

Special Issue:
V Latin American Algorithms, Graphs, and Optimization Symposium —
Gramado, Brazil, 2009

Guest Editors:
Carlos E. Ferreira, Fábio Protti, Jayme L. Szwarcfiter

Contents

<i>C.E. Ferreira, F. Protti and J.L. Szwarcfiter</i> V Latin-American Algorithms, Graphs, and Optimization Symposium — Gramado, Brazil, 2009	2499
<i>J. Araujo, N. Cohen, F. Giroire and F. Havet</i> Good edge-labelling of graphs	2502
<i>J. Araujo and C. Linhares Sales</i> On the Grundy number of graphs with few P_4 's	2514
<i>L. Bahiense, G. Manić, B. Piva and C.C. de Souza</i> The maximum common edge subgraph problem: A polyhedral investigation	2523
<i>C. Banderier and P. Hitczenko</i> Enumeration and asymptotics of restricted compositions having the same number of parts	2542
<i>S.M. Bianchi, M.S. Escalante and M. Susana Montelar</i> Lift-and-project ranks of the set covering polytope of circulant matrices	2555
<i>O. Bodini, O. Roussel and M. Soria</i> Boltzmann samplers for first-order differential specifications	2563
<i>F. Bonomo, J. Marenco, D. Saban and N.E. Stier-Moses</i> A polyhedral study of the maximum edge subgraph problem	2573
<i>R. Borndörfer, M. Karbstein and M.E. Pfetsch</i> Models for fare planning in public transport	2591
<i>M. Braga, D. Delle Donne and J. Marenco</i> A polyhedral study of the acyclic coloring problem	2606
<i>J. Cáceres, C. Hernando, M. Mora, I.M. Pelayo and M.L. Puertas</i> On the metric dimension of infinite graphs	2618
<i>P. De Caria and M. Gutierrez</i> On minimal vertex separators of dually chordal graphs: Properties and characterizations	2627
<i>C. Cardonha and R. Borndörfer</i> A set partitioning approach to shunting	2636
<i>D.M. Cardoso, E.A. Martins, M. Robbiano and V. Trevisan</i> Computing the Laplacian spectra of some graphs	2645

<i>M.R. Cerioli and D.FD. Posner</i> On $L(2, 1)$ -coloring split, chordal bipartite, and weakly chordal graphs	2655
<i>S. Dantas, F. Maffray and A. Silva</i> $2K_2$ -partition of some classes of graphs	2662
<i>G. Di Stefano</i> Distance-hereditary comparability graphs	2669
<i>C.M.H. de Figueiredo</i> The P versus NP-complete dichotomy of some challenging problems in graph theory	2681
<i>A.P. Figueroa and E. Rivera-Campo</i> The basis graph of a bicolored matroid	2694
<i>M. Groshaus, P. Hell and J. Stacho</i> On edge-sets of bicliques in graphs	2698
<i>F. Havet, C. Linhares Sales and L. Sampaio</i> b -coloring of tight graphs	2709
<i>C. Hoppen, Y. Kohayakawa and R.M. Sampaio</i> A note on permutation regularity	2716
<i>E.A. Hoshino and C.C. de Souza</i> A branch-and-cut-and-price approach for the capacitated m -ring-star problem	2728
<i>R.E. Jamison</i> Towards a comprehensive theory of conflict-tolerance graphs	2742
<i>B. L�ev�eque and D. de Werra</i> Graph transformations preserving the stability number	2752
<i>J. Ma�uch, M. Patterson and C. Chauve</i> Hardness results on the gapped consecutive-ones property problem	2760
<i>V. Pedrotti and C.P. de Mello</i> Minimal separators in extended P_4 -laden graphs	2769
<i>I. Rajasingh, P. Manuel, B. Rajan and M. Arockiaraj</i> Wirelength of hypercubes into certain trees	2778
