1. Introduction

Last paragraph should be removed

Corrigendum text

At last paragraph

The purpose of this study was to screen *Fusarium oxysporum* f. sp. *lycopersici* for its ability to produce metallic nanoparticles. In addition, the potential to manipulate key parameters, which control growth and other cellular activities, to achieve controlled size of the nanoparticles, was investigated.

2. Materials and methods

Corrigendum text

Fusarium oxysporum f. sp. *lycopersici* was obtained from Microbiological Resources Centre (Cairo, MIRCEN), Egypt. Potato Dextrose Agar medium (PDA) was the microbiological media for culturing fungus.
