Absorption of fluid
  by renal proximal straight tubules, 1
Acetazolamide
  metabolic inhibitory effects of (abstr.), 544
N-acetylprocainamide
  in renal failure, 422
Acid-base changes
  effects on bicarbonate-stimulated ATPase (abstr.), 571
Acid-base disorders
  “whole-body” CO₂ equilibration curve and (abstr.), 566
Acidification
  in elderly (abstr.), 462
tubular a.
  distal t.a.: in acute respiratory alkalosis (abstr.), 573
  potassium and (abstr.), 562
  proximal t.a., 1
  in vitro model of (abstr.), 548
urinary a.: iodination of specific membrane proteins and
  (abstr.), 560
Acidosis
  hypercapnic a. (abstr.), 494
  hyperkalemic distal tubular a.: mechanism of (abstr.), 473
  lactic a. (abstr.), 472
  metabolic a.
  effect on serum potassium (abstr.), 532
  increased bicarbonate space and (abstr.), 546
  respiratory compensation in (abstr.), 466
  proximal tubular a.
  fructose intolerance and (abstr.), 449
  uncommon type of (abstr.), 379
  tubular a.: bicarbonate wasting in children (abstr.), 567
Acids, organic
  renal transport of (abstr.), 577
Adenocarcinoma, renal
  cAMP and cGMP metabolism in, 172
Adenosine
  renal response in cat (abstr.), 574
Adenylate cyclase
  and prostaglandins activity (abstr.), 542
Adrenal glands
  sodium retaining factor and (abstr.), 556
Adrenal insufficiency, experimental
  aldosterone and dexamethasone’s effect on diluting
capacity of thick ascending limbs in (abstr.), 82
Adrenal steroids
  and prostaglandin synthesis in toad bladder (abstr.), 579
Adrenergic stimulation
  effect on renal water excretion and medullary tissue
  cAMP in diabetes insipidus, 96
Albumin
  in cortical interstitium: conformity to well-mixed-
  compartment model (abstr.), 570
Alcohol syndrome, fetal
  renal manifestations of (abstr.), 465
Aldosterone
  competitive effects of hypokalemia and volume
depletion on, in hemodialysis, 279
  effect on urinary kallikrein (abstr.), 379
  in diabetes mellitus, 412
  primary hyperaldosteronism, in Brazil (abstr.), 495
  in renal sodium reabsorption, 214
Alkalois, metabolic
  diuretic induced: and thiazide stimulation of hydrogen
  ion secretion (abstr.), 565
Aluminum
  phosphate-binding a. gels: effect of prolonged ingestion
  on serum Al levels of chronic renal failure patients
  (abstr.), 377
  transfer during hemodialysis, 361
Amiloride
  effect on tubular hydrogen secretion (abstr.), 548
Amino acids
  in renal regeneration after acute tubular necrosis, 193
  transamination by isolated perfused rat kidney and
  release of (abstr.), 543
  transport in uremia: in vitro resistance to insulin
  stimulation (abstr.), 538
Aminoglycosides
  and renal transport of cations (abstr.), 561
Ammonia
  production of
  free fatty acid and (abstr.), 539
  glutamate metabolism and (abstr.), 544
  glutamine as regulator of (abstr.), 546
  in metabolic acidosis (abstr.), 543, 544
  mitochondrial dicarboxylate anion transporter and
  (abstr.), 559
  purine nucleotide cycle and production of (abstr.), 540
  urinary a.: osmometric measurement of (abstr.), 471
Analgesic
  a. nephropathy
  acidosis and abnormal urinary concentration in
  (abstr.), 473
  N-hydroxy acetaminophen in (abstr.), 525
  dependence: in patients with kidney transplants formerly
  suffering from analgesic nephropathy (abstr.), 74
  renal metabolism of, in rabbit (abstr.), 542
Anemia
  parathyroid hormone and (abstr.), 527
Angiotensin
  blockade of: influence of sodium balance on (abstr.), 225
  and renin
  effect on isolated perfused rat kidney (abstr.), 557
  renal vascular response to interruption of, in normal
  man, 285
Subject index: Vol. 12

Angiotensin (cont'd)
- specificity of vascular, adrenal, and renal receptors for (abstr.), 506

Antibiotics
- renal side effects of, 344

Antibodies, See Immunology

Antidiuretic hormone (ADH)
- cultured pig kidney cells response to (abstr.), 549
- inappropriate secretion of: furosemide and sodium chloride supplements in treatment of (abstr.), 462
- and intramembranous particle aggregation (abstr.), 563
- prostaglandin's action on (abstr.), 574

Antigen, See Immunology

Antiglomerular basement membrane disease
- clinical study of (abstr.), 446

Antihypertensives
- mechanisms of chronic diuretic and propranolol therapy (abstr.), 471

Antinatriuretic factor
- in plasma after salt-loading, 214

Anti-tubular basement membrane
- in renal receptor diseases, 184

Aortic constriction
- effect on sodium excretion during extracellular volume expansion (abstr.), 224

Autonomic nervous system blockade
- in patients on maintenance hemodialysis: hemodynamic study, 294

Autoregulation, renal
- effect of furosemide on, 379

Azotemia, familial
- impaired urea excretion despite normal renal function (abstr.), 468

Bacilluria, chronic
- deterioration of renal function and (abstr.), 467

Bacterial infection, renal
- 67Ga localization in detecting, 157

Bartter's syndrome
- indomethacin therapy for (abstr.), 152, 449
- pathogenesis of: family study (abstr.), 447
- primary renal hyperprostaglandinism and (abstr.), 153
- prostaglandin synthesis inhibitors in treatment of (abstr.), 447
- treatment of (abstr.), 74

β-blocking agents
- effect on isoproterenol-stimulated renin release (abstr.), 73

Benzolamide
- effect on nephron filtration rate (abstr.), 575

Berger's disease
- biochemical study of serum IgA in (abstr.), 152

Bicarbonate
- absorption: by renal proximal straight tubules, 1
- arginine vasopressin and PTH in renal handling of (abstr.), 453
- mitochondrial anion accumulation inhibited by (abstr.), 541
- reabsorption
  - effects on sodium and oxygen metabolism (abstr.), 575
  - in experimental renal disease: reduced Na and P intake, 393
  - secretion by cortical collecting tubules (abstr.), 567
  - therapy: to correct hyperkalemia despite constant blood pH, 354

Blood pH
- in hyperkalemia: bicarbonate therapy and, 354

Blood pressure
- arterial: and renin-angiotensin system in normal man, 285
- in diabetes mellitus, 412
- effects of angiotensin and antagonists in normotensive and hypertensive rats (abstr.), 75
- effect of vesico-ureteric reflux on (abstr.), 446

Blood volume
- in diabetes mellitus: analysis of pressor factors, 412
- factors in control of (abstr.), 569

Bone synthesis
- and tetracycline fluorescence, 366

 Bradykinin
- and prostaglandin (abstr.), 552

Brush border membranes
- antigens in (abstr.), 511

Bumetanide
- diuretic action of (abstr.), 448
- hemodynamic and naturetic effects of (abstr.), 74

Calcitonin
- cultured pig kidney cells response to (abstr.), 549
- in renal receptor diseases, 184

Calcium
- control of plasma vit. D by (abstr.), 453
- effect of increased intracellular Ca on renal handling of phosphorus, 164
- effect of PTH and vit. D3 on renal handling of (abstr.), 75
- role in hydrosmotic response to ADH (abstr.), 560
- transport: in thick ascending limb of Henle (abstr.), 461

Calcium ionophore (A23187)
- in studying renal handling of phosphorus, 164

Canrenoate
- effect on recovery of urinary concentration after furosemide (abstr.), 379

Carbon dioxide tension
- determined in situ: bicarbonate reabsorption (abstr.), 555
- effect of carbonic anhydrase and Tris on (abstr.), 548

Carcinoma
- hereditary renal cell type: new syndrome associated with chromosomal translocation (abstr.), 464

Catecholamines
- competitive effects of hypokalemia and volume depletion on, in hemodialysis, 279
- in diabetes mellitus, 412
- in renal adenocarcinoma, 172
- renal receptors (abstr.), 568

Chloramines
- as factor in anemia of patients on dialysis (abstr.), 79

Chloride
- excretion, in renal disease: effect on bicarbonate reabsorption, 393
- reabsorption in proximal tubule of rat (abstr.), 150

Cholesterol
- in nephrosis, 23

Choline
- excretion (abstr.), 546

Cirrhosis
- ascites: urinary sodium retention (abstr.), 565

Clearance studies
- on glomerular permselectivity, 229
### Computers
- in management of dialysis and transplant patients (abstr.), 87

### Contraceptives, oral
- and malignant hypertension (abstr.), 153

### Cortex, renal
- enzyme metabolism in, vs. in renal adenocarcinoma, 172

### Cortical blood flow
- during recovery phase of acute renal failure, 199

### Cryoglobulinemia, idiopathic mixed
- and glomerulonephritis (abstr.), 73

### Cyclic adenosine monophosphate
- antidiuretic hormone activity and (abstr.), 539
- effect of adrenergic stimulation on, in diabetes insipidus, 96
- effects in isolated rat glomeruli (abstr.), 573
- in renal adenocarcinoma, 172
- in renal handling of phosphorus, 164

### Cyclic guanosine monophosphate
- in renal adenocarcinoma, 172

### Cyclic nucleotides
- in glomerular and tubular function (abstr.), 545

### Cystine
- basolateral transport of, in proximal tubule (abstr.), 554

### Cysts, renal
- after long-term lithium therapy, 205

### Dehydration
- renal response to (abstr.), 555

### Diabetes
- diabetic glomerulopathy: exudative form of (abstr.), 76
- insipidus
- effect of adrenergic stimulation on renal water excretion and medullary tissue cyclic AMP in, 96
- nephrogenic: after long-term lithium therapy, 205
- oral antidiuretic therapy and (abstr.), 563
- renal excretion of prostaglandins in (abstr.), 555
- mellitus
- analysis of pressor factors in, 412
- dopamine's effect on vasodilation of kidney in (abstr.), 474

### Dialysate
- aluminum transfer during hemodialysis, 361
- for hypotension in fluid overloaded patient: increased sodium (abstr.), 491
- peritoneal: dopamine and regitine's effect on (abstr.), 486
- potential substitutes for bicarbonate in: cardiovascular effects (abstr.), 483

### Dialysis
- aluminum burdens in: antemortem assessment (abstr.), 456
- amine generation rates in chronic d. (abstr.), 479
- anemia in: erythropoietin deficiency in (abstr.), 86
- binding of antibiotics by dialysis membranes in (abstr.), 87
- chloramines in anemia of patients on (abstr.), 79
- dacron graft fistula for (abstr.), 478
- different molecular prescriptions: a comparison (abstr.), 85
- encephalopathy of: epidemiology (abstr.), 489
- hemodiafiltration: clinical experience with (abstr.), 87
- hemodialysis
  - acetate uptake and metabolism during (abstr.), 479, 489

### Dialysis (cont'd)
- hemodialysis (cont'd)
  - Allen-Brown shunt on major blood vessels for (abstr.), 481
  - antibody response to bivalent influenza vaccine in (abstr.), 478
  - arteriovenous shunt converted to s.c. A-V fistula (abstr.), 490
  - arteriovenous fistulas of glutaraldehyde-tanned human umbilical cord veins (abstr.), 479
  - ascites treatment with nonabsorbable triamcinolone or indomethacin (abstr.), 492
  - augmented by charcoal hemoperfusion (abstr.), 490
  - blood access in: long term results (abstr.), 84
  - brain aluminum, renal failure, and dementia (abstr.), 477
  - chronic renal failure in diabetes: vs. transplantation (abstr.), 492
  - competitive effects of hypokalemia and volume depletion. 279
  - Dialysis on Wheels project (abstr.), 486
  - dialyzable inhibitor and acetate intolerance in (abstr.), 512
  - EEG and visual evoked response changes in (abstr.), 482
  - effect on cell metabolism (abstr.), 530
  - effect on insulin secretion from isolated pancreatic islets cells (abstr.), 493
  - fluoxymesterone therapy for anemia of (abstr.), 478
  - hemofiltration effects on blood pressure regulation in (abstr.), 489
  - hemofiltration followed by (abstr.), 483
  - hemoglobin-oxygen dissociation curve in patients on (abstr.), 86
  - hypothalamic-hypophyseal-thyroid axis in (abstr.), 449
  - and impedance cardiology to monitor pulmonary fluid volume and stroke volume (abstr.), 76
  - indomethacin effects on peripheral plasma renin during ultrafiltration and (abstr.), 501
  - ionized calcium during (abstr.), 80, 487
  - iron therapy in (abstr.), 88, 487
  - kinetics of: removal of solutes in chronic renal failure vs. normal health, 41
  - leucopenia in: role of cellophane membrane and complement activation (abstr.), 77
  - microelectronics for self-hemodialysis (abstr.), 480
  - modified bovine carotid implants for (abstr.), 152
  - osmolality decrease and ultrafiltration in side effects of (abstr.), 488
  - plasma norepinephrine and (abstr.), 484
  - polycarbonate membrane for (abstr.), 79
  - polytetrafluoroethylene graft as vascular access for (abstr.), 85
  - pulmonary calcification in (abstr.), 480
  - saralasin test in (abstr.), 446
  - sepsis in chronic renal failure and (abstr.), 486
  - serum antibodies before and after immunization in children on (abstr.), 83, 152
  - serum middle molecules in pan-open and closed strategies of (abstr.), 152
  - single-needle continuous flow without control module (abstr.), 79
Dialysate (cont'd)
for uremia of systemic diseases: increased survival (abstr.), 477
vs. post-dilution hemofiltration (abstr.), 477
hemodialysis, chronic
acute infections in (abstr.), 480
aluminum transfer during, 361
anabolic steroid therapy in iron replete patients on (abstr.), 484
dialyzer reuse and anti-N-like antibodies in, 59
erythrocyte sodium transport in (abstr.), 478
essential amino acids and (abstr.), 82, 482
gastrointestinal blood loss and iron deficiency in (abstr.), 488
and hepatitis B infection, 51
hypertension in: alphamethydopa and clonidine for (abstr.), 490
hypothalamic-hypophyseal-gonadal axis in (abstr.), 80
iron deficiency anemia in (abstr.), 493
nonsurgical management of uremic pericarditis of (abstr.), 483
and sympathetic nerve defect in chronic renal failure (abstr.), 494
transfusions in patients on (abstr.), 489
upper arm A-V fistula for (abstr.), 479
hemodialysis, maintenance
autonomic blockade and Valsalva maneuver in, 294
mannitol and (abstr.), 491
platelet factor 4 activity in (abstr.), 484
septicemia during (abstr.), 486
triglycerides and cholesterol levels in (abstr.), 491
hemoperfusion: effect on antibiotics (abstr.), 488
hemoperfusion, charcoal
blood and cerebrospinal fluid changes and reversal of hepatic coma by (abstr.), 482
thrombocytopenia, leukopenia, and serum chemistry changes induced by (abstr.), 484
to treat amitriptyline overdose (abstr.), 485
to treat digoxin intoxication (abstr.), 485
hypotension after: hemodynamics (abstr.), 493
integration of transplantation and (abstr.), 85
maintenance d.: penile vascular calcification in (abstr.), 481
peritoneal d.
abdominal complications from catheters of (abstr.), 481
automated p.d.: alternative to hemodialysis (abstr.), 493
continuous ambulatory system of (abstr.), 487
EEG and visual evoked response changes in (abstr.), 482
endotoxin-induced aseptic peritonitis in (abstr.), 481
exchange volume and dialysate flow rate effect on solute clearance in (abstr.), 488
fatty acids removed during transport rates and mechanisms (abstr.), 485
losses of serum proteins during (abstr.), 483
reduction of complications and ultrafiltration intolerance in (abstr.), 81
single needle technique in (abstr.), 153
staphylococcus epidermidis infection with A-V fistulas (abstr.), 494
statistical report: Europe 1976 (abstr.), 79, 81, 82
semipermeable membrane in: effect of albumin on
Dialysate: semipermeable membrane in: (cont'd)
diffusion rates of basic peptides across (abstr.), 84
ultrafiltration
automatic control of (abstr.), 84
effect on blood pressure and cardiac output (abstr.), 477
exact regulation of (abstr.), 81
uremic pericardial effusion treatment with pericardial drainage (abstr.), 487
visceral calcification in chronic d. (abstr.), 492
vs. integrated program of dialysis and transplantation (abstr.), 80
without ultrafiltration (abstr.), 82
Dialyzers
Cuprophan hollow fibers in (abstr.), 82
efficiency of automated reuse of disposable dialyzers (abstr.), 87
ethylene oxide sterilized hollow fiber d.: in bronchial asthma (abstr.), 487
hollow fiber d.: polymer, glucose, and hydrostatic pressure effects on convective solute (abstr.), 492
membrane d. as pure ultrafilters: in vitro comparative study (abstr.), 490
miniature dialyzers, high efficiency (abstr.), 82
reuse of: presence of anti-N-like antibodies, 59
Dinoxin
and Tris: opposite effects on tubular secretion of hydrogen and potassium (abstr.), 546
1,25-Dihydroxycholecalciferol, See Vitamin D
Dithiothreitol
effect on heavy metal-induced acute renal failure, 115
Diuretics
action of: role of metabolism and transport (abstr.), 545
action in newborn (abstr.), 569
effects on norepinephrine and dopamine-$\beta$-hydroxylase (abstr.), 500
effects on tubular volume reabsorption (abstr.), 566
renal prostaglandin E excretion and (abstr.), 506
uricosuric d.: supersaturation of urine with uric acid and monosodium urate (abstr.), 467
uricosuric effect of tienvic acid, 104
Electrical studies
during ion substitutions in isolated perfused proximal tubule of salamander (abstr.), 572
and effect of urea on papillary epithelial cells (abstr.), 572
of mammalian distal tubule: types of electrodes compared, 324
of phlorizin-binding to cortical brush border membrane vesicles (abstr.), 548
tubular cells (abstr.), 547
Electrodes
types of, to measure potential difference in mammalian distal tubule, 324
Endotoxin
effect on genesis of renal cortical necrosis during Shwartzman reaction, 91
Enzyme metabolism
in renal adenocarcinoma, 172
Epithelial transport functions
effect of dithiothreitol on, in acute renal failure induced by heavy metals, 115
Ethanol
AVP response to, following nausea (abstr.), 468
diuretic action of (abstr.), 552
Fabry's disease
in black kindred without skin lesions or peripheral nephropathy (abstr.), 518

Fanconi's syndrome
synthesis of 1,25(OH)2D and, 244
with acidosis, in dog (abstr.), 540

Fetal kidneys, mouse
electrolyte content and organic ion transport in (abstr.), 73

Fibrinolysis
glomerular fibrin clearance mechanisms and (abstr.), 151

Fibrosis, interstitial
after long-term lithium therapy, 205

Fistulae, arteriovenous
new vascular prosthesis for reconstruction of (abstr.), 85

Freeze-fracturing
of renal tubules, 66

Fructose intolerance, hereditary renal dysfunction of (abstr.), 462

Furosemide
effect of chloride-loading on chronic administration of (abstr.), 551
effect on gentamicin and netilmycin nephrotoxicity (abstr.), 527
effect on renal autoregulation, 379
and GFR: micropressure study (abstr.), 555
hemodynamic and natriuretic effects of (abstr.), 74
role of prostaglandin E in action of (abstr.), 551

Gallium-67 localization
to detect renal infection, 157

Gentamicin
early detection of toxicity by monitoring urinary enzymes (abstr.), 538
effect of hydration on, in furosemide-treated rats (abstr.), 522
effect on PAH transport in tubules (abstr.), 529
defect in glomerular ultrafiltration associated with, 344
polyuric phase of nephrotoxicity of (abstr.), 534
transport by rat nephron (abstr.), 569

Glomerulonephritis
acute crescentic g.: without immune deposits (abstr.), 464
biochemical study of serum IgA in (abstr.), 152
and chronic lymphocytic leukemia: immune complexes in (abstr.), 513
detection of circulating immune complexes in, 268
focal segmental g.: malignant type (abstr.), 445
Heymann-type g.: antiproteinuric effect of indomethacin in (abstr.), 223
effects of indomethacin on course of (abstr.), 223
immune complex g.: cryoglobulins in (abstr.), 513
“fixed antigen” in pathogenesis of (abstr.), 225
hepatitis B virus infection and (abstr.), 73
mortality from, in unilateral nephrectomized mice (abstr.), 580
reticuloendothelial function in (abstr.), 513
immune complexes on basement membrane in (abstr.), 513
indomethacin therapy interrupted in (abstr.), 450
in isolated perfused rat kidney (abstr.), 519
membranoproliferative g.: clinical followup in children (abstr.), 470
eyearly changes in (abstr.), 517
immunology of (abstr.), 514
mesangial cell in: origins of glomerular hypercellularity (abstr.), 445
monocytes’ role in (abstr.), 518
poststreptococcal g.: antigens and depressed leukocyte migration inhibition in (abstr.), 510
intrarenal vascular sclerosis in progression of (abstr.), 512
vasculitis and (abstr.), 467
"upright hyperkalemia" in (abstr.), 224

Glucagon
and renal adenocarcinoma, 172

Glucocorticoids
transmural electrolyte movement and (abstr.), 550

Glutamine metabolism
carbon and nitrogen balance in (abstr.), 576

Goodpasture’s syndrome
recurrent type: case report (abstr.), 464

GSH-S-transferase
and ligandinuria in acute tubular necrosis, 387

Heart tumor
and acute renal failure (abstr.), 153

Hemodialysis, See Dialysis

Hemofiltration
as adjunct to dialysis (abstr.), 82
new automatic machine for, with continuously monitored fluid balance (abstr.), 83

Plasma concentrations changed and elimination of various hormones by (abstr.), 83
in uremia (abstr.), 153

Hemolytic uremic syndrome

Hemolytic uremic syndrome (cont’d)
nonrenal involvement in (abstr.), 475
pathogenesis of (abstr.), 224
Hemophilia A
hemodialysis and renal transplantation in patient with
(abstr.), 83
Hepatitis B infection
efficacy of vaccine against (abstr.), 86
in hemodialysis, 51
Heredopathia atactica polyneuritiformis
renal involvement in (abstr.), 532
Heroin addicts
renal disease in (abstr.), 467
Hydrogen transport
metabolic pathways linked to, in turtle bladder (abstr.), 547
serosal bicarbonate and: in turtle bladder (abstr.), 554
Hydromotic flow, transmembrane
factors affecting: toad skin as model (abstr.), 559
and serosal hypertonicity: effects of quinine and calcium
ionophore (abstr.), 560
Hydrostatic pressure, peritubular
effect on salt and water reabsorption (abstr.), 558
Hydroxyproline, plasma
as index of bone resorption in renal failure (abstr.), 459
Hypercalcemia
in chronic renal failure managed with essential amino
acids (abstr.), 456
and renal handling of phosphorus, 164
Hypercalciumia
cause of "phosphate leak" in (abstr.), 469
idiopathic h.: acid vs. neutral phosphate therapy for
(abstr.), 457
Hypercholesterolemia
in nephrotic syndrome, 23
Hypokalemia
chloride and urinary concentration defect of (abstr.), 572
correction of by bicarbonate despite constant blood pH,
354
insulinopenic h.: basal insulin levels in potassium
homeostasis (abstr.), 465
Hyperlipidemia
oral activated charcoal as therapy for (abstr.), 543
and renal disease: L-tryptophan or halofenate therapy
for (abstr.), 480
Hypermagnesemia, essential
osmotic and volume responses in (abstr.), 473
Hyperparathyroidism
in early renal failure: role of phosphate retention (abstr.),
459
effects on central nervous system (abstr.), 455
metabolic acidosis after thyroparathyroidectomy in rats
(abstr.), 457
primary h.: tetracycline fluorescence in bone tissue in
patients with, 366
urolithiasis in (abstr.), 461
Hypertension (cont’d)
chlordiazepoxide therapy for: dose-response study (abstr.),
503
in chronic renal insufficiency: treated by hemofiltration
(abstr.), 86
classification as volume h. or vasoconstrictor h. (abstr.),
507
combined drug therapy: rationale for (abstr.), 502
Dahl’s h.: pressure diuresis in isolated kidneys of rats
prone to (abstr.), 74
in diabetes mellitus: analysis of pressor factors, 412
effect on diabetic retinopathy (abstr.), 506
dopamine-β-hydroxylase activity in (abstr.), 502
essential h.
intrarenal vasculature: racial differences in (abstr.),
528
low renin in: hemodynamic study (abstr.), 496
pressor responses to diuretics in (abstr.), 72
renin classification methods in (abstr.), 503
sodium excretion, norepinephrine, epinephrine,
dopamine, and renin activity in (abstr.), 506
Tierynafen therapy for: hemodynamic and ursodiolic
effects of (abstr.), 501
extracellular and intracellular fluid distribution in
(abstr.), 521
fibromuscular vs. atherosclerotic renovascular disease
(abstr.), 495
genetic h.: identification in normotensive adolescents
(abstr.), 499
Goldblatt h.: effect on glomerular lesions of diabetes
mellitus in (abstr.), 516
Guanabenz and thiazide therapy for moderately severe
h. (abstr.), 508
hemodialysis and: renin-angiotensin system in (abstr.),
508
of hemodialysis patients: hemodynamic study of, 294
hyperreninemia, unilateral renal artery occlusion, and
(abstr.), 508
kidney transplant artery stenosis in (abstr.), 83
indomethacin and hydralazine pretreatment in
experimental h. (abstr.), 498
intrinsically natriuretic capacity and (abstr.), 507
malignant h.
bilateral nephrectomy contraindicated in (abstr.), 503
Minoxidil therapy for: pericardial effusion as side
effect (abstr.), 497
and oral contraceptives (abstr.), 153
Minoxidil therapy for (abstr.), 501
nephroptosis and (abstr.), 223
with nephroclerosis: hemodynamics of, 28
norepinephrine vs. dopamine-β-hydroxylase plasma
levels in (abstr.), 498
physiology in rats (abstr.), 578
in pregnancy (abstr.), 500
primary h.: role of sympathetic nervous system (abstr.),
497
prostaglandins in (abstr.), 378
proteinuria in spontaneously hypertensive rat, 332
racial analysis of volume and renin activity in (abstr.),
504
renal responses to i.v. saline load (abstr.), 496
renin and body-fluid volumes in (abstr.), 499
renin response to head-up tilt after sodium loading in
(abstr.), 505
Hypertension (cont'd)
and saline-load excretion, in rats (abstr.), 547
salt balance relation to blood pressure in (abstr.), 505
salt-dependent h.: renomedullary interstitial cell damage and (abstr.), 505
sodium balance influence on effects of saralasin (abstr.), 225
24-hr sodium excretion estimated by spot urinary sodium to creatinine ratio (abstr.), 504
spironolactone and propranolol for: renin and aldosterone effects (abstr.), 501
SQ-14225 to treat (abstr.), 497, 500, 504

Hypokalemia
and volume depletion effects in hemodialysis, 279

Hypophosphatemia
allografts and (abstr.), 455
central nervous system dysfunction and (abstr.), 460
hormone-sensitive adenylate cyclase activity along nephron in mice having (abstr.), 454
in magnesium-depleted rat (abstr.), 460

Hyporeninism
in glomerulonephritis in young (abstr.), 224

Hypotension
in diabetes mellitus: factors contributing to, 412

Hypotensive hemorrhage
prostaglandins, renal nerves, and angiotensin in (abstr.), 560

Hypoxia
acute h.: renal function and intrarenal hemodynamics in (abstr.), 75, 78
effect on renal hemodynamics, autoregulation, and renin secretion (abstr.), 494
and vasodilation response to indomethacin (abstr.), 577

IgA nephropathy
diagnostic significance of skin biopsies in (abstr.), 515

Immunology
antibody study of hepatitis B infections in hemodialysis, 51
anti-N-like antibodies in dialyzer reuse of chronic hemodialysis, 59
anti-tubular basement membrane in renal receptor diseases, 184
arrest of antibody rebound using arabinosylcytosine and cyclophosphamide (abstr.), 519
autoantibody to glomerular mesangium and Bowman’s capsule (abstr.), 509
autoimmune glomerulotubular nephropathy in mice (abstr.), 510
beta2 microglobulin in renal disease (abstr.), 517
biochemical study of serum IgA in Berger’s disease (abstr.), 512
circulating immune complexes in autologous immune complex nephritis (abstr.), 508
detection of immune complexes in glomerulonephritis, 268
glomerular localization of subepithelial immune deposits (abstr.), 510
in glomerulonephritis: detection of circulating immune complexes, 268
humoral vs. cellular immune systems in glomerulopathy (abstr.), 520
isolation of TBM in rat, 238

Indomethacin
antiproteinuric effect of, in extramembranous nephritis (abstr.), 223
effects on glomerular permeability (abstr.), 225
effect on Heymann-type nephritis (abstr.), 223
in treatment of Bartter’s syndrome (abstr.), 152

Interstitium, renal
immune complex receptors in diseases of (abstr.), 512

Intestine, large
and secretion of potassium in renal insufficiency, 9

Inulin
inadequate marker of GFR in transplanted kidney (abstr.), 473

Isoprenaline
direct renal actions of (abstr.), 151

Isoproterenol
effect on renal water excretion and cAMP in diabetes insipidus, 96

Kallikrein, urinary
and changes in endogenous aldosterone (abstr.), 379

Lactate
sodium reabsorption and GFR regulation by (abstr.), 540

Lesions, renal
after long-term lithium therapy, 205

Levodopa
effect on tubular transport of uric acid and oxypurines (abstr.), 539

Ligandinuria
in nephrotoxic acute tubular necrosis, 387

Ling-Gerard electrodes
in measuring electrical properties of mammalian distal tubule, 324

Lithium
effect on function of distal nephron, 17
effects on renal function (abstr.), 571
effect on tubular hydrogen secretion (abstr.), 548
polyuria and (abstr.), 530
renal lesions after, 205

Liver
acid-base homeostasis in: in acidosis and alkalosis (abstr.), 533
cholesterol synthesis in: in nephrotic syndrome, 23
renin and aldosterone activity in disease of (abstr.), 504

Loop of Henle
effect of lithium chloride infusion on, 17

Lupus erythematosus, systemic
anti-dsDNA profiles in (abstr.), 519
graft survival in: immunology (abstr.), 520
hyperkalemia and selective hyporeninemic hypoaldosteronism in (abstr.), 505

Lupus nephritis, See Nephritis, lupus
Lupus nephropathy
changing histopathology patterns in (abstr.), 469
Lymphatic system, cortical
quantitative analysis of, in dog (abstr.), 547
Lysine
bicarbonaturic effect of (abstr.), 558
Macrodialysis
microelectrodes
to measure potential difference in mammalian distal tubule, 324
Magnesium
effect of phosphate depletion on renal handling of (abstr.), 457
transport in proximal tubule and loop of Henle (abstr.), 570
Maleate
effect on tubular bicarbonate, sodium and chloride transport (abstr.), 553
Maleic acid
in vitamin D₃ synthesis: related to Fanconi’s syndrome, 244
Medullary tissue, renal
effect of adrenergic stimulation on cyclic AMP in, in diabetes insipidus, 96
necrosis of: functional studies in (abstr.), 530
quantitative analysis of anatomy of, in rats and rabbits, 313
Membrane studies
cancer cell line: ouabain and (abstr.), 568
formation in regenerating cells after tubular necrosis:
effect of amino acid, 193
of nonelectrolytes as a function of concentration (abstr.), 553
paracellular pathways across toad urinary bladder (abstr.), 553
of peritoneal and glomerular capillaries to macromolecules (abstr.), 549
of thin limbs of Henle: freeze-fracture in rat (abstr.), 576
Membranous nephropathy
cancer incidence in (abstr.), 476
focal glomerular sclerosis in (abstr.), 520
mesangial electron-dense deposits in (abstr.), 514
Merccuric chloride
effect of dithiothreitol on acute renal failure induced by, 115
Mesangial nephropathy
immunology of (abstr.), 516
Metabolites
in hemodialysis kinetics study: chronic renal failure vs.
normal health, 41
Microfilaments
in ADH-induced particle aggregation (abstr.), 556
Micropuncture studies
on glomerular permselectivity, 229
Mitochondria
energy production of, regulated by cations (abstr.), 545
Models
two-compartment model of body fluid system in study of kinetics of hemodialysis, 41
Molecular size
glomerular permselectivity: in vivo studies, 229
Myoglobinuria
mannitol-bicarbonate’s effect on clinical course of (abstr.), 466
Myoinositol
as uremic neurotoxin: tissue culture study of, 131
N-acetyl-β-δ-glucosaminidase (NAG)
in urine, in health and disease (abstr.), 470
Nandrolone decanoate
for uremic anemia, 430
Natriuretic factor
in aortic constriction during ECV expansion (abstr.), 224
Natriuresis
effect of water diuresis on (abstr.), 577
and renal sodium reabsorption, 214
Necrosis, cortical
during Shwartzman reaction, 91
Nephrectomy, unilateral
circulatory retention of urinary factors as stimulus to contralateral hypertrophy, 305
medullary collecting duct function in remnant kidney (abstr.), 538
protein synthesis and renal growth (abstr.), 542
role of vagus in hemodynamic changes after (abstr.), 561
Nephritis
circulating immune complex levels related to histology of (abstr.), 472
Henoch-Schönlein n.
cyroglobulins and complement system in (abstr.), 151
prognosis of (abstr.), 151
interstitial n.: drug-induced: humoral mechanisms in, 517
lupus n.
glomerular IgE deposits in (abstr.), 475
serum immune complexes and disease activity in (abstr.), 150
nephrotic n.: focal loss of negative charge in (abstr.), 515
tubulointerstitial n.: due to fluorescein isothiocyanate: immunology (abstr.), 512
Nephrolithiasis
calcium handling in (abstr.), 458
Nephroritonephrosis
atrophy after long-term lithium therapy, 205
distal n.: function of during lithium chloride infusion, 17
filteration dynamics: an evaluation, 137
hemodynamics of: in hypertensive kidneys with nephrosclerosis, 28
mitochondrion of: characteristics of (abstr.), 539
superficial n.: bicarbonate and fluid absorption in, 1
Nephrotic syndrome
and hypertension (abstr.), 223
Nepholithiasis
cahonumus nephropathy
hemodynamics of, 28
Nephroritonephrosis
hemodynamics of, 28
Nephroritonephrosis
Nephrotic syndrome
adult idiopathic n.s.: circulating immune complexes in (abstr.), 510
in children: heterophile antibodies in (abstr.), 517
erthrocyte sedimentation rate in (abstr.), 469
hypercholesterolemia in, 23
renal vein thrombosis and (abstr.), 472
vitamin D metabolism in (abstr.), 468
Nephrotoxins
aminoglycosides (abstr.), 528, 533
gentamicin therapy and, 344
netilmicin and tobramycin as (abstr.), 466
tobramycin and gentamicin renal kinetics in health and disease (abstr.), 537
Nervous system
Nervous system (cont’d)
- myoinositol in: possible role in uremia, 131
- renal n.s.: natriuresis and (abstr.), 570

Neuromuscular
- changes after renal transplant (abstr.), 78
- reactions in uremic patients on diet therapy and hemodialysis (abstr.), 78

Neurotoxin, uremic
- myoinositol as: tissue culture study of, 131

Nicotinamide
- effect on renal acid and electrolyte excretion (abstr.), 538

Norepinephrine
- effect on renal water excretion and cAMP in diabetes insipidus, 96
- to induce acute renal failure: effect on prostaglandin E on, 122
- renal tubular handling of (abstr.), 578

Occlusive glomerular hyperplasia
- in migrating fish: prolactin (abstr.), 150

Osteodystrophy, renal
- bone scintigraphy in (abstr.), 448
- inhibitory effect of uremia on bone modeling in (abstr.), 461
- long term vit. D therapy in children with (abstr.), 463

Osteomalacia
- tetracycline fluorescence in bone formation rates, 366

Para-aminohippurate (PAH)
- and tienilic acid, 104
- transport in young rabbits (abstr.), 563

Parathyroid hormone
- effect of dietary phosphorus on phosphaturic and calsemic responses to, in uremic dog (abstr.), 457
- fasting to abolish phosphaturic effect of, in hamster (abstr.), 456
- and renal handling of phosphorus, 164
- in renal receptor diseases, 184
- renal tubular effects of (abstr.), 460
- as uremic toxin (abstr.), 453

Parenchymal disease, renal
- baroreflex function in (abstr.), 485
- urinary kallikrein related to hypertension in (abstr.), 470

Peptic ulcers
- and kidney transplantation (abstr.), 78
- in renal failure: treatment of (abstr.), 81

Perfusion studies
- effect of ureter occlusion on (abstr.), 549

Pericarditis, uremic
- algorithm for management of (abstr.), 491

Phenacetin
- effect on kidney (abstr.), 86

Phlorizin
- dissociation of proximal tubular sodium and phosphate transport by (abstr.), 459

Phosphate (cont’d)
- depletion (cont’d)
  - normal (abstr.), 459
  - effect on bicarbonate reabsorption in renal disease, 393
  - excretion: chronic lithium therapy and (abstr.), 455
  - infusion: effect on renal phosphate and calcium transport (abstr.), 461
  - low p. diet and enzyme changes in renal cortex (abstr.), 563
  - renal handling of (abstr.), 453
  - renal handling of: effect of divalent cation ionophore (A23187), 164

Phospholipids, chol-containing
- amino acid effect in synthesis of, in renal regenerating cells, 193

 Plasma
- antinatriferic activity in following salt-loading, 214
- medullary p. flows: and juxtamedullary-glomeruli filtration fraction (abstr.), 553
- volume expansion: role of renal nerves and renin-angiotensin system in vasodilation of (abstr.), 570

 Polycystic kidney disease
- in blacks (abstr.), 463
- induction of, in newborn rat (abstr.), 511
- ultrastructural and functional correlation of cysts from (abstr.), 511

 Potassium
- deficiency: collecting duct hydrogen ion secretion and (abstr.), 558
- depletion
  - phospholipid formation during (abstr.), 545
  - renal alkalosis producing effect of mineralocorticoid hormone (abstr.), 561
- homeostasis
  - catecholamines and (abstr.), 544
- role of insulin on (abstr.), 475
- kinetics of distribution in anuric humans (abstr.), 574
- large intestinal secretion of, in renal insufficiency. 9
- recycling in renal medulla (abstr.), 554
- secretion by distal tubule: factors affecting (abstr.), 558

 Potential difference, See Electrical studies

 Prazosine
- antihypertensive effects of (abstr.), 449
- inhibition of dopamine by (abstr.), 541

 Prednisone
- in adult nephrotics with minimal change and membranous histology (abstr.), 463
- for diffuse proliferative lupus nephritis (abstr.), 465

 Procainamide
- in renal failure, 422

 Prolactin
- role in occlusive glomerular hyperplasia in migrating fish (abstr.), 150

 Propranolol
- direct renal actions of (abstr.), 151
- effect on recovery of urinary concentration after frusemide, in rat (abstr.), 379
- side effects of (abstr.), 377

 Prostaglandins
- ADH-antagonist properties of (abstr.), 575
- effect in nephrotoxic and vasoconstrictor models of acute renal failure, 122
- effect on renin-aldosterone axis and potassium homeostasis (abstr.), 507
- inhibitors of: effect on furosemide-induced renin release (abstr.), 474
Prostaglandins (cont'd)
and kinin system: in natriuresis in ECV-expansion (abstr.), 567
primary renal hyperprostaglandinism and Bartter's syndrome (abstr.), 153
role in sodium excretion (abstr.), 499
role in superficial renal cortex (abstr.), 550
role in ureteral pressure elevation (abstr.), 556
secretion by proximal straight tubules (abstr.), 561
Protein reabsorption
role of tubular luminal cell membranes in (abstr.), 557
Proteinuria
aminonucleoside-induced: peritoneal and glomerular permeability (abstr.), 549
angiotensin and (abstr.), 550
Bence Jones protein administration: morphologic and functional changes in rat kidney (abstr.), 511
and glomerular permselectivity, 229
immunosuppressive therapy for (abstr.), 468
low-mol wt p.: prevalence in South Wales (abstr.), 151
in pediatric renal disease (abstr.), 466
in spontaneously hypertensive rat, 332
Pyelonephritis
acute p.: reversible renal failure due to (abstr.), 445
gallium 67 localization for detection of, 157
unilateral p.: prostaglandins activity in (abstr.), 526
Pyrazinoic acid
effect on urate excretion (abstr.), 541
Receptors, renal
for PTH and calcitonin in disease: anti-TBM study, 184
Regenerating cells, renal
effect of amino acid infusions in, after acute tubular necrosis, 193
Renal blood flow
angiotensin and prostaglandin E synthesis in control of (abstr.), 507
during recovery phase of acute renal failure, 199
and renin-angiotensin system in normal man, 285
Renal disease
albumin polymer in urine in (abstr.), 447
bicarbonate reabsorption in: effect of reduced Na and P intake, 393
clinicopathologic study in adults over age of 60 (abstr.), 471
enzyme excretion and relation to prognosis in (abstr.), 445
serum hemoglobin related to GFR in (abstr.), 378
Renal failure
acquiescent renal infection and (abstr.), 525
acute r.f.
adrenalin nucleotides to accelerate recovery from (abstr.), 534
24 and 48 hr after ischemia: pathogenic mechanisms in (abstr.), 522
after open heart surgery (abstr.), 531
bicarbonate reabsorption in (abstr.), 537
cloidine or guanethidine for (abstr.), 535
dithiothreitol's effect on (abstr.), 529
effect of prostaglandin E on, 122
furosemide therapy and (abstr.), 527
heavy metal-induced: effect of dithiothreitol on, 115
human serum albumin injection and (abstr.), 533
induced by ischemic injury (abstr.), 77
kallikrein excretion and (abstr.), 526
mechanisms in after ischemic episode: Kf factor (abstr.), 537
Renal failure
acute (cont'd)
muscle injury and (abstr.), 521
myohemoglobinuric a.r.f.: sodium chloride and renin effects (abstr.), 521
in newborn (abstr.), 471
papillary collecting duct and juxtamedullary nephron function in (abstr.), 521
pathophysiology of (abstr.), 531
and primary tumor on the heart (abstr.), 153
recovery from, after temporary renal ischemia (abstr.), 522
recovery phase: renal function and cortical blood flow during, 199
regulators of intrarenal blood flow in (abstr.), 531
renal renin depletion without forced diuresis in (abstr.), 79
rhabdomyolysis and (abstr.), 380
Rocky Mountain spotted fever and (abstr.), 536
role of renin in (abstr.), 522
secondary to interstitial lupus nephritis associated with changing immunologic abnormalities (abstr.), 464
secondary to leptospirosis (abstr.), 534
serum protein-binding of phenylbutazone during course of (abstr.), 224
statistical evaluation of 433 cases (abstr.), 84
tubules and blood vessels in: microradiography (abstr.), 525
a) amino acids and (abstr.), 525
b) amino acids or nitrogen-free analogues for: hypercalcemia and hypophosphatemia in (abstr.), 530
chronic r.f.
ammonia excretion in (abstr.), 529
anemia predicted from BUN (abstr.), 536
antibody responses to influenza vaccination in (abstr.), 472
in children: plasma lipid patterns in & effects of diets (abstr.), 378
depressed cellular immunity in (abstr.), 470
fuosemide therapy for acidosis (type 4) (abstr.), 534
hemodialysis kinetics in: study of removal of solutes, 41
hyperparathyroidism: renal phosphate transport in (abstr.), 520
hyperprolactinemia in (abstr.), 528
levamisole and plasma factors effects on sheep cell rosetting by uremic lymphocytes in (abstr.), 509
plasma oxalate levels in (abstr.), 535
potassium secretion adaptive change in, 9
potassium transport in (abstr.), 532
renal acidification in (abstr.), 537
renal glucose transport in (abstr.), 537
thyroid function in: effect of dialysis type and duration (abstr.), 536
control of fluid reabsorption by proximal straight tubule in (abstr.), 524
echocardiography in (abstr.), 447
effects of extracellular potassium on PGE2 production related to (abstr.), 523
following major angiography (abstr.), 536
glomerular changes in (abstr.), 531
glomerular response to partial unilateral ureteral obstruction (abstr.), 526
hyperglucagonemia and (abstr.), 84
level at which cellular injury occurs (abstr.), 523
Renal failure (cont'd)
  luteinizing hormone and prolactin in (abstr.), 524
  peptic ulcer in: treatment of (abstr.), 81
  portacaval anastomosis in rat: renal changes after (abstr.), 523
  procainamide and N-acetylprocainamide in, 422
  resistance to: tubular function study (abstr.), 526
  sodium-K-ATPase in (abstr.), 523

Renal infection
  gallium 67 localization for detection of, 157

Renal injury
  in spontaneously hypertensive rat, 332

Renal insufficiency
  fluoride metabolism in azotemic rats (abstr.), 72
  large intestinal secretion of potassium in, 9
  myoinositol: a uremic neurotoxin? (abstr.), 73
  tolazomol's effect on (abstr.), 72

Renal resistance
  in hypertension with nephrosclerosis, 28

Renin
  acid vs. cryoactivation of inactive r.: enzyme reaction (abstr.), 495
  -aldosterone axis: in neonatal puppies: salt-loading and volume contraction (abstr.), 562
  -angiotensin system
    in heavy metal-induced acute renal failure: effect of dithiothreitol on, 115
    renal vascular response to interruption of, in normal man, 285
    in carcinoma of kidney (abstr.), 498
  competitive effects of hypokalemia and volume depletion on, in hemodialysis, 279
  in diabetes mellitus, 412
  fatty acid in vitro and in vivo inhibition of (abstr.), 502
  terminal: effect of saralasin on hemodynamics in (abstr.), 77
  urea synthesis in (abstr.), 533
  urinary concentration capacity in (abstr.), 524
  urinary kallikrein and (abstr.), 532

Renal function studies
  long-term (abstr.), 557

Renal hypertrophy, compensatory
  circulatory retention of urinary factors as stimulus to, 305
  in juxtaglomerular: in renal vascular resistance to changes in blood pressure, 253
  and kallikrein relationship (abstr.), 502
  plasma r. activity: standardized sampling conditions for determining (abstr.), 497
  secretion and renal vasoconstriction: effects of calcium-free perfusion, verapamil, and manganese on (abstr.), 503
  secretion of active and inactive r., in pig (abstr.), 496
  secretion during transient conditions (abstr.), 566
  selective chloride depletion to stimulate (abstr.), 494

Retropitoneal fibrosis
  nonoperative treatment of (abstr.), 476

Rhabdomyolysis
  acute nontraumatic type (abstr.), 463

Saccharin
  renal excretion of (abstr.), 551

Saralasin
  effect on hemodynamics of terminal renal failure (abstr.), 77

Serum sickness
  acute s.s.: disodium cromoglycate and antihistamines in (abstr.), 81
  immune complex deposition in (abstr.), 516

Serum immune complexes, See also Immunology
  and disease activity in lupus nephritis (abstr.), 150

Shwartzman reaction, unilateral
  genesis of renal cortical necrosis during, 91

Sickle cell disease
  impaired renal tubular potassium secretion in (abstr.), 465

Sodium
  action in solute reabsorption by loop of Henle, 17
  exchangeable s.: in diabetes mellitus, 412
  excretion
    and drug-induced vasodilatation (abstr.), 557
    effect of dithiothreitol on, in acute renal failure induced by heavy metals, 115
  intake
    effect on bicarbonate reabsorption in renal disease, 393
    in hypertensive hemodialysis patients: hemodynamic study, 294
    restriction of in normal man: renin-angiotensin system's role in renal vascular response to, 285
  -nitrate: effect on renal dilution and concentrating ability (abstr.), 550
  -potassium-ATPase: role in potassium secretion in kidney tissue and colon, 9
  reabsorption, renal: natriuretic factor in, 214
  transport
    effects of silver and amiloride on epithelium (abstr.), 76
    in mucosal membrane of frog skin epithelium (abstr.), 573
    in proximal renal handling of phosphate and glucose (abstr.), 454
    role in fluid and bicarbonate absorption by tubules, and surface proteins of luminal membrane of toad bladder (abstr.), 543
    in toad bladder and skin (abstr.), 574, 579
    thyroxine's effect on epithelium (abstr.), 77

Solute
  in kinetics study of hemodialysis, 41

Somatostatin
  in renal handling of divalent ions, sodium, and water (abstr.), 454

Spironolactone
  effect on colonic sodium and water absorption (abstr.), 552

Steroid therapy
  after transplantation (abstr.), 78

Sucrose-rich diets
  renal damage caused by (abstr.), 447

Swine influenza vaccination
  in renal transplant and hemodialysis patients (abstr.), 476

Syndrome of inappropriate antidiuretic hormone
  vasopressin escape during (abstr.), 535

Tetracyclines
  effect on aldosterone-induced sodium transport (abstr.), 559
  effect on conductance and sodium transport (abstr.), 559
  fluorescence in bone of uremic and hyperparathyroid patients, 366
  water flow, pH-dependence, and antibacterial activity (abstr.), 554
Thoracic inferior vena cava constriction
antinaturiuresis of: role of atrial transmural pressure (abstr.), 567
Ticrynafen	hylopemic effect of (abstr.), 496
Tienilic acid
uricosuric effect of, 104
Transplantation
alloantibodies and (abstr.), 448
allograft serum: and accelerated vascular disease after (abstr.), 79
allotransplantation
femoral head necrosis after (abstr.), 72
immunologic diagnosis of rejection in (abstr.), 83
alternate day steroid therapy and (abstr.), 580
amyloidosis after (abstr.), 379, 586
asymptomatic coronary artery disease in diabetic patients and (abstr.), 588
causes and cost of cadaver kidney wastage (abstr.), 585
complement and α1-antitrypsin after (abstr.), 380
complications detected with Tc-99m DTPA (abstr.), 580
delayed onset of function and hemodialysis effects on cadaver kidney transplants (abstr.), 482
dialysis-requiring rejection of (abstr.), 581
dogenous anti-'la' response and (abstr.), 587
gastrointestinal complications of (abstr.), 579
graft rejection: time-relationship, prognostic significance, and role in infection (abstr.), 88
graft survival and blood transfusion (abstr.), 80
hemodynamic characteristics: hypertensive vs. normal (abstr.), 586
in heroin-associated nephropathy (abstr.), 586
HLA identical siblings (abstr.), 579
HLA-matching on primary cadaveric transplants (abstr.), 87
HLA-typing effect on success of cadaver grafts (abstr.), 579
human kidney preservation for 10 to 44'12 hr with flushing and cold storage (abstr.), 580
hyperlipemia after (abstr.), 582
hypertension after: role of angiotensin II (abstr.), 585
hypertension and: incidence and etiology (abstr.), 589
identical twin study on recurrence of renal disease after (abstr.), 448
immunologic monitoring to prevent rejection (abstr.), 86
immunology study and long-term survival of (abstr.), 584
improved cadaveric graft survival (abstr.), 588
integration of home dialysis and (abstr.), 85
long-term results in children (abstr.), 583
methylprednisolone and cell-mediated immunity in (abstr.), 584
and methylprednisolone in renal perfusate prior to ischemia (abstr.), 584
mixed lymphocyte culture and insulin receptors (abstr.), 587
mixed lymphocyte culture responsiveness and humoral immunization in (abstr.), 587
neuromuscular changes after (abstr.), 78
outcome of second r.t. (abstr.), 582
parainfluenza viral infection and (abstr.), 582
peptic ulceration and (abstr.), 78
percutaneous renal biopsy in (abstr.), 586
preservation of cadaveric allografts (abstr.), 84
preservation of kidney: surface refrigeration and hypothermic pulsatile infusion (abstr.), 152
prior splenectomy and graft survival (abstr.), 585
Transplantation (cont'd)
d-propranolol in ischemic kidney prior to (abstr.), 535
proteinuria and renal vein thrombosis in (abstr.), 582
recipient variables on graft survival (abstr.), 87
recurrent renal lesions in children with (abstr.), 76
rejection induced by cold agglutinin: antigens in (abstr.), 585
rejection: intensive plasma exchange and complement-dependent microcytotoxicity (abstr.), 80
rejection: in vitro immune reactivity and biopsy diagnosis of (abstr.), 583
rejection: prediction of reversibility (abstr.), 583
rejection: rosette-forming changes in antithymocyte globulin treated (abstr.), 583
rejection: T lymphocyte subsets in (abstr.), 588
rejections: urinary infections and (abstr.), 581
renal cell turnover studied by Y chromosome staining (abstr.), 518
rostette lymphocyte subpopulations and (abstr.), 588
statistical report for Europe (abstr.), 79, 81, 82
stentesis after (abstr.), 589
steroids in high dose and (abstr.), 581
steroid requirements after, minimum (abstr.), 78
sulfur colloid evaluation in (abstr.), 581
surgical complications in (abstr.), 84
ureteral obstruction and urinary extravasation in (abstr.), 584
water and electrolyte excretion immediately after (abstr.), 377
zinc and copper after (abstr.), 587
Triphenylmethylphosphonium-bromide diuretic effect of (abstr.), 568
Tubale, renal
acute necrosis of
amino acid enhancement of renal regeneration after, 193
ligandinuria in, 387
morphology of (abstr.), 519
amino acids and γ-glutamyl cycle reabsorption system in (abstr.), 77
analysis of standing droplets in (abstr.), 576
anatomy of, in rat and rabbits, 313
basement membrane: isolation and characterization of, in rat, 238
cell volume of (abstr.), 565
cortical collecting t.: cation transport by: relation to urinary excretion (abstr.), 573
distal t.
calcium and sodium transport in: in vivo microperfusion study (abstr.), 456
electrical characteristics of: comparison of types of electrodes, 324
tubular-glomerular feedback responses: role of osmolality in (abstr.), 568
flow rate: reabsorption during volume expansion (abstr.), 564
freeze-fracturing of, 66
hydraulic water conductivity of junctional complexes in (abstr.), 551
injury: radioimmunoassay marker of (abstr.), 476
lesions: splenectomy for (abstr.), 529
proximal t.
bicarbonate and fluid absorption by, 1
cell shape evaluated: TEM vs. SEM (abstr.), 556
chloride reabsorption in (abstr.), 150
CO2 permeability of (abstr.), 576
Subject index: Vol. 12
Transplantation (cont’d)
Subject index: Vol. 12

Tubule (cont'd)
and determinants of cortical peritubular environment
(abstr.), 577
effect of tienilic acid on urate transport in, 104
and Fanconi’s syndrome: study of vitamin D3
synthesis, 244
necrosis of: ligandinuria in, 387
reabsorptive rates in (abstr.), 562
relative bicarbonate and chloride permeabilities in
(abstr.), 562
secretion and protein binding of organic ions (abstr.), 564
transport of inorganic phosphate: role of 1,25-dihydroxy
vitamin D3 in regulation of (abstr.), 73
tubuloglomerular feedback: in normotensive and
hypertensive rats, 253

Uranyl nitrate
effect of dithiothreitol on acute renal failure induced by,
115
to induce acute renal failure: effect of prostaglandin E
on, 122
Urate
effect of tienilic acid on, 104
Urea
measured by X-ray microanalysis, 438
measurement of by patient (abstr.), 475
transport in toad urinary bladder (abstr.), 564
Uremia
androgens in: clinical and biochemical effects (abstr.), 474
defective skeletal mineralization without relation to vit.
D, serum Ca, or phosphorus in (abstr.), 455
granulocyte adherence in hemodialysis and (abstr.), 469
hemofiltration in (abstr.), 153
hepatic glucose production in (abstr.), 541
myoinositol as neurotoxin related to, 131
nandrolone decanoate for anemia of, 430
neuromuscular changes in patients on diet therapy and
hemodialysis (abstr.), 78
tetracycline fluorescence in bone in, 366
Ureteral obstruction
acute: effects on glomerular hemodynamics, 403
unilateral: and contralateral hypertrophy: circulatory
retention of urinary factors as stimulus to growth, 305
Urine
effect of lithium chloride on dilution and concentrating
capacity of, 17
excretion: of a pluridisperse gelatin solution (abstr.),
152
reinfusion study: in renal hypertrophy, 305
retention: compensatory renal hypertrophy and, 305
Urinary tract
congenital anomalies of, related to HLA haplotyping
(abstr.), 474
Urinary tract infection
antibody-coated bacteria and site of (abstr.), 75
drugs, alcohol, smoking related to (abstr.), 446
E. coli: antibodies in (abstr.), 377
in high-risk newborn infants (abstr.), 76
Urinary tract infection (cont’d)
and vesico-ureteral reflux after kidney transplantation
(abstr.), 75
Valsalva maneuver
in patients on maintenance hemodialysis: hemodynamic
study, 294
Vascular disease
joint pain and renal microvascular disease (abstr.), 80
Vasculature, renal
and development of renal cortical necrosis, 91
response to interruption of the renin-angiotensin system
in normal man, 285
Vasoactive intestinal peptide
in isolated perfused rat kidney (abstr.), 571
Vasoconstriction, renal
in acute renal failure, effect of prostaglandin E on, 122
Vasopressin
continuous low-dose administration effects on rats with
and without diabetes insipidus (abstr.), 565
cytosolic calcium’s action on (abstr.), 575
effect of lithium on collecting duct’s response to, 17
effect on renal function and plasma renin in fetal lamb
(abstr.), 571
role in effect of adrenergic stimulation on renal water
excretion and medullary tissue cAMP in diabetes
insipidus, 96
urea and water transport and (abstr.), 540
Vitamin D
effect of 1,25-dihydroxycholecalciferol in chronic
dialysis patients (abstr.), 462
in excretion of calcium, magnesium, and inorganic
phosphate, in hamster (abstr.), 454
synthesis related to Fanconi’s syndrome, 244
and tetracycline fluorescence in uremic and primary
hyperparathyroid bone, 366
Volume depletion
and hypokalemia effects in hemodialysis, 279
Water excretion, renal
effect of alpha and beta adrenergic stimulation on, in
diabetes insipidus, 96ole of plasma arginine vasopressin in (abstr.),
566
Water flow
in rabbit proximal tubules (abstr.), 578
Water homeostasis, body
antinatriferic factor in renal sodium reabsorption and,
214
Water transport
in toad urinary bladder (abstr.), 564
X-ray microanalysis
urea measurement by, 438
Yellow fever virus
membrane transport and renal function impaired by
(abstr.), 528
