. Cochran, P. T. Cummings, S. T. Cui, S. A. Gupta, R. K. Bhupathiraju and P. F. LoCascio	73	Classical Molecular Simulations of Complex, Industrially-Important Systems on the Intel Paragon
Y. Wang, G. M. Stocks, D. M. C. Nicholson and W. A. Shelton	85	The First Principles $O[N]$ LSMS Method and Its Applications to Magnetic Structure of Alloys
R. E. Tuzun, D. W. Noid and B. G. Sumpter	93	Computer Simulation of Complex, Strongly Coupled Nanometer-Scale Systems: Breaking the Billion Atom Barrier
J. Lepper, U. Schnell and K. R. G. Hein	101	Parallelization of a Simulation Code for Reactive Flows on the Intel Paragon
A. E. Deane	111	Parallel Computations of 3-D Rayleigh-Taylor Instability
O. Yaşar	117	A Scalable Model for Complex Flows

NUMBER 8

X. Gong, W. Chen and F. Tu	1	The Stability and Design of Nonlinear Neural Networks
---------------------------------------	---	---

V. S. Dimitrov, G. A. Jullien and W. C. Miller	9	A Fast and Robust RNS Algorithm for Evaluating Signs of Determinants
C. S. Chien and M.-H. Chen	15	Multiple Bifurcations in a Reaction-Diffusion Problem
H. Nabli	41	Performability Measure for Acyclic Markovian Models
M. H. AliAbadi and E. L. Ortiz	53	Numerical Treatment of Moving and Free Boundary Value Problems with the Tau Method
P. Glaister	63	An Analysis of Averaging Procedures in a Riemann Solver for the Two-Dimensional Euler Equations
J.-K. Guo, C.-H. Chen, J.-D. Lee and J.-M. Tsai	79	3-D Image Reconstruction of Brain Blood Vessels from Angiograms
J. Y. Shin	95	Finite-Element Approximation of a Fourth-Order Differential Equation
W. T. Li and S. S. Cheng	101	Asymptotic Trichotomy For Positive Solutions of a Class of Odd Order Nonlinear Neutral Difference Equation
M. Satratzemi, K. G. Margaritis and C. Tsouros	109	An Algorithm for Prescribed Multiple Domination in Arbitrary Graphs
G. Dattoli, A. Torre, S. Lorenzutta and G. Maino	117	Generalized Bessel Functions and Kapteyn Series
C. Belingeri, P. E. Ricci and O. Villo'	127	A Discretization of the Laplace and Gauss-Weierstrass Operators

NUMBER 9

L. Jódar and D. Goberna	1	A Matrix D'Alembert Formula for Coupled Wave Initial Value Problems
J. Yu and G. X.-Z. Yuan	17	The Study of Pareto Equilibria for Multiobjective Games by Fixed Point and Ky Fan Minimax Inequality Methods
J. Brimberg and R. Chen	25	A Note on Convergence in the Single Facility Minisum Location Problem
Y. C. Pao and M. Newman	33	A Direct Algorithm for Extracting a Transfer Function's Multiple Zeros or Poles
N. H. Cong	45	RKN-Type Parallel Block PC Methods with Lagrange-Type Predictors
X.-Y. Wu	59	A Sixth-Order A-Stable Explicit One-Step Method for Stiff Systems

D. O'Regan	65	Approximation of Solutions of Nonlinear Operator Equation on the Half Line
M. Meehan and D. O'Regan	79	Existence Principles for Nonresonant Operator and Integral Equations
R. P. Agarwal, H.-L. Hong and C.-C. Yeh	89	The Existence of Positive Solutions for the Sturm-Liouville Boundary Value Problems
R. P. Agarwal and D. O'Regan	97	Discrete Systems on Infinite Intervals
B. Paternoster	107	Order Bound for a Family of Parallel Runge-Kutta-Nyström Methods through Computer Algebra
C. P. Katti and S. Goel	121	A Parallel Mesh Chopping Algorithm for a Class of Two-Point Boundary Value Problems
S. H. Chou and T. A. Porsching	129	A Note on the Restarted CG Method and Reduced Space Additive Correction
	137	Book Reports

NUMBER 10

N.-J. Huang	1	Mann and Ishikawa Type Perturbed Iterative Algorithms for Generalized Nonlinear Implicit Quasi-Variational Inclusions
N.-J. Huang	9	A New Completely General Class of Variational Inclusions with Noncompact Valued Mappings
G. Antonoiu and P. K. Srimani	15	A Self-Stabilizing Distributed Algorithm for Minimal Spanning Tree Problem in a Symmetric Graph
Y. Eidelman and I. Gohberg	25	A Look-Ahead Block Schur Algorithm for Diagonal Plus Semiseparable Matrices
S. M. El-Sayed, I. G. Ivanov and M. G. Petkov	35	A New Modification of the Rojo Method for Solving Symmetric Circulant Five-Diagonal Systems of Linear Equations
L. F. Shampine	45	Linear Conservation Laws for ODEs
C. Greenspan	55	Dynamical Simulation of the Simplest Hydrides
S. Kim	63	Solving Singular Integral Equations Using Gaussian Quadrature and Overdetermined System
S. B. Leble	73	Elementary and Binary Darboux Transformations at Rings
B. X. Dai and L. H. Huang	83	Convergence of Solutions for a Class of Neutral Difference Equations
C. A. Mandal, P. P. Chakrabarti and S. Ghose	93	Some New Results in the Complexity of Allocation and Binding in Data Path Synthesis

- M. Iri** 107 Theory of Uncontrollable Flows—A New Type of Network-Flow Theory as a Model for the 21st Century of Multiple Values
- A. Zafer** 125 Necessary and Sufficient Condition for Oscillation of Higher Order Nonlinear Delay Difference Equations

NUMBER 11

- S. S. Shen and S. Zhang** 1 A Quantitative Study on the Stability of Quadratic Delay Difference Systems
- F.-M. Shao and L.-C. Zhao** 17 Topological Optimization of Computer Network Expansion with Reliability Constraint
- V. N. Dorovsky** 27 The Hydrodynamics of Particles Suspended in a Melt with the Self-Consistent Concentration Field of an Admixture (Part I)
- V. N. Dorovsky** 39 The Hydrodynamics of Particles Suspended in a Melt with the Self-Consistent Concentration Field of an Admixture (Part II)
- F.-L. Luo, R. Unbehauen, K. Reif and Y.-D. Li** 49 Analog Approach for the Eigen-Decomposition of Positive Definite Matrices
- P. A. Ramachandran and S. R. Karur** 63 Multidimensional Interpolation Using Osculatory Radial Basis Functions
- A. Karageorghis and M. Paprzycki** 75 Direct Methods for Spectral Approximations in Nonconforming Domain Decompositions
- M. A. Amer** 83 Constructive Solutions for Nonlinear Multiparameter Eigenvalue Problems
- C. A. Mandal, P. P. Chakrabarti and S. Ghose** 91 Complexity of Fragmentable Object Bin Packing and an Application
- A. M. C. Ruedin, D. C. Skigin and R. Vaillancourt** 98 Computer Solution of the Scattering Problem for a Groove in a Metallic Plane Using the Modal Method
- R. Qu and R. P. Agarwal** 121 A Subdivision Approach to the Construction of Approximate Solutions of Boundary-Value Problems with Deviating Arguments

NUMBER 12

- V. Y. Pan, M. A. Tabanjeh, Z. Q. Chen, E. I. Landowne and A. Sadikou** 1 New Transformations of Cauchy Matrices and Trummer's Problem
- S. Oliveira** 7 Analysis of a Multigrid Method for a Transport Equation by Numerical Fourier Analysis

P. Saucez, A. Vande Wouwer and W. E. Schiesser	13	An Adaptive Method of Lines Solution of the Korteweg-de Vries Equation
S. Das, B. Patra and L. Debnath	27	Stress Intensity Factors for an Interfacial Crack between an Orthotropic Half-Plane Bonded to a Dissimilar Orthotropic Layer with a Punch
G. Sarma, T. Zacharia and D. Miles	41	Using High Performance Fortran for Parallel Programming
S. Hill and L. D. Humphreys	59	Numerical Mountain Pass Periodic Solutions of a Nonlinear Spring Equation
G. Stoyan, C. Mihálykó and Z. Ulbert	69	Convergence and Nonnegativity of Numerical Methods for an Integrodifferential Equation Describing Batch Grinding
M. K. El-Daou and E. L. Ortiz	83	A Recursive Formulation of Galerkin's Method in Terms of the Tau Method: Bounded and Unbounded Domains
T. C. E. Cheng and Q. Ding	95	The Complexity of Single Machine Scheduling with Two Distinct Deadlines and Identical Decreasing Rates of Processing Times
M. Boulbrachene	101	The Noncoercive Quasi-Variational Inequalities Related to Impulse Control Problems
C. Caruso and G. Quarta	109	Interpolation Methods Comparison
