Subject Index: Volume 10

Ablation procedures
Cryosurgical modification of the atrioventricular node: a closed heart approach in the dog, 389
Effects of catheter-delivered electrical discharges near the tricuspid anulus in dogs, 693
High frequency alternating current ablation of an accessory pathway in humans, 576
Intraconary ethyl alcohol or phenol injection ablates aconitine-induced ventricular tachycardia in dogs, 1342
Intraoperative electrical ablation of ventricular arrhythmias: a “closed heart” procedure, 1048
Proarhythmic effects of ventricular electrical catheter ablation in dogs, 1350
Abscess
Left ventricular to left atrial communication secondary to a paracolic abscess: color flow Doppler documentation, 222
ACC
Report of the 1985 American College of Cardiology survey of cardiovascular medicine manpower, 1359
Report of the American College of Cardiology/American Heart Association Task Force on assessment of diagnostic and therapeutic cardiovascular procedures, 935
Accessory connections
Coexistent Mahaim and Kent accessory connections: diagnostic and therapeutic implications, 364
Accessory pathways
High frequency alternating current ablation of an accessory pathway in humans, 576
Adenosine
Autonomic control of ventricular tachycardia. III. Effects of adenosine and N-R-1-phenyl-2-propyladenosine, 390
Aging
See Elderly
Agress, Clarence
Clarence Agress pioneers experimental thrombolysis of the coronary artery in 1952, 931
Amiodarone
Risk factors for development of amiodarone-induced thyroid dysfunction (letter), 717
Sensitivity and specificity of invasive and noninvasive testing for risk of sudden death in Wolff-Parkinson-White syndrome, 373
Usefulness of electrophysiologic study to determine the clinical tolerance of arrhythmia recurrences during amiodarone therapy, 90
Anaphylotoxin
Activation of the complement system by recombinant tissue plasminogen activator, 627
Angina pectoris
Biochemical evidence of platelet activation in patients with persistent unstable angina, 998
Dynamic coronary stenosis behavior in classic angina pectoris: active process or passive response? (editorial comment), 311
Dynamic limitation of coronary vasodilator reserve in patients with dilated cardiomyopathy and chest pain, 1190
Effect of a new second generation calcium channel blocker nilvadipine (FR 34235) on exercise-induced hemodynamic changes in stable angina pectoris, 830
Prognostic significance of silent myocardial ischemia in patients with unstable angina, 1
Silent ischemia during coronary occlusion produced by balloon inflation: relation to regional myocardial dysfunction, 491
Silent ischemia predicts infarction and death during 2 year follow-up of unstable angina, 756
Thrombolytic therapy for unstable angina pectoris: rationale and results, 91B
Transdermal nitroglycerin in angina pectoris: efficacy of intermittent application, 642
Angiography
See also Radionuclide studies
Bundle branch block in patients with chronic coronary artery disease: angiographic correlates and prognostic significance, 73
Cardiac dynamics during supine exercise in cyclosporine-treated orthotopic heart transplant recipients: assessment by radionuclide angiography, 336
Coronary artery disease and its management: influence on survival in patients undergoing aortic valve replacement, 66
Effect of calcium-binding additives on ventricular fibrillation and repolarization changes during coronary angiography, 1248
Guidelines for coronary angiography, 935
Quantitation of aortic regurgitation by computer analysis of digital subtraction angiography, 1122
Angioplasty
See also Restenosis; Revascularization
Abolition of Holter monitor-detected silent myocardial ischemia after percutaneous transluminal coronary angioplasty, 499
Arterial changes after percutaneous transluminal coronary angioplasty: results at autopsy, 592
Can the immediate efficacy of coronary angioplasty be adequately assessed? (editorial comment), 251
Complications associated with the guide wire in percutaneous transluminal coronary angioplasty, 218
Coronary angioplasty after recombinant tissue-type plasminogen activator in acute myocardial infarction: a report from the Thrombolysis in Myocardial Infarction (TIMI) trial, 45B
Double balloon technique for dilatation of valvular or vessel stenosis in congenital and acquired heart disease, 107
Efficacy and safety of optically modified fiber tips for laser angioplasty, 655
Emergency percutaneous transluminal coronary angioplasty in acute myocardial infarction: a 3 year experience, 264
Emergency percutaneous transluminal coronary angioplasty in patients with early acute myocardial infarction (editorial comment), 273
Multileison coronary angioplasty: clinical and angiographic follow-up, 246
Multiple lesion transluminal coronary angioplasty in single and multivessel coronary artery disease: acute outcome and long-term effect, 1007
Percutaneous balloon angioplasty for native coarctation of the aorta, 1078
Prognostic value of computer-quantitated exercise thallium imaging early after percutaneous transluminal coronary angioplasty, 275
Relation of coronary artery stenosis and pressure gradient to exercise-induced ischemia before and after coronary angioplasty, 253
Silent ischemia during coronary occlusion produced by balloon inflation: relation to regional myocardial dysfunction, 491
Thrombolysis and Angioplasty in Myocardial Infarction trial (TAMI), 65B
Thrombolysis in Myocardial Infarction (TIMI) phase II pilot study: tissue plasminogen activator followed by percutaneous transluminal coronary angioplasty, 51B
Antiarhythmie therapy
See also specific agent
Reduction in sudden death and total mortality by antiarrhythmic therapy evaluated by electrophysiologic drug testing: criteria of efficacy in patients with sustained ventricular tachyarrhythmia, 83
Aortic arch obstruction
Accuracy of two-dimensional echocardiography in the diagnosis of aortic arch obstruction, 1072
Aortic valve disease
See also Valve prosthesis
Echocardiographic assessment of aortic valve area in elderly patients with aortic stenosis and of changes in valve area after percutaneous balloon valvuloplasty, 115
Quantitation of aortic regurgitation by
computer analysis of digital subtraction angiography, 1122
Quantitative assessment of the hemodynamic consequences of aortic regurgitation by means of continuous Doppler recordings, 135
Surgical outcome in chronic aortic regurgitation: a physiologic framework for assessing preoperative predictors (editorial review), 1165

Arrhythmias
See also Antiarrhythmic therapy; specific type of arrhythmia
Arrhythmias, 66A
Arrhythmias before and after anatomic correction of transposition of the great arteries, 200
Cardiovascular abnormalities accompanying acute spinal cord injury in humans: incidence, time course and severity, 46

Arrhythmias, ventricular
See also Ventricular fibrillation; Ventricular tachyarrhythmias; Ventricular tachycardia
Are ambient and induced ventricular arrhythmias related phenomena? (editorial comment), 105
Electrophysiologic testing and follow-up of patients with aborted sudden death, 291
Frequency and significance of ventricular arrhythmia in patients with reduced ejection fraction (≤30%) (letter), 717
Intraoperative electrical ablation of ventricular arrhythmias: a “closed heart” procedure, 1048
Prognosis of ventricular arrhythmias in relation to sudden cardiac death: therapeutic implications (review), 435
Prognostic significance of ventricular ectopic activity in survivors of acute myocardial infarction, 231
Ventricular premature complexes as villains: still an important part of the problems (editorial comment), 243

Athletes
Results of screening a large group of intercollegiate athletes for cardiovascular disease, 1214

Atria
Pulmonary atresia with intact ventricular septum (letter), 477
Surgical management of subaortic obstruction in single left ventricle and tricuspid atresia, 421
Type IA tricuspid atresia with extensive coronary artery abnormalities in a living 22 year old woman, 1100

Atrial fibrillation
Comparison of the ventricular response during atrial fibrillation in patients with enhanced atrioventricular node conduction and Wolff-Parkinson-White syndrome, 1244
Effect of beta-adrenergic blockade on exercise performance in patients with chronic atrial fibrillation, 314

Atrial natriuretic factor
Hemodynamic and hormonal effects of atrial natriuretic factor in patients with essential hypertension, 787

Atrial tachyarrhythmias
Randomized placebo-controlled trial of propafenone for treatment of atrial tachyarrhythmias after cardiac surgery, 1145

Atrioventricular alignments
When concordant or discordant atrioventricular alignments predict the ventricular situs wrongly. I. Solitus atria, concordant alignments, and L-loop ventricles. II. Solitus atria, discordant alignments and D-loop ventricles (editorial comment), 1278

Atrioventricular connections
Disharmony between atrioventricular connections and segmental combinations, unusual variants of “crossover” heart, 1274

Atrioventricular nodal refractory period
Cryosurgical modification of the atrioventricular node: a closed heart approach in the dog, 389

Aviation
Fighter pilots are world class athletes (letter), 718

Beta-adrenergic blocking agents
See Captopril; Propranolol; specific agent

Bethesda Conference
Cardiac disease in the elderly, 1A

Blood flow
See Coronary circulation; Circulation

Blood pressure
Diastolic blood pressure as a determinant of exercise performance on increased peak skeletal muscle perfusion during long-term captopril therapy in heart failure, 845

Calcium
Starling’s law of the heart is explained by an intimate interaction of muscle length and myofilament calcium activation, 1157

Calcium-binding additives
Effect of calcium-binding additives on ventricular fibrillation and repolarization changes during coronary angiography, 1249

Calcium channel blockers
See specific agent

Captopril
Dependence of enhanced maximal exercise performance on increased peak skeletal muscle perfusion during long-term captopril therapy in heart failure, 845
Identification of hypotension as a risk factor for the development of functional renal insufficiency during converting enzyme inhibition in severe chronic heart failure, 837

Cardiac conduction
Comparison of the ventricular response during atrial fibrillation in patients with enhanced atrioventricular node conduction and Wolff-Parkinson-White syndrome, 1244
Paroxysmal nonreentrant supraventricular tachycardia due to simultaneous fast and slow pathway conduction in dual atrioventricular node pathways, 456
Coexistent Mahaim and Kent accessory connections: diagnostic and therapeutic implications, 364
High frequency alternating current ablation of an accessory pathway in humans, 576

Cardiac excitation
Cardiac cartography: elucidating the pathway of cardiac excitation (editorial comment), 1057

Cardiac muscle
Starling’s law of the heart is explained by an intimate interaction of muscle length and myofilament calcium activation, 1157

Cardiac output
Influence of sampling site and flow area on cardiac output measurements by Doppler echocardiography, 818
Measurement of cardiac output and exercise factor by pulsed Doppler echocardiography during supine bicycle ergometry in normal young adolescents, 430

Cardiac tamponade
Regional cardiac tamponade: a hemodynamic study, 164

Cardiac transplantation
Cardiac dynamics during supine exercise in cyclosporine-treated orthotopic heart transplant recipients: assessment by radionuclide angiography, 336

Cardiomyopathy
See also Hypertrophy
Cardiac and skeletal muscle abnormalities in cardiomyopathy: comparison of patients with ventricular tachycardia or congestive heart failure, 608
Cardiomyopathies in the elderly, 77A
Differences in coronary flow and myocardial metabolism at rest and during pacing between patients with obstructive and patients with nonobstructive hypertrophic cardiomyopathy, 53
Dynamic limitation of coronary vasodilator reserve in patients with dilated cardiomyopathy and chest pain, 1190
Effects of verapamil on experimental cardiomyopathy in the Bio 14.6 Syrian hamster, 1128
Functional and histopathologic correlation in patients with dilated cardiomyopathy: an integrated evaluation by multivariate analysis, 186
Inducible polymorphic ventricular
tachycardia and ventricular fibrillation in a subgroup of patients with hypertrophic cardiomyopathy at risk for sudden death, 761
Intraoperative Doppler echocardiography in hypertrophic cardiomyopathy: correlations with obstructive gradient, 327
Noninvasive assessment of left ventricular diastolic function by pulsed Doppler echocardiography in patients with hypertrophic cardiomyopathy, 733
Toward an understanding of the molecular basis of cardiomyopathies (editorial comment), 1135

Cardiovascular disease
See also under Elderly
Behavioral, cognitive and emotional considerations, 38A
Bethesda Conference, Cardiovascular disease in the elderly, 1A
Clinical assessment, 48A
Human aging: changes in structure and function, 42A
Hypertensive cardiovascular disease, 57A
Results of screening a large group of intercollegiate competitive athletes for cardiovascular disease, 1214

Cardioverter-defibrillator
Nonhoracotomy internal defibrillation in dogs: threshold reduction using a subcutaneous chest wall electrode with a transvenous catheter electrode, 406
Pathologic findings related to the lead system and repeated defibrillations in patients with the automatic implantable cardioverter-defibrillator, 382

Cartography
See Mapping studies

Catecholamines
Sustained hemodynamic improvement during long-term therapy with levodopa in heart failure: role of plasma catecholamines, 1286

Catheters
See under Ablation procedures

Celiprolol
Effect of beta-adrenergic blockade on exercise performance in patients with chronic atrial fibrillation, 314

Cholesterol
Effect of 7 years of intense exercise training in patients with coronary artery disease, 321

Circulation
See also Coronary circulation
Quantitative two-dimensional echocardiography in massive pulmonary embolism: emphasis on ventricular interdependence and leftward septal displacement, 1201

Coagulation system
Effect of pacing-induced myocardial ischemia on platelet activation and fibrin formation in coronary circulation, 40

Coartation of the aorta
Percutaneous balloon angioplasty for native coarctation of the aorta, 1078

Collagen
Functional and histopathologic correlation in patients with dilated cardiomyopathy: an integrated evaluation by multivariate analysis, 186

Profound structural alterations of the extracellular collagen matrix in postischemic dysfunctional (“stunned”) but viable myocardium, 1322

Complement system
Activation of the complement system by recombinant tissue plasminogen activator, 627

Computers
Computer-aided electrocardiography (seminar), 448
Computer-assisted versus unassisted analysis of the exercise electrocardiogram in patients without myocardial infarction, 794
Quantitation of aortic regurgitation by computer analysis of digital subtraction angiography, 1122
Reference data base for multilead electrocardiographic computer measurement programs, 1313

Conduction
See Cardiac conduction

Congenital heart defects
See also Pediatric cardiology
Disharmony between atrioventricular connections and segmental combinations; unusual variants of “crossovers” hearts, 1274
When concordant or discordant atrioventricular alignments predict the ventricular situs wrongly, I. Solitus atria, concordant alignments and L-loop ventricles. II. Solitus atria, discordant alignments and D-loop ventricles (editorial comment), 1278

Congenital heart disease
Mexiletine: an effective antiarrhythmic drug for treatment of ventricular arrhythmias in congenital heart disease, 824
Valvular and congenital heart disease, 60A

Congestive heart failure
Cardiac and skeletal muscle abnormalities in cardiomyopathy: comparison of patients with ventricular tachycardia or congestive heart failure, 608
Effect of a single oral dose of milrinone on left ventricular diastolic performance in the failing human heart, 1294
Heart failure, 73A
Identification of hyponatremia as a risk factor for the development of functional renal insufficiency during converting enzyme inhibition in severe chronic heart failure, 837
Sustained hemodynamic improvement during long-term therapy with levodopa in heart failure: role of plasma catecholamines, 1286

Converting enzyme inhibition
Identification of hyponatremia as a risk factor for the development of functional renal insufficiency during converting enzyme inhibition in severe chronic heart failure, 837

Coronary artery disease
Anatomy versus physiology in the prognosis of coronary artery disease (letter), 1365
Bundle branch block in patients with chronic coronary artery disease: angiographic correlates and prognostic significance, 7
Computer-assisted versus unassisted analysis of the exercise electrocardiogram in patients without myocardial infarction, 794
Coronary artery disease and its management: influence on survival in patients undergoing aortic valve replacement, 66
Coronary heart disease, 52A
Effect of prior myocardial infarction and extent of coronary disease on accuracy of exercise echocardiography, 531
Effect of 7 years of intense exercise training on patients with coronary artery disease, 321
Exercise response of the systolic pressure to end-systolic volume ratio in patients with coronary artery disease, 33
Is there coronary vasoconstriction after intracoronary beta-adrenergic blockade in patients with coronary artery disease?, 299
Quantitative analysis for dipyridamole-thallium images for the detection of coronary artery disease, 142
Relation of coronary artery stenosis and pressure gradient to exercise-induced ischemia before and after coronary angioplasty, 253
Right ventricular infarction: frequency, size and tomography in coronary heart disease: a prospective study comprising 107 consecutive autopsies from a coronary care unit, 1223
Type 1A tricuspid atresia with extensive coronary artery abnormalities in a living 22 year old woman, 1100

Coronary artery stenosis
See Coronary artery disease; Restenosis

Coronary circulation
Differences in coronary flow and myocardial metabolism at rest and during pacing between patients with obstructive and patients with nonobstructive hypertrophic cardiomyopathy, 53
Intraventricular flow during isovolumic relaxation: description and characterization by Doppler echocardiography, 539
More problems for the coronary circulation in hypertrophy? (editorial comment), 63
Noninvasive measurement of coronary artery flow using combined two-dimensional and Doppler echocardiography, 1024
Quantitative measurement of coronary flow during medical revascularization (thrombolysis or angioplasty) in patients with acute infarction, 284

Coronary heart disease
See Coronary artery disease

Coronary occlusion
Altered response of perfused myocardium to repeated coronary occlusion in dogs, 898
Diltiazem and progression of myocardial ischemia damage during coronary artery...
occlusion and reperfusion in porcine hearts, 906

**Coronary reperfusion**
Altered response of reperfused myocardium to repeated coronary occlusion in dogs, 898

Anisoylated plasminogen streptokinase activator complex in acute myocardial infarction: a placebo-controlled arteriographic coronary recanalization study, 205

Cost-effectiveness model for coronary thrombolysis/reperfusion therapy, 79B

Diltiazem and progression of myocardial ischemia damage during coronary artery occlusion and reperfusion in porcine hearts, 906

Regional myocardial blood flow, function and metabolism using phosphorus-31 nuclear magnetic resonance spectroscopy during ischemia and reperfusion in dogs, 673

**Coronary wedge pressure**
Coronary wedge pressure: a predictor of restenosis after coronary balloon angioplasty, 504

**Cost-effectiveness**
Cost-effectiveness analysis of patient management alternatives after uncomplicated myocardial infarction: a model, 869

Cost-effectiveness model for coronary thrombolysis/reperfusion therapy, 79B

What we can’t explain can hurt us and our patients (editorial comment), 879

**Creatine kinase**
Prognostic implications of an early peak in plasma MB creatine kinase in patients with acute myocardial infarction, 979

**Creatinine clearance**
Identification of hypotension as a risk factor for the development of functional renal insufficiency during converting enzyme inhibition in severe chronic heart failure, 837

**"Crisscross" hearts**
Disharmony between atrioventricular connections and segmental combinations; unusual variants of "crisscross" hearts, 1274

When concordant or discordant atrioventricular alignments predict the ventricular situs wrongly. I. Solitus atria, discordant alignments, and L-loop ventricles. II. Solitus atria, discordant alignments and D-loop ventricles (editorial comment), 1278

**Cryoinjury**
Cryosurgical modification of the atrioventricular node: a closed heart approach in the dog, 389

**Cyclosporine**
Cardiac dynamics during supine exercise in cyclosporine-treated orthotopic heart transplant recipients: assessment by radionuclide angiography, 336

**Death**
See Sudden death

**Decision analysis**
See Cost-effectiveness

**Defibrillators**
See also Cardioverter-defibrillator

Automatic external defibrillators: importance of field testing to evaluate performance, 1259

**Diastolic function**
Effect of a single oral dose of milrinone on left ventricular diastolic performance in the failing human heart, 1294

Evaluation of left ventricular systolic and diastolic dysfunction during transient myocardial ischemia produced by angioiplasty, 748

Noninvasive assessment of left ventricular diastolic function by pulsed Doppler echocardiography in patients with hypertrophic cardiomyopathy, 733

Preload dependence of Doppler-derived indexes of left ventricular diastolic function in humans, 800

**Digitalis**
Effect of beta-adrenergic blockade on exercise performance in patients with chronic atrial fibrillation, 314

**Dilatation**
See Angioplasty

**Diltiazem**
Diltiazem and progression of myocardial ischemia damage during coronary artery occlusion and reperfusion in porcine hearts, 906

**Dipole analysis**
Application of dipole analysis for the diagnosis of myocardial infarction in the presence of left bundle branch block, 1015

Has clinical application of dipole analysis reached a turning point? (editorial comment), 1022

**Dipyridamole**
Myocardial uptake and clearance of thallium-201 in normal subjects: comparison of dipyridamole-induced hyperemia with exercise stress, 547

Quantitative analysis of dipyridamole-thallium images for the detection of coronary artery disease, 124

**Disopyramide**
Disopyramide-pyridostigmine interaction: selective reversal of anticholinergic symptoms with preservation of antiarrhythmic effect, 633

Sensitivity and specificity of invasive and noninvasive testing for risk of sudden death in Wolff-Parkinson-White syndrome. 373

**Doppler ultrasonound**
Doppler and echocardiographic features of normal and dysfunctioning bioprosthetic valves, 851

Doppler echocardiographic appearance of cusps tears in tissue valve prosthesis, 462

Influence of sampling site and flow area on cardiac output measurements by Doppler echocardiography, 818

Intraoperative Doppler echocardiography in hypertrophic cardiomyopathy: correlations with obstructive gradient, 327

Intraventricular flow during isovolumic relaxation: description and characterization by Doppler echocardiography, 539

Left ventricular to left atrial communication secondary to a paraaortic abscess: color flow Doppler documentation, 222

Measurement of cardiac output and exercise factor by pulsed Doppler echocardiography during supine bicycle ergometry in normal young adolescent boys, 430

Noninvasive assessment of left ventricular diastolic function by pulsed Doppler echocardiography in patients with hypertrophic cardiomyopathy, 733

Noninvasive measurement of coronary artery flow using combined two-dimensional and Doppler echocardiography, 1024

Preload dependence of Doppler-derived indexes of left ventricular diastolic function in humans, 800

Quantitative assessment of the hemodynamic consequences of aortic regurgitation by means of continuous wave Doppler recordings, 135

Superior vena cava and hepatic vein Doppler echocardiography in healthy adults, 1032

Valve incompetent foramen ovale in premature infants with ducus arteriosus; a Doppler echocardiographic study, 193

**Drug therapy**
See also specific drug

Medical therapy in the elderly, 29A

**Ductus arteriosus**
Valve-incompetent foramen ovale in premature infants with ducus arteriosus; a Doppler echocardiographic study, 193

**Echocardiography**
See also Doppler ultrasonound

Accuracy of two-dimensional echocardiography in the diagnosis of aortic arch obstruction, 1072

Contrast echo washout curves from the left ventricle: application of basic principles of indicator-dilution theory and calculation of ejection fraction, 125

Doppler and echocardiographic features of normal and dysfunctional bioprosthetic valves, 851

Echocardiographic assessment of aortic valve area in elderly patients with aortic stenosis and of changes in valve area after percutaneous balloon valvuloplasty, 115

End-systolic radius to thickness ratio: an echocardiographic index of regional performance during reversible myocardial ischemia in the conscious dog, 1113

Quantitative two-dimensional echocardiography in massive pulmonary embolism: emphasis on ventricular interdependence and leftright septal displacement, 1201

Two-dimensional echocardiographic
Identification of complicated aortic root endocarditis: implications for surgery, 859

Noninvasive quantification of left ventricular myocardial mass by gated proton nuclear magnetic resonance imaging, 682
Ventricular septal defect
Current results of management in transposition of the great arteries, with special emphasis on patients with associated ventricular septal defect, 1061
Ventricular situs
When discordant or discordant atrioventricular alignments predict the ventricular situs wrongly. I. Solitus atria, discordant alignments, and L-loop ventricles. II. Solitus atria, discordant alignments and D-loop ventricles (editorial comment), 1278
Ventricular tachyarrhythmias
Reduction in sudden death and total mortality by antiarrhythmic therapy evaluated by electrophysiologic drug testing: criteria of efficacy in patients with sustained ventricular tachyarrhythmia, 83
Usefulness of electrophysiologic study to determine the clinical tolerance of arrhythmia recurrences during amiodarone therapy, 90
Ventricular tachycardia
Activation sequence of ventricular tachycardia: endotracheal and epicardial mapping studies in human ventricle, 1040
Autonomic control of ventricular tachycardia. III. Effect of adenosine and N6-R-1-phenyl-2-propyladenosine, 399
Cardiac and skeletal muscle abnormalities in cardiomyopathy: comparison of patients with ventricular tachycardia or heart failure, 608
Incessant ventricular tachycardia in infants: myocardial hamartomas and surgical care, 619
Incidence and determinants of multiple morphologically distinct sustained ventricular tachycardias, 583
Intracoronary ethyl alcohol or phenol injection ablates anticonvulsive-induced ventricular tachycardia in dogs, 1342
New noninvasive index to predict sustained ventricular tachycardia and sudden death in the first year after myocardial infarction: based on signal-averaged electrocardiogram, radionuclide ejection fraction and Holter monitoring, 349
Proarrhythmic effects of ventricular electrical catheter ablation in dogs, 1350
Signal averaging of the surface QRS complex predicts inducibility of ventricular tachycardia in patients with syncope of unknown origin, 775
Sponaneous arrhythmias detected on ambulatory electrocardiographic recording lacks precision in predicting inducibility of ventricular tachycardia during electrophysiologic study, 97
Ventricular volume
Measurement of ventricular volumes in the dog by nuclear magnetic resonance imaging, 170
Ventricular wall motion
Prospective analysis of electrocardiographic variables as markers for extent and location of acute wall motion abnormalities observed during coronary angioplasty in human subjects, 17
Regional dysfunction by equilibrium radionuclide angiography: a clinicopathologic study evaluating the relation of degree of dysfunction to the presence and extent of myocardial infarction, 743
Ventriculography, radionuclide
Relative prognostic value of rest thallium-201 imaging, radionuclide ventriculography and 24 hour ambulatory electrocardiographic monitoring after acute myocardial infarction, 25
Verapamil
Effect of verapamil on experimental cardiomyopathy in the Bio 14.6 Syrian hamster, 1128
Videodensitometry
Comparison of single plane videodensitometry-based right ventricular ejection fraction in right and left anterior oblique views to biplane geometry-based right ventricular ejection fraction, 150

Wedge pressure
See Coronary wedge pressure
Wolff-Parkinson-White syndrome
Coexistent Mahaim and Kent accessory connections: diagnostic and therapeutic implications, 364
Comparison of the ventricular response during atrial fibrillation in patients with enhanced atrioventricular node conduction and Wolff-Parkinson-White syndrome, 1244
Sensitivity and specificity of invasive and noninvasive testing for risk of sudden death in Wolff-Parkinson White syndrome, 373
