Angiotensin-converting enzyme inhibition for congestive heart failure: achievements and potentials (editorial comment), 143
Antiarrhythmic drug therapy
See also specific agent
Treatment of life-threatening ventricular arrhythmias with nonguided surgery supported by electrophysiologic testing and drug therapy, 155
Anticoagulant therapy
See also specific agent
Left ventricular thrombus incidence and behavior studied by serial two-dimensional echocardiography in acute anterior myocardial infarction: left ventricular wall motion, systemic embolization and oral anticoagulation, 1514
Pulsed Doppler evaluation of atrial mechanical function after electrical cardioversion of atrial fibrillation, 817
Antimyosin antibodies
Antimyosin imaging in acute transmural myocardial infarctions: results of a multicenter clinical trial, 27
High prevalence of myocardial mononuclear antimyosin antibody uptake in patients with chronic idiopathic dilated cardiomyopathy, 1209
Antithrombotic agents
See also specific agent
St. Jude valve prosthesis: analysis of the clinical results in 815 implants and the need for systemic anticoagulation, 57
Aortic arch diameter
Pulsatile diameter and elastic modulus of the aortic arch in essential hypertension: a noninvasive study, 399
Aortic valve disease
Aortic regurgitation: a common complication after surgery for hypertrophic obstructive cardiomyopathy, 63
Aortic stenosis: most cases no longer require invasive hemodynamic study (editorial comment), 55
Balloon valvuloplasty for recurrent aortic stenosis after surgical valvotomy in childhood: immediate and follow-up studies, 1106
Clinical outcome following balloon valvuloplasty for severe aortic valve disease (correction), 1218
Hemodynamic effects of nitroglycerin in an experimental model of acute aortic regurgitation, 92
Hemodynamic progression of aortic stenosis in adults assessed by Doppler echocardiography, 545
Is mitral regurgitation a useful marker of left ventricular deterioration in aortic stenosis? (editorial comment), 802
Mild mitral insufficiency is a marker of left ventricular performance in aortic stenosis, 796
Percutaneous aortic balloon valvuloplasty: its role in the management of patients with aortic stenosis requiring major noncardiac surgery, 1039
Percutaneous balloon valvuloplasty in neonates with critical aortic stenosis, 1101
Spectrum of findings in a family with nonsyndromic autosomal dominant supravalvular aortic stenosis: a Doppler echocardiographic study, 413
APSAC
Multicenter trial of intravenous anisoylated plasminogen streptokinase activator complex (APSAC) in acute myocardial infarction: effects on infarct size and left ventricular function, 908
Apoptosis
Hypercholesterolemia causes generalized impairment of endothelium-dependent relaxation to aggregating platelets in porcine arteries, 1402
Arrhythmias, ventricular
Clinical experience with sotalol in patients with drug-refractory ventricular arrhythmias, 145
Combination of disopyramide and mexiletine for better tolerance and additive effects for treatment of ventricular arrhythmias, 659
Extracellular potassium ion dynamics and ventricular arrhythmias in the canine heart, 941
Treatment of life-threatening ventricular arrhythmias with nonguided surgery supported by electrophysiologic testing and drug therapy, 153
Ventricular fibrillation in six adults without overt heart disease, 911
Arterial patency
Thrombolysis and Angioplasty in Myocardial Infarction (TAMI-1) trial: influence of infarct location on arterial patency, left ventricular function and mortality, 12
Arteriography
Coronary arteriographic analysis and angiographic morphology (editorial comment), 492
Effect of cutaneous nitroglycerin patches on coronary artery diameter: issues concerning development of tolerance, 428
Aspirin
Determinants of restenosis and lack of effect of dietary supplementation with eicosapentaenoic acid on the incidence of coronary artery restenosis after angioplasty, 665
Atherosclerosis
Anomalous coronary arteries: location, degree of atherosclerosis and effect on survival—a report from the Coronary Artery Surgery Study, 531
"Crackers, breakers, stretchers, drillers, scrapers, shavers, burners, welders and melters"—the future treatment of atherosclerotic coronary artery disease? A clinical-morphologic assessment, 969
Thermal compression and moulding of atherosclerotic vascular tissue with use of radiofrequency energy: implications for radiofrequency balloon angioplasty, 1167
Atrial fibrillation
Acute effect of disopyramide on atrial fibrillation in the Wolff-Parkinson-White syndrome, 1133
Atrial function
Pulsed Doppler evaluation of atrial mechanical function after electrical cardioversion of atrial fibrillation, 817
Atrial natriuretic factor
Altersations in serum sodium in relation to atrial natriuretic factor and other neuroendocrine variables in experimental pacing-induced heart failure, 173
Atrial natriuretic peptide levels during and after acute cardiac tamponade, 936
Prognostic importance of atrial natriuretic peptide in patients with chronic heart failure, 1534
Atrial pressure
Assessment of right atrial pressure-volume relationships in patients with and without an atrial septal defect, 630
Determinants of exercise capacity in hypertrophic cardiomyopathy, 1521
Lessons of history as reflected in the pulmonary capillary wedge pressure (editorial comment), 830
Backscatter
Ultrasound integrated backscatter tissue characterization of remote myocardial infarction in human subjects, 84
Bernoulli equation
Lessons from in vitro models of small, irregular, multiple and tunnel-like stenosis relevant to clinical stenosis of valves and small vessels, 716
Black, James (Sir): Nobel Laureate, 769
Books received, 220, 1006, 1546
Bundle branch block
Shortening of ventriculoatrial intervals with left bundle branch block during orthodontic reciprocating tachycardia in three patients with right-sided accessory atrioventricular pathway, 215
Calcium
Treatment of reperfusion injury with intracoronary calcium channel antagonists and reduced coronary tree calcium concentration in regionally ischemic, reperfused porcine hearts, 1395
Captopril
Angiotensin-converting enzyme inhibitors: are there significant clinical differences? (editorial comment), 1248
Comparative hemodynamic and neurohormonal effects of intravenous captopril and doxazosin and their combinations in patients with severe heart failure, 134
Short- and long-acting angiotensin-converting enzyme inhibitors: a randomized trial of bisoprolol versus captopril in the treatment of congestive heart failure, 1240
Carbon dioxide
Changes in expired end-tidal carbon dioxide during cardiopulmonary resuscitation with and without defibrillation efforts, 1184
Carbon-11 patimantide
Regional myocardial blood flow and metabolism at rest in mildly symptomatic patients with hypertrophic cardiomyopathy, 317
Cardiomyopathy
Cardiac tamponade
Cardiac output
Cardiac arrest
See also Sudden death
Long-term outcome of patients with hypertrophic cardiomyopathy successfully resuscitated after cardiac arrest, 1283
Cardiac catheterization
Quantitative exercise thallium-201 variables versus cardiac catheterization (letter), 263
Cardiac glycosides
Changing strategies in the management of heart failure (seminar), 513
Cardiac output
Accuracy of cardiac output measured by continuous wave Doppler echocardiography during dynamic exercise testing in the supine position in patients with coronary artery disease, 76
Another measurement of cardiac output: is it truly needed? (editorial comment), 1393
Determination of cardiac output in critically ill patients by dual beam Doppler echocardiography, 340
Instantaneous and continuous cardiac output obtained with a Doppler pulmonary artery catheter, 1382
Cardiac tamponade
Atrial natriuretic peptide levels during and after acute cardiac tamponade, 936
Cardiomyopathy
See also Hypertrophy
Acquired disease component in hypertrophic cardiomyopathy: new clinical clarifications (editorial comment), 46
Aortic regurgitation: a common complication after surgery for hypertrophic obstructive cardiomyopathy, 63
Beneficial effects of long-term diltiazem treatment in dilated cardiomyopathy, 653
Cardiac manifestations of human immunodeficiency virus infection: a two dimensional echocardiographic study, 1030
Causal relation between the pressure gradient and left ventricular ejection time in hypertrophic cardiomyopathy, 1275
Challenge of cardiomyopathy (seminar), 1219
Chordal geometry determines the shape and extent of systolic anterior mitral motion: in vitro studies (seminar), 1438
Determinants of exercise capacity in hypertrophic cardiomyopathy: new clinical clarifications (editorial comment), 46
Elderly patients with hypertrophic cardiomyopathy: a subset with distinctive left ventricular morphology and progressive clinical course late in life, 36
Feasibility of identifying amyloid and hypertrophic cardiomyopathy with the use of computerized quantitative texture analysis of clinical echocardiographic data, 832
Hypercholesterolemia causes generalized impairment of endothelium-dependent relaxation to aggregating platelets in porcine arteries, 1402
Pathophysiology and current therapy of congestive heart failure (seminar), 771
Pregnancy in patients with chronic heart failure, 1534
Short- and long-acting angiotensin-converting enzyme inhibitors: a randomized trial of lisinopril versus captopril in the treatment of congestive heart failure, 1240
Myocardial metabolism by positron emission tomography in hypertrophic cardiomyopathy (editorial comment), 325
Myocardial stunning in hypertrophic cardiomyopathy: recovery predicted by single photon emission computed tomographic thallium-201 scintigraphy, 1415
Regional myocardial blood flow and metabolism at rest in mildly symptomatic patients with hypertrophic cardiomyopathy, 317
Results of operation for coexistent obstructive hypertrophic cardiomyopathy and coronary artery disease, 1527
Cardiopulmonary resuscitation
Changes in expired end-tidal carbon dioxide during cardiopulmonary resuscitation in dogs: a prognostic guide for resuscitation efforts, 1184
Cardiovascular disease
Molecular cardiology: new avenues for the diagnosis and treatment of cardiovascular disease (seminar), 265
Cardioverter-defibrillator
Combined automatic implantable cardioverter-defibrillator and pacemaker systems (editorial comment), 132
Combined automatic implantable cardioverter-defibrillator and pacemaker systems: implantation techniques and follow-up, 121
Long-term outcome with the automatic implantable cardioverter-defibrillator, 1353
Prophylactic automatic implantable cardioverter-defibrillator patches in patients at high risk for postoperative ventricular tachycardia, 1367
Catheters
Instantaneous and continuous cardiac output obtained with a Doppler pulmonary artery catheter, 1382
Ventricular entrapment of a Swan-Ganz catheter: a technique for nonsurgical removal, 1422
Cholesterol
Diet and cholesterol guidelines and coronary heart disease (editorial), 503
Hypercholesterolemia causes generalized impairment of endothelium-dependent relaxation to aggregating platelets in porcine arteries, 1402
Why some physicians have concerns about the cholesterol awareness program (editorial), 491
Chordal geometry
Chordal geometry determines the shape and extent of systolic anterior mitral motion: in vitro studies (seminar), 1438
Clinical trials
Need for clarification of percent risk reduction data in clinical cardiovascular trial reports (editorial), 764
Coarctation of the aorta
Angiographic follow-up after balloon angioplasty for coarctation of the aorta, 689
Causes of recoarctation after balloon angioplasty of unoperated aortic coarctation, 109
Coarctation and balloons: inflated or realistic? (editorial comment), 696
Collagen
Cardiac interstitium in health and disease: the fibrillar collagen network, 1637
Collateral filling
Determinants of collateral filling obscure vessel during sudden controlled coronary artery occlusion in human subjects, 297
Collateral vessels
Coil embolization to occlude aortopulmonary collateral vessels and shunts in patients with congenital heart disease, 100
Congenital heart defects
See also Specific defects
Coil embolization to occlude aortopulmonary collateral vessels and shunts in patients with congenital heart disease, 100
Contrast echocardiography in the Doppler color flow imaging era (editorial comment), 687
Comparative hemodynamic and neurohormonal effects of intravenous captopril and digoxin and their combinations in patients with severe heart failure, 134
Comparative hemodynamic and neurohormonal effects of intravenous captopril and digoxin and their combinations in patients with severe heart failure, 134
Increased exercise capacity after digoxin administration in patients with heart failure, 1138
Angiotensin-converting enzyme inhibition for congestive heart failure: achievements and potential (editorial comment), 143
Changing strategies in the management of heart failure (seminar), 513
Comparative hemodynamic and neurohormonal effects of intravenous captopril and digoxin and their combinations in patients with severe heart failure, 134
Increased exercise capacity after digoxin administration in patients with heart failure, 1138
Pathophysiology and current therapy of congestive heart failure (seminar), 771
Pregnancy in patients with chronic heart failure, 1534
Short- and long-acting angiotensin-converting enzyme inhibitors: a randomized trial of lisinopril versus captopril in the treatment of congestive heart failure, 1240
Compliance with international guidelines in patients with congenital heart disease, 100
Diastolic function

Altersations in diastolic function in response to progressive left ventricular hypertrophy, 461

Diastolic dysfunction in amyloid heart disease: restrictive cardiomyopathy or not? (editorial comment), 54

Differentiation of restrictive cardiomyopathy from pericardial constriction: assessment of diastolic function by radionuclide angiography, 1007

Doppler characterization of left ventricular diastolic function in cardiac amyloidosis, 1017

Doppler echocardiographic evaluation of right and left ventricular diastolic function in normal neonates, 700

Echocardiographic evaluation of left ventricular diastolic function (editorial comment), 1027

Ischemia-induced diastolic dysfunction: new observations, new questions (editorial comment), 1071

Left ventricular diastolic dysfunction: early diastolic relaxation and late diastolic compliance (editorial comment), 337

Left ventricular diastolic function: comparison of pulsed Doppler echocardiographic and hemodynamic indexes in subjects with and without coronary artery disease, 327

Noninvasive evaluation of diastolic function: need for hemodynamically and clinically relevant variables (editorial comment), 1015

Prolonged abnormalities of left ventricular diastolic wall thinning in the "stunned" myocardium in conscious dogs: time course and relations to systolic function, 1085

Radionuclide angiographic assessment of left ventricular diastolic filling in amyloid heart disease: a study of patients with familial amyloid polyneuropathy, 48

Diatrizoate meglumine

Quantitation of myocardial perfusion by contrast echocardiography: analysis of contrast gray level appearance variables and intracine variability, 200

Diatrizoate sodium

Quantitation of myocardial perfusion by contrast echocardiography: analysis of contrast gray level appearance variables and intracine variability, 200

Diet

Diet and cholesterol guidelines and coronary heart disease (editorial), 503

Digitals

Beneficial effects of long-term diiltiazem treatment in dilated cardiomyopathy, 653

Intravenous diiltiazem for termination of recent supraventricular tachycardia: a placebo-controlled, randomized, double-blind, multicenter study, 538

Treatment of reperfusion injury with intracoronary calcium channel antagonists and reduced coronary free calcium concentration in regionally ischemic, reperfused porcine hearts, 1395

Dipryridamole

Dipryridamole radionuclide ventriculography: a test with high specificity for severe coronary artery disease, 841

Effects of pharmacologic coronary hyperemia on echocardiographic left ventricular function in patients with single vessel coronary artery disease, 1042

Disopyramide

Ascent of disopyramide on arterial fibrillation in the Wolf-Parkinson-White syndrome, 1133

Combination of disopyramide and mexiletine for better tolerance and additive effects for treatment of ventricular arrhythmias, 659

Diuretics

Beneficial effects of long-term diiltiazem treatment in dilated cardiomyopathy, 653

Changing strategies in the management of heart failure (seminar), 513

Pathophysiology and current therapy of congestive heart failure (seminar), 771

Docosahexaenoic acid

Determinants of restenosis and lack of effect of dietary supplementation with eicosapentaenoic acid on the incidence of coronary artery restenosis after angioplasty, 665

Donoso, Ephraim

Ischemia—silent or manifest: does it matter? (editorial comment), 1503
Left ventricular pressure—length relation during exercise-induced ischemia, 1062
Significance of "reciprocal" ST segment depression: left ventriculographic observations during left anterior descending coronary angioplasty, 1270
Treatment of reperfusion injury with intracoronary calcium channel antagonists and reduced coronary free calcium concentration in regionally ischemic, reperfused porcine hearts, 1395

Isoproterenol
Treatment of atrioventricular node reentrant tachycardia with encaïnine: reversal of drug effect with isoproterenol, 904

Ketanserin
Hypercholesterolemia causes generalized impairment of endothelium-dependent relaxation to aggregating platelets in porcine arteries, 1402

Laser-assisted thermal angioplasty in human peripheral artery occlusions: mechanism of recanalization, 1547

Lectures
Cardiac electrophysiology: promises and contributions (plenary lecture), 1329

Letters to the editor
Color Doppler diagnosis of left ventricular pseudoaneurysm, 512
Comments regarding Dr. Ephraim Donoso, 955
Detection of amiodarone pulmonary toxicity, 261
Dilated cardiomyopathy in myotonic dystrophy, 262
Double balloon aortic valvuloplasty in children, 1216
Educational role of thrombolytic therapy, 511

Ephraim Donoso, editor, 1452
Ephraim Donoso: in memorium, 955
Exercise training after anterior Q wave myocardial infarction: importance of regional left ventricular function and topography, 1451
Inferior vena cava plethora with blunted respiratory response, 1217
Quantitative exercise thallium-201 variables versus cardiac catheterization, 263
Silent defects, 1451
Suppression of exercise-induced angina by magnesium sulfate in patients with variant angina, 956
Ventricular premature beats and sympathetic nerve activity, 1693
What is the role of vagal tone in the genesis of life-threatening ventricular tachyarrhythmias in humans?, 1694

Lipids
Demonstration of increased myocardial lipid with positron emission tomography ("myocardial stunning") by proton nuclear magnetic resonance spectroscopy, 739

Lisinopril
Angiotensin-converting enzyme inhibitors: are there significant clinical differences? (editorial comment), 1248
Short- and long-acting angiotensin-converting enzyme inhibitors: a randomized trial of lisinopril versus captopril in the treatment of congestive heart failure, 1240

Loading conditions
Hemodynamic effects of nitroglycerin in an experimental model of acute aortic regurgitation, 927
Influence of loading patterns on peak length-tension relation and on relaxation in cardiac muscle, 483
Left ventricular shape, afterload and survival in idiopathic dilated cardiomyopathy, 311
Pullation of complex cardiac anomalies with subaortic obstruction: new operative approach, 406
LYS3.857
Serotonin S2 and thromboxane A2-prostaglandin H2 receptor blockade provide protection against epinephrine-induced cyclic flow variations in severely narrowed canine coronary arteries, 755
Magnesium sulfate
Suppression of exercise-induced angina by magnesium sulfate in patients with variant angina (letter), 946

Magnetic resonance imaging
See also Nuclear magnetic resonance imaging
Mitral fibers
Scintigraphic characteristics of ventricular pre-excitation through Mahaim fibers with the use of phase analysis, 882

Mapping studies

An editor’s account of the history of the college, 5

Challenges of cardiomyopathy, 1219

Changing strategies in the management of heart failure, 513

“Crackers, breakers, stretchers, drillers, scrapers, shavers, burners, welders and melters”—the future treatment of atherosclerotic coronary artery disease? A clinical-morphologic assessment, 969

Genetics and congenital heart disease: perspectives and prospects, 1458

Growth and development of state of the art care for people with congenital heart disease, 1453

Introduction, 1

Molecular cardiology: new avenues for the diagnosis and treatment of cardiovascular disease, 265

Pathophysiology and current therapy of congestive heart failure, 771

Treatment of coronary artery disease, 957

Why celebrate?, 3

Seminar on in vitro studies of cardiac flow and their applications for clinical Doppler echocardiography

Chordal geometry determines the shape and extent of systolic anterior mitral motion: in vitro studies, 1438

Clinical significance of in vitro and in vivo experimental findings regarding Doppler flow velocity recordings, June

Doppler color flow evaluation of prosthetic mitral valves: experimental epicardial studies, 234

Doppler color flow mapping of simulated in vitro regurgitant jets: evaluation of the effects of orifice size and hemodynamic variables, 1195

Factors influencing the structure and shape of stenotic and regurgitant jets: in vitro investigation using Doppler color flow mapping and optical flow visualization, June

Fluid dynamics model of mitral valve flow: description with in vitro validation, 221

Lessons from in vitro models of small, irregular, multiple and tunnel-like stenoses relevant to clinical stenoses of valves and small vessels, 716

Pressure recovery distal to a stenosis: potential cause of gradient “overestimation” by Doppler echocardiography, 706

Spatial velocity distribution and acceleration in serial subvalve tunnel and valvular obstructions: an in vitro study using Doppler color flow mapping, 341

Serotonin

Hypercholesterolemia causes generalized impairment of endothelium-dependent relaxation to aggregating platelets in porcine arteries, 1902

Serotonin receptor antagonists

Serotonin S_{1} and thromboxane A_{2}-prostaglandin H_{2} receptor blockade provide protection against epinephrine-induced cyclic flow variations in severely narrowed canine coronary arteries, 755

SHU-454

Left heart opacification with peripheral venous injection of a new saccharide echo contrast agent in dogs, 1622

SHU-508

Left heart opacification with peripheral venous injection of a new saccharide echo contrast agent in dogs, 1622

Shunts

Coil embolization to obliterate aortopulmonary collateral vessels and shunts in patients with congenital heart disease, 100

Sodium

Alterations in serum sodium in relation to atrial natriuretic factor and other neuroendocrine variables in experimental pacing-induced heart failure, 173

Sotalol

Clinical experience with sotalol in patients with drug-refractory ventricular arrhythmias, 145

Concentration dependence of class III and beta-adrenergic blocking effects of sotalol in anesthetized dogs, 1190

SQ29,548

Serotonin S_{1} and thromboxane A_{2}-prostaglandin H_{2} receptor blockade provide protection against epinephrine-induced cyclic flow variations in severely narrowed canine coronary arteries, 755

ST segment

Significance of hyperventilation-induced ST segment depression in patients with coronary artery disease, 804

Significance of “reciprocal” ST segment depression: left ventriculographic observations during left anterior descending coronary angioplasty, 1770

ST segment shift in unstable angina: pathophysiology and association with coronary anatomy and hospital outcome, 1495

Stenosis

See also Aortic valve disease; Mitral valve disease; Restenosis

Canine model of coronary artery thrombosis with superimposed high grade stenosis for the investigation of rere thrombosis after thrombolysis, 1409

Significance of successful intravenous reperfusion therapy on regional myocardial function and geometry in humans: a tomographic assessment using two-dimensional echocardiography, 706

Multicenter trial of intravenous anisoylated plasminogen streptokinase activator complex (APSAC) in acute myocardial infarction: effects on infarct size and left ventricular function, 988

Plasminogen Activator Italian Multicenter Study (PAIMS): comparison of intravenous recombinant single-chain human tissue-type plasminogen activator (rt-PA) with intravenous streptokinase in acute myocardial infarction, 19

Quantitative radionuclide assessment of regional ventricular function after thrombolytic therapy for acute myocardial infarction: results of Phase 1 thrombolysis in Myocardial Infarction (TIMI) trial, 998

Sudden death

See also Cardiac arrest

Long-term results of amiodarone therapy in patients with recurrent sustained ventricular tachycardia or ventricular fibrillation, 442

Risk factor profiles of patients with sudden cardiac death and death from other cardiac causes: a report from the Coronary Artery Surgery Study (CASS), 524

Surgery

Aortic regurgitation: a common complication after surgery for hypertrophic obstructive cardiomyopathy, 63

Direct surgery for ventricular tachycardia: is nonguided misguided? (editorial comment), 163

Percutaneous aortic balloon valvuloplasty: its role in the management of patients with aortic stenosis requiring major noncardiac surgery, 1039

Results of operation for coexistent obstructive hypertrophic cardiomyopathy and coronary artery disease, June

Treatment of life-threatening ventricular arrhythmias with nonguided surgery
Supported by electrophysiologic testing and drug therapy. 153

Surgery. Coronary bypass

Ventricular volume
Assessment of right ventricular anatomy and function by quantitative radionuclide ventriculography, 354
Patterns of left ventricular dilation during the six months after myocardial infarction, 304
Ventricular wall motion
Assessment of right ventricular anatomy and function by quantitative radionuclide ventriculography, 354
Exercise ultrasoncomputed tomography for the detection of coronary artery disease, 1073
Left ventricular thrombus incidence and
behavior studies by serial two-dimensional echocardiography in acute anterior myocardial infarction: left ventricular wall motion, systemic embolism and oral anticoagulation. 1514

**Ventriculography, radionuclide**

Assessment of right ventricular anatomy and function by quantitative radionuclide ventriculography. 354

Dipyridamole radionuclide ventriculography: a test with high specificity for severe coronary artery disease. 841

**Verapamil**

Determinants of restenosis and lack of effect of dietary supplementation with eicosapentaenoic acid on the incidence of coronary artery restenosis after angioplasty. 665

Myocardial stunning in hypertrophic cardiomyopathy: recovery predicted by single photon emission computed tomographic thallium-201 scintigraphy. 1415

Treatment of reperfusion injury with intracoronary calcium channel antagonists and reduced coronary free calcium concentration in regionally ischemic, reperfused porcine hearts. 1395

**Warfarin**

St. Jude valve prosthesis: analysis of the clinical results in 815 implants and the need for systemic anticoagulation. 57

**Williams syndrome**

Spectrum of findings in a family with nonsyndromic autosomal dominant supravalvular aortic stenosis: a Doppler echocardiographic study. 413

**Wolff-Parkinson-White syndrome**

Acute effect of disopyramide on atrial fibrillation in the Wolff-Parkinson-White syndrome. 1133
